In consideration of the foregoing, the following corrections are made in IR-5 appearing at page 51991 of the Federal Register issued on November 18, 1982 (FR Doc. 82-31395).

1. On page 51992, the tenth line, first column, is corrected by changing the spelling of "proceding" to "proceeding".

2. On page 51992, the forty-fourth line, second column, is corrected by changing the spelling of "requirment" to "requirement".

3. On page 51994, the ninth line, first column is corrected by inserting the word "and" between "thereunder" and "are".

4. On page 51994, the forty-seventh line, first column, is corrected by changing the citation date from "1977" to "1974".

5. On page 51994, the fifty-fourth line, first column, is corrected by changing the word "material" to "materials".

6. On page 51994, the first line, third column, is corrected by changing the word "aper" to "paper".

7. On page 51994, the 27th line, third column, is corrected by changing that line to read "* * * Additional different requirements".

Issued in Washington, D.C. on December 13, 1982.

Joseph T. Horning,

Acting Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

[FR Doc. 82-34271 Filed 12-17-82; 8:45 am]

BILLING CODE 4910-60-M

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in November 1982. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
3187-X	DOT-E 3187	PPG Industries, Incorporated, Pittsburgh, PA	49 CFR 173.119(m), 173.21(b), 173.218, 173.221(a)(3)	To renew, and to authorize an additional rectangular container of high density polyethylene, overpacked in a fiberboard box. (Mode 1.)
4631-X	DOT-E 4631	Nitrochem Energy Corporation, Brwabik, MN	49 CFR 173.114a, 173.304(a)	To authorize use of non-DOT specification hopper-type tank trucks and cargo tank trailers, for shipment of a blasting agent and a nonflammable compressed gas. (Mode 1.)
4760-X	DOT-E 4760	Air Products and Chemicals, Incorporated, Allentown, PA	49 CFR 172.101, 173.315(a)	To authorize use of a non-DOT specification cargo tank for transportation of liquefied helium. (Mode 1.)
4844-X	DOT-E 4844	BAJ Vickers Ltd., Avon, England	49 CFR 173.301(i), 173.302, 173.304	To authorize the use of non-DOT specification foreign made steel cylinders for shipment of certain nonflammable gases. (Mode 1.)
5959-X	DOT-E 5959	El Paso Products Company, Odessa, TX	49 CFR 172.101, 173.315(a)	To authorize shipment of liquefied ethylene in non-DOT specification insulated cargo tanks. (Mode 1.)
6066-X	DOT-E 6066	Union Carbide Corporation, Danbury, CT	49 CFR 173.119, 173.125, 46 CFR 98.35	To authorize use of non-DOT specification portable tanks, for transportation of certain flammable and combustible liquids. (Modes 1 and 3.)
6369-X	DOT-E 6369	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 172.101, 173.346(a)(10), 173.347(a)(2), 173.352(a)(4), 173.374(a).	To authorize use of DOT specification 105A400W, 112A400W, 114A400W, 120A300W, and proposed 120A400W tank car tanks, for transportation of certain class B poisonous liquids. (Mode 2.)
6392-X	DOT-E 6392	El Paso Products Company, Odessa, TX	49 CFR 172.101, 173.314(c)	To authorize use of non-DOT specification vacuum insulated tank car tanks for transportation of a liquefied flammable compressed gas. (Mode 2.)
6434-P	DOT-E 6434	Rhone-Poulenc Inc., Monmouth Junction, NJ	49 CFR 173.377(i)(1)	To become a party to Exemption 6434. (Modes 1 and 2.)
6589-P	DOT-E 6589	Life Support Products, Inc., Anaheim, CA	49 CFR 173.302(a)(1), 175.3	To become a party to Exemption 6589. (Modes 1, 2, 4, and 5.)
6607-X	DOT-E 6607	Bio-Lab, Incorporated, Conyyers, GA	49 CFR 173.217(a)	To authorize a preformed expanded polystyrene molding, or thermoformed polyvinyl chloride tray, as inner packaging, overpacked in a fiberboard box, for transportation of a certain oxidizing material. (Modes 1, 2, and 3.)
6614-X	DOT-E 6614	Hasa Chemicals, Incorporated, Saugus, CA	49 CFR 173.263(a)(28), 173.277(a)(6)	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corrosive liquids. (Mode 1.)
6629-X	DOT-E 6629	The Boeing Company, Seattle, WA	49 CFR 173.304(a)(1), 173.305(c), 175.3	To authorize use of a modified DOT Specification 4B cylinder, for transportation of certain gases or mixture of gases or a nonhazardous material and a gas. (Modes 1, 4, and 5.)
6695-X	DOT-E 6695	Produits Chimiques Ugine Kuhlmann, Paris, France	49 CFR 173.315	To authorize use of a non-DOT specification IMO Type 5 portable tank, for transportation of certain nonflammable compressed gases. (Modes 1, 2, and 3.)
6802-X	DOT-E 6802	Welders Gas & Supply, Sioux Falls, SD	49 CFR 173.315(a)	To authorize transport of liquefied argon, nitrogen and oxygen in non-DOT specification truck mountable cargo tanks. (Mode 1.)
6802-X	DOT-E 6802	Harvey Company, Greensburg, PA	49 CFR 173.315(a)	To authorize transport of liquefied argon, nitrogen and oxygen in non-DOT specification truck mountable cargo tanks. (Mode 1.)
6824-P	DOT-E 6824	All Pure Chemical Company, Incorporated, Tracy, CA	49 CFR 173.217(a)	To become a party to Exemption 6824. (Modes 1, 2, and 3.)
6824-P	DOT-E 6824	Hasa Chemicals, Incorporated, Saugus, CA	49 CFR 173.217(a)	To become a party to Exemption 6824. (Modes 1, 2, and 3.)
6824-P	DOT-E 6824	Alstar Company, Saugus, CA	49 CFR 173.217(a)	To become a party to Exemption 6824. (Modes 1, 2, and 3.)
6932-X	DOT-E 6932	Compagnie des Containers Reservons, Paris, France	49 CFR 173.264(b)(4)	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of anhydrous hydrofluoric acid. (Modes 1 and 3.)
6932-X	DOT-E 6932	Fauvet-Girel, Paris, France	49 CFR 173.264(b)(4)	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of anhydrous hydrofluoric acid. (Modes 1 and 3.)
6932-X	DOT-E 6932	Eurotainer, Paris, France	49 CFR 173.264(b)(4)	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of anhydrous hydrofluoric acid. (Modes 1 and 3.)
6932-X	DOT-E 6932	Produits Chimiques Ugine Kuhlmann, Paris, France	49 CFR 173.264(b)(4)	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of anhydrous hydrofluoric acid. (Modes 1 and 3.)
6949-X	DOT-E 6949	FMC Corporation, Philadelphia, PA	49 CFR 173.190(b)(4)	To authorize use of marine portable tanks, for transportation of certain flammable solids. (Modes 1, 2, and 3.)
6971-X	DOT-E 6971	PolyScience Corporation, Niles, IL	49 CFR Parts 100-199	To authorize transport of small quantities of reagent chemicals in inside glass bottles packed in metal boxes, overpacked in a strong wooden or fiberboard box. (Modes 1, 2, 3, 4, and 5.)
6984-X	DOT-E 6984	Ireco Chemicals, Salt Lake City, UT	49 CFR 173.103(a), 173.66(g), 177.835(g)(2)(i)	To authorize packaging of 1000 or less electric blasting caps in inside pasteboard cartons or tubes, overpacked in an IME Standard 22 container. (Mode 1.)
6984-P	DOT-E 6984	Angus Chemical Company, Northbrook, IL	49 CFR 173.103(a), 173.66(g), 177.835(g)(2)(i)	To become a party to Exemption 6984. (Mode 1.)
7013-X	DOT-E 7013	Airco Welding Products, Murray Hill, NJ	49 CFR 173.315(a)(1)	To authorize use of a non-DOT specification cargo tank, for transportation of a flammable compressed gas. (Mode 1.)
7046-X	DOT-E 7046	J. T. Baker Chemical Company, Phillipsburg, NJ	49 CFR 173.269, 178.340-5(c)	To authorize use of modified DOT Specification MC-312 glass lined cargo tanks, for transportation of certain corrosive liquids and a certain oxidizer. (Modes 1 and 3.)
7052-P	DOT-E 7052	National Center for Atmospheric Research, Palestine, TX	49 CFR 172.101, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, and 4.)
7096-X	DOT-E 7096	Fike Metal Products Corporation, Blue Springs, MO	49 CFR 173.304(a)(1), 178.55	To authorize shipment of bromotrifluoromethane (Freon 1301) in non-DOT specification cylinders. (Modes 1, 2, and 3.)
7220-X	DOT-E 7220	Gnef Brothers Corporation, Springfield, MI	49 CFR Part 173, Subart D, E, F, and H	To authorize manufacture, marking and sale of non-DOT specification reusable, blow-molded, polyethylene containers, for shipment of certain corrosive, flammable liquids, oxidizers and Class B poisonous liquids. (Modes 1, 2, and 3.)
7285-X	DOT-E 7285	Produits Chimiques Ugine Kuhlmann, Paris, France	49 CFR 173.315(a)	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of certain nonflammable, liquefied gases. (Modes 1, 2, and 3.)
7546-X	DOT-E 7546	Grumman Aerospace Corporation, Bethpage, NY	49 CFR 173.119, 173.302(a)(1), 173.304(a), 173.305(a), 173.34(d), 175.3.	To authorize use of a heat pipe radiator assembly for shipment of certain flammable liquids and nonflammable and flammable compressed gases. (Modes 1 and 3.)
7632-X	DOT-E 7632	Enterprise Service Company, Houston, TX	49 CFR 173.315(a)(1), 173.315(c)(1)	To authorize use of an insulated DOT Specification MC-331 cargo tank, for transportation of a liquefied gas mixtures. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
7650-X	DOT-E 7650	ICI Americas, Incorporated, Wilmington, DE.	49 CFR 173.315	To authorize use of non-DOT specification vacuum insulated steel portable tanks for shipment of certain nonflammable compressed gases. (Modes 1 and 3.)
7677-X	DOT-E 7677	San Diego Gas & Electric Company, San Diego, CA.	49 CFR 172.101, 173.315(a)	To authorize shipment of liquefied natural gas (methane) in non-DOT specification vacuum insulated truck mounted portable tanks. (Mode 1.)
7778-X	DOT-E 7778	Schenley Distillers, Inc. New York, NY	49 CFR 172.400(a) Part 107 Subpart B, Subchapter B, App. B.	To authorize barrels of distilled spirits to be transported without being labeled or having the exemption number marked on the barrel or shipping paper. (Modes 1 and 2.)
7809-X	DOT-E 7809	Whitmire Research Laboratories, Inc., St. Louis, MO.	49 CFR 173.304, 173.34(d), 175.3	To authorize shipment of insecticides in DOT Specification 39 cylinders equipped with a pressure relief device. (Modes 1, 2, 3, and 4.)
7940-X	DOT-E 7940	Centennial Plastics Co., Inc., Camden, NJ	49 CFR 178.19, Part 173, Subparts D, F	To authorize manufacture, marking and sale of non-DOT specification reusable, rotationally molded polyethylene container, for transportation of corrosive and flammable liquids. (Modes 1, 2, and 3.)
8047-P	DOT-E 8047	GCS Container Service SA, Paris, France	49 CFR Part 173, Subparts D, F, Subpart H, J, Subpart K.	To become a party to Exemption 8047. (Modes 1, 2, and 3.)
8053-X	DOT-E 8053	Eastman Kodak Company, Rochester, NY.	49 CFR 173.148(a), 175.3	To authorize shipment of monoethylamine in inside glass bottles-metal cans, overpacked in DOT Specification 12B fiberboard boxes. (Modes 1, 2, and 4.)
8063-X	DOT-E 8063	Union Carbide Corporation, Danbury, Ct	49 CFR 173.304(a)	To authorize use of a vacuum insulated DOT Specification 4L welded cylinder, for transportation of certain nonflammable gases. (Mode 1.)
8067-X	DOT-E 8067	Container Corporation of America, Wilmington, DE.	49 CFR 173.272(g)	To authorize use of a 15-gallon capacity DOT Specification 34 container, for transportation of 95% to 98% sulfuric acid. (Modes 1, 2, and 3.)
8079-X	DOT-E 8079	Container Corporation of America, Wilmington, DE.	49 CFR 178.35a-1	To authorize manufacture, marking and sale of DOT Specification 2SL inside polyethylene containers using a higher density, higher melt index resin, for shipment of those materials authorized in a DOT Specification 2SL. (Modes 1, 2, and 3.)
8080-X	DOT-E 8080	Allied Corporation, Morristown, NJ	49 CFR 173.164	To authorize transport of dry chromic acid in a DOT Specification 105A300W tank car which has been converted to DOT Specification 111A100W. (Mode 2.)
8084-X	DOT-E 8084	Ireco Chemicals, Salt Lake City, UT	49 CFR 173.65(a)(5)	To authorize transport of Class A explosives containing more than 5% of moisture in plastic tubes overpacked in DOT Specification wooden or fiberboard boxes. (Mode 1.)
8111-X	DOT-E 8111	U.S. Department of Energy, Washington, DC.	49 CFR 173.304(a)	To authorize use of non-DOT specification welded, stainless steel cylinders for transportation of a nonflammable gas mixture. (Modes 1, 2, 3, 4, and 5.)
8125-X	DOT-E 8125	Compagnie des Containers Reservoirs, Paris, France.	49 CFR 173.123, 173.315	To authorize use of non-DOT specification portable tanks, for transportation of certain flammable and nonflammable gases and flammable liquids. (Modes 1, 2, and 3.)
8125-X	DOT-E 8125	Fauvet-Girel, Paris, France	49 CFR 173.123, 173.315	To authorize use of non-DOT specification portable tanks, for transportation of certain flammable and nonflammable gases and flammable liquids. (Modes 1, 2, and 3.)
8129-P	DOT-E 8129	Rollins Environmental Services (LA), Inc., Baton Rouge, LA.	49 CFR, 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to Exemption 8129. (Mode 1.)
8129-P	DOT-E 8129	Ecoflo, Inc., Bladensburg, MD	49 CFR, 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to Exemption 8129. (Mode 1.)
8129-P	DOT-E 8129	FMC Corporation, Princeton, NJ	49 CFR, 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to Exemption 8129. (Mode 1.)
8141-X	DOT-E 8141	GTE Products Corporation, Waltham, MA	49 CFR 172.101, 173.206, 173.247	To authorize transport of individual cells and modules consisting of three cells containing lithium metal and thionyl chloride in non-DOT specification wooden boxes. (Mode 1.)
8144-X	DOT-E 8144	ICI Americas Inc., Wilmington, DE	49 CFR 173.133, 175.3, 176.3	To authorize cargo vessel and cargo-only aircraft as additional mode of transportation. (Modes 1, 3, and 4.)
8217-P	DOT-E 8217	GCS Container Service SA, New York	49 CFR F, H, J, and K, Part 173, Subpart D.	To become a party to Exemption 8217. (Modes 1, 2, and 3.)
8225-X	DOT-E 8225	Hoover Universal, Inc., Beatrice, NB	49 CFR 173.119, 173.266, Part 173, Subpart F.	To authorize cargo vessel as an additional mode of transportation and to add various flammable liquids and additional commodities. (Modes 1, 2, and 3.)
8360-X	DOT-E 8360	Grayco Specialist Tank Manufacturing, Fort Worth, TX.	49 CFR 173.119 (a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5 178,343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC-307 or MC-312 with certain exceptions, for transportation of certain hazardous materials. (Modes 1.)
8390-P	DOT-E 8390	Micro Image, Inc., Orange, CT	49 CFR 173.272, 178.210, 178.24a	To become a party to Exemption 8390. (Modes 1.)
8390-P	DOT-E 8390	J. T. Baker Chemical Co., Phillipsburg, NJ	49 CFR 173.272, 178.210, 178.24a	To become a party to Exemption 8390. (Modes 1.)
8441-P	DOT-E 8441	EG&G Environmental Equipment Div., Sea-Link System, Herndon, VA.	49 CFR 172.101	To become a party to Exemption 8441. (Modes 1.)
8441-P	DOT-E 8441	National Center for Atomospheric Research, Palestine, TX.	49 CFR 173.101	To become a party to Exemption 8441. (Modes 1.)
8467-X	DOT-E 8467	Societe Auxiliaire de Transports et d'Industries, Paris, France.	49 CFR 173.315	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of nonflammable gases. (Modes 1, 2, 3.)
8467-X	DOT-E 8467	ANF-Industrie, Paris, France	49 CFR 173.315	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of nonflammable gases. (Modes 1, 2, and 3.)
8472-X	DOT-E 8472	Ohmart Corporation, Cincinnati, OH	49 CFR 173.302, 175.3	To authorize use of non-DOT specification, meta., single trip, inside container, for shipment of a nonflammable gas. (Modes 1, 2, 3, 4, and 5.)
8477-X	DOT-E 8477	Mobay Chemical Corporation, Pittsburgh, PA.	49 CFR 173.247(a)	To authorize use of a noninsulated DOT Specification 111A100W6 tank car tanks, for shipment of thionyl chloride. (Modes 2.)
8489-X	DOT-E 8489	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.154, 173,182, 173.245b	To authorize shipment of certain oxidizers and corrosive materials in a non-DOT specification collapsible polyethylene-lined, woven polypropylene bag, and a disposable bulk container, (Modes 1. and 3.)
8489-X	DOT-E 8489	FMC Corporation, Philadelphia, PA	49 CFR 173.154, 173.182, 173.245b	To authorize shipment of certain oxidizers and corrosive materials in a non-DOT specification collapsible polyethylene-lined, woven polypropylene bag, and a disposable bulk container. (Modes 1, and 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8489-X	DOT-E 8489	Degussa Corporation, Teterboro, NJ	49 CFR 173.154, 173.182, 173.245b	To authorize shipment of certain oxidizers and corrosive materials in a non-DOT specification collapsible polyethylene-lined, woven polypropylene bag, and a disposable bulk container. (Modes 1, and 3.)
8490-P	DOT-E 8490	Union Carbide Corporation, Danbury, CT	49 CFR 173.245(a)(31)	To become a party to Exemption 8490. (Mode 1.)
8506-X	DOT-E 8506	Dow Chemical Company, Midland, MI	49 CFR 178.192-2(c), Part 173 Subpart D, Subpart E, F, H.	To authorize use of a DOT Specification 6D cylindrical steel overpack constructed with two holes below the top chime, for shipment of those materials presently authorized in a DOT Specification 6D. (Mode 1, 2, and 3.)
8531-X	DOT-E 8531	Monsanto Company, St. Louis, MO	49 CFR 172.101, 172.406, 172.504, 173.114@.	To authorize shipment of nitro carbo nitrate in prescribed DOT Specification bags labeled oxidizer, after December 31, 1980, in order to utilize the existing inventory. (Mode 1.)
8572-X	DOT-E 8572	AMEX, Inc., Hayden Lake, ID	49 CFR 172.101, 172.406, 172.504, 173.114a.	To authorize shipment of a limited number of packages of nitrocarbonitrate, after December 31, 1980, bearing the oxidizer label. (Mode 1.)
8655-P	DOT-E 8655	International Silver Company, Meriden, CT.	49 CFR 173.352(a)(1)	To become a party to Exemption 8655. (Mode 1.)
8691-X	DOT-E 8691	Aluminum Company of America, Palestine, TX.	49 CFR 173.338	To authorize a PVC coated polyester bag, not to exceed 110 pounds as additional container for shipment of aluminum chloride contaminated with phosgene, corrosive solid. (Modes 1, 2, and 3.)
8791-P	DOT-E 8791	Stauffer Chemical Company, Westport, CT.	49 CFR 173.245a, 178.245-1	To become a party to Exemption 8791 (Modes 1, 2, and 3.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8845-N	DOT-E 8845	Pengo Industries, Inc., Fort Worth, TX	49 CFR 173.110(c)(1), 173.80(b), 173.80(c).	To authorize transport of charged oil well jet perforating guns with detonators attached. (Modes 1 and 3.)
8851-N	DOT-E 8851	Process Engineering Inc., Plaistow, NH	49 CFR 173.315	To authorize manufacture, marking and sale of non-DOT specification vacuum insulated portable tanks, for transportation of non-flammable gases. (Modes 1 and 3.)
8862-N	DOT-E 8862	ABERCO Inc., Seabrook, MD	49 CFR 173.119, 173.306	To authorize authorize shipment of propylene oxide, classed as a flammable liquid, in DOT Specification 5P lagged steel drums. (Mode 1.)
8867-N	DOT-E 8867	3M Company, St. Paul, MN	49 CFR 173.119(k), 173.3	To authorize shipment of a certain viscous flammable liquid, n.o.s. in a polyvinyl chloride bottle, overpacked six to a DOT Specification 12B fiberboard box. (Modes 1, 2, and 4.)
8869-N	DOT-E 8869	Air Exec, Inc., Fort Madison, IA	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of certain Class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (Mode 4.)
8870-N	DOT-E 8870	Hach Company, Ames, IA	49 CFR 172.101, 173.286, 175.3	To comingle compatible hazardous materials of various classifications packed in separate inside receptacles not exceeding 8 fluid ounces or 1¼ lb. packed inside a strong outside container, labeled according to the highest order of hazard, and described as chemical kit. (Modes 1, 2, 4, and 5.)
8878-N	DOT-E 8878	Corning Glass Works, Corning, NY	49 CFR 173.245	To authorize shipment of germanium tetrachloride, corrosive liquid, n.o.s., in glass containers of less than 3 gallon capacity, surrounded by vermiculite placed in a cylindrical steel overpack, packed six to a compartmented wooded box. (Mode 1.)
8886-N	DOT-E 8886	Amerex Corporation, Trussville, AL	49 CFR 173.34(e)(9)	To authorize a longer time period between retests of DOT Specification 4B or 4B240ET cylinders containing nonflammable gas. (Modes 1, 2, and 4.)
8891-N	DOT-E 8891	BIC Corporation, Milford, CT	49 CFR 173.21, 173.308	To authorize not more than two cigarette lighters containing flammable gas to be packed in the same inner container, overpacked in corrugated fiberboard boxes. (Modes 1 and 2.)
8899-N	DOT-E 8899	DIA, Inc., d/b/a Dauphin Island Airways, Mobile, AL	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of certain Class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (Mode 4.)
8908-N	DOT-E 8908	Diamond Shamrock Corporation, Irving, TX	49 CFR 173.164	To authorize shipment of dry chromic acid, in non-DOT specification collapsible polyethylene-lined, woven polypropylene bags. (Mode 1.)
8911-N	DOT-E 8911	Olin Corporation, East Alton, IL	49 CFR 173.101	To authorize shipment of scrap, guillotined small arms ammunition loosely packed in non-DOT specification, nonreusable, closed-top wooden crates in truck load lots to an incinerator for disposal. (Mode 1.)
8928-N	DOT-E 8928	Aluminum Company of America, Lafayette, IN.	49 CFR 173.245b(a)	To authorize a one-time shipment of a corrosive solid waste material in a non-DOT specification open top tank. (Mode 1.)
8931-N	DOT-E 8931	CIL Industries, Toronto, Canada	49 CFR 173.272, 179.201-1	To authorize shipment of sulfuric acid, classed as a corrosive material in DOT Specification 111A100W2 tank cars equipped with bottom outlets. (Mode 2.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 5186-X	DOT-E 5186	Liquid Carbonic Corporation, Chicago, IL	49 CFR 172.101, 173.315(a)	To authorize shipment of a flammable liquefied compressed gas in a non-DOT specification perlite-vacuum insulated cargo tank. (Mode 1.)
EE 8849-X	DOT-E 8849	Global International Airways, Kansas City, MO.	49 CFR 172.101 Column 8(b).	To authorize air transport of rocket ammunition with explosive projectile, Class A explosive that is packed, marked, labeled and loaded in accordance with DOD procedures and requirements. (Mode 4.)

WITHDRAWALS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
3941-X	Pacific Engineering & Production Company of Nevada, Henderson, NV.	49 CFR 173.239a(a)(2)	To authorize transport of ammonium perchlorate in non-DOT specification aluminum portable tanks. (Modes 1 and 2.)
8635-N	Georgia-Pacific Corporation, Atlanta, GA	49 CFR 172.302(b)	To authorize use of shipping papers which list the quantity ordered and product number before the proper shipping name. (Modes 1 and 2.)

Denials

8271-X Request by John Brown Engineers and Constructors Ltd., Hampshire, England to reconsider denial of their request to authorize shipment of a pyrophoric solid dispersed in a flammable liquid in a non-DOT specification portable tank comparable to DOT specification 51 denied November 23, 1982.
8905-N Request by Eurotainer S.A., Paris, France to authorize use of non-DOT specification IMO Type 5 portable tanks for the transportation of pyroforic liquids and those flammable liquids allowed to be shipped in DOT Specification IM 101 portable tank denied November 3, 1982.

NOTE.—Inadvertently omitted from the 47 FR 223 publication of Exemptions issued during October 1982 are the following:

8271-X Request by John Brown Engineers and Constructors Ltd., Hampshire, England to authorize shipment of a pyrophoric solid dispersed in a flammable liquid in a non-DOT specification portable tank comparable to DOT Specification 51 denied October 14, 1982.
8909-N Request by Johnson Controls, Inc., Milwaukee, WI to authorize use of shipping papers which deviate from the proper format required for the description of hazardous materials being shipped denied October 1, 1982.
8922-N Request by PepsiCo., Inc., Purchase, NY to ship as essentially nonregulated a flammable liquid consisting of citrus oil and approximately 65% food grade ethanol in four one-gallon jars packed in a DOT Specification 12A80 fiberboard box denied October 4, 1982 as being unnecessary.

Issued in Washington, D.C., on December 8, 1982.

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted To OMB for Review

During the period December 3 through December 9, 1982, the Department of the Treasury submitted the following public information collection requirements to OMB, for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of these submissions may be obtained from the Treasury Department Clearance Officer, by calling (202) 634-2179. Comments regarding these information collections should be addressed to the Treasury Reports Management Officer, Information Resources Management Division, Room 309, 1625 I St. NW., Washington, D.C. 20220; *and* to the OMB reviewer listed at the end of entry.

Date Submitted: December 3, 1982.
Submitting Bureau: Internal Revenue Service.
OMB Number: 1545-0654.
Form Number: 4752.
Type of Submission: Revision.
Title: Questionnaire—Head of Household.
Purpose: Form 4752—Questionnaire, Head of Household was developed to assist in determining whether or not an individual who claimed this filing status was eligible to claim it and its more favorable tax rate. This information is requested in connection with an examination of the return.
OMB Reviewer: Michael Abrahams, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

* * * * *

Date Submitted: December 3, 1982.
Submitting Bureau: Internal Revenue Service.
OMB Number: 1545-0029.
Form Number: 941, 941E, 941PR and 941SS.
Type of Submission: Revision.
Title: Quarterly Federal Tax Return; Quarterly Return of Withheld Federal Income Tax.
Purpose: Form 941 is used by employers to report payments made to employees subject to income and FICA taxes and the amounts of these taxes. Form 941E is used primarily by State and local governments to report withheld income taxes only. Form 941PR is used by employers in Puerto Rico to report FICA taxes only and Form 941SS is used by employers in the U.S. possessions to report FICA taxes only. The data is used primarily to verify that the correct taxes have been paid.
OMB Reviewer: Michael Abrahams, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

* * * * *

Date Submitted: December 8, 1982.
Submitting Bureau: Internal Revenue Service.
OMB Number: 1545-0128.
Form Number: 1120L.
Type of Submission: Revision.
Title: U.S. Life Insurance Company Income Tax Return.
Purpose: Life insurance companies are required to file an annual return of income and compute and pay any tax due. The data is used to ensure that companies have correctly reported taxable income and paid the correct tax.
OMB Reviewer: Michael Abrahams, (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.
Date Submitted: December 8, 1982.
Submitting Bureau: Internal Revenue Service.
OMB Number: 1545-0197.
Form Number: 5300 and 5301.
Type of Submission: Revision.
Title: Application for Determination for Defined Benefit Plan and Application for Determination for Defined Contribution Plan.
Purpose: IRS needs certain information on the finances and operation of employee benefit plans set up by employers. The IRS uses Forms 5300 and 5301 to obtain the information needed to determine whether the plans qualify under section 401(a) of the Code and the applicable parts of ERISA as approved employee benefit plans. It also uses the information to determine tax exempt status of the related trust under section 501(a) of the Code.
OMB Reviewer: Michael Abrahams (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated Submitted: December 8, 1982.
Submitting Bureau: Alcohol, Tobacco and Firearms.
OMB Number: 1512-0036.
Form Number: ATF F 5020.20.
Type of Submission: Extension.
Title: Form Letter Personnel Inquiry RE: Applicant for Federal Permit.
Purpose: Form is used to check references given by an applicant or an individual connected with an application for a Federal license or permit. The information asked of a reference is the following (length of association, character, integrity, business responsibility and general

reputation for conforming with laws and regulations) about the individual. The form provides evidence as to whether license or permit should be issued.

OMB Reviewer: Arnold Strasser (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20508.

* * * * *

Date Submitted: December 8, 1982.

Submitting Bureau: Internal Revenue Service.

OMB Number: 1545–0023.

Form Number: 720.

Type of Submission: Revision.

Title: Quarterly Federal Excise Tax Return.

Purpose: Form 720 is used to report excise taxes due from retailers and manufacturers on the sale or manufacture of various articles, to report taxes on oil, etc.). It enables IRS to monitor excise tax liability for various categories on a single form and to collect the tax quarterly in compliance with the law and regulations (IRC section 6011).

OMB Reviewer: Michael Abrahams (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

* * * * *

Date Submitted: December 8, 1982.

Submitting Bureau: Alcohol, Tobacco and Firearms.

OMB Number: 1512–0118.

Form Number: ATF F 2148.

Type of Submission: Extension.

Title: Bond-Drawback of Tax on Cigars, Cigarettes, or Cigarette Papers or Tubes.

Purpose: The bond is necessary to secure payment for tobacco articles on which drawback (refund on tariff or other tax) has been claimed and paid. The bond will secure payment in the event that a claim was not lawfully refunded. The bond describes the particular conditions under which the surety company and drawback claimant adhere to a description of what the bond covers.

OMB Reviewer: Arnold Strasser (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Date Submitted: December 8, 1982.

Submitting Bureau: Internal Revenue Service.

OMB Number: 1545–0334.

Form Number: 6450.

Type of Submission: Revision.

Title: Questionnaire to Determine Exemption from Withholding.

Purpose: Form 6450 is used in conjunction with letter 1407(Sc/Do) in contacting employees claiming exemption from withholding when there is no record of a prior year tax return being filed or the prior year tax return showed no tax liability.

OMB Reviewer: Michael Abrahams, (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

BILLING CODE 4810–25–M

Fiscal Service

[Dept. Circ. 570, 1982 Rev., Supp. No. 11]

Voyager Casualty Insurance Co.; Surety Companies Acceptable on Federal Bonds; Termination of Authority

Notice is hereby given that the certificate of authority issued by the Treasury to Voyager Casualty Insurance Company, Jacksonville, Florida, under Sections 9304 to 9308 of Title 31 of the United States Code (formerly 6 U.S.C. 6–13), to qualify as an acceptable surety on federal bonds is hereby terminated, effective today.

The company was last listed as an acceptable surety on federal bonds at 47 FR 28884, July 1, 1982.

With respect to any bonds currently in force with Voyager Casualty Insurance Company, bond approving officers of the Government should secure new bonds with acceptable sureties in those instances where a significant amount of liability remains outstanding.

Questions concerning this termination notice may be directed to the Operations Staff (Surety), Banking and Cash Management, Bureau of Government Financial Operations, Department of the Treasury, Washington, DC 20226, Telephone (202) 634–5752.

Dated: November 12, 1982.

W. E. Douglas,

Commissioner, Bureau of Government Financial Operations.

BILLING CODE 4810–25–M

Office of the Secretary

[Dept. Cir. Public Debt Series—No. 36–82]

Treasury Bonds of 2003; Interest Rate

December 15, 1982.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $3,000,000,000 of the United States securities, designated Treasury Bonds of 2003 (CUSIP No. 912810 DC 9). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

Description of Securities

2.1. The securities will be dated January 4, 1983, and will bear interest from that date, payable on a semiannual basis on August 15, 1983 and each subsequent 6 months on February 15 and August 15 until the principal becomes payable. They will mature February 15, 2003, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in

denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Wednesday, December 22, 1982. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, December 21, 1982, and received no later than Tuesday, January 4, 1983.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 95.000. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Tuesday, January 4, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, December 31, 1982. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the

securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4 Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Gerald Murphy,

Acting Fiscal Assistant Secretary.

[FR Doc. 82-34554 Filed 12-16-82; 3:28 pm]

BILLING CODE 4810-40-M

[Dept. Cir., Public Debt Series—No. 35-82]

Treasury Notes; Series C-1990

December 15, 1982.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $4,500,000,000 of United States securities, designated Treasury Notes of January 15, 1990, Series C-1990 (CUSIP No. 912827 PA 4). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorties.

2. Description of Securities

2.1. The securities will be dated January 4, 1983, and will bear interest from that date, payable on a semiannual basis on July 15, 1983, and each subsequent 6 months on January 15 and July 15 until the principal becomes payable. They will mature January 15, 1990, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard Time, Tuesday, December 21, 1982. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, December 20, 1982, and received no later than Tuesday, January 4, 1983.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results

in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.250. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securitites specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Tuesday, January 4, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury, in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, December 31, 1982. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Gerald Murphy,

Acting Fiscal Assistant Secretary.

UNITED STATES INFORMATION AGENCY

United States Advisory Commission on Public Diplomacy

A meeting of the U.S. Advisory Commission on Public Diplomacy will be held on December 21, 1982 from 9:30 AM to 12:00, and from 1:30 PM to 3:30 PM in Room 600, 1750 Pennsylvania Avenue, NW., Washington, D.C. In the morning, the Commission will discuss USIA's personnel policies and programs; in the afternoon, there will be a discussion of Latin American issues.

Since space is limited, please call Elizabeth Fahl, (202) 724-9244, if you are interested in attending the meeting.

Mary Jane Winnett,

Management Analyst, Management Analysis/Regulations Staff, Bureau of Management, United States Information Agency.

FEDERAL COMMUNICATIONS COMMISSION

FCC To Hold a Closed Commission Meeting, Wednesday, December 22, 1982

December 15, 1982.

The Federal Communications Commission will hold a Closed Meeting on the subjects listed below on Wednesday, December 22, 1982 following the Open Meeting which is scheduled to commence at 9:30 a.m. in Room 856, at 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

Hearing—1—Motions for approval of settlement agreement, related motions to enlarge issues and other pleadings in the Jacksboro-Bridgeport, Texas (Docket Nos. 21333–34); Mineral Wells, Texas (CC Docket Nos. 81–90/91); Jacksboro-Agnes, Texas (CC Docket Nos. 81–68/69); Graham-Jacksonboro, Texas (CC Docket Nos. 81–84/87); and Bridgeport, Texas (CC Docket Nos. 81–423/424).

This item is closed to the public because it concerns Adjudicatory Matters (See 47 CFR 0.603 (j)).

The following persons are expected to attend:

Commissioners and their Assistants
Managing Director and members of his staff
General Counsel and members of his staff
Chief, Office of Public Affairs and members of his staff

Action by the Commission:

Hearing Item 1, December 14, 1982. Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera, and Sharp voting to consider this item in Closed Session.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

Issued: December 15, 1982.

William J. Tricarico,

Secretary, Federal Communications Commission.

2

FEDERAL COMMUNICATIONS COMMISSION

FCC To Hold Open Commission Meeting, Wednesday, December 22, 1982.

December 15, 1982.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Wednesday, December 22, 1982, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

General—1—*Title:* Petition for Rule Making and Petition for Waiver filed by the Senstar Security Systems Corporation. *Summary:* The Commission considers a petition for rule making requesting amendment of Part 15, Subpart F to provide for operation of field disturbance sensors in the band 40.66–40.70 MHz and a petition for waiver requesting Commission authorization for operation of the Senstar Perimeter Protection System (i.e., field disturbance sensor) in the bank 40.66–40.70 MHz pending the outcome of the rule making proceeding in this matter.

General—2—*Title:* Notice of Proposed Rulemaking to allocate spectrum for the establishment of a nationwide public air-ground telephone system. *Summary:* The Commission will consider the merits of RM–3524, filed by Airfone, Inc. and RM–3885, filed by Aeronautical Radio, Inc. Each petitioner has requested the allocation of spectrum in the 900 MHz region to establish a nationwide public air-ground telephone system.

Private Radio—1—*Title:* Rulemaking proceeding to implement changes in frequencies, operating procedures, technical standards and other criteria relating to the use of radiotelegraphy in the Maritime Mobile Service. *Summary:* The FCC will consider whether to adopt a Memorandum Opinion and order (Doc. No. 20813) responding to various requests for Reconsideration in regard to rule sections adopted in the Report and Order (FCC 77–380; 42 FR 30999) released June 10, 1977.

Private Radio—2—*Title:* Licensing and availability of narrow-band direct-printing (NB–DP) radio teletypewriter frequencies. *Summary:* The Commission will consider whether to adopt a Notice of Proposed Rule Making to amend its rules effecting assignment of NB–DP frequencies.

Common Carrier—1—*Title:* Modification of Depreciation Rates for Eighteen Domestic Telephone Companies. *Summary:* The Commission has under consideration revised depreciation rates using the straight line equal life group (SLELG) method for eleven Bell operating telephone companies, six GTE affiliates and one Continental affiliate. The proposed SLELG rates are based upon life and net salvage studies prepared by the companies and reviewed by the staffs of the respective state commissions and the FCC in 1980 and 1981. These SLELG rates are primarily for new additions to the central office equipment accounts. The SLELG method was permitted by the Commission in Docket No. 20188, 83 FCC 2d 267 (1980).

Common Carrier—2—*Title:* Petition for Reconsideration of GTE Satellite Corporation 90 FCC 2d 1009 (1982). *Summary:* The Commission will consider the petition of United States Satellite Broadcasting Company, Inc. requesting rescission of the grant, or in the alternative, conditioning the grant by prohibiting the offering of television service to individual residences.

Common Carrier—3—*Title:* Third Report and Order in the Matter of MTS–WATS Market Structure—Phase I, Docket No. 78–72. *Summary:* Telephone companies now receive compensation for providing access to their local network to complete interstate services through an uncoordinated system. They receive the revenue either directly or through the settlements or division of revenues procedures. The Commission will consider whether to adopt an order prescribing rules for computing access charges to replace these existing procedures.

Common Carrier—4—*Title:* American Telephone and Telegraph Company. *Summary:* The Commission will consider two petitions for waiver of section 64.702 of the rules to permit the Bell Operating Companies and other local telephone companies to provide customer premises equipment for disabled persons under tariff.

Common Carrier—5—*Title:* Petition for Reconsideration in Docket No. 79–105, Petition for Declaratory Ruling of General Telephone Co. of Ohio. *Summary:* The Commission will consider the effect of its depreciation rate prescriptions on the ability of state commissions to prescribe inconsistent depreciation rates.

Mass Media—Video—1—"Petition for Special Relief" (CSR–2191X) filed September 13, 1982, by Whitcom Investment Company. Whitcom Investment Company, the corporate parent of State Cable TV Corporation, requests a waiver of Section 76.501(a)(1) of the Commission's Rules to allow Mr. William S. Paley to become a partner in Whitcom.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

Issued: December 15, 1982.

William J. Tricarico,

Secretary, Federal Communications Commission.

Part II

Department of Transportation

Coast Guard

Tank Vessels Carrying Oil In Bulk; Cargo Monitors

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 157

[CGD 76-088b]

Tank Vessels Carrying Oil in Bulk; Cargo Monitors

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: In the **Federal Register** of June 27, 1977, the Coast Guard proposed rules concerning the installation and use of cargo monitors on board tank vessels of 150 gross tons and over. The proposal applies both to U.S. seagoing vessels and to foreign vessels that call at U.S. ports. Several comments were received and the rules have been revised to incorporate commenters' recommendations to the extent possible. The proposal has also been revised to include certain requirements in the Protocol of 1978 Relating to the International Convention for the Prevention of Pollution from Ships, 1973. This notice contains the complete text of the revised proposal. The intended purpose of the proposed rules is to reduce oil pollution in operational discharges from tank vessels.

DATE: Comments on this proposal must be received on or before March 21, 1983.

ADDRESSES: (a) Comments should be mailed to Commandant (G-CMC/44), (CGD 76-088b), U.S. Coast Guard Headquarters, Washington, D.C. 20593. (b) The materials referenced in this notice and all comments received will be available for examination and copying between 8 a.m. and 4 p.m., Monday through Friday, except holidays, at the Marine Safety Council (G-CMC/44), Room 4402, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593 (202-426-1477). Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant Jeffrey G. Lantz, Project Officer, Office of Merchant Marine Safety, (G-MVI-5/12), Room 1206, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593 (202-426-4431).

SUPPLEMENTARY INFORMATION: On June 27, 1977, the Coast Guard published a notice of proposed rulemaking (NPRM) for these regulations in the **Federal Register** (42 FR 32684). Interested persons were requested to submit comments and a public hearing was held in Washington, D.C., on November 28, 1977. Notice of the hearing was published in the **Federal Register** of October 27, 1977 (42 FR 56825). A total of 28 comments were received on the NPRM. After the comment period closed, several telephone inquiries were also received concerning potential methods for complying with the proposed requirements. The proposal was also explained and discussed at the 1980 U.S. Coast Guard Tanker Seminar conducted on May 30, 1980. A summary of topics discussed at the seminar is available at the address listed above for examination and copying of comments.

Interested persons are invited to submit written comments on this supplemental NPRM. Persons submitting comments should include their names and addresses, identify this notice (CGD 76-088b), give the specific section to which their comments apply, and give reasons for the comments. Persons desiring acknowledgment of their comments should enclose a stamped, self-addressed postcard or envelope. All comments received before expiration of the comment period will be considered before final action is taken on the proposed rules. The rules may be changed in light of comments received. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

The NPRM was published at the same time as two other sets of proposed pollution prevention regulations. The other two regulatory dockets are:

CGD 75-124 Pollution Prevention—Vessel and Oil Transfer Facilities (33 CFR Parts 154, 155, and 156). Portions of the proposal were later published as final regulations on January 31, 1980 (45 FR 7156). Proposed §§ 155.330 through 155.410, which included a requirement that oil-water separators, bilge alarms, and bilge monitors be installed and used, were not finalized and are currently being revised as a result of comments received.

CGD 76-088a Engineering Equipment: Design and Approval Requirements for Oil Pollution Prevention Equipment (46 CFR Part 162). These regulations were published as final rules in the **Federal Register** on September 13, 1979 (44 FR 53352). The final rules set out specifications and procedures for approving oil-water separators, cargo monitors, bilge monitors, and bilge alarms for use on merchant vessels. A current list of approved monitors can be obtained from the Coast Guard Office of Merchant Marine Safety (G-MVI-3/12), Room 1210, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593 (202-426-1444).

Drafting Information

The principal persons involved in drafting this supplemental NPRM are: Lieutenant Commander Richard M. Cool, Office of Merchant Marine Safety, and William R. Register, Office of the Chief Counsel.

Background Information

In November 1973, the International Maritime Organization (IMO, then referred to as the Inter-Governmental Maritime Consultative Organization, IMCO) adopted the International Convention for the Prevention of Pollution from Ships, 1973 (MARPOL 73). In February 1978, MARPOL 73 was incorporated into and modified by the Protocol of 1978 Relating to the International Convention for the Prevention of Pollution from Ships, 1973 (MARPOL Protocol). On July 2, 1980, the U.S. Senate gave its advice and consent to ratification of the MARPOL Protocol, and implementing legislation was signed by the President on October 21, 1980 (Pub. L. 96-478; 33 U.S.C. 1901-1911). The legislation becomes fully effective when the MARPOL Protocol enters into force. The MARPOL Protocol will enter into force on October 2, 1983.

Annex I to the MARPOL Protocol sets forth several requirements applicable to all types of vessels. Regulations 9, 13A, 15, 16, 18, and 21 of the Annex contain specific requirements for the installation and use of oil-water separators, monitors, bilge alarms, and associated pumping, piping, and discharge arrangements. The Annex also includes provisions for approving the design features of the equipment in accordance with IMO design and testing specifications. The IMO specifications are set forth in IMO Resolution A.393(X) and they form the basis for the Coast Guard specifications published in the **Federal Register** on September 13, 1979 (44 FR 53352). Copies of the IMO Resolution may be purchased from the International Maritime Organization, Publications Section, 101-104 Picadilly, London W1V OAE, United Kingdom.

The regulations in this supplemental NPRM adopt the MARPOL Protocol requirements for cargo monitors on seagoing tank vessels. The proposal also adopts two recent IMO interpretations to the MARPOL Protocol. The interpretations are published as appendices to the rules in this Supplemental NPRM. They are not otherwise readily available to the public.

Several MARPOL requirements have already been adopted in regulations published in Subparts A through E of 33

CFR, Part 157. Regulations for tank vessels carrying oil in domestic trade were published in 1975 (40 FR 46280). Regulations for U.S. tank vessels in foreign trade and foreign tank vessels operating in U.S. waters were published in 1976 (41 FR 54177). Additional requirements for segregated ballast tanks (SBT), dedicated clean ballast tanks (CBT), and crude oil washing systems (COW) were published in June 1980 (45 FR 43705). Procedures for obtaining exemptions from the SBT, CBT, and COW requirements were published in Subpart F of Part 157 on January 15, 1981 (46 FR 3510).

Evaluation and Certification

These proposed regulations are considered to be nonsignificant and, accordingly, a draft evaluation has been prepared and placed in the public docket as required by the DOT Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of May 22, 1980). The regulations have also been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulations and have been determined not to be major rules under the terms of that order. Likewise, on the basis of the supporting explanation provided below, it is certified that these regulations, if promulgated, would not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (Pub. L. 96–354; 5 U.S.C. 610–612).

The draft evaluation includes an environmental assessment as required by DOT Order 5610.1C and Commandant Instruction M16475.1A. Comments on the content and accuracy of the draft evaluation and environmental assessment may be submitted to the address listed above for submission of comments. They will be considered in conjunction with comments on the supplemental NPRM.

The draft evaluation includes an estimate of the annual costs of these regulations to owners of U.S. ships for 1981 and subsequent years. These costs are $0.7 million for 1981; $13.2 million for 1982; $10.0 million for 1983; $5.0 million for 1984; $5.0 million for 1985; and $0.7 million for 1986 and each subsequent year. (All costs are in 1981 dollars. The present value of these costs is $31.9 million.) A portion of these costs may initially be absorbed by vessel owners, but all costs are eventually expected to be passed on to oil consumers in the form of increased transportation charges.

The costs include estimates for 1981 and 1982—before these regulations are expected to become effective. Some vessel owners are already taking measures to comply with the regulations.

Most of the costs resulting from these regulations will be those involving purchase and installation of cargo monitors and control systems. It is noted, however, that the principal requirements concerning this equipment are mandated by the MARPOL Protocol and implementing legislation in 33 U.S.C. 1901–1911.

The draft evaluation also includes an estimate of costs to owners of foreign vessels for comparative purposes. These costs will be incurred due to flag state enforcement of the MARPOL Protocol rather than as a result of compliance with these regulations.

The cost of these regulations to individual ship owners is estimated to be between $86,000 and $167,000 per vessel, depending in vessel size, delivery date, and date of monitor installation. Many U.S. vessels are independently owned and some of these can be considered to be "small entities." The cost per vessel (whether a large or small entity) represents a marginal, one-time outlay equal to only a small percentage of annual operating costs for a single year (0.9–3.3%). These costs are not considered to be significant.

The cargo monitor and control system required by these proposed regulations would provide both a means for: (1) Determining whether discharges from tankers meet international standards, and (2) recording the oil content of those discharges. These measures, coupled with MARPOL 73 provisions that have already been adopted in 33 CFR Part 157, are expected to reduce by 80% the amount of oil that would be routinely discharged overboard if no pollution prevention measures were used.

Description of the Regulations

1. These proposed regulations would apply both to U.S. seagoing vessels and to foreign vessels that call at U.S. ports. The regulations adopt and interpret various requirements contained in the MARPOL Protocol. Table I lists the proposed regulations, the corresponding MARPOL Protocol provisions, and the intended effect of the proposed requirements.

2. Each of the proposed rules would either clarify or relax an existing regulation in 33 CFR Part 157, or add a new provision that corresponds to a similar requirement in the MARPOL Protocol. The proposed clarifications are non-substantive in nature. The new provisions, with one exception, either relax existing regulations or otherwise have little or no economic impact. The exception relates to the proposed record keeping requirement in § 157.37(d). This requirement is specifically required by the MARPOL Protocol. However, the impact of § 157.37(d) has been minimized to the extent possible as explained in paragraph 22 below.

TABLE I—COMPARISON OF PROPOSED REQUIREMENTS IN SUPPLEMENTAL NPRM AND MARPOL PROTOCOL REQUIREMENTS

Proposed regulation in Supplemental NPRM	Corresponding MARPOL protocol requirement or related requirement	Effect of regulation and comments
157.03(e)	MARPOL Reg 1(16)	M
157.03(hh)	MARPOL Article I and 33 U.S.C. 1901(1).	C

Appendix E	Appendix 5 to Annex 3 of MEPC XV/16.	N1
Appendix F	Resolution A.496(XII)	N1

NOTES.—The abbreviations used in the third column of the Table have the following meanings:
"M" means a MARPOL provision that relaxes an existing rule in 33 CFR Part 157.
"C" means a nonsubstantive clarification of an existing rule in 33 CFR Part 157.
"N1" means a new rule that adopts a recent IMO interpretation that relaxes, but is equivalent to an existing MARPOL requirement.
"N2" means a new rule that, although not contained in the MARPOL Protocol, is an equivalent under Regulation 3 of the Protocol.
"N3" means a new rule that imposes a MARPOL provision which would have little or no economic impact.
"N4 means a new rule that imposes a MARPOL record keeping requirement.
"R" means a relaxation to an existing rule in 33 CFR Part 157.

Discussion of Comments and Changes Made

General

1. No comments were received on §§ 157.13, 157.19(d), 157.25, 157.37(c) and 157.39(b), as proposed in the NPRM, and they have been incorporated into the supplemental NPRM without substantive change.

2. Although no comments were received on the revisions to §§ 157.17 and 157.23, as proposed in the NPRM, they have been determined to be unnecessary and are deleted from the supplemental NPRM.

3. Three commenters stated that the term "cargo monitor" in the NPRM is inaccurate and they recommended replacing the term with "oil content monitor," "oil discharge monitor" or "oil-in-water monitor" in order to reflect the intended use of the equipment. Though other terms may better reflect the medium being monitored, the term cargo monitor was chosen to differentiate this unit from a bilge monitor. Accordingly, these recommendations have not been adopted.

4. Editorial revisions have been made to certain requirements to make them more understandable. The principal changes are in § 157.11 of the NPRM, which has been restructured and separated into two sections to explain the requirements more clearly. Proposed § 157.11, as revised, contains requirements for pumping, piping, and discharge arrangements. Proposed § 157.12, as added in the supplemental NPRM, contains requirements for cargo monitors and control systems. Paragraphs § 157.08 (b) and (c) have also been revised to add a cross reference to § 157.12.

5. One commenter questioned whether the proposed piping and monitoring requirements would apply to inland river barges over 150 gross tons. The regulations in this supplemental NPRM apply only to seagoing vessels. The requirements would not apply to inland barges that operate exclusively on rivers.

Specific Regulations

6. *Section 157.03(e).* This change was not in the NPRM. It revises the existing definition of clean ballast to make it consistent with the MARPOL Protocol definition. Specifically, the word "cargo" is deleted from the phrase "from a cargo tank" and a new § 157.03(e)(2) has been added to provide that clean ballast also includes ballast water with an oil content of 15 p.p.m. or less, as verified by an approved cargo monitor and control system.

7. *Section 157.03(hh).* This change was not in the NPRM. It revises the existing definition of "MARPOL Protocol" by adopting the definition of the term provided in 33 U.S.C. 1901(1).

8. *Section 157.08(b).* This change was not in the NPRM. Section 157.08(b) exempts tank vessels that only carry asphalt from the piping, cargo monitor, and slop tank requirements in Part 157. As revised, this section also exempts vessels that only carry carbon black feed stock or other products with physical properties that inhibit effective product/water separation and monitoring. These products have (i) Densities greater than water, making normal slop tank practices ineffective, and (ii) adhesive and cohesive properties that do not permit proper monitoring.

9. *Section 157.08(i).* Two commenters recommended that vessels which are exempt under Subpart F or Part 157 from SBT, CBT, or COW requirements also be made exempt from the cargo monitor requirements. One of these comments was made at the 1980 Coast Guard Tanker Seminar. This recommendation has been adopted in § 157.08(i)(1) of the supplemental NPRM. Vessels exempt under Subpart F of Part 157 are prohibited by § 157.310 from discharging cargo residues and ballast other than segregated ballast and, as provided in § 157.43(b), use of a cargo monitor is not required for discharges of segregated ballast. An additional exemption from the cargo monitor requirements has also been added in § 157.08(i)(2) for vessels engaged solely in voyages that are: (1) Between ports or places within the United States, its territories or possessions, and (2) of less than 72 hours and at all times within 50 miles of the nearest land. Regulation 15(5) of Annex I to the MARPOL Protocol specifically allows this exemption.

10. *Sections 157.11(a) and 157.12.* Two commenters asked whether product carriers that have several independent piping arrangements for product segregation would be required to provide separate monitors for each arrangement. For the purpose of § 157.11, independent piping arrangements may collectively form the fixed piping system required by that section and one monitor could be provided for the collective system. Section 157.11(a) has been clarified in accordance with these commenters' question by adding a sentence stating that independent piping arrangements collectively form the fixed piping system required by that section.

As explained previously in paragraph 4, the specific requirements for cargo monitors have been transferred to § 157.12. Section 157.12(a) in this supplemental NPRM and Appendix F, as incorporated into § 157.12, require at least one monitor and provide for additional owner/operator options that, if selected, would necessitate the installation of additional sampling points, monitors, or flow meters, depending upon the requirements relating to the option.

11. *Section 157.11 (b) and (c).* The NPRM required each discharge point through which oily mixtures are discharged to the sea from a slop tank, cargo tank, or cargo pumproom bilge to be located above the waterline when the vessel is in its deepest ballast condition. Two commenters interpreted this provision to mean that all of a vessel's discharge points capable of discharging oily mixtures have to be above the waterline. They recommended that this requirement apply only to vessels constructed after these regulations become effective. The discharge points on many existing vessels are below the waterline and the commenters stated that the relocation of discharge piping to provide above the waterline discharge points would be both impracticable and beyond the scope of MARPOL 73. To the extent allowed by the MARPOL Protocol, the commenters' recommendation has been adopted. Section 157.11(b)(2), as revised in the supplemental NPRM, only requires one of the overboard discharge points to be above the waterline. The MARPOL Protocol contains essentially the same requirement. Also, a new provision has been added in § 157.11(c) to allow "existing vessels" to have a "part flow" system meeting IMO requirements in proposed Appendix E to Part 157 in lieu of an above waterline discharge point. It should be noted that the terms "new vessel" and "existing vessel" are defined in §§ 157.03 (ii) and (jj). The term "new vessel" includes, in addition to vessels built in future years, certain vessels that are currently in existence, but that were contracted for, delivered, or subjected to a major conversion after specific dates prescribed in the definition. The term "existing vessel"

means any vessel that is not a "new vessel".

12. *Section 157.11 (b)(2)(iii).* The NPRM required each point through which oily mixtures are discharged overboard to have a stop valve actuated by the system's cargo monitor. Three commenters objected to this requirement and recommended that pump shutdown, or other comparable methods, be accepted to stop overboard discharges. This recommendation has not been adopted. The MARPOL Protocol requires the monitor and control system to be capable of preventing oily discharges to the sea in concentrations that exceed those allowed by the Protocol. Stop valves are needed to ensure compliance with this requirement. Reliance on pump shutdown alone, or on other methods such as partial recirculation of the mixture to a cargo tank, would not always be effective. Much of the mixture in the discharge piping at the time of pump shutdown or other corrective action would in all probability be discharged overboard unless a stop valve were also actuated to retain the mixture. Accordingly, § 157.11 (b)(2)(iii) in the supplemental NPRM includes a stop valve requirement. The requirement has been modified, however, to allow manual valves on existing vessels and on new vessels that are less than 4,000 deadweight tons. IMO Resolution A.496 (XII), as set out in proposed Appendix F, allows manual valve closure on these vessels.

13. *Section 157.12(a).* No comments were received on this provision. It is being proposed again without substantive change.

14. *Section 157.12 (b).* This provision requires that (1) Monitors installed on U.S. vessels must be approved by the Coast Guard under 46 CFR 162.050 and (2) monitors installed or on foreign vessels must comply with either 46 CFR 162.050 or applicable IMO specifications. One commenter recommended that the Coast Guard allow the use of non-approved monitors if they are installed before the regulations require approved equipment. This recommendation has not been adopted. Most monitors currently being built, if they are not designed in accordance with Coast Guard or IMO specifications, are not sufficiently reliable or accurate for shipboard use. The IMO specifications are in IMO Resolution A.393 (X).

15. *Section 157.12(c).* The NPRM required both new and existing vessels to have a recording device that records the total amount of oil discharged in liters, the rate of discharge in liters per nautical mile, and the time and date of discharge. One commenter stated that this requirement should not apply to existing vessels since it would exceed MARPOL requirements. This section has been revised in accordance with the commenter's recommendation to incorporate the MARPOL Protocol requirements. The existing requirement for a recording device in 46 CFR 162.050–25 (j) will be deleted when the relaxed requirement in this section becomes effective.

16. *Section 157.12(c).* The NPRM required overboard discharge points for oily mixtures to have sampling points. Two commenters interpreted the rules to require sampling points also in piping used only for transfers within a vessel or for discharges to reception facilities. This interpretation is not correct. The monitoring requirements in IMO Resolution A.496(XII), as incorporated into § 157.12(c) and Appendix F to Part 157, apply only to discharge points used for overboard discharges, i.e. discharges into the sea.

17. *Section 157.12(c).* Three commenters recommended that the Coast Guard delete the requirement in the NPRM for sampling points to be located in vertical sections of piping, stating that existing installations which have sampling points in horizontal sections of piping have proven satisfactory. This comment has been adopted. The purpose of the NPRM requirement was to insure that samples would be taken from a piping section that has full flow. However, full flow can also be accomplished with other orientations of piping. IMO Resolution A. 496(XII), as incorporated into § 157.12(c) and Appendix F to Part 157, would allow any arrangement of piping that assures full flow through the sampling point during discharge operations.

18. *Sections 157.12 (d) and (e).* These provisions differ from those in the NPRM. They postpone the cargo monitor requirements to correspond with the dates specified by the MARPOL Protocol. The Protocol requires new vessels to comply with cargo monitoring requirements on and after the date the Protocol enters into force. Existing vessels, except those with dedicated clean ballast tanks, can delay installing a monitor for up to three years after that date (October 2, 1983). Existing vessels with dedicated clean ballast tanks are required to have an approved cargo monitor within three years after the MARPOL Protocol enters into force but, in any event, not later then the first scheduled shipyard visit after the entry into force of the Protocol.

19. *Section 157.19(b)(1).* There is a printing error in existing § 157.19(b)(1). The term "400 $\sqrt{}$ DWT "should read "400 $\sqrt[3]{}$DWT" and is accordingly changed.

20. *Section 157.28.* Section 157.28 has a clerical error. The error occurred in publishing revisions to Part 157 in the December 13, 1978, issue of the Federal Register (43 FR 54180). In those revisions, the requirement in § 157.08(a)(2) was transferred to § 157.08(c) and the cross reference in §157.28 was inadvertently not changed at that time. The revision to § 157.28 in this document corrects that prior error.

21. *Section 157.37 (a) and (b).* Section 157.37 has been revised to incorporate various MARPOL provisions. Section 157.37(a)(5) (ii) and (iii) prescribe requirements for below the waterline discharges by gravity or through a part flow system. Section 157.37(a)(7) prohibits discharges in a "special areas" listed in the MARPOL Protocol, once the Protocol becomes effective. Section 157.37(b) has been revised to emphasize that residues of products with properties similar to asphalt must, like asphalt, be transferred to reception facilities.

22. *Section 157.37(d).* Three commenters recommended that the requirement in § 157.37(d) to retain cargo monitor discharge data on board for three years should be modified. One commenter recommended that discharge date be allowed to be kept ashore rather than on the vessel. Another recommended that the data be kept for only one year, and on shore rather than on the vessel. The third recommended that the data be kept on board for one year and then ashore for two additional years. The purpose of this requirement is to provide verification of compliance with § 157.37(a). The need for verification is substantially less after the first year. The MARPOL Protocol requires that the data be kept for three years. Accordingly, § 157.37(d) has been modified to require discharge data to be kept on board for one year, when the potential need for it is the greatest, and to permit the owner to maintain it either on board or ashore for the second and third years.

23. *Section 157.43.* No comments were received on section 157.43, as proposed in the NPRM. However, this section has been revised in the supplemental NPRM to incorporate MARPOL provisions and interpretations for discharging clean and segregated ballast.

Paperwork Reduction Act

24. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the recordkeeping provision in proposed § 157.37(d) is being submitted for

approval to the Office of Management and Budget.

25. The list of index terms for 33 CFR Part 157 is provided as follows:

List of Subjects in 33 CFR Part 157

Cargo vessels, Oil pollution, Tank vessels, Water pollution control.

In consideration of the foregoing, the Coast Guard proposes to amend Part 157 of Title 33, Code of Federal Regulations, as set forth below.

Dated: December 8, 1982.

Clyde T. Lusk, Jr.,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

PART 157—[AMENDED]

1. The authority citation for Part 157 is revised to read as follows:

Authority: Sec. 4, Pub. L. 96-478, 94 Stat. 2298 (33 U.S.C. 1903); Sec. 5, Pub. L. 95-474, 92 Stat. 1480 (46 U.S.C. 391a); 49 CFR 1.46.

2. By revising § 157.03 (e) and (hh) to read as follows:

§ 157.03 Definitions.

* * * * *

(e) "Clean ballast" means ballast which—

(1) If discharged from a vessel that is stationary into clean, calm water on a clear day, would not—

(i) Produce visible traces of oil on the surface of the water or on adjoining shore lines, or

(ii) Cause a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shore lines; or

(2) If verified by an approved cargo monitor and control system, has an oil content that does not exceed 15 p.p.m.

* * * * *

(hh) * * * This Protocol incorporates and modifies the International Convention for the Prevention of Pollution from Ships, 1973, done at London on November 2, 1973.

* * * * * *

3. By revising the introductory text of § 157.08 and paragraphs (b) and (c) and by adding new § 157.08(i) to read as follows:

§ 157.08 Applicability of Subpart B.

This subpart applies to vessels under this part that are seagoing and of 150 gross tons or more, except as follows:

* * * * *

(b) Section 157.11, 157.12, 157.13, and 157.15 do not apply to a tank vessel that carries only asphalt, carbon black feed stock, or other products with similar physical properties, such as specific gravity and cohesive and adhesive characteristics, that inhibit effective product/water separation and monitoring.

(c) Sections 157.11, 157.12, 157.13, 157.15, and 157.23 do not apply to a tank barge that cannot ballast cargo tanks or wash cargo tanks while proceeding en route.

* * * * *

(i) Section 157.12 does not apply to a U.S. vessel that—

(1) Is granted an exemption under Subpart F of this part; or

(2) Is engaged solely in voyages that are—

(i) Between ports or places within the United States, its territories or possessions;

(ii) Of less than 72 hours in length; and

(iii) At all times within 50 nautical miles of the nearest land.

4. By revising § 157.11 (a), (b), and (c) to read as follows:

§ 157.11 Pumping, piping and discharge arrangements.

(a) Each tank vessel must have a fixed piping system for transferring cargo residues and other oily mixtures for cargo tanks to slop tanks and for discharging oily mixtures to the sea and to reception facilities. On a vessel that has two or more independent piping arrangements, the arrangements collectively form the fixed piping system required by this paragraph.

(b) Each fixed piping system required by paragraph (a) of this section must have—

(1) At least two manifolds on the weather deck for transferring oily mixtures to reception facilities, one of which is on the port side of the vessel and one of which is on the starboard side; and

(2) Except as provided in paragraph (c) of this section, at least one discharge point that—

(i) Is used for discharges to the sea;

(ii) Is on a port or starboard weather dock or on the vessel's side above the waterline of its deepest ballast condition; and

(iii) Has an automatic stop valve that is actuated by a cargo monitor signal, except that manual valves may be provided on existing vessels and on new vessels of less than 4,000 deadweight tons.

(c) An above waterline discharge point is not required on an existing vessel if its fixed piping system meets Paragraphs 3 and 4 of Appendix E to this part.

* * * * *

5. By adding a new § 157.12 to read as follows:

§ 157.12 Cargo monitor and control system.

(a) Each vessel must have, for each type of cargo oil that it carries, at least one cargo monitor that is designed for use with that oil.

(b) Each monitor installed on a U.S. vessel must be approved under 46 CFR 162.050. Each monitor installed on a foreign vessel must be approved—

(1) Under 46 CFR 162.050; or

(2) As meeting IMO Resolution A.393(X) by a country that has ratified the MARPOL Protocol.

(c) Each monitor must be installed in accordance with Paragraphs 4, 5, and 6 of Appendix F to this part and be fitted with the control system prescribed by paragraphs 6.1.4.2 through 6.1.4.5.5 of that appendix.

(d) Except as provided in paragraph (e), this section becomes effective—

(1) For new vessels, on October 2, 1983; and

(2) For existing vessels, October 2, 1986.

(e) An existing vessel that has dedicated clean ballast tanks to meet the requirements in § 157.10a or § 157.10b must comply with paragraphs (a) and (b) of this section not later than the date in paragraph (d)(2) of this section or the end of the vessel's first scheduled shipyard visit after October 2, 1983, whichever is earlier.

6. By revising the introductory text of § 157.13 and paragraph (a) to read as follows:

§ 157.13 Designated observation area.

Each new vessel must have a designated observation area on the weather deck or above that is—

(a) Located where the effluent from each discharge point and manifold described in § 157.11 can be visually observed; and

* * * * *

§ 157.19 [Amended]

7. By striking the term "$400\sqrt[3]{DWT}$" in § 157.19(b)(1) and replacing it with the term "$400\sqrt[3]{DWT}$".

8. By revising § 157.19(d) to read as follows:

§ 157.19 Cargo tank arrangement and size.

* * * * *

(d) If a line of piping that runs through a cargo tank in a position less than t_c from the vessel's side or less than v_s from the vessel's bottom as defined in Appendix A of this part, has a branch, that branch must have a stop valve—

(1) Within each cargo tank into which the branch opens; or

(2) Outside each tank into which the branch opens in a location that is

immediately adjacent to the point at which the branch enters the tank.

* * * * *

9. By revising § 157.25 to read as follows:

§ 157.25 Exceptions to applicability.

(a) Sections 157.29, 157.31, 157.37(a)(5), 157.37(a)(6) and 157.43 apply to foreign vessels when they discharge into the navigable waters of the United States.

(b) Sections 157.35, 157.37, except paragraphs (a)(5) and (a)(6), 157.39, 157.45, and 157.47 do not apply to foreign vessels.

§ 157.28 [Amended]

10. By striking the citation "157.08(a)(2)" in § 157.28 and replacing it with the citation "157.08(c)".

11. In § 157.37, by revising the introductory text of paragraph (a), (a)(5), the introductory text of paragraph (a)(6), paragraphs (a)(6)(iv), and (b), and by adding paragraphs (a)(7) and (c) through (e) to read as follows:

§ 157.37 Discharge of cargo residue.

(a) A tank vessel may not discharge an oily mixture into the sea from a cargo tank, slop tank, or cargo pump room bilge unless the vessel—

* * * * *

(5) Discharges—

(i) Through the above waterline discharge point described in § 157.11(b)(2);

(ii) In accordance with paragraph 5 of Appendix E to this part, if the vessel is an existing vessel with a part Flow System meeting that appendix; or

(iii) Below the waterline in accordance with paragraph (e) of this section;

(6) Has in operation a cargo monitor and associated equipment required by § 157.12 that is designed for use with the oily mixture being discharged, except that the system may be operated manually if—

(i) * * *

(ii) * * *

(iii) * * *

(iv) The system is operated manually only until the ballast voyage is completed; and

(7) Is outside the "Special Areas" defined in Regulation 1 (10) of Annex I to the MARPOL Protocol after October 2, 1983.

(b) A seagoing tank vessel of 150 gross tons or more that carries asphalt or other products whose physical properties inhibit effective product/water separation and monitoring must transfer all residues and tank washings from such cargoes to a reception facility.

(c) Each cargo monitor must be maintained and operated in accordance with its instructions manual.

(d) All discharge data recorded by a cargo monitor must be retained for at least three years. The data for the most recent year must be retained on board the vessel.

(e) Ballast containing an oily mixture may be discharged below the waterline at sea by gravity if—

(1) The ballast is not from a slop tank;

(2) Examination with an oil-water interface detector shows that oil-water separation has taken place; and

(3) The oil layer is high enough in the tank so that it will not be discharged.

12. By revising § 157.39(b) to read as follows:

§ 157.39 Machinery space bilges.

* * * * *

(b) Each tank vessel must comply with the requirements in Part 155 of this Chapter concerning the use of oil-water separating and monitoring equipment in discharging to the sea oily mixtures that are not combined with cargo residues.

13. By revising § 157.43, including the heading, to read as follows:

§ 157.43 Discharges of clean and segregated ballast: Seagoing tank vessels of 150 gross tons or more.

(a) Clean ballast may not be discharged overboard unless the discharge is verified as clean ballast through use of an approved cargo monitor or, if discharged before the required cargo monitor installation date, by visual examination of the ballast contents immediately before discharge. This paragraph applies to discharges of clean ballast—

(1) From dedicated clean ballast tanks; and

(2) Into the navigable waters of the United States from any other tank.

(b) Segregated ballast may not be discharged overboard unless a visual examination, or a test of the ballast contents with an oil/water interface detector, immediately before the discharge shows that there is no oil mixture in the ballast. Use of a cargo monitor is not required. This paragraph applies to discharges of segregated ballast—

(1) Into the navigable waters of the United States; and

(2) Below the waterline at sea from an existing vessel that does not have an above the waterline discharge point for segregated ballast.

(c) All discharges of clean ballast and segregated ballast must be through an above the waterline discharge point described in § 157.11(b)(2), except that:

(1) A vessel may discharge clean ballast and segregated ballast below the waterline when in port or at an offshore terminal.

(2) A vessel may discharge clean ballast and segregated ballast at sea by gravity below the waterline.

(3) An existing vessel that does not have above waterline discharge points for dedicated clean ballast tanks may discharge clean ballast from those tanks below the waterline at sea.

(4) An existing vessel that does not have above waterline discharge points for segregated ballast tanks may discharge segregated ballast below the waterline at sea.

(d) This section applies only to seagoing tank vessels of 150 gross tons or more.

14. By adding new Appendices E and F at the end of Part 157 to read as follows:

Appendix E

Source: Appendix 5 to Annex 3 of the International Maritime Organization's (IMO's) Marine Environment Protection Committee document MEPC XV/16. Paragraphs 1 and 2 are printed for information. Paragraphs 3, 4, and 5 are referenced in §§ 157.11 and 157.37.

Note.—Information in square brackets has been added by the Coast Guard for clarity.

Specifications for the Design, Installation and Operation of a Part Flow System for Control of Overboard Discharges

1. Purpose.

The purpose of these Specifications is to provide specific design criteria and installation and operational requirements for the part flow system referred to in Regulation 18(6)(e) of Annex I of the International Convention for the Prevention of Pollution from Ships, 1973 as modified by the Protocol of 1978 relating thereto.

2. Application.

2.1 Existing oil tankers may, in accordance with Regulation 18(6)(e) of Annex I of MARPOL 73/78, discharge dirty ballast water and oil contaminated water from cargo tank areas below the waterline, provided part of the flow is led through permanent piping to a readily accessible location on the upper deck or above where it may be visually observed during the discharge operation and provided that the arrangements comply with the Requirements established by the Administration and which shall at least contain all the provisions of these Specifications.

2.2 The part flow concept is based on the principle that the observation of a representative part flow of the overboard effluent is equivalent to observing the entire effluent stream. These specifications provide the details of the design installation, and operation of a part flow system.

3. General Provisions.

3.1 The part flow system shall be so fitted that it can effectively provide a representative sample of the overboard effluent for visual display under all normal operating conditions.

3.2 The part flow system is in many respects similar to the sampling system for an oil discharge monitoring and control system but shall have pumping and piping arrangements separate from such a system, or combined equivalent arrangements acceptable to the Administration.

3.3 The display of the part flow shall be arranged in a sheltered and readily accessible location on the upper deck or above, approved by the Administration (e.g. the entrance to the pump room). Regard should be given to effective communication between the location of the part flow display and the discharge control position.

3.4 Samples shall be taken from relevant sections of the overboard discharge piping and be passed to the display arrangement through a permanent piping system.

3.5 The part flow system shall include the following components:

.1 Sampling probes;

.2 Sample water piping system;

.3 Sample feed pump(s);

.4 Display arrangement;

.5 Sample discharge arrangement; and, subject to the diameter of the sample piping;

.6 Flushing arrangement.

3.6 The part flow system shall comply with the applicable safety requirements.

4. System Arrangement

4.1 Sampling points:

4.1.1 Sampling point locations:

.1 Sampling points shall be so located that relevant samples can be obtained of the effluent being discharged through outlets below the waterline which are being used for operational discharges.

.2 Sampling points shall as far as practicable be located in pipe sections where a turbulent flow is normally encountered.

.3 Sampling points shall as far as practicable be arranged in accessible locations in vertical sections of the discharge piping.

4.1.2 Sampling probes:

.1 Sampling probes shall be arranged to protude into the pipe a distance of about one-fourth of the pipe diameter.

.2 Sampling probes shall be arranged for easy withdrawal for cleaning.

.3 The part flow system shall have a stop valve fitted adjacent to each probe, except that where the probe is mounted in a cargo line, two stop valves shall be fitted in series, in the sample line.

.4 Sampling probes should be of corrosion resistant and oil resistant material, of adequate strength, properly jointed and supported.

.5 Sampling probes shall have a shape that is not prone to becoming clogged by particle contaminants and should not generate high hydrodynamic pressures at the sampling probe tip. Figure 1 is an example of one suitable shape of a sampling probe.

.6 Sampling probes shall have the same nominal bore as the sample piping.

4.2 Sample piping:

.1 The sample piping shall be arranged as straight as possible between the sampling points and the display arrangement. Sharp bends and pockets where settled oil or sediment may accumulate should be avoided.

.2 The sample piping shall be so arranged that sample water is conveyed to the display arrangement within 20 seconds. The flow velocity in the piping should not be less than 2 metres per second.

.3 The diameter of the piping shall not be less than 40 millimetres if no fixed flushing arrangement is provided and shall not be less than 25 millimetres if a pressurized flushing arrangement as detailed in paragraph 4.4 is installed.

.4 The sample piping should be of corrosion-resistant and oil-resistant material, of adequate strength, properly jointed and supported.

.5 Where several sampling points are installed the piping shall be connected to a valve chest at the suction side of the sample feed pump.

4.3 Sample feed pump:

.1 The sample feed pump capacity shall be suitable to allow the flow rate of the sample water to comply with 4.2.2.

4.4 Flushing arrangement:

.1 If the diameter of sample piping is less than 40 millimetres, a fixed connexion from a pressurized sea or fresh water piping system shall be installed to enable flushing of the sample piping system.

4.5 Display arrangement:

.1 The display arrangement shall consist of a display chamber provided with a sight glass. The chamber should be of a size that will allow a free fall stream of the sample water to be clearly visible over a length of at least 200 millimetres. The Administration may approve equivalent arrangements.

.2 The display arrangement shall incorporate valves and piping in order to allow a part of the sample water to bypass the display chamber to obtain a laminar flow for display in the chamber.

.3 The display arrangement shall be designed to be easily opened and cleaned.

.4 The internal of the display chamber shall be white except for the background wall which shall be so coloured in order to facilitate the observation of any change in the quality of the sample water.

.5 The lower part of the display chamber shall be shaped as a funnel for collection of the sample water.

.6 A test cock for taking a grab sample shall be provided in order that a sample of the water can be examined independent of that in the chamber.

.7 The display arrangement shall be adequately lighted to facilitate visual observation of the sample water.

4.6 Sample discharge arrangement:

.1 The sample water leaving the display chamber shall be routed to the sea or to a slop tank through piping of adequate diameter.

5. Operation.

5.1 When a discharge of dirty ballast water or other oil contaminated water from the cargo tank area is taking place through an outlet below the waterline, the part flow system shall provide sample water from the relevant discharge outlet at all times.

5.2 The sample water should be observed particularly during those phases of the discharge operation when the greatest possibility of oil contamination occurs. The discharge shall be stopped whenever any traces of oil are visible in the flow and when the oil content meter reading indicates oil content exceeds permissible limits.

5.3 On those systems that are fitted with flushing arrangement, the sample piping should be flushed after contamination has been observed and additionally it is recommended that the sample piping be flushed after each period of usage.

5.4 The ship's cargo and ballast handling manuals and, where applicable, those manuals required for crude oil washing systems or dedicated clean ballast tanks operation shall clearly describe the use of the part flow system in conjunction with the ballast discharge and the slop tank decanting procedures.

Guidelines and Specifications for Oil Discharge Monitoring and Control Systems for Tankers

1. *Purpose.*

1.1 The purpose of these Guidelines and Specifications is:

.1 To provide a uniformed interpretation of the requirements of Regulations 15(3)(a) of Annex I to the MARPOL 7378 Convention,[1] and

.2 To assist Administrations in determining appropriate design, construction and operational parameters for oil discharge monitoring and control systems when such systems are fitted in ships flying the flag of their State.

2. *Background.*

2.1 The requirements of Annex I to the MARPOL 73/78 Convention relating to oil content monitoring of oil tanker ballast and tank washing water are contained in Regulation 15(3)(a), which stipulates that oil tankers of 150 tons gross tonnage and above shall be equipped with an approved oil discharge monitoring and control system and that the system shall record continuously:

.1 The discharge of oil in litres per nautical mile and total quantity of oil discharge; or

.2 In lieu of the total quantity of oil discharged, the oil content of the effluent and rate of discharge.

In both cases the record shall be "identifiable as to time and date" and shall be kept for at least three years.

2.2 Regulation 15 also stipulates that the system shall come into operation when there is any discharge of effluent into the sea and shall be such as will ensure that any discharge of oily mixture is automatically stopped when the instaneous rate of discharge of oil exceeds that permitted by Regulation 9(1)(a). In existing oil tankers the stopping of the discharge may be performed manually and the rate of discharge may be estimated from the pump characteristics.

2.3 A test and performance specification for the basic oil content meter, indicating oil content in ppm, has been adopted by Resolution A.393(X).

2.4 Resolution A.445(XI) recognizes the need for early installation of oil discharge monitoring and control systems in order that operational experience can be gained. That resolution further invites the Marine Environmental Protection Committee (MEPC) to develop guidelines for the progressive installation of oil discharge monitoring and control systems for new and existing oil tankers.

3. *Application.*

3.1 An oil discharge monitoring and control system, approved by the Administration, shall be fitted in every oil tanker of 150 tons gross tonnage and above, and shall be fitted in:

.1 New (*as defined in Regulation 1(6))[2] tankers, on the date of entry into force of the Convention;

.2 Existing tankers, within three years of the date of entry into force of the Convention.

3.2 Existing tankers operating with a tank cleaning procedure using crude oil washing in accordance with Regulation 13(8) or with dedicated clean ballast tanks in accordance with Regulation 13(9) must fit an oil content meter not later than the first scheduled shipyard visit after entry into force of the Convention.

3.3 An incentive scheme to encourage the early installation of oil discharge monitoring and control systems (Resolution A.445(XI)) has been developed which allows different requirements depending on the date of installation of the systems and the size and building date of the oil tanker. The term used in the description of the various requirements are defined in section 4 below.

4. *Definitions.*

4.1 "Oil discharge monitoring and control system":

4.1.1 Oil discharge monitoring and control system is a general term covering any one of the units referred to in paragraphs 4.2, 4.3 and 4.4.

4.2 "Control unit":

4.2.1 A control unit is a system which receives automatic signals of:

.1 Oil content;
.2 Flow rate of discharge;
.3 Ship's speed;
.4 Date and time (G.M.T.); and
.5 Discharge valve position (open or closed).

4.2.2 The unit shall make automatic recordings of:

.1 Instantaneous rate of discharge of oil;
.2 Total quantity of oil discharged;
.3 Date and time (G.m.t.);
.4 Discharge valve position (open or closed);
.5 Alarm condition;
.6 Failure (i.e. no flow, fault etc.); and
.7 Override action (i.e. manual override, flushing, calibration etc.).

4.2.3 The unit shall be fitted with a starting interlock and discharge valve control capability. The unit shall meet the specifications contained in the relevant paragraphs of section 6.

4.3 "Computing unit":

4.3.1 A computing unit is a system which receives automatic signals of:

.1 Oil content;
.2 Date and time (G.m.t.);
.3 Discharge valve activation;
.4 Flow rate of discharge; and
.5 Ship's speed in knots.

The flow rate and ship's speed may be manually inserted into the unit.

4.3.2 The unit shall make automatic recordings of:

.1 Instantaneous rate of discharge of oil;
.2 Total quantity of oil discharged;
.3 Date and time (G.m.t.);
.4 Discharge valve position (open or closed);
.5 Alarm condition;
.6 Failure (i.e. no flow, fault etc.);
.7 Override action;
.8 Manual input (i.e. speed, flow); and
.9 Oil content if the flow rate has been manually inserted.

4.3.3 Unless explicitly stated in the Implementation Requirements (see section 5 below) the unit need not be fitted with a starting interlock or discharge valve control capability.

4.3.4 The unit shall meet the specifications contained in the relevant paragraphs of section 6.

4.4 "Calculating unit":

4.4.1 A calculating unit is a system which received automatic signals of:

.1 Oil content;
.2 Flow rate of discharge; and
.3 Ship's speed.

The flow rate an ship's speed may be manually inserted into the unit.

4.4.2 The unit shall make an automatic recording of:

.1 Oil content, unless the oil content meter is provided with a recorder.

4.4.3 The unit shall display:

.1 Instantaneous rate of discharge of oil;
.2 Total quantity of oil discharged, unless permitted to be calculated manually.

4.4.4 The time and date, instantaneous rate of discharge of oil and, the total quantity of oil discharged may be recorded manually.

4.4.5 The unit need not be fitted with a starting interlock nor discharge valve control capability.

4.4.6 The unit shall meet the specifications contained in the relevant paragraphs of section 6.

4.5 "Starting interlock" is an automatic device which prevents the initiation of the opening of the discharge valve before the monitoring and control system is fully operational when use of this system is required by the Convention.

4.6 The "discharge valve control" is an automatic device which initiates the sequence to stop the overboard discharge.

5. *Implementation Requirements.*

5.1 To assist in the implementation of Resolution A.445(XI), an implementation scheme has been developed by the MEPC which provides slightly different requirements for oil discharge monitoring and control systems depending on size and building date of the oil tanker. The scheme also allows for different requirements, depending on the installation date of the system.

5.2 Under the implementation scheme contained in paragraph 5.4 oil tankers of 150 tons gross tonnage and above have been arranged into five categories. Each category of oil tanker shall be fitted with an oil discharge monitoring and control system as set out below. The definitions given in section 4 should be consulted for a description of the different systems.

5.3 The implementation scheme set out in paragraph 5.4 give details, with reference to paragraph 4, of the minimum equipment required to comply with this scheme. Where

it is expedient to fit equipment of a higher category then required no objection shall be raised to this arrangement.

5.4 Implementation scheme:

5.4.1 Category I:

.1 An oil tanker of this category is of 4,000 tons deadweight and above and is a "new ship" as defined in Regulation 1(6) of Annex I of MARPOL 73/78 and the oil discharge monitoring and control system is installed on or after 1 June 1982.

.2 This category of ship shall be fitted with a control unit as defined under paragraph 4.2.

5.4.2 Category II:

.1 An oil tanker of this category is of 4,000 tons deadweight and above and is a "new ship" as defined in Regulation 1(6) of Annex I of MARPOL 73/78 and the oil discharge monitoring and control system is installed before 1 June 1982.

.2 This category of ship shall be fitted with a computing unit as defined under paragraph 4.3.

.3 The system shall also be fitted with a starting interlock and a discharge valve control.

5.4.3 Category III:

.1 An oil tanker of this category is of 150 tons gross tonnage and above, but less than 4,000 tons deadweight and is a "new ship" as defined in Regulation 1(6) of Annex I of MARPOL 73/78.

.2 This category of ship shall be fitted with a computing unit as defined under paragraph 4.3.

.3 No automatic devices are required to activate overboard discharge valve closure, neither is a starting interlock required.

5.4.4 Category IV(a):

.1 An oil tanker of this category is of 20,000 tons deadweight and above and is an "existing ship" as defined in Regulation 1(7) of Annex I of MARPOL 73/78 and the oil discharge monitoring and control system is installed between one year and three years after the date of entry into force of MARPOL 73/78.

.2 This category of ship shall be fitted with a computing unit as defined under paragraph 4.3.

.3 The system shall also be fitted with a starting interlock, but need not be fitted with a discharge valve control.

.4 For oil tankers within this category up to and including 100,000 tons deadweight, where the overboard discharge has local manual control or where control is provided by means of extension rods, Administrations may grant waivers or exemptions from the requirement to fit a starting interlock system.[3]

5.4.5 Category IV(b):

.1 An oil tanker of this category is of 20,000 tons deadweight and above and is an "existing ship" as defined in Regulation 1(7) of Annex I of MARPOL 73/78 and the oil discharge monitoring and control system is installed not later than one year after the date of entry into force of MARPOL 73/78.

.2 This category of ship shall be fitted with a computing unit as defined under paragraph 4.3.

.3 No automatic devices are required to activate overboard discharge valve closure, neither is a starting interlock required.

5.4.6 Category V(a):

.1 An oil tanker of this category is of 150 tons gross tonnage and above but less than 20,000 tons deadweight and is an "existing ship" as defined in Regulation 1(7) of Annex I of MARPOL 73/78 and the oil discharge monitoring and control system is installed between one year and three years after the entry into force of MARPOL 73/78.

.2 This category of ship shall be fitted with a calculating unit as defined under paragraph 4.4.

.3 No automatic devices are required to activate overboard discharge valve closure, neither is a starting interlock required.

5.4.7 Category V(b):

.1 An oil tanker of this category is of 150 tons gross tonnage and above but less than 20,000 tons deadweight and is an "existing ship" as defined in Regulation 1(7) of Annex I to MARPOL 73/78 and the oil discharge monitoring and control system is installed not later than one year after the entry into force of MARPOL 73/78.

.2 This category of ship shall be fitted with a calculating unit as defined under paragraph 4.4. However, the total quantity of oil discharged may be computed manually.

.3 No automatic devices are required to activate overboard discharge valve closure, neither is a starting interlock required.

5.5 Shown at the Appendix is a summary, in tabular form, of the implementation requirements.[4]

6. *Technical Specifications.*

6.1 Oil discharge monitoring and control system:

6.1.1 The oil discharge monitoring and control system shall be so fitted that it can effectively monitor and control the discharge of any effluent into the sea through those overboard discharge outlets permitted by Regulation 18(2) which in the opinion of the Administration are necessary for fulfill the operational requirements of the tanker.[5] The system should additional cover:

.1 The gravitational discharge of ballast water from cargo tanks; and

.2 The midship cargo manifold arrangement when used to meet the requirements of Regulation 18.

6.1.2 The discharge of dirty ballast water or oil contaminated water into the sea through outlets which are not controlled by the monitoring and control system is an infringement of the Convention.[6]

6.1.3 The system should function effectively, according to the criteria shown below, under all environmental conditions which vessels are normally assumed to encounter, and shall be designed and constructed to withstand the environmental conditions as specified in paragraph 6.1.6 of these Guidelines and Specifications:

.1 Except where manual operation of the system is permitted the system shall be so designed that no ballast discharge can take place unless the monitor is in the normal operating mode and the relevant sampling point has been connected to the monitor.

.2 Preferably the system should have a minimum number of discharge outlets and sampling points so arranged that discharge can take place via only one sampling point at a time.

.3 Where it is intended that more than one line is used for simultaneous discharge purposes, one oil content meter,[7] together with a flow meter, shall be installed per discharge line. These instruments shall be connected to a common processing unit.

.4 In order to avoid alarms due to short term high oil concentration signals (spikes) causing indications of high instantaneous rates of dischange, the short term high ppm signal may be suppressed for a maximum of 10 seconds by employing a delay relay. Alternatively, the instantaneous rate of discharge may be the average during the preceding 20 seconds or less as computed from instantaneous ppm values produced by the oil content meter with intervals of a maximum of 5 seconds.

6.1.4 The system should comprise the following:

.1 An oil content meter to measure the oil content of the effluent in parts per million. This meter shall be approved in accordance with the provisions contained in resolution A.393(X) [8] and certified to take into account the range of cargoes carried;

.2 A flow rate system to indicate the quantity of effluent being discharged in a unit of time (see also paragraphs 6.3.7 and 6.3.8);

.3 A vessel speed indicating device; to give the vessel's speed in knots (see also paragraphs 6.4.2 and 6.4.3);

.4 A sampling system to convey a representative sample of the effluent to the oil content meter;

.5 A control section which includes:

.5.1 A processor, which accepts signals of oil content, flow rate and the vessel's speed and converts them into litres per nautical mile and the total quantity of oil discharged (see also paragraph 6.5.3);

.5.2 A transmitting device to provide alarms and, where required, command signals to the discharge control arrangement;

.5.3 A recording device to provide, where required, a continuous record of the effluent discharged;

.5.4 A manual override system to be used in the event of failure of the monitoring and control system; and

5.5 Where required a transmitting device to provide signals to a starting interlock preventing the discharge of effluent before the oil content meter is fully operative.

6.1.5 The electrical components of the system installed in a hazardous area of a vessel shall meet the appropriate safety requirements (*As contained in the provisions of IEC Publication 92 or its equivalent.) [9] provided for these areas.

6.1.6 The control section of an oil discharge monitoring and control system shall be capable of operating satisfactorily under the following environmental conditions:

.1 *Ambient air temperature:* 0°C to 55°C in enclosed spaces; −25°C to 55°C on open decks

.2 *Vibration:* 2.0 Hz to 13.2 Hz, with displacement amplitude of ±1.0 mm 13.2 Hz to 80.0 Hz, with an acceleration amplitude of ±0.7g

.3 *Voltage variations for alternating current:* permanent variation of ±10%

.4 *Inclination:* inclination at angles of up to 22.5° in any place from the normal operational position

6.2 Sampling system:

6.2.1 Sampling points should be so located that relevant samples can be obtained from those outlets that are used for operational discharges in accordance with paragraph 6.1.1. the sampling probes located in the overboard discharge lines and the piping system connecting the sampling probes to the oil content meter should meet the following requirements:

.1 The piping and probes shall be of corrosion-resistant and oil-resistant material, of adequate strength, properly jointed and supported;

.2 The system shall have a stop valve fitted adjacent to each probe, except that where the probe is mounted in a cargo line, e.g. to the midship cargo manifold arrangement, two stop valves shall be fitted, in series, in the sample line;

.3 Sampling probes should be arranged for easy withdrawal and should as far as practicable be mounted at an accessible location in a vertical section of the discharge line. If a sampling point has to be made in a horizontal section then suitable arrangements should be made to obtain representative samples. Sampling probes should normally penetrate inside the discharge pipe to a distance of one quarter the diameter of that pipe;

.4 Means shall be provided for cleaning the probes and piping system by the provision of permanent clean water flushing arrangements or some other equivalent method, especially in the case of probes mounted in a cargo line. The design of the probes and piping should be such as to minimize their clogging by oil, oily residue and other matter;

.5 The velocity of the fluid in the piping shall be such that, taking into consideration the length of the piping, the overall response time should be as short as possible between an alteration in the mixture being pumped and the alteration in the meter reading and in any case not more than 40 seconds;

.6 The location of sampling probes in relation to any point of flow diversion to a slop tank shall be selected with regard to the need for sampling the oily water the recirculation mode;

.7 The arrangements for driving the sampling pump or any other pumps such as those provided for washing windows shall have regard to the safety requirements of the space in which the pump is located;

.8 The flushing arrangements should be such that where necessary they can be utilized for stabilizing the oil content meter and for correcting zero setting;

.9 Sample water when returned to the slop tank shall be allowed to free fall into the tank.

6.3 Flow rate indicating system:

6.3.1 A flow meter for measuring the rate of discharge should be installed in a vertical section of a discharge line or in any other section of discharge line as appropriate, so as to be always filled with the liquid.

6.3.2 A flow meter should employ an operating principle which is suitable for shipboard use and, where relevant, can be used in large diameter pipes.

6.3.3 A flow meter should be suitable for the full range of flow rates that may be encountered during normal operation. Alternatively, arrangements such as the use of two flow meters of different ranges or a restriction of the operational flow rate range may be necessary to meet this requirement.

6.3.4 The flow meter, as installed, should have an accuracy of ±15 per cent, or better, of the instantaneous rate throughout the operating range.

6.3.5 Any component part of the flow meter in contact with the effluent discharge including associated piping, if fitted, shall be of corrosion-resistant and oil-resistant material of adequate strength.

6.3.6 The design of the flow metering arrangements shall have regard to the safety requirements of the space in which such metering arrangements are located.

6.3.7 In ships fitted with a computing unit the flow rate may be determined from the pump characteristics and the data manually inserted into the unit.

6.3.8 In ships fitted with a calculating unit the flow rate may be manually inserted into the unit. The flow rate is to be estimated from the best available source e.g. pump characteristics, speed of pump(s), ullages or knowledge of pumping rates for particular tanks on the ship.

6.3.9 In oil tankers where the gravitational discharges of ballast water from the cargo tanks is an established practice, in accordance with Regulation 18(6)(d), means, such as calibration curves, shall be provided to estimate the flow rate of discharge.

6.4 Vessel's speed indicating system:

6.4.1 The automatic speed signal required for the control unit shall be obtained from the vessel's speed indicating device (*See "Recommendation on Performance Standards for Devices to Indicate Speed and Distance (Annex to Resolution A.478(XII)).) by means of a repeater signal. This information shall be readily available in a form that can be accepted by a processor. The speed information used may be either speed over the ground or speed through the water depending upon the speed measuring equipment installed on board.

6.4.2 In ships where a computing unit is required the vessel's speed may be manually inserted into the unit. This data shall be obtained from the ship's log or from an indicating device which transmits signals which need not be in a form which can be accepted by a computer system.

6.4.3 The vessel's speed on ships required to install a calculating unit may be obtained from the ship's log or from the navigation charts and shall be estimated from the most reliable source.

6.5 Processor and transmitting device:

6.5.1 The processor should receive, at time intervals not exceeding 5 seconds, signals from the oil content meter, the flow rate measuring system, and the vessel's speed indicator and automatically compute the following:

.1 Instantaneous rate of discharge of oil in litres per nautical mile; and

.2 Total quantity of oil discharged per voyage in cubic meters or litres.

6.5.2 When the calculations of the processor exceed the limits imposed by Regulation 9(1) (iv) and (v) [10] the transmitting device will provide alarms and, in new ships, it will also provide command signals to the discharge valve control which will cause the discharge of effluent into the sea to stop.

6.5.3 In existing ships fitted with a calculating unit where the unit is installed early, the total quantity of oil discharged may be computed manually.

6.6 Recording devices:

6.6.1 Control Unit:

.1 The recording device for a control unit should include a digital printer or an analogue recorder or the combination of both or a recorded visible display. The record shall be identifiable as to the time and date and shall be kept for at least three years. [11]

.2 The data to be automatically recorded shall include at least the following items:

.2.1 Instantaneous rate of discharge of oil (litres per nautical mile);

.2.2 The total quantity of oil discharged (litres);

.2.3 Time and date (G.M.T.);

.2.4 The discharge valve position (open or closed);

.2.5 Alarm condition;

.2.6 Failure (i.e. no flow, fault, etc.); and

.2.7 Override action (i.e. manual override, flushing, calibrating, etc.).

6.6.2 Computing Unit:

.1 The recording device for a computing unit should include a digital printer or an analogue recorder or the combination of both or a recorded visible display. The record shall be identifiable as to the time and date and shall be kept for at least three years. [11] Manual input information should be identifiable on the record.

.2 The data to be automatically recorded shall include at least the following items:

.2.1 Instantaneous rate of discharge of oil (litres per nautical mile);

.2.2 The total quantity of oil discharged (litres);

.2.3 Time and date (G.M.T.);

.2.4 Manual input information;

.2.5 The valve position (open or closed);

.2.6 Alarm condition;

.2.7 Failure (i.e. no flow, fault, etc.);

.2.8 Override action (i.e. manual override, flushing, calibration, etc.); and

.2.9 Oil content if flow rated is manually inserted.

6.6.3 Calculating unit:

.1 An automatic recording device is not required for a calculating unit, but, where fitted, the recording device should include a digital printer or an analogue recorder or the combination of both or a recorded acceptable visible display. The record shall be identifiable as to time and date, which may be entered manually, and shall be kept for at least three years. [11]

.2 The data to be automatically recorded on the above-mentioned recording device shall include at least the following item:

Oil content in ppm, unless the oil content meter is provided with a recorder.

6.6.4 Recording for digital printers:

Occasions of recordings. Data required in paragraphs 6.6.1.2, 6.6.2.2, and 6.6.3.2 of these Specifications shall be printed out with the following minimum frequency:

.1 When the discharge is started;

.2 When the discharge is stopped;
.3 At intervals of not more than 10 minutes;
.4 When an alarm condition is developed;
.5 When normal conditions are restored;
.6 At the change of valve order or valve position;
.7 When introducing input data;
.8 Whenever the computed rate of discharge varies by 10 litres/nautical mile, unless an equivalent trend-indicating arrangement is provided;
.9 When selecting zero setting or calibration mode; and
.10 On manual command.

6.6.5 Recording for analogue recorders:

Data required in paragraphs 6.6.1.2, 6.6.2.2 and 6.6.3.2 of these Specifications should be continuously recorded in such a way as would satisfy the following requirements:

.1 The chart speed should be indicated. If the speed is controllable, the recorder shall be provided with a marker to identify the speed of the chart paper; and

.2 Means shall be provided to enable the chart paper to be interpreted as to time, date and readings after it has been removed from the recorder.

6.7 Data display:

6.7.1 The current data shall be visibly displayed.

6.7.2 The recording device and the data display should be located in a position easily accessible to the person in charge of the operation of discharging the effluent overboard.

6.8 Manually operated alternatives:

6.8.1 The alternative means and information for use in case of any one failure in the system should be as follows:

.1 Oil content meter: visual observation of the surface of the water; [12]

.2 Sampling pump: visual observation of the surface of the water;
.3 Flow meter: pump characteristics, etc.;
.4 Vessel's speed indicating device: main engine R.P.M., etc.;
.5 Processor: manual calculation and manual recording; and
.6 Discharge valve control: manual operation of pumps and valves.

6.9 Alarm conditions resulting in the stopping of discharge:

6.9.1 Audio-visual alarms shall be initiated for any of the following conditions:

.1 Whenever the instantaneous rate of discharge of oil exceeds 60 litres per nautical mile;

.2 When the total quantity of oil discharged reaches the allowable limit prescribed by the provisions of the relevant regulations;

.3 Failure of the system's operation, such as:

.3.1 Power failure;
.3.2 Loss of sample;
.3.3 Failure of the measuring or recording system; or
.3.4 When the input signal of the sensors exceeds the effective capacity of the system.

6.10 Location of alarm indicator:

6.10.1 The alarm indicator of the system shall be installed in the cargo control room where provided and/or other places where it will attract immediate attention and action.

7. Equipment, Operation and Maintenance Manuals.

7.1 Adminstrations shall ensure that approved equipment, operational and/or maintenance manuals for the various items comprising the oil discharge monitoring and control systems are on board the vessel. These manuals shall cover the oil content meter, control, computing or calculating unit, flow meter and ship's speed indicator, where required.

Footnotes

(Added by the U.S. Coast Guard for clarity.)

[1] The "MARPOL 73/78 Convention" is referred to as the MARPOL Protocol" in 33 CFR, Part 157.

[2] Also defined in § 157.03(i).

[3] The Coast Guard has determined that a starting interlock system is not required on Category IV(a) vessels that are 100,000 DWT or less.

[4] The Coast Guard is not publishing this Appendix.

[5] Section 157.11(b)(2) requires at least one discharge point.

[6] Section 157.37(a) requires all overboard discharges of oily mixtures to be monitored.

[7] The "oil content meter" is referred to as a "cargo monitor" in 33 CFR Part 157 and 46 CFR Subpart 162.050.

[8] Approval under 46 CFR Subpart 162.050 constitutes compliance with this resolution. Section 157.12(b) requires that monitors installed on U.S. vessels must be approved under 46 CFR Subpart 162.050.

[9] U.S. vessels are required to meet 46 CFR Parts 110–113, Electrical Engineering Regulations, which also constitutes compliance with IEC Publication 92.

[10] Sections 157.37(a)(3) and (4) impose the same limits. These limits relate to instantaneous rate and total quantity of oil discharged.

[11] Section 157.37(d) also requires that discharge data be kept for three years.

[12] Section 157.37(a)(6) also requires visual observation of the discharge if the system fails.

Part III

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Coal Mining and Reclamation; Permanent Program; Federal Lands; State-Federal Cooperative Agreements; New Mexico

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 931

Surface Coal Mining and Reclamation; Permanent Program; Federal Lands; State-Federal Cooperative Agreements; New Mexico

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: This final rule completes the administrative process for the adoption of a cooperative agreement between the Department of the Interior and the State of New Mexico for the regulation of surface coal mining and reclamation operations on Federal lands in New Mexico under the permanent regulatory program. Such a cooperative agreement is provided for by section 523(c) of the Surface Mining Control and Reclamation Act of 1977.

EFFECTIVE DATE: December 20, 1982.

ADDRESSES: Copies of the request by the State of New Mexico for the permanent program cooperative agreement, related information required under 30 CFR Part 745, and the complete administrative record of this rulemaking are available for public inspection Monday through Friday, 8:30 a.m. to 5:00 p.m., excluding holidays, at the following address: Administrative Record R&I–06, Office of Surface Mining, Room 5315, 1100 L Street, NW., Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT: Andrew F. DeVito, Office of Surface Mining, South Interior Building, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Phone: (202) 343–5866.

SUPPLEMENTARY INFORMATION: This preamble is divided into five parts in order to assist understanding of the process by which the Secretary decided to enter into a permanent program cooperative agreement with the Governor of the State of New Mexico. The notice is divided as follows:

I. Background.
II. Director's findings.
III. Approval of the cooperative agreement.
IV. Summary of the cooperative agreement and disposition of comments.
V. Procedural matters.

I. Background

A. The State of New Mexico's request

The purpose of this final rulemaking is to adopt a permanent program cooperative agreement between the Department of the Interior and the State of New Mexico which will give New Mexico primacy in the administration of its approved permanent regulatory program on Federal lands in New Mexico. The State of New Mexico requested the cooperative agreement on February 9, 1981. Section 523(c) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act), 30 U.S.C. 1201 *et seq.*, allows the State and the Secretary to enter into a permanent program cooperative agreement if the State has, as New Mexico does, an approved State program for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands. See 45 FR 86459, December 31, 1980.

Permanent program cooperative agreements are authorized by the first sentence of section 523(c) of the Act which provides that "[a]ny State *with an approved State program* may elect to enter into a cooperative agreement with the Secretary to provide for State regulation of surface coal mining and reclamation operations on Federal lands within the State, provided the Secretary determines in writing that such State has the necessary personnel and funding to fully implement such a cooperative agreement in accordance with the provisions of this Act." 30 U.S.C. 1273(c) (emphasis added). The procedures for States to elect to enter into permanent program cooperative agreements are found in 30 CFR Part 745.

The Secretary's regulations at 30 CFR 745.11(b) (1) through (8) require that certain information be submitted with a request for a permanent program cooperative agreement, if the information has not previously been submitted in the State program. The State of New Mexico submitted part of the supporting information required by 30 CFR 745.11(b) on May 13, 1981. The rest of the information relating to the budget, staffing, organization and duties of the State regulatory authority (the New Mexico Mining and Minerals Division (Mining and Minerals)), was listed as appearing in New Mexico's Proposed Permanent Coal Program Text. See 30 CFR 745.11(b) (1), (2), (3), (4), (5) and (6). In addition the State submitted a written certification from the General Counsel of the Mining and Minerals Division that no State statutory, regulatory or other legal constraint exists which would limit the capability of the State of New Mexico to fully comply with section 523(c) of the Act, as implemented by 30 CFR 745. See 30 CFR 745.11(b)(8).

B. Federal Rulemaking

On June 1, 1982, the Office of Surface Mining (OSM) published a notice of proposed rulemaking and public hearing (47 FR 23898) on the proposed cooperative agreement. A public hearing was held on July 20, 1982, in Santa Fe, New Mexico. Final revisions of the text based on comments received at the public hearing and on written comments received during the public comment period are discussed in Part IV, Summary of the Cooperative Agreement and Disposition of Comments.

II. Director's Findings

Under 30 CFR 745.11(f), the Director, OSM, must make the following three findings before recommending to the Secretary that the Department of the Interior enter into a cooperative agreement with a State.

Finding No. 1: The Director finds that the State of New Mexico has an approved State program which was conditionally approved by the Deputy Assistant Secretary for Energy and Minerals, on December 24, 1980. It became effective upon publication in the **Federal Register** on December 31, 1980, 45 FR 86459.

Finding No. 2: The Director finds that the State regulatory authority has sufficient budget, equipment and personnel to enforce fully the State's statutes and regulations for the regulation of surface coal mining and reclamation operations on Federal lands in New Mexico. The Director makes this finding based on information obtained in the processing of grants to the State of New Mexico.

Finding No. 3: The Director finds that the State of New Mexico has the legal authority to administer the cooperative agreement. This finding was made based on written certification from the General Counsel of the Mining and Minerals Division and conditional approval of the State's permanent regulatory program.

These findings were reported to the Secretary in a decision memorandum dated November 24, 1982, in which the Director, OSM, recommended approval of the cooperative agreement.

III. Approval of the Cooperative Agreement

Based upon the conditional approval of the New Mexico State program, the administrative record of this rulemaking, including written and oral comments and the public hearing, and the findings and recommendations of the Director, OSM, the Secretary decided to approve a permanent program cooperative agreement for the State of New Mexico. The cooperative agreement was signed on November 24, 1982, by the Secretary of the Interior and on December 7, 1982, by the Governor of the State of New Mexico. By its terms, the agreement

becomes effective upon publication as final rulemaking in the **Federal Register**.

IV. Summary of the Agreement and Disposition of Comments

Each article of the cooperative agreement is summarized below, along with the Department's disposition of any comments received. Unless indicated otherwise, the text is the same as that in the proposed rule except for minor editorial changes.

Article I: Introduction and Purpose

This Article sets forth the legal authority for the cooperative agreement which is contained in section 523 of the Act. The purposes of the cooperative agreement are also listed. No comments were received on this Article.

Article II: Effective Date

This Article provides that the cooperative agreement is effective following signing by the Secretary and the Governor, and upon publication as a final rule in the **Federal Register**. It will remain in effect until terminated as provided in Article XII. No comments were received concerning this Article.

In processing cooperative agreements with other States, OSM has been asked to clarify how pending permit applications will be processed on the date the cooperative agreement becomes effective. OSM has considered the matter and has concluded that the best solution is to have authority to process permit applications pass to the State on the effective date of the cooperative agreement. OSM will continue to assist in the processing of applications filed prior to the effective date of the cooperative agreement. This will allow for an orderly transition, assuring efficiency and economy in processing applications. The level of assistance necessary will be determined by the State and OSM.

Article III: Scope

Article III provides that the laws, regulations, terms and conditions of New Mexico's State program are applicable to Federal lands in New Mexico except as otherwise stated in the cooperative agreement, the Act, 30 CFR 745.13, or other applicable Federal laws. The effect of this provision is to adopt the New Mexico State program as substantive Federal law on Federal lands, enforceable by the State and the United States. This provision also specifically implements section 523(a) of the Act, which provides that "[w]here Federal lands in a State with an approved State program are involved, the Federal Lands Program shall, at a minimum, include the requirements of the approved State program." 30 U.S.C. 1273(a). Expressly excluded from the scope of the cooperative agreement are the authorities and responsibilities reserved for the Secretary pursuant to the Act and 30 CFR 745.13.

No comments were received concerning this Article. However, clarifying language has been added to Article III, paragraph 4, which specifies that appealable decisions and orders issued by Mining and Minerals are to be appealed to the State reviewing authority, which is the Coal Surface Mining Commission. Decisions and orders issued by non-secretarial officials of the Department are still appealable to the Department's Office of Hearing and Appeals.

Article IV: Responsibilities

This Article specifies that the responsible agency in the State of New Mexico for purposes of administering this cooperative agreement is the Mining and Minerals Division (Mining and Minerals), which has and must continue to have authority under State law to carry out this cooperative agreement.

This Article obligates the State to have the personnel necessary to implement the provisions of the cooperative agreement. It also specifies that the State will assume primary responsibility for the review and analysis of permit applications and applications for permit revisions or renewals. The term "permit application package," used throughout the cooperative agreement beginning in Article IV, is a new term. It constitutes the proposal to conduct surface coal mining and reclamation operations on Federal lands, including an application for a permit, permit revision or permit renewal, all the information required by the Act, 30 CFR Chapter VII, Subchapter D, the applicable State program, this cooperative agreement and all other applicable laws and regulations, including, with respect to leased Federal coal, the Mineral Leasing Act of 1920 (MLA), which is implemented by the 30 CFR 211 regulations of the Minerals Management Service (MMS). See the proposed Federal lands regulations published on June 9, 1982, for further explanation. 47 FR 25092.

At the public hearing held on July 20, 1982, clarification was requested concerning the sentence in paragraph 6 of this Article which states that "the State shall have the necessary personnel to fully implement this Agreement in accordance with the provisions of the Federal Act and the Program." This sentence was added to the cooperative agreement in order to comply with section 523(c) of the Federal Act. Section 523(c) requires that the Secretary determine in writing that the State has the necessary personnel and funding to fully implement a cooperative agreement in accordance with the provisions of the Act before entering into a cooperative agreement with the State. By signing the cooperative agreement the Secretary is agreeing to fund the State for the work that is contemplated by the cooperative agreement. This constitutes knowledge by the Secretary of sufficient funding and personnel as required by section 523 of the Act.

Article V: Funding

Article V provides that the State may be reimbursed pursuant to section 705(c) of the Act if the cooperative agreement has been implemented and if necessary funds have been appropriated to OSM by Congress. Section 705(c) of the Act provides that a State with a cooperative agreement may receive an increase in its annual grant for the development, administration and enforcement of a State program on Federal lands by an amount which the Secretary determines is approximately equal to the amount the Federal government would have expended to regulate surface coal mining and reclamation operations on the Federal lands within the State. See 30 U.S.C. 1295(c). The reference in section 705(c) to section 523(d) is obviously a typographical error. The correct reference is section 523(c). The regulations implementing section 705(c) appear at 30 CFR 735.16 through 735.26. If adequate funds have not been appropriated, OSM and Mining and Minerals will meet to decide on appropriate measures to insure that mining operations are regulated in accordance with the State program. Funds provided to the State are to be adjusted in accordance with Office of Management and Budget (OMB) Circular A–102 (Uniform Requirements For Assistance To State And Local Governments), Attachment E (Program Income). No comments were received on this Article.

Article VI: Reports, Fees and Equipment

The Article deals with reports, permit application fees, and the availability of equipment and laboratories. The proposed provisions are short and self-explanatory.

One comment was received concerning the submission of reports. The commenter suggested that where Article VI, paragraph 8, requires that Mining and Minerals make annual reports to OSM concerning its

compliance with the terms of the cooperative agreement, the phrase, " * * * and the surface managing agency" be added. Mining and Minerals would then be required to submit the annual report to the surface managing agency in addition to submitting it to OSM. OSM declined to adopt the suggestion because it would result in Mining and Minerals having to send duplicate reports to Federal agencies. OSM will, instead, send a copy of the report to the surface managing agency as appropriate.

Article VII: Permit Application Package

Under this Article, an operator on Federal lands will be required by Mining and Minerals and the Director of OSM to submit a permit application package or application for a permit revision or renewal in an appropriate number of copies to Mining and Minerals. The permit application package or application for a permit revision or renewal is to be in the form required by Mining and Minerals and contain any supplemental information which may be required by the Department of the Interior. At a minimum, the permit application package or application for a permit revision or renewal must include the information necessary for Mining and Minerals and the Department to make a determination of compliance with the State program, applicable terms and conditions of the Federal coal lease, if any, and applicable requirements of other Federal laws and regulations.

Article VII also describes the procedures for the cooperative review and analysis of permit applications or applications for permit revisions or renewals on Federal land. The cooperative agreement identifies Mining and Minerals as having the primary responsibility for the analysis and review of the permit application or application for a permit revision or renewal. OSM will assist the State in carrying out the State's analysis and review. However, this does not preclude an independent determination by the Department of the Interior with respect to those statutory requirements and decisions which the Secretary cannot delegate to the State. In assuming primary responsibility for review and analysis of a permit application or application for a permit revision or renewal, Mining and Minerals will also be the primary point of contact for operators on behalf of both the State and the Department. All joint State-Federal determinations are to be channeled to the operator through Mining and Minerals. However, the Secretary may contact the operator independently of the State to carry out his statutory responsibilities. Copies of any correspondence with the applicant as well as any information OSM receives from an applicant will be provided to Mining and Minerals.

In addition, this Article refers to Appendix B, which appears at the end of the rule. The exact procedures to be followed in processing the permit application package or application for a permit revision or renewal are listed in Appendix B. Because these procedures are an extension of the review provisions of Article VII, they are summarized here with the provisions of Article VII. Comments received on Appendix B will also be discussed here.

A. Mining and Minerals will be the primary point of contact and will coordinate communications with the applicant. Mining and Minerals will receive the permit application package or the application for a permit revision or renewal in an appropriate number of copies. Mining and Minerals will be required to transmit an appropriate number of copies to the Federal land management agency (FLMA), OSM, MMS and other appropriate Federal agencies specified by the Secretary for their review. It should be noted that this cooperative agreement cannot and does not purport to bind Federal agencies outside of the Department of the Interior such as the Forest Service. The Department is presently preparing a memorandum of understanding with the Forest Service which will deal with review procedures under the cooperative agreement. Mining and Minerals will coordinate with all appropriate Federal agencies to ensure timely funneling of analyses and conclusions.

Mining and Minerals will determine the completeness of the permit application package or application for a permit revision or renewal, coordinate the technical review of the application by Federal agencies to ensure timely funneling of analyses and conclusions, help OSM develop the decision document, and issue the permit, permit revision, or permit renewal for surface coal mining and reclamation operations. The Secretary will review and approve the elements of the permit application package relating to the MLA and other requirements of the permit application package, such as cultural resources and post-mining land use, which are required by Federal law and the responsibility for which cannot be delegated to the State. Even though the permit is issued by the State, mining may not commence on Federal lands until the Secretary approves the mining plan pursuant to the requirements of the MLA and complies with the requirements of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, *et seq.*, and other applicable Federal laws, responsibility for which cannot be delegated to the State. Because of the timing requirements of NEPA, it is possible that the permit will be issued before the mining plan is approved by the Secretary.

B. OSM, at the request of Mining and Minerals, will assist as possible in the review of the permit application package or application for a permit revision or renewal and provide technical assistance to Mining and Minerals. OSM also will prepare the decision document and incorporate NEPA requirements when necessary. Responsibility for compliance with NEPA remains with OSM.

C. MMS will assist Mining and Minerals as arranged and will be the point of contact with the applicant on issues concerned exclusively with its regulations codified at 30 CFR Part 211.

D. The FLMA will assist Mining and Minerals as arranged and will determine whether the permit application or application for a permit revision or renewal provides for post-mining land use consistent with FLMA's land use plan and whether it provides sufficient protection for resources not covered by the Federal coal lease.

E. Other agencies specified by the Secretary will review the permit application package or application for a permit revision or renewal in regard to their responsibilities under Federal law.

As originally proposed in the **Federal Register**, Article VII referred to permit application packages and applications for permit revisions. OSM has modified this Article to include permit renewals. This modification was made as a logical addition to permit application packages or applications for a permit revision because section 506(d) of the Act and 30 CFR 741.23 specify that a validly issued permit shall carry with it the right of successive renewal upon expiration.

OSM has also modified Article VII to indicate that OSM, with the assistance of Mining and Minerals, will prepare the decision document for the Secretary. As originally proposed, Mining and Minerals was to have prepared a draft decision document, circulated it to appropriate Federal agencies for comment, and then prepared the final decision document after reviewing any comments received. The procedure was modified so that it is in accord with OSM policy as enunciated in the proposed revisions to the Federal lands regulations published on June 9, 1982 (47 FR 25092). This will result in a uniform

system for decision document preparation in all States with cooperative agreements. OSM preparation of the decision document will essentially consist of incorporating the NEPA compliance document with documents prepared by other Federal agencies and by Mining and Minerals.

At the public hearing held on June 20, 1982, OSM was asked to clarify actual responsibility for mining plan approval, permit approval and the relationship between the two. As was explained above, the State will approve the permit while the Secretary (whose authority for mining plan approval is delegated to the Assistant Secretary for Energy and Minerals) will approve the mining plan. The permit and the mining plan are distinct although they are based on some common elements. The approval of the permit by Mining and Minerals is based on Mining and Minerals' review of those elements of the permit application package required by the approved State program. The approval of the mining plan will be based on the decision document prepared by OSM with the assistance of Mining and Minerals. The decision document will include a technical analysis of the proposed mining operation, prepared by the State, and all other written findings required by the approved State program; a NEPA compliance document; concurrences from appropriate Federal agencies; and a brief, but comprehensive discussion of the need for the proposal and alternatives to the proposal. Under the cooperative agreement, it is no longer necessary for OSM to concur in approval of the permit as is generally required by the Federal lands regulations. Since the cooperative agreement was promulgated in accordance with the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, it supersedes in New Mexico the Federal lands regulations in 30 CFR 740–745 to the extent that those regulations are inconsistent. See 47 FR 25091, June 9, 1982, for proposed revisions of 30 CFR Parts 740–745.

At the public hearing, one commenter pointed out that, as proposed, the cooperative agreement specifies that OSM will assist Mining and Mineral in the review of the permit application package or application for permit revision or renewal "at the request" of Mining and Minerals. The commenter asked how OSM and the Department could perform their responsibilities under the cooperative agreement if Mining and Minerals fails to request assistance in the review.

The provision in question pertains to the review of the permit application package or application for permit revision or renewal. This review is the responsibility of Mining and Minerals and it is the responsibility of Mining and Minerals to request any assistance it may require. This provision, however, cannot and does not purport to prohibit OSM or the Department from reviewing the permit application package or application for a permit revision or renewal as necessary to fulfill their responsibilities under the cooperative agreement.

One commenter felt that the provisions allowing Mining and Minerals to determine the completeness of the permit application package or application for a permit revision or renewal, coordinate the technical review of the application by Federal agencies, help OSM develop the decision document, and issue the permit, permit revision, or permit renewal for surface coal mining and reclamation operations combined with the provisions to avoid duplication resulted in so much authority being delegated to the State that the provision of section 523(c) of the Act, reserving to the Secretary the authority to approve mining plans, had been violated. The Department disagrees. The cooperative agreement clearly reserves to the Secretary the review and approval authority over mining plans. Much of the data needed for the mining plan will be the same as required in the permit application and to that extent the Department will avoid duplicative efforts. If additional information is needed the Department will arrange with the appropriate State or Federal agency such as the MMS, to obtain the information.

Another commenter questioned whether Congress actually intended to delegate to the States authority to approve surface coal mining permits on Federal lands and suggested that Congress perhaps intended to delegate authority for other types of permits instead, such as exploration permits.

Both the Act and its legislative history clearly indicate that Congress intended that the authority to approve surface coal mining permits for Federal lands could be delegated in a cooperative agreement to the States with approved State programs.

Article VIII: Inspections

This Article specifies that Mining and Minerals must conduct inspections of Federal lands and prepare and file inspection reports in accordance with its approved State program.

Administrative provisions of this Article include designation of Mining and Minerals as the primary point of contact with the operator and a provisions for reasonable notice to the State prior to a Federal inspection.

The right of Federal and State agencies to conduct inspections for purposes outside the scope of the proposed cooperative agreement is not affected. In particular, this Article preserves the Department's obligation and authority to conduct inspections pursuant to 30 CFR Parts 743 and 842. The Article also expressly reserves the Secretary's right to conduct inspections without prior notice to the State to carry out his responsibilities under the Federal Act.

On general comment was received at the public hearing concerning Article VIII. The commenter stated that the Article appeared unwieldy, although he approved of the fact that OSM retains the right to make inspections when necessary.

OSM has reviewed the language in Article VIII and believes it is as simple as possible given the need to retain certain authority for the Secretary, while delegating the primary responsibility for inspections on Federal lands to Mining and Minerals.

One comment was received concerning the provision requiring Mining and Minerals to file inspection reports with OSM. The commenter suggested that Mining and Minerals also file inspection reports with the surface managing agency.

OSM declined to adopt the suggestion because it would result in Mining and Minerals having to send duplicate reports to Federal agencies. OSM will, instead, send copies of reports to the surface managing agency as appropriate.

Article IX: Enforcement

Article IX sets forth the enforcement obligations and authorities of OSM and Mining and Minerals. Mining and Minerals has primary enforcement authority on Federal lands in accordance with the requirements of the cooperative agreement and the approved State program.

This Article also specifies that the parties will consult prior to revoking or suspending a permit. The Secretary's obligation to enforce violations of Federal law other than the Act is preserved, as is OSM's authority to take enforcement action to comply with 30 CFR Parts 843 and 845. In taking such action, OSM will apply the performance standards contained in the approved State program, but will use the Federal procedures and penalty system. Federal procedures must be used because enforcement by OSM would be a Federal action and the Act provides for

specific procedures to be followed when OSM is the enforcement agency. These procedures must be followed to ensure that the rights of all parties are protected during the Federal enforcement proceedings.

One comment was received concerning the provision requiring Mining and Minerals to notify OSM of violations. The commenter suggested that Mining and Minerals also notify the surface managing agency. OSM declined to adopt the suggestion because it would result in duplicate reporting to Federal agencies. OSM will notify the surface managing agency of any violations as appropriate.

Article X: Bonds

Under this Article, Mining and Minerals will require each operator to submit a single performance bond to meet Federal and State requirements. The bond will be payable to the State and, if required by Federal regulations in Subchapter D, the United States. Mining and Minerals is required to obtain the consent of the Department prior to releasing or forfeiting an operator's performance bond. In addition to a performance bond, an operator still will be required to furnish a lease bond and a lessee protection bond. Bonding requirements of the MLA and other Federal laws appear at 30 CFR Part 742 and 43 CFR Subpart 3474.

No comments were received concerning this Article. However, OSM has modified the sentence in paragraph 23 which states that if the cooperative agreement is terminated, the bonds will revert to being payable only to the United States. OSM has added the phrase "to the extent that Federal lands are involved." The sentence now reads as follows: "If the cooperative agreement is terminated, the bonds will revert to being payable only to the United States to the extent that Federal lands are involved." This will insure that there is bond coverage for both State and private lands as well as Federal lands if the cooperative agreement should terminate and a single performance bond has been filed for an entire operation covering both Federal and non-Federal lands.

Article XI: Designation of Lands as Unsuitable

This Article describes the roles of Mining and Minerals and OSM in the review and processing of petitions to designate lands as unsuitable for surface coal mining operations on adjacent Federal and non-Federal lands. The authority to designate Federal lands as unsuitable is reserved to the Secretary or his designated representative. See 30 CFR 745.13. Petitions for designation on Federal lands must be filed in accordance with 30 CFR Part 769.

At the public hearing, a commenter asked if the Secretary actually makes the determinations on whether or not to designate Federal lands as unsuitable for surface coal mining pursuant to petition.

Actual determinations are made by the Director of OSM unless the Secretary specifically chooses to assume jurisdiction. Both the Act and the legislative history clearly state that the authority to designate Federal lands as unsuitable is reserved to the Secretary and cannot be delegated to the State. Decisions on petitions to designate Federal lands in New Mexico as unsuitable for surface coal mining will therefore be made by the Secretary or his designated representative within the Department and not by Mining and Minerals.

One comment was received concerning the provisions in paragraph 30 requiring Mining and Minerals to notify OSM of the receipt of a petition to designate non-Federal lands as unsuitable for mining when the designation could impact adjacent Federal lands. The commenter suggested that Mining and Minerals should also notify the Federal surface managing agency.

OSM declined to adopt the suggestion because it would result in an unnecessary duplication of effort for Mining and Minerals. Instead, OSM will notify the surface managing agency of any petitions that are received.

Article XII: Termination of Cooperative Agreement

Article XII provides for termination of the cooperative agreement in accordance with 30 CFR 745.15. No comments were received on this Article.

Article XIII: Reinstatement of Cooperative Agreement

Article XIII provides for reinstatement of the cooperative agreement under 30 CFR 745.16. No comments were received on this Article.

Article XIV: Amendment of Cooperative Agreement

Article XIV provides that the cooperative agreement may be amended by mutual agreement of the Governor and Secretary in accordance with 30 CFR 745.14. No comments were received on this Article.

Article XV: Change in State or Federal Standards

This Article recognizes that the Secretary or the State may from time to time promulgate new or revised performance or reclamation requirements, or enforcement and administration procedures, necessitating corresponding changes to the cooperative agreement. Changes made by the State would be made in accordance with 30 CFR Part 732 in order to be consistent with State program regulations. Changes made by the Secretary would be made in accordance with section 501 of the Act. No comments were received on this Article.

Article XVI: Changes in Personnel and Organization

As required by 30 CFR 745.12, this Article specifies that the State and the Department must advise each other of changes in the organization, structure, functions, duties and funds of the offices, departments, divisions, and persons within their organizations which could affect administration or enforcement of the cooperative agreement. No comments were received on this Article.

Article XVII: Definitions

This Article specifies which definitions apply. Basically, it adopts the definitions presently in force in the Act, OSM's permanent regulatory program and the State program. In the case of conflict, the State definition applies except in the case of a term which defines the Secretary's remaining responsibilities under the Act and other laws. No comments were received on this Article.

Article XVIII: Reservation of Rights

Article XVIII recognizes that the Act, 30 CFR 745.13 and other authorities prohibit the Secretary from delegating certain authorities to the State. Article XVIII states that the cooperative agreement shall not be construed as waiving or preventing the assertion of any rights not expressly addressed in the cooperative agreement or available to the parties under the authorities cited in Appendix A.

Pursuant to 30 CFR 745.13 and the terms of this Article, the Secretary reserves authority and responsibility for several MLA functions (e.g., release of lease bonds). Section 745.13 lists other specific responsibilities reserved to the Secretary. Among these responsibilities are the designation of Federal lands as unsuitable for surface coal mining operations and the termination of such

designations. Under section 523 of the Act and 30 CFR 745.13, the Secretary must retain authority to approve mining plans or significant modifications thereto on Federal lands. No comments were received on this Article.

The Department of the Interior also reserves the authority and responsibility for several specific functions which are an integral part of the permit application review procedures discussed earlier. These items include, but are not limited to, the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, *et seq.*; consultation requirements of the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531, *et seq.*; and section 106 of the National Historic Preservation Act of 1966, 16 U.S.C. 470f.

Compliance With NEPA

The Department and its member offices and bureaus must comply with NEPA, its implementing regulations, and the Department's own guidelines. See 40 CFR Part 1500, *et seq.* (regulations of the Council on Environmental Quality) and 45 FR 27541 (April 23, 1980) (Department of the Interior Notice of Final Revised Procedures). See also 45 FR 10043 (February 14, 1980) (Notice of Proposed Revised Instructions for the Office of Surface Mining). These authorities require the Department, prior to a decision on a permit application package on Federal lands, to prepare an environmental assessment or environmental impact statement. The current regulations at 30 CFR 745.13(b) do not allow the Secretary to delegate his NEPA duties to the States. However, the Secretary believes that this regulation does allow States to assist in preparation of NEPA documents (see 40 CFR 1506.3), with final action reserved to the Secretary so long as the Department is sufficently involved in the preparation of the NEPA document to form an independent judgment of the environmental impacts of the proposed action.

Endangered Species Act (16 U.S.C. 1536)

This Federal law requires that the Department take such steps as are necessary to insure that actions authorized, funded, or carried out by Federal departments and agencies do not jeopardize the continued existence of an endangered species, or result in the destruction or modification of a species' critical habitat. 16 U.S.C. 1536. See 50 CFR 402 (regulations on inter-agency cooperation under the Endangered Species Act). OSM's regulations at 30 CFR 745.13(m) provide that the Secretary's obligation to consult under section 7(a) of the Endangered Species Act regarding actions on Federal lands may not be delegated to a State.

National Historic Preservation Act (16 U.S.C. 470f)

Compliance with section 106 of the National Historic Preservation Act and its implementing regulations (36 CFR Part 800) is mandatory where the approval of mining on Federal lands may adversely affect sites, buildings, objects or districts which are listed on, or eligible for listing on, the National Register of Historic Places. Compliance is achieved through early consultation with and involvement of State Historic Preservation Officers and, in some cases, consultation with the Advisory Council on Historic Preservation.

OSM and the Department must also comply with Executive Order 11593, "Protection and Enhancement of the Cultural Environment" (May 13, 1971). Executive Order 11593 contains two principal requirements. First, with respect to properties not owned by the Federal government, agencies and departments must establish procedures for consultation with the Advisory Council on Historic Preservation on any Federal plans and programs affecting such properties. Second, the Order requires all Federal agencies and departments to inventory and nominate historic sites, buildings, districts and objects that are on Federal property and that may be eligible for inclusion on the National Register of Historic Places. Participation by all Federal agencies and departments insures that their areas of expertise are utilized.

Federal agencies must take measures to insure that proposed undertakings fulfill their responsibilities under section 106 of the National Historic Preservation Act of 1974, and that the Advisory Council on Historic Preservation is given an opportunity to comment on proposed treatment plans.

These responsibilities would be reserved to the Secretary under the cooperative agreement since they are not "expressly addressed" (Article XVI).

Floodplain Management and Wetland Protection

The Office of Surface Mining has published a general statement of policy which describes the existing procedural mechanisms for compliance with Executive Order 11988, Floodplain Management (May 24, 1977) and Executive Order 11990, Protection of Wetlands (May 24, 1977). See 45 FR 49872 (July 25, 1980). Secretarial approval of surface coal mining operations on Federal lands is discussed in that **Federal Register** notice at 45 FR 49872–73. As noted therein, the method and responsibility for compliance with these two Orders is to be a subject of the permanent program cooperative agreements under 30 CFR Part 745.

Since the cooperative agreement with New Mexico does not directly discuss compliance with these Orders, the obligation for compliance with them will remain with the Secretary and will not be delegated to New Mexico.

V. Procedural Matters Required for Promulgation of This Rule

1. Executive Order 12291 and Regulatory Flexibility Act

The Department has determined that this document is not a major rule and does not require a regulatory impact analysis under Executive Order 12291 because promulgation of a State-Federal cooperative agreement between the Department of the Interior and the State of New Mexico will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. The cooperative agreement should result in cost savings to the mining industry and lessen the burden of regulatory compliance. Further, the cooperative agreement will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based interprises in domestic or export markets. The Department certifies that this document will not have a significant economic effect on a substantial number of small entities and therefore does not require a regulatory flexibility analysis under the Regulatory Flexibility Act, 5 U.S.C. 605(b). This certification was made based on an assessment of the probable impact of the cooperative agreement on small entities within the State. The Director has concluded that the effect of the cooperative agreement would be to reduce the cost and burden of complying with the Federal Lands Program found in 30 CFR Chapter VII, Subchapter D. The above findings were made by the Director, OSM and approved by the Assistant Secretary for Energy and Minerals. A copy is on file in the OSM Administrative Record Room, Room 5315, 1100 L Street, Washington, D.C. 20005.

2. Recordkeeping and Reporting Requirements

There are recordkeeping and reporting requirements in this rule which are the same as and required by the permanent

program regulations. Those regulations received clearance from the Office of Management and Budget under 44 U.S.C. 3507 and were assigned the following clearance numbers:

Location of Requirements and OMB Clearance Number

Article VI.9 (Required by 30 CFR Part 735), 1029–0013
Article VII.11 (Required by 30 CFR Part 741), 1029–0026
Article VII.14 (Required by 30 CFR Part 786), 1029–0041
Article VIII.18 (Required by 30 CFR Part 840), 1029–0051
Article X.27 (Required by 30 CFR Part 800), 1029–0043

3. National Environmental Policy Act

Proceedings relating to adoption of a permanent program cooperative agreement are part of the Secretary's implementation of the Federal Lands Program pursuant to section 523 of the Act. Such proceedings are, therefore, exempt under section 702(d) of the Act from the requirements to prepare an Environmental Impact Statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

4. Justification for Immediate Effective Date

The Department of the Interior finds, in accordance with section 553(d)(3) of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), that good cause exists to make this final rule effective upon publication. Immediate implementation will result in the immediate elimination of dual administration of surface coal mining in New Mexico, resulting in efficiency and economy both to the State and the Federal government as well as to operators. Article II of the proposed cooperative agreement with New Mexico stated that the cooperative agreement would become effective upon publication in the **Federal Register** as a final rule. No comments were received on this provision and it has been adopted as proposed.

5. Indexing Requirements

List of Subjects in 30 CFR Part 931

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 931 of Chapter VII, Title 30 is amended as set forth herein.

Dated: November 24, 1982.

Daniel N. Miller Jr.,

Assistant Secretary for Energy and Minerals.

PART 931—[AMENDED]

1. Section 931.30 is added to read as follows:

§ 931.30 State-Federal cooperative agreement.

The State of New Mexico (State) acting through the Governor and the Department of the Interior (Department) acting through the Secretary enter into a Cooperative Agreement (Agreement) to read as follows:

Article I: Introduction and Purpose

1. This Agreement is authorized by section 523(c) of the Surface Mining Control and Reclamation Act (Federal Act), 30 U.S.C. 1273(c), which allows a State with a permanent regulatory program approved under 30 U.S.C. 1253 to elect to enter into an agreement with the Secretary for the regulation and control of surface coal mining and reclamation operations on Federal lands and by section 69–25A–27 NMSA 1978 of the Surface Mining Act (State Act).

The Agreement provides for State regulation of surface coal mining and reclamation operations on Federal lands within the State consistent with the State and Federal Acts, the State program (Program) (30 CFR Part 931) and the Federal Lands Program (30 CFR Parts 740–745). The term "Federal lands" is defined in the Federal Act and State and Federal regulations.

2. The purpose of this Agreement is to (a) foster State-Federal cooperation in the regulation of surface coal mining and reclamation operations; (b) eliminate intergovernmental overlap and duplication; and (c) provide uniformity by effective application of the State program to Federal lands in New Mexico.

Article II: Effective Date

3. This Cooperative Agreement is effective following signing by the Secretary and the Governor, and upon publication as a final rule in the **Federal Register**. This Agreement shall remain in effect until terminated as provided in Article XII.

Article III: Scope

4. This Agreement makes the laws, regulations, terms and conditions of the Program conditionally approved effective December 31, 1980 (30 CFR Part 931), or as hereinafter amended in accordance with 30 CFR 732.17, applicable to Federal lands within the State except as otherwise stated in this Agreement, the Federal Act, 30 CFR Part 745 or other applicable Federal laws. Orders and decisions issued in accordance with the Program by the Mining and Minerals Division (Mining and Minerals) of the New Mexico Energy and Minerals Department that are appealable shall be appealed to the State reviewing authority. Orders and decisions issued by the Department that are appealable shall be appealed to the Department of the Interior's Office of Hearings and Appeals.

Article IV: Responsibilities

5. Mining and Minerals is and shall continue to be the sole agency responsible for administering this cooperative agreement on behalf of the Governor on Federal lands throughout the State. Mining and Minerals has and shall continue to have authority under State law to carry out this Agreement. The Office of Surface Mining (OSM) of the Department of the Interior shall administer this Agreement of behalf of the Secretary in accordance with the regulations in 30 CFR Chapter VII.

6. To eliminate duplication and overlap, the State will assume the primary responsibility for the review and analysis of permit applications and applications for permit revisions or renewals, subject to legal restrictions, including those limitations in 30 U.S.C. 1272(b) and 1273 and in 42 U.S.C. 4321–4335. The State shall have the necessary personnel to fully implement this Agreement in accordance with the provisions of the Federal Act and the Program.

Article V: Funding

7. The State will devote adequate funds to the administration and enforcement of this Agreement of Federal lands within the State. If this Agreement has been carried out, and subject to appropriations, the Department shall provide the State with funds to defay the costs associated with carrying out responsibilities under this Agreement, as provided in 30 U.S.C. 1295(c) and 30 CFR 735.16. Reimbursement shall be in the form of annual grants, and applications for said grants shall be processed and awarded in a timely and prompt manner.

If sufficient funds have not been appropriated to OSM, OSM and Mining and Minerals shall promptly meet to decide on appropriate measures that will insure that mining operations are regulated in accordance with the Program.

Funds provided to the State shall be adjusted in accordance with Office of Management and Budget (OMB) Circular A–102, Attachment E.

Article VI: Reports, Fees and Equipment

8. Mining and Minerals shall make annual reports to OSM containing information respecting its compliance with the terms of this Agreement pursuant to 30 CFR 745.12(c). The State and OSM shall exchange, upon request, except where prohibited by Federal law, information developed under this Agreement. OSM shall provide Mining and Minerals with a copy of any final evaluation report prepared concerning State administration and enforcement of this Agreement.

9. The amount of the fee accompanying an application for a permit shall be determined in accordance with New Mexico Coal Surface Mining Commission Rule 80–1, Part 5–25. All permit fees shall be retained by the State and deposited with the State Treasurer in the Oil and Gas Conservation Fund. The Financial Status Report submitted pursuant to 30 CFR 735.26 shall include a report of the amount of fees collected during the prior State fiscal year.

10. Mining and Minerals will assure itself access to equipment, laboratories and facilities with which all inspections, investigations, studies, tests and analyses can be performed, and which are necessary to carry out the requirements of this Agreement.

Article VII: Permit Application Package

11. Mining and Minerals and OSM shall require an operator on Federal lands to submit a permit application package or an application for a permit revision or renewal in an appropriate number of copies to Mining and Minerals. Any documentation or information submitted by the operator for the sole purpose of complying with the 3-year requirement of section 7(c) of the Mineral Leasing Act of 1920, 30 U.S.C. 181 *et seq.*, will be forwarded to the Minerals Management Service (MMS). If such documentation is submitted as part of a permit application package, a copy of the entire package will be forwarded to MMS.

The permit application package or application for a permit revision or renewal shall be in the form required by Mining and Minerals, shall satisfy the requirements of 30 CFR 741.12(b) and 30 CFR 741.13, and shall include the information required by, or necessary for, Mining and Minerals and the Secretary to make a determination of compliance with:

(a) Section 69-25A-1, *et seq.*, NMSA 1978;

(b) New Mexico Coal Surface Mining Commission Rule 80-1;

(c) Applicable terms and conditions of the Federal coal lease;

(d) Applicable requirements of the 30 CFR Part 211 regulations pertaining to the Mineral Leasing Act requirements; and

(e) Applicable requirements of the approved Program and other Federal laws including, but not limited to, those identified in 30 CFR Chapter VII, Subchapter D and Appendix A of this Agreement.

12. Mining and Minerals shall assume the primary authority pursuant to sections 510(a) and 523(c) of the Federal Act for the analysis, review, and approval of the permit application or application for a permit revision or renewal according to the standards of the Program. OSM shall assist Mining and Minerals in the analysis of the permit application or application for a permit revision or renewal according to the procedures set forth in Appendix B. The Department shall concurrently carry out its responsibilities under the Mineral Leasing Act, as amended (MLA), the National Environmental Policy Act (NEPA), and other public laws (including but not limited to those in Appendix A) that cannot, under the Federal Act, be delegated to the State. The Department shall carry out these responsibilities according to the procedures set forth in Appendix B so as to avoid, to the maximum extent possible, duplication of the responsibilities of the State set forth in this Agreement and the State Program. The Secretary will consider the information in the permit application package and, where appropriate, make the decisions required by the Federal Act, MLA, NEPA and other public laws listed above.

13. Mining and Minerals shall be the primary point of contact with the operator. The Department will independently initiate contacts with the applicant regarding permit application packages or applications for a permit revision or renewal only where necessary to carry out its statutory responsibilities. When such action may generate correspondence with the applicant, a copy of all correspondence with the applicant that may have a bearing on decisions regarding the mining operation shall be sent to Mining and Minerals.

14. Mining and Minerals shall maintain a file of all original correspondence with the applicant and any information received from the applicant which may have a bearing on decisions regarding the permit application package or application for a permit revision or renewal. At the request of the Secretary or his designated agents, Mining and Minerals shall make available the Mining and Minerals files and send copies of such correspondence and information when requested to do so.

15. To the fullest extent allowed by State and Federal law, OSM and Mining and Minerals shall cooperate so that duplication will be eliminated in conducting the review and analysis of the permit application package or application for a permit revision or renewal.

16. Mining and Minerals will review the permit application or application for a permit revision or renewal under sections 11-11 through 11-29 of the New Mexico Coal Surface Mining Commission Rule 80-1.

Article VIII: Inspections

17. Mining and Minerals shall conduct inspections on Federal lands and prepare and file inspection reports in accordance with its Program.

18. Mining and Minerals shall, subsequent to conducting any inspection on Federal lands, file with OSM on a timely basis, an inspection report adequately describing (1) the general conditions of the lands; (2) the manner in which the operations are being conducted; and (3) whether the operator is complying with applicable performance and reclamation requirements.

19. Mining and Minerals will be the point of contact and primary inspection authority in dealing with the operator concerning operations and compliance with the requirements covered by this Agreement, except as described hereinafter. Nothing in this Agreement shall prevent inspections by authorized Federal agencies for purposes other than those covered by this Agreement.

20. The Department may conduct any inspections necessary to comply with 30 CFR Parts 842 and 743.

21. Except as provided below, the Secretary shall give Mining and Minerals reasonable notice of his intent to conduct an inspection in order to provide State inspectors an opportunity to join in the inspection. The Secretary reserves the right to conduct inspections without prior notice to Mining and Minerals to carry out his responsibilities under the Federal Act.

Article IX: Enforcement

22. Mining and Minerals shall be the primary enforcement authority under the Federal Act concerning compliance with the requirements of this Agreement and the Program. Enforcement authority of the Secretary under other laws and orders including, but not limited to, those listed in Appendix A is reserved to the Secretary.

23. During any joint inspection by OSM and Mining and Minerals, Mining and Minerals shall have primary responsibility for enforcement procedures, including issuance of orders of cessation, notices of violation and assessment of penalties. OSM and Mining and Minerals shall consult prior to issuance of any decision to suspend or revoke a permit.

24. Mining and Minerals and OSM shall promptly notify each other of all violations of applicable laws, regulations, orders, approved mining plans and permits subject to this Agreement and of all actions taken with respect to such violations.

25. During any inspection made solely by OSM or any joint inspection where Mining and Minerals and OSM fail to agree regarding the propriety of any particular enforcement action, OSM may take any enforcement action necessary to comply with 30 CFR Parts 843 and 845.

Such enforcement action shall be based on the performance standards included in the regulations of the Program, and the procedures and penalty system contained in 30 CFR Parts 843 and 845. This Agreement does not limit the Department's authority to enforce violations of standards and requirements of Federal laws other than the Federal Act.

26. Personnel of the State and the Department shall be mutually available to serve as witnesses in enforcement actions taken by either party.

Article X: Bonds

27. For all surface coal mines on Federal lands, Mining and Minerals and the Secretary shall require all operators to submit a single performance bond to cover the operator's responsibilities under the Federal Act and the Program, payable to the State, and if required by Federal regulations in Subchapter D, the United States. The performance bond shall be of sufficient amount to comply with the requirements of both State and Federal law and release of the bond shall be conditioned upon compliance with all applicable State and Federal requirements. If the cooperative agreement is terminated, the bonds will revert to being payable only to the United States to the extent that Federal lands are involved. Submission of a performance bond does not satisfy the requirements for a Federal lease bond required by 43 CFR 3474 or a lessee protection bond required in addition to a performance bond, in certain circumstances, by section 715 of the Federal Act.

28. Prior to releasing the operator from an obligation under the performance bond required by the Program for any Federal lands, Mining and Minerals shall obtain the consent of OSM. Mining and Minerals shall also advise OSM of adjustments to the performance bond.

29. The operator's performance bond shall be subject to forfeiture with the consent of the Department, in accordance with the procedures and requirements of the Program.

Article XI: Designating Land Areas Unsuitable for All or Certain Types of Surface Coal Mining

30. Mining and Minerals and the Director shall cooperate with each other in the review and processing of petitions to designate lands as unsuitable for surface coal mining operations. When either agency receives a petition that could impact adjacent Federal or non-Federal lands, the agency receiving the petition shall (1) notify the other of receipt and of the anticipated scheduled for reaching a decision; and (2) request and fully consider data, information and the views of the other.

The authority to designate State and private lands as unsuitable for mining is reserved to the State. The authority to designate Federal lands as unsuitable for mining is reserved to the Secretary or his designated representative.

Article XII: Termination of Cooperative Agreement

31. This Agreement may be terminated by the State or the Department under the provisions of 30 CFR 745.15.

Article XIII: Reinstatement of Cooperative Agreement

32. If this Agreement has been terminated in whole or in part it may be reinstated under the provisions of 30 CFR 745.16.

Article XIV: Amendments of Cooperative Agreement

33. This Agreement may be amended by mutual agreement of the State and the Department. An amendment proposed by one party shall be submitted to the other with a statement of the reasons for such proposed amendment. The amendment shall be adopted after Federal rulemaking in accordance with 30 CFR 745.11. The party to whom the proposed amendment is submitted shall signify its acceptance or rejection of the proposed amendment, and if rejected shall state the reasons for rejection.

Article XV: Changes in State or Federal Standards

34. The Department or the State may from time to time promulgate new or revised performance or reclamation requirements or enforcement and administration procedures. Each party shall, it it determines it to be necessary to keep this Agreement in force, change or revise its regulations and request necessary legislative action. Such changes shall be made under the procedures of 30 CFR Part 732 for changes to the State Program, and under the procedures of section 501 of the Federal Act for changes to the Federal Lands Program.

35. The State and the Department shall provide each other with copies of any changes to their respective laws, rules, regulations and standards pertaining to the enforcement and administration of this Agreement.

Article XVI: Changes in Personnel and Organization

36. The State and the Department shall, consistent with 30 CFR 745.12, advise each other of changes in the organization, structure, functions, duties and funds of the offices, departments, divisions and persons within their organizations. Each shall promptly advise the other in writing of changes in key personnel, including the head of a department or division, or changes in the functions or duties of persons occupying the principal offices within the structure of the Program. The State and the Department shall advise each other in writing of changes in the location of offices, addresses, telephone numbers and changes in the names, locations and telephone numbers of their respective mine inspectors and the area within the State for which such inspectors are responsible.

Article XVII: Definitions

37. Terms and phrases used in this Agreement which are defined in the Federal Act, 30 CFR 700, 701, and 740, and defined in the New Mexico Surface Mining Act (69–25A–1, *et seq.*, NMSA 1978) and the rules and regulations promulgated pursuant to that Act, shall be given the meanings set forth in said definitions. Where there is a conflict between the above referenced State and Federal definitions, the definitions used in the approved Program will apply, except in the case of a term which defines the Secretary's remaining responsibilities under the Federal Act and other laws.

Article XVIII. Reservation of Rights

38. In accordance with 30 CFR 745.13, this Agreement shall not be construed as waiving or preventing the assertion of any rights that have not been expresaly addressed in this Agreement that the State or the Secretary may have under other laws or regulations, including but not limited to those listed in Appendix A.

Dated: December 7, 1982.

Bruce King,

Governor of New Mexico.

Dated: November 24, 1982.

James G. Watt,

Secretary of the Interior.

Appendix A

1. The Federal Land Policy and Management Act, 43 U.S.C. 1701, *et seq.*, and implementing regulations.

2. The Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.*, and implementing regulations including 30 CFR Part 211.

3. The National Environmental Policy Act of 1969, 42 U.S.C. 4321, *et seq.*, and implementing regulations including 40 CFR Part 1500 *et seq.*

4. The Endangered Species Act, 16 U.S.C. 1531 *et seq.*, and implementing regulations including 50 CFR Part 402.

5. The National Historic Preservation Act of 1966, 16 U.S.C. 470 *et seq.*, and implementing regulations including 36 CFR Part 800.

6. The Clean Air Act, 42 U.S.C. 7401, *et seq.*, and implementing regulations.

7. The Federal Water Pollution Control Act, 33 U.S.C. 1251, *et seq.*, and implementing regulations.

8. The Resource Conservation and Recovery Act of 1976, 42 U.S.C. 6901 *et seq.*, and implementing regulations.

9. The Reservoir Salvage Act of 1960, as amended by the Preservation of Historical and Archaeological Data Act of 1974, 16 U.S.C. 469 *et seq.*

10. Executive Order 11593, Cultural Resource Inventories on Federal Lands.

11. Executive Order 11988 for Flood Plain Protection. Executive Order 11990 for Wetlands Protection.

12. The Mineral Leasing Act for Acquired Lands, 30 U.S.C. 351, *et seq.*, and the implementing regulations.

13. The Stock Raising Homestead Act of 1916, 43 U.S.C. 291, *et seq.*

14. The Constitution of the United States.

15. The Constitution of the State and State law.

Appendix B—Procedure for Cooperative Review of Permit Application Packages and Applications for Permit Revisions or Renewals for Federal Coal Mines in New Mexico

I: Point of Contact and Coordination During the Review of Permit Application Packages and Applications for Permit Revisions and Renewals

A. The New Mexico Mining and Minerals Division (Mining and Minerals) will:

1. Be the point of contact and coordinate communications with the applicant on issues concerned with the development, review and approval of permit application packages or applications for permit revisions or renewals, except on issues concerned with the requirements of the Mineral Leasing Act of 1920 (MLA), 30 U.S.C. 181, *et seq.*, or National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, and the requirements of other Federal laws not addressed in the applications.

2. Communicate with the applicant on issues of concern to the appropriate Federal land management agency (FLMA) and immediately advise FLMA and OSM of such issues and communication.

3. Communicate with the applicant on issues of concern to the Office of Surface Mining (OSM), and immediately advise OSM of such issues and communications.

4. Communicate with the applicant on issues of concern to the Minerals Management Service (MMS) and immediately advise MMS and OSM of such issues and communications as they pertain to the application.

5. Communicate with the applicant on issues of concern to other agencies within the Department of the Interior, as appropriate, and immediately advise such agencies of such issues and communications.

6. Provide OSM with a copy of each apparent completeness review upon completion.

B. MMS will:

1. Receive any documentation required by the 30 CFR Part 211 regulations.

2. Be the point of contact with the applicant on issues concerned exclusively with the 30 CFR Part 211 regulations.

3. Provide Mining and Minerals and OSM with copies of pertinent correspondence.

C. OSM will: Be responsible for ensuring that any information OSM receives which has a bearing on decisions regarding the permit application package or application for

a permit revision or renewal is sent promptly to Mining and Minerals.

II: Receipt and Distribution of Permit Application Packages and Applications for Permit Revisions and Renewals

A. Mining and Minerals will:

1. Receive the permit application package, the application for a permit revision or renewal or the correspondence from the applicant and transmit an appropriate number of copies to FLMA, MMS, OSM and other agencies specified by the Secretary after the application has been filed. Such transmittal will include a request for a conference on the submissions, as needed.

2. Identify an application manger responsible for coordinating the review and notify OSM, MMS and FLMA as necessary.

3. Upon receipt of an application, meet with OSM to discuss the application and agree upon a schedule, and, when Mining and Minerals requests assistance, agree upon a work plan with OSM.

B. OSM, MMS and FLMA will: Identify an application manager upon receipt of the application and notify Mining and Minerals of the identity of the application manager.

III: Determination of Completeness

Mining and Minerals will:

1. Determine the completeness of a permit application package or application for a permit revision or renewal.

2. Issue public notice of the availability of complete applications for the public to review in accordance with the public review procedure set forth in New Mexico Coal Surface Mining Commission Rule 80–1, Part 11.

IV: Determination of Preliminary Findings of Substantive Adequacy

A. Mining and Minerals will:

1. Consult with MMS, FLMA, OSM, and other Federal agencies specified by the Secretary to review the filed application for preliminary findings of substantive adequacy (henceforth "preliminary findings") and to assess the need for additional data requirements in their respective areas of responsibility.

2. Arrange meetings and field examinations with the interested parties as necessary to determine the preliminary findings.

3. Advise the applicant of the preliminary findings upon the advice and consent of FLMA, MMS, OSM and other Federal agencies specified by the Secretary.

4. Transmit the letter(s) informing the applicant of the preliminary findings, with copies to FLMA, OSM, MMS and other agencies specified by the Secretary.

5. When requested, furnish the Director with copies of correspondence with the applicant and all information received from the applicant.

B. OSM will:

1. Review the permit application package or application for a permit revision or renewal for preliminary findings and, at the request of Mining and Minerals, provide technical assistance as possible.

2. Furnish Mining and Minerals with preliminary findings within 45 calendar days of receipt of the permit application package or application for a permit revision or renewal and specify any requirements for additional data.

3. No later then 30 days from notification of completeness, initiate NEPA compliance procedures and determine the need for an Environmental Assessment or an Environmental Impact Statement.

4. Publish notices of NEPA documents as required by Federal law and regulations.

5. Participate, as arranged, in meetings and field examinations.

C. FLMA will:

1. Review the permit application package or application for permit revision or renewal for preliminary findings as to whether the applicant's proposed postmining land use is consistent with FLMA's land use plan, and the adequacy of measures to protect Federal resources not covered by the rights granted by the Federal coal lease.

2. Furnish Mining and Minerals with preliminary findings within 45 calendar days of receipt of the permit application package or application for a permit revision or renewal and specify any requirements for additional data.

3. Participate, as arranged, in meetings and field examinations.

D. MMS will:

1. Review the permit application package or application for a permit revision or renewal in regard to MLA requirements.

2. Furnish Mining and Minerals with the preliminary findings within 45 calendar days of receipt of the permit application package or application for a permit revision or renewal and specify any requirements for additional data.

3. Participate, as arranged, in meetings and field examinations.

E. Other agencies specified by the Secretary will:

1. Review the permit application package or application for a permit revision or renewal for preliminary findings in regard to their responsibilities under law.

2. Furnish Mining and Minerals with preliminary findings within 45 calendar days of receipt of the application and specify any requirements for additional data.

3. Participate, as arranged, in meetings and field examinations.

V: Findings of Technical Adequacy and NEPA Compliance

A. Mining and Minerals will:

1. Develop and coordinate the technical review of permit application packages or applications for a permit revision or renewal. The review will include representatives of Mining and Minerals, MMS, FLMA, OSM and other Federal agencies specified by the Secretary as appropriate.

2. Coordinate with OSM, for the purpose of eliminating duplication, and provide to OSM a complete technical analysis of the permit application or application for permit revision or renewal pursuant to the Federal Act and the Program that will serve as the technical base for an Environmental Assessment (EA) or an Environmental Impact Statement (EIS) as may be required by NEPA for each permit application package or application for a permit revision or renewal.

3. Coordinate with MMS, for the purpose of eliminating duplication, to conduct a technical analysis that will assist MMS in making findings as may be necessary to determine compliance with the MLA.

4. Coordinate with FLMA, for the purpose of eliminating duplication, to conduct a technical analysis of issues regarding postmining land use and the adequacy of measures to protect Federal resources not covered by the rights granted by the Federal coal lease.

5. Coordinate with other agencies specified by the Secretary, for the purpose of eliminating duplication, to conduct technical analyses of issues within their jurisdiction.

B. OSM will:

1. At the request of Mining and Minerals, assist as possible in the review of the permit application package or application for a permit revision or renewal for technical adequacy in a timely manner as set forth by a schedule developed by Mining and Minerals in cooperation with OSM.

2. Take the leadership role for the development of the EA and/or EIS.

C. MMS will:

1. Review the permit application package or application for a permit revision or renewal for compliance with 30 CFR Part 211.

2. Furnish Mining and Minerals, through OSM, findings on compliance with 30 CFR Part 211 in a timely manner as set forth by a schedule developed by Mining and Minerals in cooperation with MMS.

3. Participate, as arranged, in meetings and field examinations.

D. FLMA will:

1. Determine whether the permit application package or application for a permit revision or renewal provides for postmining land use consistent with FLMA's land use plan and determine the adequacy of measures to protect Federal resources not covered by the rights granted by the Federal coal lease.

2. Furnish Mining and Minerals, through OSM, its determination on the technical adequacy in a timely manner as set forth by a schedule developed by Mining and Minerals in cooperation with FLMA.

3. Participate, as arranged, in meetings and field examinations.

E. Other agencies specified by the Secretary will:

1. Review the permit application package or application for a permit revision or renewal in regard to their responsibilities under law.

2. Furnish Mining and Minerals, through OSM, findings on compliance with other applicable Federal laws and regulations in a timely manner as set forth by a schedule developed in cooperation with Mining and Minerals.

3. Participate, as arranged, in meetings and field examinations.

VI: Preparation and Transmittal of the Decision Document

A. Mining and Minerals will:

1. Assist OSM in the preparation of the decision document for the permit application package or application for a permit revision or renewal, unless the work plan and schedule agreed upon provide otherwise. Mining and Minerals will provide OSM with:

a. A recommendation on the proposal;

b. A finding of compliance with the Program as approved by the Secretary and the regulations promulgated thereunder, which will consist of an analysis of critical issues raised during the course of the review and the resolution of those issues; and

c. All other specific written findings required under section 69-25A-14, NMSA 1978.

2. Consider the comments of OSM, MMS and FLMA and other appropriate Federal agencies when assisting in the preparation of the decision document.

B. OSM will:

1. Prepare the approved NEPA compliance document.

2. Prepare the decision document with the assistance of Mining and Minerals unless the work plan and schedule agreed upon provide otherwise. The decision document shall contain the following:

a. An analysis of the enviromental impacts of the proposal and alternatives to the proposal, prepared in compliance with NEPA, the Council on Environmental Quality regulations and OSM's NEPA compliance handbook;

b. The determinations and recommendations of FLMA;

c. The memorandum of recommendation from the MMS to the Assistant Secretary of the Interior for Energy and Minerals, with regard to MLA requirements;

d. The incorporation of the comments of other agencies specified by the Secretary, as appropriate; and

e. The relevant information submitted by Mining and Minerals as specified by A.1 of this Article.

3. Transmit the decision document to the Secretary.

C. FLMA will: Provide written concurrence on the final decision document to OSM with regard to postmining land use and the adequacy of measures to protect Federal resources not covered by rights granted by any Federal coal lease.

D. MMS will: Provide written concurrence on the final decision document to OSM with regard to its responsibilities.

E. Other agencies will: Provide written concurrence on the final decision document to OSM with regard to their responsibilities.

VII: Decision and Permit Issuance

A. The Secretary will:

1. Evaluate the analysis, conclusions, and recommendations in the decision document as necessary to determine whether he approves or disapproves.

2. Inform Mining and Minerals immediately of his decision. Where the Secretary decides not to approve, the reasons for not approving, and recommendations for remedy shall be specified.

B. Mining and Minerals will:

1. Issue the permit, revised permit, or permit renewal for surface coal mining and reclamation operations after making a finding of compliance with the approved Program in the manner set forth in this Agreement.

2. Advise the operator, in the permit, of the necessity of obtaining Secretarial approval for those statutory requirements which have not been delegated to the State prior to directly affecting Federal lands and, if necessary, prohibit the operator from directly affecting Federal lands under the permit, revised permit, or permit renewal until after the Secretary's approval of the mining plan has been received.

3. Reserve the right to modify the permit, revised permit or permit renewal to conform with the Secretary's decision if a permit, revised permit, or permit renewal has been issued prior to receipt of the Secretary's decision.

VIII: Resolution of Conflict

A. Every effort will be made to resolve errors, omissions and conflicts on data and data analysis at the State and field level.

B. Areas of disagreement between the State and the Department shall be referred to the Governor and the Secretary for resolution.

(Sec. 523(c) of the Surface Mining Control and Reclamation Act of 1977; Pub. L. 95-87; (30 U.S.C. 1273(c)))

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect; documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Proclamation 5007 of December 17, 1982

Fiorello H. La Guardia Memorial Day

By the President of the United States of America

A Proclamation

December 11, 1982, marked the one hundredth anniversary of the birth of Fiorello H. La Guardia, affectionately known as The Little Flower, who served with great distinction for twelve years in the United States House of Representatives and then for ten years as Mayor of New York City.

With his vast energy, fiery leadership, and considerable wisdom, Mr. La Guardia contributed greatly to the betterment of the United States and New York City, in the finest tradition of public service. He was first elected to Congress in 1916 and served with distinction in that body from 1917 to 1919 and from 1923 to 1933. In 1933, Mr. La Guardia was elected Mayor of New York City, and he guided the City through the difficult days of the Depression and the early years of World War II. To this day, New York City bears strong testament to the vision and determination that marked Mr. La Guardia's administration.

Mr. La Guardia's many accomplishments, and the honesty and fairness which characterized his work, continue to serve as a benchmark against which other careers in public service are judged, and as an inspiration to all Americans, particularly those who share his Italian heritage.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, pursuant to a joint resolution of the Congress, do hereby declare December 11, 1982, as "Fiorello H. La Guardia Memorial Day", and I call upon all the people of the United States to observe that day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 17th day of December, in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 47, No. 245
Tuesday, December 21, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 421

Cotton Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Interim rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises, and reissues, the Cotton Crop Insurance Regulations (7 CFR Part 421), effective with the 1983 and succeeding crop years, in accordance with the provisions of Secretary's Memorandum No. 1512–1, which requires a periodic review of FCIC's regulations as to need, currency, clarity, and effectiveness. FCIC has revised the regulations to: (1) Provide that the insured be required to file a notice of probable loss when the insured crop is damaged to the extent that a loss is probable and leave intact a representative sample of the unharvested crop, (2) prescribe the interest rate to be charged on any unpaid premium balances, (3) define FCIC's liability in cases of loss by fire when the insured has other insurance against loss by fire, (4) delete a section of the regulations requiring the posting of a list of indemnities paid within a county, (5) delete the reduction in guarantee for unharvested acreage provision, (6) combine the second and third stages and provide for full coverage in both stages, (7) increase the first stage guarantee to 60 percent of the full coverage, (8) provide improved coverage in cases where the producer elects not to have FCIC fire and hail coverage and buys an equal amount of such coverage from private companies, (9) provide a policy that is easy to read and understand, and (10) include an application form that is multicrop instead of single-crop format to reduce the time and paperwork burden on the applicant. In addition, the regulations have been reviewed and corrected as to language and format. The intended effect of this interim rule is to improve the debt management practices of FCIC, revise the system of reporting damage or loss to insured crops, remove certain restrictions on coverage of insurance in the various stages, reduce the time and paperwork demands on an applicant, and comply with the provisions of Secretary's Memorandum No. 1512–1, as to reviewing the regulations with regard to need, currency, clarity, and effectiveness.

DATES: Effective Date: December 16, 1982. Comment Date: Written comments, data, and opinions on this proposed rule must be submitted not later than February 22, 1983, to be sure of consideration.

ADDRESS: Written comments on this interim rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250; telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this interim rule and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1512–1 (June 11, 1981).

Information collection requirements contained in these regulations (7 CFR Part 421) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

Merritt W. Sprague, Manager, FCIC, has determined that: (1) This action is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) this action does not increase the Federal paperwork burden for individuals, small businesses, and other persons, and (3) this action conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance Program to which this proposed rule applies are: Title—Crop Insurance; Number 10.450.

This action will not have a significant impact specifically upon area and community development; therefore, review as established in Executive Order (E.O.) 12372 (July 14, 1982) was not used to assure that units of local government are informed of this action.

It has been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

It has also been determined that this action constitutes a review as to need, currency, clarity, and effectiveness of these regulations under the provisions of Secretary's Memorandum No. 1512–1 (June 11, 1981). The sunset review date established for these regulations is October 1, 1987.

Merritt W. Sprague, Manager, FCIC, has determined that an emergency situation exists which warrants immediate implementation of this rule without allowing for the normal 60-day comment period prior to implementation because the regulations for insuring cotton provide that any amendments thereto must be placed on file or provided to insureds 15 days before the cancellation date for the crop insured. The cancellation date established for cotton is December 31; therefore, any amendments to the regulations must be placed on file by December 15. There would not be sufficient time to permit a comment period prior to implementation of these regulations and still comply with the regulations with respect to placing these regulations in file by such date.

FCIC is soliciting public comment on this interim rule for 60 days after publication in the **Federal Register**, and this interim rule will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Pursuant to the administrative provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule prior to implementation are impracticable and contrary to the public interest; however, comments are solicited for 60 days after publication of this rule and such comments made pursuant to this notice will be available

for public inspection in the Office of the manager during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 421

Crop insurance, Cotton.

Interim Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby amends and reissues the Cotton Crop Insurance Regulations (7 CFR Part 421), effective with the 1983 and succeeding crop years, as follows:

PART 421—[AMENDED]

1. The Subpart heading is revised to read as follows:

Subpart—Regulations for the 1983 and Succeeding Crop Years

2. Sections 421.1–421.7 are revised to read as set forth below:

§ 421.1 Availability of cotton crop insurance.

Insurance shall be offered under the provisions of this subpart on cotton in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this part the names of the counties in which cotton insurance will be offered.

§ 421.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for cotton which shall be shown on the county actuarial table on file in the service office and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverge level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 421.3 [Reserved]

§ 421.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefits under the contract except as provided in the policy.

§ 421.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the cotton insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation of other erroneous action or advice by an agent or employee of the Corporation: (1) Is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and

(b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000, finds: (1) That an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 421.6 The contract.

(a) The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the cotton crop as provided in the policy. The contract shall consist of the application, the policy, the appendix, and the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the service office.

§ 421.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the cotton crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the service office on or before the applicable closing date for the county on file in the service office.

(b) The Corporation may discontinue the acceptance of applications in any county upon its determination that the insurance risk is excessive, and also, for the same reason, may reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the office for the county and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the period of such extension. However, if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1969 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of cotton contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Cotton Insurance Policy for the 1983 and succeeding crop years, are as follows:

BILLING CODE 3410-08-M

UNITED STATES DEPARTMENT OF AGRICULTURE

FEDERAL CROP INSURANCE CORPORATION

CROP INSURANCE APPLICATION

CONTINUOUS CONTRACT

1. Name of Applicant _____ [ ][ ] -[ ][ ][ ] -[ ][ ][ ][ ][ ]
6. State County 7. Contract Number

2. Authorized Representative _____ 8. County _____ 9. State _____

3. Street or Mailing Address _____ [ ][ ][ ][ ][ ][ ][ ][ ][ ][ ] [ ] [ ]
10. Identification Number 11. SSN--Tax

4. City and State _____ 5. Zip Code _____ 12. Type of Entity _____

13. Applicant is over 18: Yes___ No___ _____
If no, Date of Birth

A. The applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (herein called "Corporation"), hereby applies to the Corporation for insurance on the applicant's share in the crop(s) shown below planted on insurable acreage as shown on the county actuarial table. The applicant elects from the actuarial table the coverage level, and where applicable, a price election or plan of insurance. THE PREMIUM RATE AND APPLICABLE PRODUCTION GUARANTEE OR AMOUNT OF INSURANCE PER ACRE SHALL BE THOSE SHOWN ON THE APPLICABLE COUNTY ACTUARIAL TABLE FILE IN THE SERVICE OFFICE FOR EACH CROP YEAR.

14. Effective Crop Year	15. Crop	16. Type, Class Plan of Ins.	17. Alpha Election	18. Price Election	19. Level Election	20. 21. 22. For Agency Use Only (A)	(P)

24. [ ] Crop(s) NOT insured the first year: _____ _____ _____

B. This application is hereby accepted by the Corporation except that the Corporation may reject the application on the basis that (1) the Corporation has determined that the risk is excessive under the provisions of paragraph 7(b) of the individual crop insurance regulations; (2) any material fact is concealed or misrepresented or fraud occurs in the application, or submission of the application; (3) the applicant is indebted to any United States Government Agency and that indebtedness is delinquent; (4) the applicant previously had crop insurance terminated for violation of the terms of the contract or the regulations, or for failure to pay the applicant's indebtedness; (5) the applicant is debarred by any United States Government Agency; or (6) the applicant has failed to provide complete and accurate information to material requests in this application.

Rejection shall be accomplished by depositing notification thereof in the United States Mail, Postage Paid, to the above address. Unless rejection as provided above or the time for filing applications has passed at the time this application is filed, the contract shall be in effect for the crops and crop years specified. AND SHALL CONTINUE FOR EACH SUCCEEDING CROP YEAR UNTIL CANCELED OR TERMINATED as provided in the contract. This accepted application, the insurance policies, the applicable appendix(es), and the provisions of the county actuarial table showing the insurable and uninsurable acreage, coverage levels, premium rates, and wherever applicable, the production guarantees, amounts of insurance, or plan of insurance shall constitute the contract. No term or condition of the contract shall be waived or changed except in writing by the Corporation.

SEE REVERSE SIDE OF FORM FOR STATEMENT REQUIRED BY PRIVACY ACT OF 1974	34. Page ___of___pages

Following is the Privacy Act Statement found on the reverse side of the Application for Crop Insurance:

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT)

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552(a)):

The authority for requesting the information to be supplied on this form is the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and the regulations promulgated thereunder (7 CFR 400 et seq.). The information requested is necessary for FCIC to consider and process the application for insurance; to assist in determining the correct premium and indemnity; and to determine the correct parties to the insurance contract. The information may be furnished to FCIC contract agencies and contract loss adjusters, reinsured companies, other U.S. Department of Agriculture Agencies, Internal Revenue Service, Department of Justice, or other State and Federal law enforcement agencies, and in response to orders of a court, magistrate, or administrative tribunal.

Furnishing the Social Security number is voluntary and no adverse action will result from failure to do so. Furnishing the information, other than the Social Security number, is also voluntary; however, failure to furnish the correct, complete information requested may result in rejection of the application and/or subsequent denial of any claim for indemnity which may be filed. The failure to supply correct, complete information will also invalidate the automatic acceptance provisions of Section 8 hereof and may substantially delay acceptance of the application and processing of any claim for indemnity.

BILLING CODE 3410-08-C

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Cotton—Crop Insurance Policy

[This is a continuous contract. Refer to Section 15]

Agreement to insure: We will provide the insurance described in this policy in return for the premium and compliance with all applicable provisions.

Throughout this policy "you" and "your" refer to the insured shown on the approved Application and "we," "us" and "our" refer to the Federal Crop Insurance Corporation.

Terms and Conditions

1. Causes of loss.

a. The insurance provided is against unavoidable loss of production resulting from adverse weather conditions, fire, insects, plant disease, wildlife, earthquake, or volcano occurring within the insurance period, unless those causes are excepted, excluded, or limited by the actuarial table.

b. We will not insure against any cause of loss of production due to:

(1) The neglect or malfeasance of you, any member of your household, your tenants or employees;

(2) The failure to follow recognized good cotton farming practices;

(3) Damages resulting from the impoundment of water by any governmental, public or private dam or reservoir project; or

(4) Any cause not specified in section 1a as an insured loss.

2. Crop, acreage, and share insured.

a. The crop insured shall be American Upland lint cotton which is grown on insured acreage and for which we provide a guarantee and premium rate on the actuarial table.

b. The acreage insured for each crop year shall be that acreage planted to cotton on insurable acreage as provided for an actuarial table and in which you have a share, as reported by you or as determined by us, whichever we shall elect. The acreage insured of skiprow cotton shall be the acreage occupied by the rows of cotton after eliminating the skipped-row portions.

c. The insured share shall be your share as landlord, owner-operator, or tenant in the insured cotton at the time of planting.

d. We do not insure any acreage:

(1) Which is non-irrigated and from which a hay crop was harvested or a small grain crop reached the heading stage in the same calendar year;

(2) Which is new ground acreage;

(3) Where the farming practices carried out are not in accordance with the farming practices for which the premium rates have been established;

(4) Which is irrigated and an irrigated practice is not provided for on the actuarial table. (You have the option to insure such acreage by reporting it for insurance as provided in section 3.);

(5) Which is destroyed and we determine it is practical to replant to cotton and such acreage was not replanted;

(6) Initially planted after the final planting date contained in the actuarial table, unless you sign an option form agreeing to coverage reduction; or

(7) planted to a type or variety of cotton not established as adapted to the area or excluded on the actuarial table.

e. Where insurance is provided for an irrigated practice:

(1) You shall report as irrigated only the acreage for which you have adequate facilities and water to carry out a good cotton irrigation practice at the time of planting; and

(2) Any loss of production caused by failure to carry out a good cotton irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

f. Acreage which is planted for the development of production of hybrid seed or for experimental purposes is not insured unless we agree in writing to insure such acreage.

g. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to planting.

3. Report of acreage, share, and where applicable, practice.

You shall report on our form:

a. All the acreage of cotton in the county in which you have a share;

b. The practice; and

c. Your share at the time of planting.

You shall designate separately any acreage that is not insurable. You shall report if you do not have a share in any cotton planted in the county. This report shall be submitted annually before the reporting date. If you do not submit this report by the reporting date, we may elect to determine by unit the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. Production guarantees, coverage levels, and prices for computing indemnities.

a. The production guarantees, coverage levels, and prices for computing indemnities will be contained in the actuarial table.

b. The production guarantees in the actuarial table are the second stage guarantees. The first stage guarantee is 60 percent of the second stage guarantee.

The stages are:

(1) First Stage—Planting until 50 days after the final planting date or until the shedding of the first blooms, whichever occurs first. We may limit the liability to the first stage if the cotton was damaged during this period to the extent that farmers generally would not further care for the cotton; or

(2) Second Stage—Includes all insured cotton after the first stage.

c. You may change the coverage level and price election before the closing date for submitting applications for the crop year.

5. Annual premium.

a. The annual premium is earned and payable at the time of planting. The amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time of planting, times the applicable premium adjustment percentage.

ANNUAL PREMIUM ADJUSTMENT TABLE [1]

[Percent adjustments for favorable continuous insurance experience]

[1] For premium adjustment purposes, only the years during which premiums were earned shall be considered.

[2] Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned

[3] Only the crop years after the 1979 crop year will be used to determine the number of "Loss Years" (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year.)

b. Interest will accrue at the rate of one and a half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

c. Any premium adjustment applicable to the contract shall be transferred to:

(1) The contract of your estate or surviving spouse in case of your death;

(2) The contract of the person who succeds you if such person had previously participated in the farming operation; or

(3) Your contract if you stop farming in one county and start farming in another county.

d. If participation is not continous, any premium will be computed on the basis of previous unfavorable insurance experience but no premium reduction under section 5a will be applicable.

6. Deductions for debt.

Any unpaid amount due us may be deducted from any indemnity payable to you or from any loan or payment due you under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies, unless prohibited by law.

7. Insurance period. Insurance attaches when the cotton is planted and ends at the earliest of:

a. Total destruction of the cotton;

b. Removal of the cotton from the field;

c. Final adjustment of a loss; or

d. The date immediately following planting as follows:

(1) Arizona and California—January 31;

(2) Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, LaSalle, Dimmit Counties, Texas and all Texas counties south thereof—September 30;

(3) All other Texas counties and other states—December 31.

8. Notice of damage or loss.

a. In case of damage or probable loss:

(1) You must give us written notice if:

(a) During the period before harvest, the cotton on any unit is damaged and you decide not to further care for or harvest any part of it;

(b) You want our consent to put the acreage to another use; or

(c) After consent to put acreage to another use is given, additional damage occurs.

Insured acreage may not be put to another use until we have appraised the cotton and given written consent. We will not consent to another use until it is too late to replant. You must notify us when such acreage is put to another use.

(2) You must give us notice of probable loss at least 15 days before the beginning of harvest if you anticipate a loss on any unit. If probable loss is later determined, immediate notice shall be given and a respresentative sample of unharvested cotton (at least 10 feet wide and the entire length of the field) shall be left for a period of 15 days from the date of the notice, unless we give you written consent to harvest the sample.

(3) In addition to the notices required by this section, if you are going to claim an indemnity on any unit, we must be given notice not later than 30 days after the earliest of:

(a) Total destruction of the cotton on the unit;

(b) Harvest of the unit; or

(c) The calendar date for the end of the insurance period.

b. You may not destroy any cotton on which an indemnity will be claimed until we give consent.

c. You must be given written consent by us before you destroy any of the cotton which is not to be harvested.

d. We may reject any claim for indemnity if any of the requirements of this section or section 9 are not complied with

9. Claim for indemnity.

a. Any claim for indemnity on a unit shall be submitted to us on our prescribed form not later than 60 days after the earliest of:

(1) Total destruction of the cotton on the unit;

(2) Harvest of the unit; or

(3) The calendar date for the end of the insurance period

b. We shall not pay any indemnity unless you:

(1) Establish the total production of cotton on the unit and that any loss of production has been directly caused by one or more of the insured causes during the insurance period; and

(2) Furnish all information we require concerning the loss.

c. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total production of cotton to be counted under section 9d;

(3) Multiplying the remainder by the price election; and

(4) Multiply this result by your share.

If the information reported by you results in a lower premium than the actual premium determined by us, the indemnity will be reduced proportionately.

d. The total production to be counted for a unit shall include all harvested and appraised production but, shall not include any harvested production destroyed due to insurable causes occurring within the insurance period before being removed from the field.

(1) When mature cotton has been damaged solely by insured causes, the production to count shall be reduced if, on the date the final notice of loss is given by the insured, the price quotation for cotton of like quality (price quotation "A") at the applicable spot market, as determined by the Corporation, is less than 75 percent of price quotation "B". Price quotation "B" shall be that day's spot market price quotation at the same market for cotton of the grade, staple length, and micronaire reading shown on the actuarial table for this purpose. The pounds of production to be counted shall be determined by multiplying the actual number of pounds of such production by price quotation "A" and dividing the result by 75 percent of price quotation "B".

(2) Appraised production to be counted shall include:

(a) Unharvested production on harvested acreage and potential production lost due to uninsured causes and failure to follow recognized good cotton farming practices;

(b) Not less than the guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause;

(c) Only the appraised production in excess of the difference between the first and second stage production guarantee for any acreage which does not qualify for the second stage guarantee.

(3) Any appraisal we have made on insured acreage for which we have given written consent to be put to another use shall be considered production unless such acreage:

(a) Is not put to another use before harvest of cotton becomes general in the county;

(b) Is harvested; or

(c) Is further damaged by an insured cause before the acreage is put to another use.

(4) The cotton stalks shall not be destroyed on any acreage for which an indemnity is claimed, until consent is given by us. An appraisal of not less than the second stage guarantee may be made on acreage where the stalks have been destroyed without our consent.

(5) When you have elected to exclude hail and fire as insured causes of loss and you have obtained at least a like amount of hail and fire insurance and the cotton is damaged by hail or fire, appraisals will be made as follows:

(a) If hail or fire occurs prior to loss caused by any other insured cause and the percent of hail or fire loss determined as an average of the entire unit exceeds the following percentages for the applicable level, there will be an appraisal for uninsured causes as follows:

(i) Level 1. Each percent of loss in excess of 50 percent will result in an appraisal for uninsured causes of 2.00 percent of the guarantee;

(ii) Level 2. Each percent of loss in excess of 35 percent will result in an appraisal for uninsured causes of 1.54 percent of the guarantee; and

(iii) Level 3. Each percent of loss in excess of 25 percent will result in an appraisal for uninsured causes of 1.33 percent of the guarantee.

(b) If hail or fire occurs following a loss caused by any other insured cause and the amount of hail and fire insurance is reduced, an appraisal for uninsured causes will be made as follows:

(i) The hail and fire insurance indemnity will be divided by the original hail and fire insurance liability; and

(ii) This result applied to (a) (i), (ii) or (iii) above, whichever is applicable.

(6) The production of units commingled will be allocated to such units in proportion to the liability on the harvested acreage of each unit.

e. You will not abandon any insured cotton acreage to us.

f. You cannot bring suit or action against us unless you have complied with all policy provisions. If a claim is denied, you may sue us in the United States District Court under the provisions of 7 U.S.C. 1508(c). You must bring suit within 12 months of the date notice of denial is mailed to and received by you.

g. We will pay the loss within 30 days after we reach agreement with you entry of a final judgment, or the filing of any appraisal award with us. In no event shall we be liable for

interest or damages in connection with any claim for indemnity, whether we approve or disapprove such claim.

h. If you die, disappear, or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved after the cotton is planted for any crop year, any indemnity will be paid to the person(s) we determine to be beneficially entitled thereto.

i. If you have other fire insurance and fire damage occurs during the insurance period and you have not elected to exclude fire insurance from this policy, we shall be liable for loss due to fire only for the smaller of:

(1) The amount of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) The amount determined by us by which the loss from fire exceeds the indemnity paid or payable under such other insurance. For the purposes of this section, the amount of loss from fire shall be the difference between the fair market value of the production on the unit before the fire and after the fire, as determined by us from our appraisals.

10. Concealment or fraud.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. Transfer of right to indemnity on insured share.

If you transfer any part of your share during the crop year, you may transfer the right to an indemnity on an approved form. We may collect the premium from either you or your transferee or both. The transferee shall have the same rights and responsibilities provided by the contract.

12. Assignment of indemnity.

On our prescribed form and with our approval, you may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms required by the contract.

13. Subrogation. (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us, you must do all you can to preserve any such rights. If we pay you for your loss then your right of recovery will belong to us. If we recover more than we paid you plus our expenses, the excess will be paid to you.

14. Records and access to farm.

You shall keep for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all cotton produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by us shall have access to such records and the farm for purposes related to the contract.

15. Life of contract: cancellation and termination.

a. This contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, the contract will continue in force for each succeeding crop year unless canceled or terminated as provided for in this section.

b. This contract may be canceled by either you or us for any crop year by giving written notice on or before the cancellation date preceding such crop year.

c. This contract will terminate as to any crop year if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due. The date of payment of the amount due:

(1) If deducted from an indemnity claim shall be the date you sign such claim; or

(2) If deducted from payment under another program administered by United States Department of Agriculture shall be the date such payment was approved.

d. The cancellation and termination dates are:

State and County	Cancellation date	Termination date
Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, LaSalle, Dimmit Counties, Texas and all Texas counties lying south thereof.	Sept. 30	Jan. 31.
All other Texas counties and states.	Dec. 31	Mar. 31.

e. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution. *However*, if such event occurs after insurance attaches for any crop year, the contract shall continue in force through the crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

f. The contract shall terminate if no premium is earned for five consecutive years.

16. Contract changes.

We may change any terms and provisions of the contract from year to year. If your price election at which indemnities are computed is no longer offered, the actuarial table will provide the price election which you will be deemed to have elected. You shall be notified of changes at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective. Acceptance of any changes will be conclusively presumed in the absence of any notice from you to cancel the contract.

17. Meaning of terms.

For the purposes of cotton crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, practices where applicable, insurable and uninsurable acreage, and related information regarding cotton insurance in the county.

b. "Cotton" means only American Upland Cotton.

c. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

d. "Crop year" means the period within which the cotton is normally grown and shall be designated by the calendar year in which the cotton is normally harvested.

e. "Harvest" means the removal of the seed cotton from the open cotton boll or the severance of the open cotton boll from the stalk by either manual or mechanical means.

f. "Insurable acreage" means the land classified as insurable by us and shown as such on the actuarial table.

g. "Insured" means the person who submitted the application accepted by us.

h. "New ground acreage" in all states except Arizona, California, and New Mexico, means acreage on which it was necessary to remove or deaden timber and remove undergrowth to carry out established cultural practices. Pastureland, other than woodland pasture, cleared of underbrush and brought into cultivation will not be considered new ground acreage. In Arizona, California, and New Mexico, "new ground acreage" means any acreage which has not been planted to a crop in any one of the previous three crop years, except that acreage in tame hay or rotation pasture during the previous crop year shall not be considered new ground acreage.

i. "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

j. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by you or designated by us.

k. "Spot market" means a market so designated by the Secretary of Agriculture by Regulation (7 CFR 27.93) pursuant to 26 U.S.C. 1001.

l. "Tenant" means a person who rents land from another person for a share of the cotton or a share of the proceeds therefrom.

m. "Unit" means all insurable acreage of cotton in the county on the date of planting for the crop year (1) in which you have a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the cotton on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office or by written agreement between us and you. We shall

determine units as herein defined when the acreage is reported. Errors in reporting such units may be corrected by us to conform to applicable guidelines when adjusting a loss and we may consider any acreage and share reported by or for your spouse or child or any member of your household to be the bona fide share of you or any other person having the bona fide share.

18. Descriptive headings.

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction or meaning of any of the provisions of the contract.

Appendix B [Redesignated as Appendix A]

3. Appendix B is redesignated as Appendix A.

7 CFR Part 431

Soybean Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Interim rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Soybean Crop Insurance Regulations (7 CFR Part 431), effective with the 1983 and succeeding crop years, in accordance with the provisions of the Secretary's Memorandum No. 1512–1, which requires periodic review of FCIC's regulations as to need, currency, clarity, and effectiveness. In addition to the review process, FCIC has revised the regulations to: (1) Provide that the insured to the extent that a loss is probable file a notice of probable loss, and leave intact a representative sample of the unharvested crop, (2) prescribe the interest rate to be charged on any unpaid premium balances, (3) define FCIC's liability in cases of loss by fire when the insured has other insurance against loss by fire, (4) change the replanting provision to limit the payment to actual cost of replanting and to simplify the method of deducting and replanting payment from any additional loss, (5) delete the reduction in guarantee for unharvested acreage, (6) provide improved coverage where the producer elects not to have FCIC fire and hail coverage, and buys an equal amount of such coverage from private companies, and (7) provide a policy that is easy to read and understand. The intended effect of this rule is to revise the system of reporting damage or loss to insured crops, improve the debt management practices of FCIC, reduce the paperwork burden on individuals, simplify the method of deducting the replanting payments from other indemnities, and remove the restriction of the reduction in guarantee for unharvested acreage. FCIC has also made minor corrections to language and format.

DATES: Effective date: December 16, 1982.

Comment date: Written comments, data, and opinions on this rule must be submitted not later than February 22, 1983, to be sure of consideration.

ADDRESS: Written comment on this rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this rule and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1512–1 (June 11, 1981).

Information collection requirements contained in these regulations (7 CFR Part 431) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

Merritt W. Sprague, Manager, FCIC, has determined that this action (1) is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) does not increase the Federal paperwork burden for individuals, small businesses, and other persons, and (3) conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance program to which these regulations apply are: Title—Crop Insurance; Number 10.450.

This action will not have significant impact specifically upon area and community development; therefore, review as established in Executive Order (E.O.) No. 12372 (July 14, 1982), was not used to assure that units of local government are informed of this action.

It has been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

It has also been determined that this action constitutes a review as to need, currency, clarity, and effectiveness of these regulations under the provisions of Secretary's Memorandum No. 1512–1 (June 11, 1981). The sunset review date established for these regulations is October 1, 1987.

Merritt W. Sprague, Manager, FCIC, has determined that an emergency situation exists which warrants immediate implementation of this rule without allowing for the normal 60-day comment period prior to implementation because the regulations for insuring soybeans provide that any amendments must be placed on file or provided to insureds 15 days before the cancellation date for the crop. The cancellation date established for soybeans is December 31; therefore, any amendments must be placed on file by December 15. There would not be sufficient time to permit a comment period prior to implementation of these regulations and still comply with the regulations with respect to placing these regulations in file by such date.

FCIC is soliciting public comment on this interim rule for 60 days after publication in the Federal Register, and this interim rule will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the Federal Register as soon as possible.

Pursuant to the administrative provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule prior to implementation are impracticable and contrary to the public interest; however, comments are solicited for 60 days after publication of this rule and such comments made pursuant to this notice will be available for public inspection in the Office of the Manager during regular business hours, Monday through Friday.

Crop insurance, Soybeans.

Interim Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation

hereby amends and reissues the Soybean Crop Insurance Regulations (7 CFR Part 431), effective with the 1983 and succeeding crop years, as follows:

PART 431—[AMENDED]

1. The Subpart heading is revised to read:

Subpart—Regulations for the 1983 and Succeeding Crop Year

2. Sections 431.1–431.7 are revised to read as follows:

§ 431.1 Availability of Soybean Insurance.

Insurance shall be offered under the provisions of this subpart on soybeans in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this part the names of the counties in which soybean insurance will be offered.

§ 431.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels and prices at which indemnities shall be computed for soybeans which shall be shown on the county actuarial table on file in the service office and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 431.3 [Reserved]

§ 431.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 431.5 Good faith reliance on misrepresentation.

Notwithstanding another provision of the soybean insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation, (1) is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and

(b) The Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000.00, finds: (1) That an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 431.6 The contract.

(a) The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the soybean crop as provided in the policy. The contract shall consist of the application the policy, the appendix, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the service office.

§ 431.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the soybean crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the service office on or before the applicable closing date on file in the service office.

(b) The Corporation reserves the right to discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and also for the same reason, to reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the service office and publishing a notice in the **Federal Register** upon the Manager's determination that no selectivity will result during the period of such extension. However, if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1969 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of a soybean contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Soybean Insurance Policy for the 1983 and succeeding crop years are as follows:

FEDERAL CROP INSURANCE CORPORATION

CROP INSURANCE APPLICATION

CONTINUOUS CONTRACT

1. Name of Applicant _____ [ ][ ] -[ ][ ][ ] -[ ][ ][ ][ ][ ]
6. State County 7. Contract Number

2. Authorized Representative _____ 8. County _____ 9. State _____

3. Street or Mailing Address _____ [ ][ ][ ][ ][ ][ ][ ][ ][ ] [ ] [ ]
10. Identification Number 11. SSN--Tax

4. City and State _____ 5. Zip Code _____ 12. Type of Entity _____

13. Applicant is over 18: Yes___ No___ If no, Date of Birth _____

A. The applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (herein called "Corporation"), hereby applies to the Corporation for insurance on the applicant's share in the crop(s) shown below planted on insurable acreage as shown on the county actuarial table. The applicant elects from the actuarial table the coverage level, and where applicable, a price election or plan of insurance. THE PREMIUM RATE AND APPLICABLE PRODUCTION GUARANTEE OR AMOUNT OF INSURANCE PER ACRE SHALL BE THOSE SHOWN ON THE APPLICABLE COUNTY ACTUARIAL TABLE FILE IN THE SERVICE OFFICE FOR EACH CROP YEAR.

14. Effective Crop Year	15. Crop	16. Type, Class Plan of Ins.	17. Alpha Election	18. Price Election	19. Level Election	20. 21. 22. For Agency Use Only (A) (P)

B. This application is hereby accepted by the Corporation except that the Corporation may reject the application on the basis that (1) the Corporation has determined that the risk is excessive under the provisions of paragraph 7(b) of the individual crop insurance regulations; (2) any material fact is concealed or misrepresented or fraud occurs in the application, or submission of the application; (3) the applicant is indebted to any United States Government Agency and that indebtedness is delinquent; (4) the applicant previously had crop insurance terminated for violation of the terms of the contract or the regulations, or for failure to pay the applicant's indebtedness; (5) the applicant is debarred by any United States Government Agency; or (6) the applicant has failed to provide complete and accurate information to material requests in this application.

Rejection shall be accomplished by depositing notification thereof in the United States Mail, Postage Paid, to the above address. Unless rejection as provided above or the time for filing applications has passed at the time this application is filed, the contract shall be in effect for the crops and crop years specified. AND SHALL CONTINUE FOR EACH SUCCEEDING CROP YEAR UNTIL CANCELED OR TERMINATED as provided in the contract. This accepted application, the insurance policies, the applicable appendix(es), and the provisions of the county actuarial table showing the insurable and uninsurable acreage, coverage levels, premium rates, and wherever applicable, the production guarantees, amounts of insurance, or plan of insurance shall constitute the contract. No term or condition of the contract shall be waived or changed except in writing by the Corporation.

SEE REVERSE SIDE OF FORM FOR STATEMENT REQUIRED BY PRIVACY ACT OF 1974	34. Page ___of___pages

Following is the Privacy Act Statement found on the reverse side of the Application for Crop Insurance:

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT)

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552(a)):

The authority for requesting the information to be supplied on this form is the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and the regulations promulgated thereunder (7 CFR 400 et seq.). The information requested is necessary for FCIC to consider and process the application for insurance; to assist in determining the correct premium and indemnity; and to determine the correct parties to the insurance contract. The information may be furnished to FCIC contract agencies and contract loss adjusters, reinsured companies, other U.S. Department of Agriculture Agencies, Internal Revenue Service, Department of Justice, or other State and Federal law enforcement agencies, and in response to orders of a court, magistrate, or administrative tribunal.

Furnishing the Social Security number is voluntary and no adverse action will result from failure to do so. Furnishing the information, other than the Social Security number, is also voluntary; however, failure to furnish the correct, complete information requested may result in rejection of the application and/or subsequent denial of any claim for indemnity which may be filed. The failure to supply correct, complete information will also invalidate the automatic acceptance provisions of Section B hereof and may substantially delay acceptance of the application and processing of any claim for indemnity.

BILLING CODE 3410-08-C

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Soybean—Crop Insurance Policy

[This is a continuous contract. Refer to Section 15]

Agreement to insure: We will provide the insurance described in this policy in return for the premium and compliance with all applicable provisions.

Throughout this policy "you" and "your" refer to the insured shown on the approved Application and "we," "us" and "our" refer to the Federal Crop Insurance Corporation.

Terms and Conditions

1. Causes of loss.

a. The insurance provided is against unavoidable loss of production resulting from adverse weather conditions, fire, insects, plant disease, wildlife, earthquake, or volcano occurring within the insurance period, unless those causes are excepted, excluded, or limited by the actuarial table.

b. We will not insure against any cause of loss of production due to:

(1) The neglect or malfeasance of you, any member of your household, your tenants or employees;

(2) The failure to follow recognized good soybean farming practices;

(3) Damage resulting from the impoundment of water by any governmental, public or private dam or reservoir project; or

(4) Any cause not specified in section 1a as an insured loss.

2. Crop, acreage, and share insured.

a. The crop insured shall be soybeans which are planted for harvest as beans and which are grown on insured acreage and for which we provide a guarantee and premium rate on the actuarial table.

b. The acreage insured for each crop year shall be that acreage planted to soybeans on insurable acreage as provided for on the actuarial table and in which you have a share, as reported by you or as determined by us, whichever we shall elect.

c. The insured share shall be your share as landlord, owner-operator, or tenant in the insured soybeans at the time of planting.

d. We do not insure any acreage:

(1) Where the farming practices carried out are not in accordance with the farming practices for which the premium rates have been established;

(2) Which is irrigated and an irrigated practice is not provided for on the actuarial table. (You have the option to insure such acreage by reporting it for insurance as provided in section 3.);

(3) Which is destroyed and we determine it is practical to replant to soybeans and such acreage was not replanted;

(4) Initially planted after the final planting date contained in the actuarial table, unless you sign an option form agreeing to coverage reduction;

(5) Of volunteer soybeans;

(6) Planted to a type or variety of soybeans not established as adapted to the area or excluded on the actuarial table;

(7) Planted with another crop; or

(8) Of a second soybean crop following a soybean crop harvested in the same calendar year.

e. Where insurance is provided for an irrigated practice:

(1) You shall report as irrigated only the acreage for which you have adequate facilities and water to carry out a good soybean irrigation practice at the time of planting; and

(2) Any loss of production caused by failure to carry out a good soybean irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

f. Unless otherwise provided on the actuarial table, insurance shall attach only on acreage initially planted in rows far enough apart to permit cultivation, as determined by us; but, if such insured acreage is destroyed and replanted, whether in the same manner or by broadcasting, drilling, or in rows too close to permit cultivation, it shall be regarded as insured acreage and not as acreage put to another use.

g. Acreage which is planted for the development or production of hybrid seed or for experimental purposes is not insured unless we agree in writing to insure such acreage.

h. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to planting.

3. Report of acreage, share, and where applicable, practice.

You shall report on our form:

a. All the acreage of soybeans in the county in which you have a share;

b. The practice; and

c. Your share at the time of planting.

You shall designate separately any acreage that is not insurable. You shall report if you do not have a share in any soybeans planted in the county. This report shall be submitted annually before the reporting date. If you do not submit this report by the reporting date, we may elect to determine by unit the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. Production guarantees, coverage levels, and prices for computing indemnities.

a. The production gurantees, coverage levels, and prices for computing indemnities will be contained in the actuarial table.

b. You may change the coverage level and price election before the closing date for submitting applications for the crop year.

5. Annual premium.

a. The annual premium is earned and payable at the time of planting. The amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time of planting, times the applicable premium adjustment percentage.

ANNUAL PREMIUM ADJUSTMENT TABLE [1]

[Percent adjustments for favorable continuous insurance experience]

Loss ratio [2] through previous crop year	Numbers of years continuous experience through previous year

[1] For premium adjustment purposes, only the years during which premiums were earned shall be considered.
[2] Only the most recent 15 crop years will be used to determine the number of "Loss Years". (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year.)
[3] Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.

b. Interest will accrue at the rate of one and a half percent (1½%) simple interest per calender month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

c. Any premium adjustment applicable to the contract shall be transferred to:

(1) The contract of your estate or surviving spouse in case of your death;

(2) The contract of the person who succeeds you if such person had previously participated in the farming operation; or

(3) Your contract if you stop farming in one county and start farming in another county.

d. If participation is not continuous, any premium will be computed on the basis of previous unfavorable insurance experience but no premium reduction under section 5a will be applicable.

6. Deductions for debt.

Any unpaid amount due us may be deducted from any indemnity payable to you or from any loan or payment due you under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies, unless prohibited by law.

7. Insurance period.

Insurance attaches when the soybeans are planted and ends at the earliest of:

a. Total destruction of the soybeans;

b. Combining, threshing or removal from the field;

c. Final adjustment of a loss; or

d. The date immediately following planting as follows:

(1) Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Virginia, December 20;

(2) North Dakota, October 31;

(3) All other states, December 10.

8. Notice of damage or loss.

a. In a case of damage or probable loss:

(1) You must give us written notice if:

(a) You want our consent to replant soybeans damaged due to an insured cause. (To qualify for a replanting payment, the acreage replanted shall be at least the lesser of 10 acres or 10 percent of the insured acreage on the unit.);

(b) During the period before harvest, the soybeans on any unit are damaged and you decide not to further care for or harvest any part of them;

(c) You want our consent to put the acreage to another use; or

(d) After consent to put acreage to another use is given, additional damage occurs.

Insured acreage may not be put to another use until we have appraised the soybeans and given written consent. We will not consent to another use until it is too late to replant. You must notify us when such acreage is replanted or put to another use.

(2) You must give us notice or probable loss at least 15 days before the beginning of harvest if you anticipate a loss on any unit. If probable loss is later determined, immediate notice shall be given and a representative sample of unharvested soybeans (at least 10 feet wide and the entire length of the field) shall be left for a period of 15 days from the date of the notice, unless we give you written consent to harvest the sample.

(3) In addition to the notices required by this section, if you are going to claim an indemnity on any unit, we must be given notice not later than 30 days after the earliest of:

(a) Total destruction of the soybeans on the unit;

(b) Harvest of the unit; or

(c) The calendar date for the end of the insurance period.

b. You may not destroy or replant any of the soybeans on which a replanting payment will be claimed until we give consent.

c. You must be given written consent by us before you destroy any of the soybeans which are not to be harvested.

d. We may reject any claim for indemnity if any of the requirements of this section or section 9 are not complied with.

9. Claim for indemnity.

a. Any claim for indemnity on a unit shall be submitted to us on our prescribed form not later than 60 days after the earliest of:

(1) Total destruction of the soybeans on the unit;

(2) Harvest of the unit; or

(3) The calendar date for the end of the insurance period.

b. We shall not pay any indemnity unless you:

(1) Establish the total production of soybeans on the unit and that any loss of production has been directly caused by one or more of the insured causes during the insurance period; and

(2) Furnish all information we require concerning the loss.

c. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total production of soybeans to be counted under section 9d;

(3) Multiplying the remainder by the price election; and

(4) Multiplying this result by your share.

If the information reported by you results in a lower premium than the actual premium determined by us, the indemnity will be reduced proportionately.

The indemnity will be reduced by the amount of any replanting payment.

d. The total production to be counted for a unit shall include all harvested and appraised production.

(1) Mature soybeans which grade No. 4 or better shall be reduced .12 percent for each .1 percentage point of moisture in excess of 14.0 percent; and if, due to insurable causes, any soybeans do not grade No. 4 or better in accordance with the Official United States Grain Standards the production shall be adjusted by:

(a) Dividing the value per bushel of such soybeans by the price per bushel of U.S No. 2 soybeans; and

(b) Multiplying the result by the number of bushels of such soybeans.

The applicable price for No. 2 soybeans shall be the local market price on the earlier of: the day the loss is adjusted or the day such soybeans were sold.

(2) Appraised production to be counted shall include:

(a) Unharvested production on harvested acreage and potential production lost due to uninsured causes and failure to follow recognized good soybean farming practices;

(b) Not less than the guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause;

(c) Any appraised production on unharvested acreage.

(3) Any appraisal we have made on insured acreage for which we have given written consent to be put to another use shall be considered production unless such acreage:

(a) Is not put to another use before harvest of soybeans becomes general in the county;

(b) Is harvested; or

(c) Is further damaged by an insured cause before the acreage is put to another use.

(4) We may determine the amount of production of any unharvested soybeans on the basis of field appraisals immediately after the end of the insurance period.

(5) When you have elected to exclude hail and fire as insured causes of loss and you have obtained at least a like amount of hail and fire insurance and the soybeans are damaged by hail or fire, appraisals will be made as follows:

(a) If hail or fire occurs prior to loss caused by any other insured cause and the percent of hail or fire loss determined as an average of the entire unit exceeds the following percentages for the applicable level, there will be an appraisal for uninsured causes as follows:

(i) Level 1. Each percent of loss in excess of 50 percent will result in an appraisal for uninsured causes of 2.00 percent of the guarantee;

(ii) Level 2. Each percent of loss in excess of 35 percent will result in an appraisal for uninsured causes of 1.54 percent of the guarantee; and

(iii) Level 3. Each percent of loss in excess of 25 percent will result in an appraisal for uninsured causes of 1.33 percent of the guarantee.

(b) If hail or fire occurs following a loss caused by any other insured cause and the amount of hail and fire insurance is reduced, an appraisal for uninsured causes will be made as follows:

(i) The hail and fire insurance indemnity will be divided by the original hail and fire insurance liability; and

(ii) This result applied to (a)(i), (ii) or (iii) above, whichever is applicable.

(6) The production of units commingled will be allocated to such units in proportion to the liability on the harvested acreage of each unit.

e. A replanting payment may be made on any insured soybeans replanted after we have given consent and the acreage replanted is at least the lesser of 10 acres or 10 percent of the insured acreage for the unit.

(1) No replanting payment will be made on acreage:

(a) On which our appraisal exceeds 90 percent of the guarantee;

(b) Initially planted prior to the date we determine reasonable; or

(c) On which a replanting payment has been made during the current crop year.

(2) The replanting payment per acre will be your actual cost per acre for replanting, but shall not exceed 3 bushels multiplied by the price election times your share.

If the information reported by you results in a lower premium than the actual premium determined by us, the replanting payment will be reduced proportionately.

Any replanting payment will be considered as an indemnity.

f. You will not abandon any insured soybean acreage to us.

g. You cannot bring suit or action against us unless you have complied with all policy provisions. If a claim is denied, you may sue us in the United States District Court under the provisions of 7 U.S.C. 1508(c). You must bring suit within 12 months of the date notice of denial is mailed to and received by you.

h. We will pay the loss within 30 days after we reach agreement with you, entry of a final judgment, or the filing of any appraisal award with us. In no event shall we be liable for interest or damages in connection with any claim for indemnity, whether we approve or disapprove such claim.

i. If you die, disappear, or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved after the soybeans are planted for any crop year, any indemnity will be paid to the person(s) we determine to be beneficially entitled thereto.

j. If you have other fire insurance and fire damage occurs during the insurance period and you have not elected to exclude fire insurance from this policy, we shall be liable for loss due to fire only for the smaller of:

(1) The amount of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) The amount determined by us by which the loss from fire exceeds the indemnity paid or payable under such other insurance. For the purposes of this section, the amount of loss from fire shall be the difference between the fair market value of the production on the unit before the fire and after the fire, as determined by us from our appraisals.

10. Concealment or fraud.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. Transfer of right to indemnity on insured share.

If you transfer any part of your share during the crop year, you may transfer the right to an indemnity on an approved form. We may collect the premium from either you or your transferee or both. The transferee shall have the same rights and responsibilities provided by the contract.

12. Assignment of indemnity.

On our prescribed form and with our approval, you may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms required by the contract.

13. Subrogation. (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us, you must do all you can to preserve any such rights. If we pay you for your loss then your right of recovery will belong to us. If we recover more than we paid you plus our expenses, the excess will be paid to you.

14. Records and access to farm.

You shall keep for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all soybeans produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by us shall have access to such records and the farm for purposes related to the contract.

15. Life of contract: Cancellation and termination.

a. This contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, the contract will continue in force for each succeeding crop year unless canceled or terminated as provided for in this section.

b. This contract may be canceled by either you or us for any crop year by giving written notice on or before the December 31 cancellation date preceding such crop year.

c. This contract will terminate as to any crop year if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due. The date of payment of the amount due:

(1) If deducted from an indemnity claim shall be the date you sign such claim; or

(2) If deducted from payment under another program administered by United States Department of Agriculture shall be the date such payment was approved.

The termination date for the contract is March 31.

d. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution. *However*, if such event occurs after insurance attaches for any crop year, the contract shall continue in force through the crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

e. The contract shall terminate if no premium is earned for five consecutive years.

16. Contract changes.

We may change any terms and provisions of the contract from year to year. If your price election at which indemnities are computed is no longer offered, the actuarial table will provide the price election which you will be deemed to have elected. You shall be notified of changes at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective. Acceptance of any changes will be conclusively presumed in the absence of any notice from you to cancel the contract.

17. Meaning of terms.

For the purposes of soybean crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, practices where applicable, insurable and uninsurable acreage, and related information regarding soybean insurance in the county.

b. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

c. "Crop year" means the period within which the soybeans are normally grown and shall be designated by the calendar year in which the soybeans are normally harvested.

d. "Harvest" means the severance of mature soybeans from the land for combining or threshing.

e. "Insurable acreage" means the land classified as insurable by us and shown as such on the actuarial table.

f. "Insured" means the person who submitted the application accepted by us.

g. "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

h. "Replanting" means performing the cultural practices necessary to replant insured acreage to soybeans.

i. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by you or designated by us.

j. "Tenant" means a person who rents land from another person for a share of the soybeans or a share of the proceeds therefrom.

k. "Unit" means all insurable acreage of soybeans in the county on the date of planting for the crop year (1) in which you have a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the soybeans on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office or by written agreement between us and you. We shall determine units as herein defined when the acreage is reported. Errors in reporting such units may be corrected by us to conform to applicable guidelines when adjusting a loss and we may consider any acreage and share reported by or for your spouse or child or any member of your household to be the bona fide share of you or any other person having the bona fide share.

18. Descriptive headings.

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction or meaning of any of the provisions of the contract.

Appendix B [Redesignated as Appendix A]

3. Appendix B is redesignated as Appendix A.

---

7 CFR Part 432

Corn Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Interim rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Corn Crop Insurance Regulations (7 CFR Part 432), effective with the 1983 and succeeding crop years, in accordance with the provisions of Secretary's Memorandum No. 1512–1, which requires a periodic review of FCIC's regulations as to need, currency, clarity, and effectiveness. In addition to the review process, FCIC has revised the regulations to: (1) Include a provision to require the insured to file a notice of probable loss when the crop is damaged to the extent that a loss is probable and leave intact a representative sample of the unharvested crop, (2) prescribe the interest rate to be charged on any unpaid premium balances, (3) add a provision to provide a replanting payment limited to the actual cost of replanting; such payment to be considered as an indemnity payment deducted from any additional loss, (4) define FCIC's liability in cases of loss due to fire when the insured has other insurance against fire, (5) delete a section of the regulations requiring posting of indemnities paid within a county (6) eliminate the provision providing reduction in guarantee for any unharvested acreage, (7) eliminate the provision for substitute crops (8) provide improved coverage in cases where the producer elects not to have FCIC fire and hail coverage and buys an equal amount of such coverage from private companies, (9) provide a policy that is rewritten in clearer, easier to understand language, and (10) include a revised multi-crop application form to replace the former single-crop application. The intended effect of this interim rule is to revise the system of reporting damage or loss to an insured crop, improve the debt management practices of FCIC, rewrite the policy in clearer language, remove certain restrictions in the policy, and reduce the time and paperwork demands on the applicant, in addition to the review of these regulations in compliance with the provisions of Secretary's Memorandum No. 1512–1 (June 11, 1981).

DATES:

Effective date: December 16, 1982.

Comment date: Written comments, data, and opinions on this interim rule should be submitted not later than January 20, 1983, to be sure of consideration.

ADDRESS: Written comments on this interim rule should be sent to the Office of the Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C, 20250.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this interim rule and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1512–1 (June 11, 1981).

Information collection requirements contained in these regulations (7 CFR Part 432) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

Merritt W. Sprague, Manager, FCIC, has determined that: (1) This action is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) this action does not increase the Federal paperwork burden for individuals, small businesses, and other persons, and (3) this action conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance Program to which this interim rule applies are: Title—Crop Insurance; Number 10.450.

This action will not have a significant impact specifically upon area and community development; therefore, review as established in Executive Order No. 12372 (July 14, 1982), was not used to assure that units of local government are informed of this action.

It has been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

It has also been determined that this action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under the provisions of Secretary's Memorandum No. 1512–1 (June 11, 1981). The sunset review date established for these regulations is October 1, 1987.

Merritt W. Sprague, Manager, FCIC, has determined that an emergency situation exists which warrants implementation of this proposed rule without allowing for the normal 60-day comment period prior to implementation because the regulations for insuring corn provide that any amendments thereto must be placed on file or provided to insureds 15 days before the cancellation date for the crop insured. The cancellation date established for corn is December 31; therefore, any amendments to the regulations must be placed on file by December 15. There would not be sufficient time to permit a comment period prior to implementation of these regulations and still comply with the regulations with respect to placing these regulations on file by such date.

FCIC is soliciting public comment on this interim rule for 60 days after publication in the **Federal Register**, and this interim rule will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Pursuant to the administrative provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule prior to implementation are impracticable and contrary to the public interest; however, comments are solicited for 60 days after publication of this rule and such comments made pursuant to this notice will be available for public inspection in the Office of the Manager during regular business hours, Monday through Friday.

List of Subjects in 7 CFR Part 432

Crop insurance, Corn.

Interim Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby amends and reissues the Corn Crop Insurance Regulations (7 CFR Part 432), effective with the 1983 and succeeding crop years, as follows.

PART 432—[AMENDED]

1. The Subpart heading is revised to read:

"Subpart—Regulations for the 1983 and Succeeding Crop Years"

2. Sections 432.1–432.7 are revised to read as set forth below:

§ 432.1 Availability of corn insurance.

Insurance shall be offered under the provisions of this subpart on corn in counties within limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this part the names of the counties in which corn insurance will be offered.

§ 432.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for corn which shall be shown on the county actuarial table on file in the service office and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 432.3 [Reserved.]

§ 432.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 432.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the corn insurance contract, whenever (a) An insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation of other erroneous action or advice by an agent or employee of the Corporation (1) Is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, and

(b) The Board of Directors of the Corporation, or the Manager in cases involving not more than $20,000.00, finds (1) That an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 432.6 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the corn crop as provided in the policy. The contract shall consist of the application, the policy, the attached appendix, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. Copies of forms referred to in the contract are available at the service office.

§ 432.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the corn crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the service office on or before the applicable closing date on file in the service office.

(b) The Corporation may discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and may also, for the same reason, reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the service office and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the period of such extension. However, if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in policies issued under FCIC regulations for the 1969 and succeeding crop years, a contract in the form provided for under this subpart will come into effect as a continuation of a corn contract issued under such prior regulations, without the filing of a new application.

(d) The provisions of the application and Corn Insurance Policy for the 1983 and succeeding crop years are as follows:

Following is the Privacy Act Statement found on the reverse side of the Application for Crop Insurance:

COLLECTION OF INFORMATION AND DATA (PRIVACY ACT)

The following statements are made in accordance with the Privacy Act of 1974 (5 U.S.C. 552(a)):

The authority for requesting the information to be supplied on this form is the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and the regulations promulgated thereunder (7 CFR 400 et seq.). The information requested is necessary for FCIC to consider and process the application for insurance; to assist in determining the correct premium and indemnity; and to determine the correct parties to the insurance contract. The information may be furnished to FCIC contract agencies and contract loss adjusters, reinsured companies, other U.S. Department of Agriculture Agencies, Internal Revenue Service, Department of Justice, or other State and Federal law enforcement agencies, and in response to orders of a court, magistrate, or administrative tribunal.

Furnishing the Social Security number is voluntary and no adverse action will result from failure to do so. Furnishing the information, other than the Social Security number, is also voluntary; however, failure to furnish the correct, complete information requested may result in rejection of the application and/or subsequent denial of any claim for indemnity which may be filed. The failure to supply correct, complete information will also invalidate the automatic acceptance provisions of Section 8 hereof and may substantially delay acceptance of the application and processing of any claim for indemnity.

BILLING CODE 3410-08-C

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Corn Crop Insurance Policy

[This is a continuous contract. Refer to section 15.]

Agreement to insure: We will provide the insurance described in this policy in return for the premium and compliance with all applicable provisions.

Throughout this policy "you" and "your" refer to the insured shown on the approved Application and "we," "us" and "our" refer to the Federal Crop Insurance Corporation.

Terms and Conditions

1. Causes of loss.

a. The insurance provided is against unavoidable loss of production resulting from adverse weather conditions, fire, insects, plant disease, wildlife, earthquake, or volcano occurring within the insurance period, unless those causes are excepted, excluded, or limited by the actuarial table.

b. We will not insure against any cause of loss of production due to:

(1) The neglect or malfeasance of you, any member of your household, your tenants or employees;

(2) The failure to follow recognized good corn farming practices;

(3) Damage resulting from the impoundment of water by any governmental, public or private dam or reservoir project; or

(4) Any cause not specified in section 1a as an insured loss.

2. Crop, acreage, and share insured.

a. The crop insured shall be field corn ("corn") which is planted for harvest as grain or silage and which is grown on insured acreage and for which we provide a guarantee and premium rate on the actuarial table.

b. The acreage insured for each crop year shall be that acreage planted to corn on insurable acreage as provided for on the actuarial table and in which you have a share, as reported by you or as determined by us, whichever we shall elect.

c. The insured share shall be your share as landlord, owner-operator, or tenant in the insured corn at the time of planting.

d. We do not insure any acreage:

(1) Where the farming practices carried out are not in accordance with the farming practices for which the premium rates have been established;

(2) Which is irrigated and an irrigated practice is not provided for on the actuarial table. (You have the option to insure such acreage by reporting it for insurance as provided in section 3.);

(3) Which is destroyed and we determine it is practical to replant to corn and such acreage was not replanted;

(4) Initially planted after the final planting date contained in the actuarial table, unless you sign an option form agreeing to coverage reduction;

(5) Of volunteer corn;

(6) Planted to a type or variety of corn not established as adapted to the area or excluded on the actuarial table; or

(7) Planted with another crop.

e. Where insurance is provided for an irrigated practice:

(1) You shall report as irrigated only the acreage for which you have adequate facilities and water to carry out a good corn irrigation practice at the time of planting; and

(2) any loss of production caused by failure to carry out a good corn irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

f. Acreage which is planted for the development or production of hybrid seed or for experimental purposes is not insured unless we agree in writing to insure such acreage.

g. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to planting.

3. Report of acreage, share, and where applicable, practice.

You shall report on our form:

a. All the acreage of corn in the county in which you have a share;

b. The practice; and

c. Your share at the time of planting.

You shall designate separately any acreage that is not insurable. You shall report if you do not have a share in any corn planted in the county. This report shall be submitted annually before the reporting date. If you do not submit this report by the reporting date, we may elect to determine by unit the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. Production guarantees, coverage levels, and prices for computing indemnities.

a. The production guarantees, coverage levels, and prices for computing indemnities will be contained in the actuarial table.

b. You may change the coverage level and price election before the closing date for submitting applications for the crop year.

5. Annual premium.

a. The annual premium is earned and payable at the time of planting. The amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time of planting, times the applicable premium adjustment percentage.

[1] For premium adjustment purposes, only the years during which premiums were earned shall be considered.
[2] Only the most recent 15 crop years will be used to determine the number of "Loss Years". (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year.)
[3] Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.

b. Interest will accrue at the rate of one and a half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

c. Any premium adjustment applicable to the contract shall be transferred to:

(1) The contract of your estate or surviving spouse in case of your death;

(2) The contract of the person who succeeds you if such person had previously participated in the farming operation; or

(3) Your contract if you stop farming in one county and start farming in another county.

d. If participation is not continuous, any premium will be computed on the basis of

previous unfavorable insurance experience but no premium reduction under section 5a will be applicable.

6. Deductions for debt.

Any unpaid amount due us may be deducted from any indemnity payable to you or from any loan or payment due you under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies, unless prohibited by law.

7. Insurance period.

Insurance attaches when the corn is planted and ends at the earliest of:

a. Total destruction of the corn;

b. Harvest;

c. Final adjustment of a loss;

d. The date immediately following planting as follows:

(1) North Dakota, October 31;

(2) Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, LaSalle, Dimmitt Counties, Texas and all Texas counties south thereof, September 30;

(3) All other Texas counties and other states, December 10, or

e. September 30 where our actuarial table shows:

(1) Only a silage guarantee; or

(2) Both a grain and a silage guarantee and the corn is to be harvested for silage.

8. Notice of damage or loss.

a. In case of damage or probable loss:

(1) You must give us written notice if:

(a) You want our consent to replant corn damaged due to any insured cause. (To qualify for a replanting payment, the acreage replanted shall be at least the lesser of 10 acres or 10 percent of the insured acreage on the unit.);

(b) During the period before harvest, the corn on any unit is damaged and you decide not to further care for or harvest any part of it;

(c) You want our consent to put the acreage to another use; or

(d) After consent to put acreage to another use is given, additional damage occurs.

Insured acreage may not be put to another use until we have appraised the corn and given written consent. We will not consent to another use until it is too late to replant. You must notify us when such acreage is replanted or put to another use.

(2) You must give us notice of probable loss at least 15 days before the beginning of harvest if you anticipate a loss on any unit. If probable loss is later determined, immediate notice shall be given and a representative sample of unharvested corn (at least 10 feet wide and the entire length of the field) shall be left for a period of 15 days from the date of the notice, unless we give you written consent to harvest the sample.

(3) In addition to the notices required by this section, if you are going to claim an indemnity on any unit, we must be given notice not later than 30 days after the earliest of:

(a) Total destruction of the corn on the unit;

(b) Harvest of the unit; or

(c) The calendar date for the end of the insurance period.

b. You may not destroy or replant any of the corn on which a replanting payment will be claimed until we give consent.

c. You must be given written consent by us before you destroy any of the corn which is not to be harvested.

d. We may reject any claim for indemnity if any of the requirements of this section or section 9 are not complied with.

9. Claim for indemnity.

a. Any claim for indemnity on a unit shall be submitted to us on our prescribed form not later than 60 days after the earliest of:

(1) Total destruction of the corn on the unit;

(2) Harvest of the unit; or

(3) The calendar date for the end of the insurance period.

b. We shall not pay any indemnity unless you:

(1) Establish the total production of corn and/or silage on the unit and that any loss of production has been directly caused by one or more of the insured causes during the insurance period; and

(2) Furnish all information we require concerning the loss.

c. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Multiplying this product by the price election;

(3) Subtracting the dollar amount obtained by multiplying the total production to be counted under section 9d by the price election; and

(4) Multiplying this result by your share.

Where a unit contains acreage to which both a grain and a silage guarantee apply, the dollar amount of insurance and dollar amount of the production to be counted shall be determined separately for each portion and then added together to determine the total amount for the unit.

If the information reported by you results in a lower premium than the actual premium determined by us, the indemnity will be reduced proportionately.

The indemnity will be reduced by the amount of any replanting payment.

d. The total production to be counted for a unit shall include all harvested and appraised production.

(1) When the actuarial table shows only a grain guarantee, all production and appraisals shall be determined in bushels. When the actuarial table shows only a silage guarantee, all production and appraisals shall be in tons. When the actuarial table shows both a grain and silage guarantee, the production and appraisals shall be determined in bushels for any unharvested acreage and in bushels or tons for any harvested acreage, depending upon whether the acreage is harvested for grain or silage.

(2) Mature grain production shall be reduced .12 percent for each .1 percentage point of moisture in excess of 15.5 through 30.0 percent and .2 percent for each .1 percentage point of moisture from 30.1 through 40.0 percent; and if, due to insurable causes, the moisture is over 40 percent, or the kernel damage is more than 15 percent as determined by a licensed grain grader, or the test weight is below 40 pounds per bushel, the production shall be adjusted by:

(a) Dividing the value per bushel of such corn by the price per bushel of U.S. No. 2 corn; and

(b) Multiplying the result by the number of bushels of such corn.

The applicable price for No. 2 corn shall be the local market price on the earlier of: the day the loss is adjusted or the day such corn was sold. The quality adjustment shall not reduce the harvested production more than 75 percent so that at least 25 percent of harvested production will count.

(3) Where the actuarial table shows both a grain and silage guarantee and the corn is harvested as silage, if a grain appraisal is made concurrently with a silage appraisal and the grain appraisal is less than 4.5 bushels per ton, the production shall be reduced 1 percent for each 1 tenth of a bushel below 4.5 bushels. There shall be no reduction allowed for harvested silage production if a representative sample of unharvested corn (one sample at least 10 feet wide and the entire length of the field for each 25 acres of corn harvested as silage) is not left until appraised by us.

(4) Appraised production to be counted shall include:

(a) Unharvested production on harvested acreage and potential production lost due to uninsured causes and failure to follow recognized good corn farming practices;

(b) Not less than the guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause;

(c) Any appraised production on unharvested acreage.

(5) Any appraisal we have made on insured acreage for which we have given written consent to be put to another use shall be considered as production unless such acreage:

(a) Is not put to another use before harvest of corn becomes general in the county;

(b) Is harvested; or

(c) Is further damaged by an insured cause before the acreage is put to another use.

(6) We may determine the amount of production of any unharvested corn on the basis of field appraisals immediately after the end of the insurance period.

(7) Where the actuarial table shows a silage guarantee or both a grain and silage guarantee and the normal silage harvesting period has ended, we may increase any tonnage appraisal or any harvested silage production to reflect the normal moisture content of silage harvested during the normal silage harvesting period.

(8) Where the actuarial table shows only a silage guarantee, we may convert bushels of grain to tons of silage, and increase all production harvested after the normal silage harvesting period to reflect the normal moisture content of silage harvested during the normal silage harvesting period.

(9) When you have elected to exclude hail and fire as insured causes of loss and you have obtained at least a like amount of hail and fire insurance and the corn is damaged by hail or fire, appraisals will be made as follows:

(a) If hail or fire occurs prior to loss caused by any other insured cause and the percent of hail or fire loss determined as an average of the entire unit exceeds the following percentages for the applicable level, there

will be an appraisal for uninsured causes as follows:

(i) Level 1. Each percent of loss in excess of 50 percent will result in an appraisal for uninsured causes of 2.00 percent of the guarantee;

(ii) Level 2. Each percent of loss in excess of 35 percent will result in an appraisal for uninsured causes of 1.54 percent of the guarantee; and

(iii) Level 3. Each percent of loss excess of 25 percent will result in an appraisal for uninsured causes of 1.33 percent of the guarantee.

(b) If hail or fire occurs following a loss caused by any other insured cause and the amount of hail and fire insurance is reduced, an appraisal for uninsured cause will be made as follows:

(i) The hail and fire insurance indemnity will be divided by the orginal hail and fire insurance liability; and

(ii) This result applied to (a)(i), (ii) or (iii) above, whichever is applicable.

(10) The production of units commingled will be allocated to such units in proportion to the liability on the harvested acreage of each unit.

e. A replanting payment may be made on any insured corn replanted after we have given consent and the acreage replanted is at least the lesser of 10 acres or 10 percent of the insured acreage for the unit.

(1) No replanting payment will be made on acreage:

(a) On which our appraisal exceeds 90 percent of the guarantee;

(b) Initially planted prior to the date we determine reasonable; or

(c) On which a replanting payment has been made during the current crop year.

(2) The replanting payment per acre will be your actual cost per acre for replanting except that:

(a) Where the actuarial table shows a grain guarantee only or both a grain and silage guarantee, the payment shall not exceed 8 bushels multiplied by the price election times your share; or

(b) Where the actuarial table shows only a silage guarantee, the payment shall not exceed 1 ton multiplied by the price election times your share.

If the information reported by you results in a lower premium than the actual premium determined by us, the replanting payment will be reduced proportionately.

Any replanting payment will be considered as an indemnity.

f. You will not abandon any insured corn acreage to us.

g. You cannot bring suit or action against us unless you have complied with all policy provisions. If a claim is denied, you may sue us in the United States District Court under the provisions of 7 U.S.C. 1508(c). You must bring suit within 12 months of the date notice of denial is mailed to and received by you.

h. We will pay the loss within 30 days after we reach agreement with you, entry of a final judgment, or the filing of any appraisal award with us. In no event shall we be liable for interest or damages in connection with any claim for indemnity, whether we approve or disapprove such claim.

i. If you die, disappear, or are judicially declared incompetent, or it you are an entity other than an individual and such entity is dissolved after the corn is planted for any crop year, any indemnity will be paid to the person(s) we determine to be beneficially entitled thereto.

j. If you have other fire insurance and fire damage occurs during the insurance period and you have not elected to exclude fire insurance from this policy, we shall be liable for loss due to fire only for the smaller of:

(1) The amount of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) The amount as determined by us by which the loss from fire exceeds the indemnity paid or payable under such other insurance. For the purposes of this section, the amount of loss from fire shall be the difference between the fair market value of the production on the unit before the fire and after the fire, as determined by us from our appraisals.

10. Concealment or fraud.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract, and such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. Transfer of right to indemnity on insured share.

If you transfer any part of your share during the crop year, you may transfer the right to an indemnity on an approved form. We may collect the premium from either you or your transferee or both. The transferee shall have the same rights and responsibilities provided by the contract.

12. Assignment of indemnity.

On our prescribed form and with our approval, you may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms required by the contract.

13. Subrogation. (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us, you must do all you can to preserve any such rights. If we pay you for your loss then your right of recovery will belong to us. If we recover more than we paid you plus our expenses, the excess will be paid to you.

14. Records and access to farm.

You shall keep for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all corn produced on each unit including separate records showing the same information for production from any uninsured acreage. Any persons designated by us shall have access to such records and the farm for purposes related to the contract.

15. Life of contract: cancellation and termination.

a. This contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, the contract will continue in force for each succeeding crop year unless canceled or terminated as provided for in this section.

b. This contract may be canceled by either you or us for any crop year by giving written notice on or before the cancellation date preceding such crop year.

c. This contract will terminate as to any crops year if any amount due us on this or any other contract with you is not paid on or before the termination date for the contract on which the amount is due. The date of payment of the amount due:

(1) If deducted from an indemnity claim shall be the date you sign such claim; or

(2) If deducted from payment under another program administered by the United States Department of Agriculture shall be the date such payment was approved.

d. The cancellation and termination dates are:

State and county	Cancellation date	Termination date for indebtedness
Jackson, Victoria, Goliad, Bee, Live Oak, McMullen, LaSalle, Dimmit Counties, Texas and all Texas counties lying south thereof	Sept. 30	Jan. 31
All other Texas counties and all other states.	Dec. 31	Mar. 31.

e. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution. *However*, if such event occurs after insurance attaches for any crop year, the contract shall continue in force through the crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

f. The contract shall terminate if no premium is earned for live consecutive years.

16. Contract changes.

We may change any terms and provisions of the contract from year to year. If your price election at which indemnities are computed is no longer offered, the actuarial table will provide the price election which you will be deemed to have elected. You shall be notified of changes at least 15 days prior to the cancellation date preceding the crop year for which the changes are to become effective. Acceptance of any changes will be conclusively presumed in the absence of any notice from you to cancel the contract.

17. Meaning of terms.

For the purposes of corn crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, practices where applicable, insurable and uninsurable acreage, and related information regarding corn insurance in the county.

b. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown on the actuarial table.

c. "Crop year" means the period within which the corn is normally grown and shall be designated by the calendar year in which the corn is normally harvested.

d. "Harvest" means removing the grain from the stalk either by hand or machine or cutting the corn for the purpose of livestock feed.

e. "Insurable acreage" means the land classified as insurable by us and shown as such on the actuarial table.

f. "Insured" means the person who submitted the application accepted by us.

g. "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

h. "Replanting" means performing the cultural practices necessary to replant insured acreage to corn.

i. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by you or designated by us.

j. "Silage" means corn harvested by severing the stalk from the land and chopping the stalk and the ear for the purpose of livestock feed.

k. "Tenant" means a person who rents land from another person for a share of the corn or a share of the proceeds therefrom.

l. "Unit" means all insurable acreage of corn in the county on the date of planting for the crop year (1) in which you have a 100 percent share, or (2) which is owned by one entity and operated by another entity on a share basis. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the corn on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office or by written agreement between us and you. We shall determine units as herein defined when the acreage is reported. Errors in reporting such units may be corrected by us to conform to applicable guidelines when adjusting a loss and we may consider any acreage and share reported by or for your spouse or child or any member of your household to be the bona fide share of you or any other person having the bona fide share.

16. Descriptive headings.

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction or meaning of any of the provisions of the contract.

Appendix B—[Redesignated as Appendix A]

3. Appendix B, counties designated for Corn Crop Insurance is redesignated as Appendix A.

(Secs. 506, 516, Pub. L 75-430, 52 Stat. 72, as amended (7 U.S.C. 1506, 1516))

Done in Washington, D.C., on December 13, 1982.

Dated: December 13, 1982.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

BILLING CODE 3410-08-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release Nos. 33-6443; 34-19326; 35-22772; 39-785; IC-12894; IA-833]

Approved Information Collections; Current OMB Expiration Dates

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending Subpart N of Part 200 to reflect current OMB expiration dates for approved information collections.

EFFECTIVE DATE: December 21, 1982.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Fogash, Deputy Executive Director, SEC, 450 Fifth Street, NW., Washington, D.C. 20549, (202) 272-2142.

SUPPLEMENTARY INFORMATION: The Commission will amend Subpart N periodically to reflect current information.

List of Subject in 17 CFR Part 200

Administrative practice and procedure, Freedom of information, Privacy, Securities.

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Subpart N—Commission Information Collection Requirements Under the Paperwork Reduction Act: OMB Control Nos. and Expiration Dates

Part 200 of 17 CFR Chapter II is amended by removing Rule 242 and Forms 146, 240 and 242; by adding Rule 17f-5 and Rule 2A-7 (proposed); and revising certain expiration dates in paragraph (b) of § 200.800 as follows:

§ 200.800 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

[Release Nos. 33-6442; 34-19300; IC-12871; FR-8; File No. S7-918]

Financial Statement Requirements for Registered Investment Companies

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission announces the adoption of final rules which amend Article 6 of Regulation S-X regarding financial statements filed by registered investment companies. The amendments to Article 6 are being adopted to: (1) Eliminate rules which are duplicative of generally accepted accounting principles ("GAAP"), (2) effect changes which recognize current industry practices, and (3) integrate and simplify the rules to improve financial reporting. In addition, financial statement requirements for employee stock purchase, savings and similar plans are also being amended and transferred to a separate Article 6A. These amendments are part of the Commission's comprehensive reexamination of its requirements for financial statements in connection with its efforts to simplify and improve the current disclosure system.

EFFECTIVE DATE: Effective for companies and plans with fiscal years ended after June 15, 1983, with earlier implementation encouraged. Where comparative financial statements are presented, all reported periods shall conform with the rules being adopted.

FOR FURTHER INFORMATION CONTACT: Clarence M. Staubs, John W. Albert or Lawrence S. Jones, Office of the Chief Accountant, Securities and Exchange Commission, Washington, D.C. 20549 (202-272-2130).

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is adopting final rules which amend Article 6 of Regulation S-X (17 CFR Part 210) regarding financial statements filed for registered investment companies and employee stock purchase, savings and similar plans. The amendments to Article 6 are being adopted to: (1) Eliminate rules which are duplicative of GAAP, (2) effect changes which recognize current industry practices, and (3) integrate and simplify the rules to improve financial reporting. The rules integrate certain common reporting requirements of management investment companies, unit investment trusts, and face-amount certificate companies (referred to collectively as registered investment companies) in a revised Article 6. Financial statement requirements for employee stock purchase, savings and similar plans are also amended to change requirements for valuation of investments and to transfer the rules to a separate Article 6A.

The final rules require management investment companies to present an all-inclusive statement of operations rather than the separate statements of income and expense, realized gain or loss on investments, and unrealized appreciation or depreciation of investments currently being furnished. The results of these operations will be captioned "net increase (decrease) in net assets resulting from operations." In addition, a reporting format is being prescribed for the presentation of a statement of net assets and a revised format adopted for the statement of changes in net assets. Finally, the requirements regarding the basis used to value certain assets in the balance sheets of closed-end management investment companies are being amended.

In connection with an ongoing review of Regulation S-X, the Commission established a project to review the requirements for financial statements filed by registered investment companies set forth in Article 6 of Regulation S-X. In a release issued on January 11, 1982,[1] the Commission invited public comment on proposed rules which would revise the financial statement requirements for these companies. A total of 19 letters were received during the comment period ended May 30, 1982.[2] Although the number of commentators was relatively few, the letters were generally very substantive. Accordingly, the comments included in these letters have been considered and appropriate changes made in the final rules adopted by the Commission.

Statement of Operations

The introduction of an all-inclusive statement of operations to replace the separate statements of income and expense, realized gain or loss on investments, and unrealized appreciation or depreciation of investments currently required represented the most significant proposed change and accordingly was addressed by many commentators. Views of the commentators were virtually evenly divided on this issue. Supportive commentators indicated that the adoption of an income statement results in a more meaningful presentation, and is consistent with the "total return" concept utilized by many investment companies. In addition, commentators supported the all-inclusive income statement as consistent with the concept of comprehensive income cited in the proposing release. Opposing views

[1] Securities Act Release 6374 (47 FR 2776).

[2] Representation among the commentators was virtually evenly divided between accounting firms or groups (9) and industry and related groups (8). Comments were also received from 2 law firms or groups. The comment period was extended 30 days from its original deadline of April 30, 1982.

generally focused on the inclusion of unrealized appreciation or depreciation in determining net income, arguing that income recognition is premature since the earnings process has not been completed. Other commentators argued that the all-inclusive income statement ignores the varying objectives of different investment companies.

The Commission believes that it is appropriate to report all changes in net assets resulting from investment activities in a basic statement and accordingly is adopting the requirement for an all-inclusive statement of operations. Since an open-end management investment company continuously trades its shares on the basis of its underlying net assets stated at value [3], the Commission believes that it is consistent for such investment companies to report changes in net assets resulting from all investment activities in the determination of operating results. Although a close-end management investment company does not stand ready to redeem its shares on a continuous basis, the market price at which such shares are traded correlates with the company's net asset value.

In adopting the requirements for a statement of operations, the Commission has considered the views of commentators who, while supportive of the income statement concept, opposed labeling the net result as "net income." These commentators cautioned that readers could confuse net income with the subcaption "investment income-net" also presented in the statement of operations or infer that net income represents amounts totally available for distribution. The Commission finds merit in these views and accordingly has adopted a reporting format under which the results of the income statement are captioned, "net increase (decrease) in net assets resulting from operations."

Statement of Net Assets

Rather than present a conventional balance sheet, management investment companies often substitute a statement of net assets. Since the major asset of any management investment company is its investment portfolio, the statement of net assets is comprised basically of a detailed listing of its securities portfolio similar to the schedule requirements for investment companies prescribed in Regulation S–X (§ 210.12–12). All other assets and total liabilities are often netted for presentation in the statement, and a balance captioned as net assets is presented, together with the number of outstanding shares and value per share.

Since the statement of net assets is fully informative only in situations in which an investment company's securities portfolio represents virtually all of its net assets, the Commission proposed rules which would establish conditions to restrict the use of this statement to such a situation. These proposed conditions were that (1) The amount of investment in securities (excluding investments in affiliated issuers) represent a least 95 percent of total assets, (2) liabilities not be significant (defined as not exceeding 5 percent of total assets), and (3) only one class of equity securities be outstanding. In addition, investment companies would not be permitted to use a statement of net assets if, as of the balance sheet date, there were outstanding balances with related parties representing amounts other than those arising from the conduct of regular investment advisory or management services or there were balances with respect to securities transactions involving short sales, open option contracts, or deposits on securities loaned.

Most commentators opposed the proposal to establish criteria for the use of the statement of net assets. In their view, failure to meet all of the proposed conditions should not result in forfeiture of the right to use the statement. These commentators suggested that additional disclosure requirements be imposed instead.

The Commission finds merit in this argument. As a consequence, the rules being adopted prohibit the presentation of a statement of net assets only in circumstances where the amount of investments in securities (other than investments in affiliated issuers) represents less than 95 percent of total assets. A reporting format for the statement of net assets is also being adopted to require that balances resulting from transactions with related parties, with certain limited exceptions, be presented on the face of the statement and that balances of other specified liabilities, including amounts related to short sales and open option contracts, be disclosed in the footnotes. Where the related party transaction occurs in the ordinary course of business, is subject to the usual trade terms, and involves noncontrolled affiliates, presentation on the face of the statement would not be required.

Valuation of Assets

Although the existing rules permit an option to state all assets at either cost or value, virtually all closed-end management investment companies currently reflect their investment securities at value. The final rules recognize current industry practice and require that closed-end companies state investments in securities at value.

Section 28(b) of the Investment Company Act of 1940 requires investment companies which issue face-amount certificates to value their "qualified assets" in accordance with certain provisions of the Code of the District of Columbia. Unlike management investment companies whose assets are largely comprised of investments in marketable securities, issuers of face-amount certificates often hold more diverse investments, such as real estate. Issuers of face-amount certificates will continue to value all investments pursuant to the statutory requirements.

Statement of Changes in Net Assets

In its January release, the Commission proposed certain revisions to its existing requirements for the content of the statement of changes in net assets presented by management investment companies. The revisions were intended to simplify the content of this statement by eliminating the presentation of certain information already reported in other statements and by restricting the presentation of other information to supplemental or footnote status. Commentators generally disagreed with the reporting format proposed by the Commission and offered specific suggestions for its improvement. The Commission finds merit in many of the suggestions and accordingly has adopted the following revised format for reporting changes in net assets:

Increase (decrease) in Net Assets

Operations:
- Investment income-net
- Realized gain (loss) on investments-net
- Increase (decrease) in unrealized appreciation or depreciation-net
- Net increase (decrease) in net assets resulting from operations

Net equalization credits

Dividends to shareholders from:
- Investment income-net
- Realized gain from investment transactions-net

Capital share transactions (net increase or decrease)

Total increase (decrease)

[3] Management investment companies are classified as either "open-end" or "closed-end" companies. An open-end management investment company stands ready to redeem its outstanding shares at current net asset value, and generally offers its shares to the public on a continuous basis. A closed-end management iinvestment company, however, does not stand ready to redeem its outstanding shares; its shares are traded in a manner similar to those of other public companies.

Net assets

Beginning of year
End of year (including parenthetical disclosure of amounts of undistributed net investment income as of end of each year presented)

Materiality Thresholds

Many commentators opposed the proposed requirement to separately present the amount of any liability which exceeds five percent of total liabilities, suggesting that since total liabilities are often insignificant to investment companies, separate presentation of amounts representing five percent of this caption would not be meaningful. These commentators suggested that the reporting of separate liability accounts be triggered by a more significant benchmark, such as their relationship to total assets. In adopting final rules on this issue, the Commission has deleted any reference to numerical tests in determining when separate presentation of a particular asset or liability account is appropriate. Persons are referred instead to the general standards of significance set forth in Rule 6–03(1) of Regulation S–X which permits the omission of separate captions where the items and conditions are not present, or the amounts involved not significant. The only exception to this general standard applies to amounts involving related parties which are required to be set forth regardless of amount.

Series Companies

A few commentators questioned the proposed requirement that financial information for series companies be provided on a comparative basis. This view is premised on the fact that a shareholder of one series company generally has no direct financial interest in the other series, and that comparative information on the other series is not meaningful. Commentators pointed out that assets, liabilities and results of operations are accounted for separately for each series, and that it is only for Federal income tax purposes that the series are ever combined and treated as a separate entity. For example, in the event that a series has a capital loss, the net capital loss may be used to offset any net capital gain from another series. The Commission finds merit in this argument and accordingly has deleted the requirement for comparative data of other series companies from the final rules and will require instead footnote disclosure of the income tax consequences and any contingencies arising from the relationship between related series issuers where appropriate.

Schedules

Although much of the proposed schedule information was carried forward from existing rules, the proposing release solicited public comment as to the usefulness of the proposed schedule requirements. As a result of the input provided by these commentators, the Commission is adopting certain significant revisions to its schedule requirements. These revisions include the elimination of schedules furnished pursuant to Rules 12–19 and 12–20 titled, "Investments in Securities," and "Trust Shares," respectively and which are applicable to unit investment trusts only. Instead of presenting the information on investments in securities called for in Rule 12–19, unit investment trusts would provide the information currently required for management investment companies under Rule 12–12 titled, "Investments in Securities of Unaffiliated Issuers." This change responds to the views expressed by commentators that the operations of unit investment trusts are not significantly different from those of management investment companies and that detailed information on investment activity during the period required under Rule 12–19 but not under Rule 12–12 is unnecessary. Finally, Rule 12–20 has been deleted because the information is generally duplicative of that provided in the statement of changes in net assets.

In addition to the changes affecting unit investment trusts, the requirements to provide detailed information as to investment activity have been deleted from the schedule furnished pursuant to Rule 12–13, "Investments other than Securities." In response to comments opposing the proposed requirements to provide detailed information on each separate securities issue, instructions to Rule 12–12 have been revised to permit grouping of short-term debt securities. In order to provide information to enable investors to assess the possible income tax consequences of unrealized gains or losses, the schedule requirements under Rules 12–12 and 12–13 have been expanded to require disclosure of the amounts of the aggregate unrealized appreciation or depreciation of securities based on the relationship between value and cost as determined for Federal income tax purposes. In addition, the requirement to disclose the basis for determining value where stock exchange prices are not used has been deleted from Rule 12–12 since such disclosure is already required in footnotes.

Other Changes

The final rules reflect certain other changes which eliminate additional rules identified by commentators as being duplicative of GAAP. Examples of these deletions from the proposed rules include, but are not limited to, portions of the general guidance on income recognition under Rule 6–03(g) and provisions for Federal income taxes under Rule 6–03(h). In addition, other proposed requirements, such as disclosure of the gross amounts of unrealized appreciation and depreciation of investment securities on the basis of historical cost, have been deleted based on commentators' concerns that they are contrary to GAAP.

In other instances, the final rules reflect changes to conform the requirements of Article 6 with other sections of Regulation S–X. For example, the requirements to present receivable balances under Rules 6–04.6 and 6–06.3 have been expanded to provide for separate disclosure of notes receivable balances to conform with similar provisions under Article 5 of Regulation S–X. In addition, the requirement to present net asset amounts in balance sheets of registered investment companies has been expanded to include per share data conforming to the requirements under Rule 6–05.4 for statements of net assets. Further, since the requirements for a statement of changes in net assets permit disclosure of the number of authorized and outstanding capital shares to be provided in a footnote, the requirements of Rule 6–04.16 relating to balance sheet presentation have been revised to permit presentation of this information either on the face of the balance sheet or in footnotes.

A few commentators suggested that certain of the proposed requirements, such as disclosures of restricted securities and the basis and method of compensating directors, called for information which is not generally appropriate for footnote presentation. Although the Commission finds merit in these arguments, it regards the information as meaningful. Accordingly, these disclosure requirements are included in the final rules being adopted. The Commission will reconsider these requirements at the time of any future project to transfer these type disclosure requirements from the financial statements to other sections of the propectus and annual report.

Finally, technical amendments are being adopted to conform the references

to specific provisions of Article 6 contained in other rules and regulations of the Commission with the amended rules.

FASB Extraction Project

As discussed in an earlier section of this release, the revisions to Article 6 are being adopted to, among other things, eliminate rules which are duplicative of GAAP. In this connection, the Commission recognizes that the Financial Accounting Standards Board ("FASB") has begun a project to extract the specialized accounting and reporting principles and practices from the industry audit guide, "Audits of Investment Companies," issued by the American Institute of Certified Public Accountants.[4] Upon completion of this project, the Commission will reexamine the rules being adopted in this release with the intent of eliminating any rules which become duplicative.

List of Subjects in 17 CFR Parts 210 and 270

Accounting, Reporting and recordkeeping requirements, Securities.

Parts 210 and 270 of Chapter II Title 17 of the Code of Federal Regulations are amended as follows:

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. By revising the introductory text of paragraph (a) and paragraph (a) (2) and (3) of § 210.3–18 to read as follows:

§ 210.3–18 Special provisions as to registered management investment companies and companies required to be registered as management investment companies.

(a) For filings by registered management investment companies, the following financial statements shall be filed:

* * * * *

(2) An audited statement of operations for the most recent fiscal year conforming to the requirements of § 210.6–07.

(3) Audited statements of changes in net assets conforming to the requirements of § 210.6–09 for the two most recent fiscal years.

* * * * *

2. By revising paragraph (a) of § 210.5–01 to read as follows:

§ 210.5–01 Application of §§ 210.5–01 to 210.5–04.

(a) Sections 210.5–01 to 210.5–04 shall be applicable to financial statements filed by all persons except—(1) registered investment companies (see §§ 210.6–01 to 210.6–10).

(2) Employee stock purchase, savings and similar plans (see §§ 210.6A–01 to 210.6A–05).

(3) Insurance companies (see §§ 210.7–01 to 210.7–05).

(4) Committees issuing certificates of deposit (see §§ 210.8–01 to 210.8–03).

(5) Bank holding companies and banks (see §§ 210.9–01 to 210.9–05).

(6) Brokers and dealers when filing Form X–17A–5 (§ 249.617) (see §§ 240.17a–5 and 240.17a.10 under the Securities Exchange Act of 1934).

* * * * *

3. By removing §§ 210.6–01 to 210.6–24 and the center headings for those sections and adding new §§ 210.6–01 to 210.6–10 and a new center heading preceding § 210.6–01 as follows:

Registered Investment Companies

Sec.
210.6–01 Application of §§ 210.6–01 to 210.6–10.
210.6–02 Definition of certain terms.
210.6–03 Special rules of general application to registered companies.
210.6–04 Balance sheets.
210.6–05 Statements of net assets.
210.6–06 Special rules applicable to the balance sheets of issuers of face-amount certificates.
210.6–07 Statements of operations.
210.6–08 Special provisions applicable to the statements of operations of issuers of face-amount certificates.
210.6–09 Statements of changes in net assets.
210.6–10 What schedules are to be filed.

Registered Investment Companies

§ 210.6–01 Application of §§ 210.6–01 to 210.6–10.

Sections 210.6–01 to 210.6–10 shall be applicable to financial statements filed for registered investment companies.

§ 210.6–02 Definition of certain terms.

The following terms shall have the meaning indicated in this rule unless the context otherwise requires. (Also see § 210.1–02 of this part.)

(a) *Affiliate.* The term "affiliate" means an "affiliated person" as defined in section 2(a)(3) of the Investment Company Act of 1940 unless otherwise indicated. The term "control" has the meaning in section 2(a)(9) of that Act.

(b) *Value.* As used in §§ 210.6–01 to 210.6–10, the term "value" shall have the meaning given in section 2(a)(41)(B) of the Investment Company Act of 1940.

(c) *Balance sheets; statements of net assets.* As used in §§ 210.6–01 to 210.6–10, the term "balance sheets" shall include statements of assets and liabilities as well as statements of net assets unless the context clearly indicates the contrary.

(c) *Qualified assets.* (1) For companies issuing face-amount certificates subsequent to December 31, 1940 under the provisions of section 28 of the Investment Company Act of 1940, the term "qualified assets" means qualified investments as that term is defined in section 28(b) of the Act. A statement to that effect shall be made in the balance sheet.

(2) For other companies, the term "qualified assets" means cash and investments which such companies do maintain or are required, by applicable governing legal instruments, to maintain in respect of outstanding face-amount certificates.

(3) Loans to certificate holders may be included as qualified assets in an amount not in excess of certificate reserves carried on the books of account in respect of each individual certificate upon which the loans were made.

§ 210.6–03 Special rules of general application to registered investment companies.

The financial statements filed for persons to which §§ 210.6–01 to 210.6–10 are applicable shall be prepared in accordance with the following special rules in addition to the general rules in §§ 210.1–01 to 210.4–10 (Articles 1, 2, 3, and 4). Where the requirements of a special rule differ from those prescribed in a general rule, the requirements of the special rule shall be met.

(a) *Content of financial statements.* The financial statements shall be prepared in accordance with the requirements of this part (Regulation S–X) notwithstanding any provision of the articles of incorporation, trust indenture or other governing legal instruments specifying certain accounting procedures inconsistent with those required in §§ 210.6–01 to 210.6–10.

(b) *Audited financial statements.* Where, under Article 3 of this part, financial statements are required to be audited, the independent accountant shall have been selected and ratified in accordance with section 32 of the Investment Company Act of 1940.

[4] At present, the principles and practices embodied in industry audit guides are considered preferable accounting but are not enforceable standards to be adhered to under Rule 3–02 of the AICPA's Code of Professional Ethics. In Statement of Financial Accounting Standards No. 32, the FASB announced a project to extract the specialized accounting and reporting principles and practices from the AICPA Guides and Statements of Position.

(c) *Consolidated and combined statements.* (1) Consolidated and combined statements filed for registered investment companies shall be prepared in accordance with §§ 210.3A–01 to 210.3A–05 (Article 3A) except that (i) statements of the registrant may be consolidated only with the statements of subsidiaries which are investment companies; (ii) a consolidated statement of the registrant and any of its investment company subsidiaries shall not be filed unless accompanied by a consolidating statement which sets forth the individual statements of each significant subsidiary included in the consolidated statement: *Provided, however,* That a consolidating statement need not be filed if all included subsidiaries are totally held; and (iii) consolidated or combined statements filed for subsidiaries not consolidated with the registrant shall not include any investment companies unless accompanied by consolidating or combining statements which set forth the individual statements of each included investment company which is a significant subsidiary.

(2) If consolidating or combining statements are filed, the amounts included under each caption in which financial data pertaining to affiliates is required to be furnished shall be subdivided to show separately the amounts: (i) Eliminated in consolidation; and (ii) not eliminated in consolidation.

(d) *Valuation of assets.* The balance sheets of registered investment companies, other than issuers of face-amount certificates, shall reflect all investments at value, with the aggregate cost of each category of investment reported under §§ 210.6–04.1, 6–04.2 and 6–04.3 and of the total investments reported under § 210.6–04.4 or § 210.6–05.1 shown parenthetically. State in a note the methods used in determining value of investments. As required by section 28(b) of the Investment Company Act of 1940, "qualified" assets of face-amount certificate companies shall be valued in accordance with certain provisions of the Code of the District of Columbia. For guidance as to valuation of securities, see §§ 404.03 to 404.05 of the Codification of Financial Reporting Policies.

(e) *Qualified assets.* State in a note the nature of any investments and other assets maintained or required to be maintained, by applicable legal instruments, in respect of outstanding face-amount certificates. If the nature of the qualifying assets and amount thereof are not subject to the provisions of section 28 of the Investment Company Act of 1940, a statement to that effect shall be made.

(f) *Restricted securities.* State in a note unless disclosed elsewhere the following information as to investment securities which cannot be offered for public sale without first being registered under the Securities Act of 1933 (restricted securities):

(1) The policy of the person with regard to acquisition of restricted securities.

(2) The policy of the person with regard to valuation of restricted securities. Specific comments shall be given as to the valuation of an investment in one or more issues of securities of a company or group of affiliated companies if any part of such investment is restricted and the aggregate value of the investment in all issues of such company or affiliated group exceeds five percent of the value of total assets. (As used in this paragraph, the term "affiliated" shall have the meaning given in § 210.6–02(a) of this part.)

(3) A description of the person's rights with regard to demanding registration of any restricted securities held at the date of the latest balance sheet.

(g) *Income recognition.* Dividends shall be included in income on the ex-dividend date; interest shall be accured on a daily basis. Dividends declared on short positions existing on the record date shall be recorded on the ex-dividend date and included as an expense of the period.

(h) *Federal income taxes.* The company's status as a "regulated investment company" as defined in Subtitle A, Chapter 1, Subchapter M of the Internal Revenue Code, as amended, shall be stated in a note referred to in the appropriate statements. Such note shall also indicate briefly the principal assumptions on which the company relied in making or not making provisions for income taxes. However, a company which retains realized capital gains and designates such gains as a distribution to shareholders in accordance with section 852(b)(3)(D) of the Internal Revenue Code shall, on the last day of its taxable year (and not earlier), make provision for taxes on such undistributed capital gains realized during such year.

(i) *Issuance and repurchase by a registered investment company of its own securities.* Disclose for each class of the company's securities:

(1) The number of shares, units, or principal amount of bonds sold during the period of report, the amount received therefor, and, in the case of shares sold by closed-end management investment companies, the difference, if any, between the amount received and the net asset value or preference in involuntary liquidation (whichever is appropriate) of securities of the same class prior to such sale; and

(2) The number of shares, units, or principal amount of bonds repurchased during the period of report and the cost thereof. Closed-end management investment companies shall furnish the following additional information as to securities repurchased during the period of report:

(i) As to bonds and preferred shares, the aggregate difference between cost and the face amount or preference in involuntary liquidation and, if applicable net assets taken at value as of the date of repurchase were less than such face amount or preference, the aggregate difference between cost and such net asset value;

(ii) As to common shares, the weighted average discount per share, expressed as a percentage, between cost of repurchase and the net asset value applicable to such shares at the date of repurchases.

The information required by paragraphs (h)(i)(2) (i) and (ii) of this section may be based on reasonable estimates if it is impracticable to determine the exact amounts involved.

(j) *Series companies.* (1) The information required by this part shall, in the case of a person which in essence is comprised of more than one separate investment company, be given as if each class or series of such investment company were a separate investment company; this shall not prevent the inclusion, at the option of such person, of information applicable to other classes or series of such person on a comparative basis, except as to footnotes which need not be comparative.

(2) If the particular class or series for which information is provided may be affected by other classes or series of such investment company, such as by the offset of realized gains in one series with realized losses in another, or through contingent liabilities, such situation shall be disclosed.

(k) *Certificate reserves.* (1) For companies issuing face-amount certificates subsequent to December 31, 1940 under the provisions of section 28 of the Investment Company Act of 1940, balance sheets shall reflect reserves for outstanding certificates computed in accordance with the provisions of section 28(a) of the Act.

(2) For other companies, balance sheets shall reflect reserves for

outstanding certificates determined as follows:

(i) For certificates of the installment type, such amount which, together with the lesser of future payments by certificate holders as and when accumulated at a rate not to exceed 3½ per centum per annum (or such other rate as may be appropriate under the circumstances of a particular case) compounded annually, shall provide the minimum maturity or face amount of the certificate when due.

(ii) For certificates of the fully-paid type, such amount which, as and when accumulated at a rate not to exceed 3½ per centum per annum (or such other rate as may be appropriate under the circumstances of a particular case) compounded annually, shall provide the amount or amounts payable when due.

(iii) Such amount or accrual therefor, as shall have been credited to the account of any certificate holder in the form of any credit, or any dividend, or any interest in addition to the minimum maturity or face amount specified in the certificate, plus any accumulations on any amount so credited or accrued at rates required under the terms of the certificate.

(iv) An amount equal to all advance payments made by certificate holders, plus any accumulations thereon at rates required under the terms of the certificate.

(v) Amounts for other appropriate contingency reserves, for death and disability benefits or for reinstatement rights on any certificate providing for such benefits or rights.

(l) *Inapplicable captions.* Attention is directed to the provisions of §§ 210.4–02 and 210.4–03 which permit the omission of separate captions in financial statements as to which the items and conditions are not present, or the amounts involved not significant. However, amounts involving directors, officers, and affiliates shall nevertheless be separately set forth except as otherwise specifically permitted under a particular caption.

§ 210.6–04 Balance sheets.

This rule is applicable to balance sheets filed by registered investment companies except for persons who substitute a statement of net assets in accordance with the requirements specified in § 210.6–05, and issuers of face-amount certificates which are subject to the special provisions of § 210.6–06 of this part. Balance sheets filed under this rule shall comply with the following provisions:

Assets

1. *Investments in securities of unaffiliated issuers.*

2. *Investments in and advances to affiliates.* State separately investments in and advances to: (a) Controlled companies and (b) other affiliates.

3. *Investments—other than securities.* State separately each major category.

4. *Total investments.*

5. *Cash.* Include under this caption cash on hand and demand deposits. Provide in a note to the financial statements the information required under § 210.5–02.1 regarding restrictions and compensating balances.

6. *Receivables.* (a) State separately amounts receivable from (1) sales of investments; (2) subscriptions to capital shares; (3) dividends and interest; (4) directors and officers; and (5) others.

(b) If the aggregate amount of notes receivable exceeds 10 percent of the aggregate amount of receivables, the above information shall be set forth separately, in the balance sheet or in a note thereto, for accounts receivable and notes receivable.

7. *Deposits for securities sold short and open option contracts.* State separately amounts held by others in connection with: (a) Short sales and (b) open option contracts.

8. *Other assets.* State separately (a) prepaid and deferred expenses; (b) pension and other special funds; (c) organization expenses; and (d) any other significant item not properly classified in another asset caption.

9. *Total assets.*

Liabilities

10. *Accounts payable and accrued liabilities.* State separately amounts payable for: (a) Securities sold short; (b) open option contracts written; (c) other purchases of securities; (d) capital shares reedeemed; (e) dividends or other distributions on capital shares; and (f) others. State separately the amount of any other liabilities which are material. Securities sold short and open option contracts written shall be stated at value.

11. *Deposits for securities loaned.* State the value of securities loaned and indicate the nature of the collateral received as security for the loan, including the amount of any cash received.

12. *Other liabilities.* State separately (a) amounts payable for investment advisory, management and service fees; and (b) the total amount payable to: (1) Officers and directors; (2) controlled companies; and (3) other affiliates, excluding any amounts owing to noncontrolled affiliates which arose in the ordinary course of business and which are subject to usual trade terms.

13. *Notes payable, bonds and similar debt.* (a) State separately amounts payable to: (1) Banks or other financial institutions for borrowings; (2) controlled companies; (3) other affiliates; and (4) others, showing for each category amounts payable within one year and amounts payable after one year.

(b) Provide in a note the information required under § 210.5–02.19(b) regarding unused lines of credit for short-term financing and § 210.5–02.22(b) regarding unused commitments for long-term financing arrangements.

14. *Total liabilities.*

15. *Commitments and contingent liabilities.*

Net Assets

16. *Units of capital.* (a) Disclose the title of each class of capital shares or other capital units, the number authorized, the number outstanding, and the dollar amount thereof.

(b) Unit investment trusts, including those which are issuers of periodic payment plan certificates, also shall state in a note to the financial statements: (1) The total cost to the investors of each class of units or shares; (2) the adjustment for market depreciation or appreciation; (3) other deductions from the total cost to the investors for fees, loads and other charges, including an explanation of such deductions; and (4) the net amount applicable to the investors.

17. *Accumulated undistributed income (loss).* Disclose:

(a) The accumulated undistributed investment income-net,

(b) accumulated undistributed net realized gains (losses) on investment transactions, and (c) net unrealized appreciation (depeciation) in value of investments at the balance sheet date.

18. *Other elements of capital.* Disclose any other elements of capital or residual interests appropriate to the capital structure of the reporting entity.

19. *Net assets applicable to outstanding units of capital.* State the net asset value per share.

§ 210.6–05 Statements of net assets.

In lieu of the balance sheet otherwise required by § 210.6–04 of this part, persons may substitute a statement of net assets if at least 95 percent of the amount of the person's total assets are represented by investments in securities of unaffiliated issuers. If presented in such instances, a statement of net assets shall consist of the following:

Statements of Net Assets

1. A schedule of investments in securities of unaffiliated issuers as prescribed in § 210.12–12.

2. The excess (or deficiency) of other assets over (under) total liabilities stated in one amount, except that any amounts due from or to officers, directors, controlled persons, or other affiliates, excluding any amounts owing to noncontrolled affiliates which arose in the ordinary course of business and which are subject to usual trade terms, shall be stated separately.

3. Disclosure shall be provided in the notes to the financial statements for any item required under §§ 210.6–04.10 to 210.6–04.13.

4. The balance of the amounts captioned as *net assets.* The number of outstanding shares and net asset value per share shall be shown parenthetically.

5. The information required by (i) § 210.6–04.16, (ii) § 210.6–04.17 and (iii) § 210.6–04.18 shall be furnished in a note to the financial statements.

§ 210.6–06 Special provisions applicable to the balance sheets of issuers of face-amount certificates.

Balance sheets filed by issuers of face-amount certificates shall comply with the following provisions:

Assets

1. *Investments.* State separately each major category: such as, real estate owned, first mortgage loans on real estate, other mortgage loans on real estate, investments in securities of unaffiliated issuers, and investments in and advances to affiliates.

2. *Cash.* Include under this caption cash on hand and demand deposits. Provide in a note to the financial statements the information required under § 210.5–02.1 regarding restrictions and compensating balances.

3. *Receivables.* (a) State separately amounts receivable from (1) sales of investments; (2) dividends and interest; (3) directors and officers; and (4) others.

(b) If the aggregate amount of notes receivable exceeds 10 percent of the aggregate amount of receivables, the above information shall be set forth separately, in the balance sheet or in a note thereto, for accounts receivable and notes receivable.

4. *Total qualified assets.* State in a note to the financial statements the amount of qualified assets on deposit classified as to general categories of assets and as to general types of depositories, such as banks and states, together with a statement as to the purpose of the deposits.

5. *Other assets.* State separately: (a) Investments in securities of unaffiliated issuers not included in qualifying assets in item 1 above; (b) investments in and advances to affiliates not included in qualifying assets in item 1 above; and (c) any other significant item not properly classified in another asset caption.

6. *Total assets.*

Liabilities

7. *Certificate reserves.* Issuers of face-amount certificates shall state separately reserves for: (a) Certificates of the installment type; (b) certificates of the fully-paid type; (c) advance payments; (d) additional amounts accrued for or credited to the account of certificate holders in the form of any credit, dividend, or interest in addition to the minimum amount specified in the certificate; and (e) other certificate reserves. State in an appropriate manner the basis used in determining the reserves, including the rates of interest of accumulation.

8. *Notes payable, bonds and similar debt.* (a) State separately amounts payable to: (1) Banks or other financial institutions for borrowings; (2) controlled companies; (3) other affiliates; and (4) others, showing for each category amounts payable within one year and amounts payable after one year.

(b) Provide in a note the information required under § 210.5–02.19(b) regarding unused lines of credit for short-term financing and § 210.5–02.22(b) regarding unused commitments for long-term financing arrangements.

9. *Accounts payable and accrued liabilities.* State separately (a) amounts payable for investment advisory, management and service fees; and (b) the total amount payable to: (1) Officers and directors; (2) controlled companies; and (3) other affiliates, excluding any amounts owing to noncontrolled affiliates which arose in the ordinary course of business and which are subject to usual trade terms. State separately the amount of any other liabilities which are material.

10. *Total liabilities.*

11. *Commitments and contingent liabilities.*

Stockholders' Equity

12. *Capital shares.* Disclose the title of each class of capital shares or other capital units, the number authorized, the number outstanding and the dollar amount thereof. Show also the dollar amount of any capital shares subscribed but unissued, and show the deduction for subscriptions receivable therefrom.

13. *Other elements of capital.* (a) Disclose any other elements of capital or residual interests appropriate to the capital structure of the reporting entity.

(b) A summary of each account under this caption setting forth the information prescribed in § 210.3–04 shall be given in a note or separate statement for each period in which a statement of operations is presented.

14. *Total liabilities and stockholders' equity.*

§ 210.6–07 Statements of operations.

Statements of operations filed by registered investment companies, other than issuers of face-amount certificates subject to the special provisions of § 210.6–08 of this part, shall comply with the following provisions:

Statements of Operations

1. *Investment income.* State separately income from: (a) dividends; (b) interest on securities; and (c) other income. If income from investments in or indebtedness of affiliates is included hereunder, such income shall be segregated under an appropriate caption subdivided to show separately income from: (1) Controlled companies; and (2) other affiliates. If non-cash dividends are included in income, the bases of recognition and measurement used in respect to such amounts shall be disclosed. Any other category of income which exceeds five percent of the total shown under this caption shall be stated separately.

2. *Expenses.* (a) State separately the total amount of investment advisory, management and service fees, and expenses in connection with research, selection, supervision, and custody of investments. Amounts of expenses incurred from transactions with affiliated persons shall be disclosed together with the identity of and related amount applicable to each such person accounting for five percent or more of the total expenses shown under this caption together with a description of the nature of the affiliation. Expenses incurred within the person's own organization in connection with research, selection and supervision of investments shall be stated separately. Reductions or reimbursements of management or service fees shall be shown as a negative amount or as a reduction of total expenses shown under this caption.

(b) State separately any other expense item the amount of which exeeds five percent of the total expenses shown under this caption.

(c) A note to the financial statements shall include information concerning management and service fees, the rate of fee, and the base and method of computation. State separately the amount and a description of any fee reductions or reimbursements representing: (1) Expense limitation agreements or commitments; and (2) offsets received from broker-dealers showing separately for each amount received or due from (i) unaffiliated persons; and (ii) affiliated persons. If no management or service fees were incurred for a period, state the reason therefor.

(d) If any expenses were paid otherwise than in cash, state the details in a note.

(e) State in a note to the financial statements the amount of brokerage commissions (including dealer markups) paid to affiliated broker-dealers in connection with purchase and sale of investment securities. Open-end management companies shall state in a note the net amounts of sales charges deducted from the proceeds of sale of capital shares which were retained by any affiliated principal underwriter or other affiliated broker-dealer.

3. *Interest and amortization of debt discount and expense.*

4. *Investment income before income tax expense.*

5. *Income tax expense.* Include under this caption only taxes based on income.

6. *Investment income-net.*

7. *Realized and unrealized gain (loss) on investments-net.* (a) State separately the net realized gain or loss on transactions in: (1) Investment securities of unaffiliated issuers, (2) investment securities of affiliated issuers, and (3) investments other than securities.

(b) Distributions of realized gains by other investment companies shall be shown separately under this caption.

(c) State separately: (1) The gain or loss from expiration or closing of option contracts written, (2) the gain or loss on closed short positions in securities, and (3) other realized gain or loss. Disclose in a note to the financial statements the number and associated dollar amounts as to option contracts written: (i) At the beginning of the period; (ii) during the period; (iii) expired during the period; (iv) closed during the period; (v) exercised during the period; (vi) balance at end of the period.

(d) State separately the amount of the net increase or decrease during the period in the unrealized appreciation or depreciation in the value of investment securities and other investments held at the end of the period.

(e) State separately any: (1) Federal income taxes and (2) other income taxes applicable to realized and unrealized gain (loss) on investments, distinguishing taxes payable currently from deferred income taxes.

8. *Net gain (loss) on investments.*

9. *Net increase (decrease) in net assets resulting from operations.*

§ 210.6-08 Special provisions applicable to the statements of operations of issuers of face-amount certificates.

Statements of operations filed by issuers of face-amount certificates shall comply with the following provisions:

Statements of Operations

1. *Investment income.* State separately income from: (a) Interest on mortgages; (b) interest on securities; (c) dividends; (d) rental income; and (e) other investment income. If income from investments in or indebtedness of affiliates is included hereunder, such income shall be segregated under an appropriate caption subdivided to show separately income from: (1) Controlled companies; and (2) other affiliates. If non-cash dividends are included in income, the bases of recognition and measurement used in respect to such amounts shall be disclosed. Any other category of income which exceeds five percent of the total shown under this caption shall be stated separately.

2. *Investment expenses.* (a) State separately the total amount of investment advisory, management and service fees, and expenses in connection with research, selection, supervision, and custody of investments. Amounts of expenses incurred from transactions with affiliated persons shall be disclosed together with the identity of and related amount applicable to each such person accounting for five percent or more of the total expenses shown under this caption together with a description of the nature of the affiliation. Expenses incurred within the person's own organization in connection with research, selection and supervision of investments shall be stated separately. Reductions or reimbursements of management or service fees shall be shown as a negative amount or as a reduction of total expenses shown under this caption.

(b) State separately any other expense item the amount of which exceeds five percent of the total expenses shown under this caption.

(c) A note to the financial statements shall include information concerning management and service fees, the rate of fee, and the base and method of computation. State separately the amount and a description of any fee reductions or reimbursements representing: (1) Expense limitation agreements or commitments; and (2) offsets received from broker-dealers showing separately for each amount received or due from: (i) Unaffiliated persons; and (ii) affiliated persons. If no management or service fees were incurred for a period, state the reason therefor.

(d) If any expenses were paid otherwise than in cash, state the details in a note.

(e) State in a note to the financial statements the amount of brokerage commissions (including dealer markups) paid to affiliated broker-dealers in connection with purchase and sale of investment securities.

3. *Interest and amortization of debt discount and expense.*

4. *Provision for certificate reserves.* State separately any provision for additional credits, or dividends, or interests, in addition to the minimum maturity or face amount specified in the certificates. State also in an appropriate manner reserve recoveries from surrenders or other causes.

5. *Investment income before income tax expense.*

6. *Income tax expense.* Include under this caption only taxes based on income.

7. *Investment income-net.*

8. *Realized gain (loss) on investments-net.* (a) State separately the net realized gain or loss on transactions in: (1) Investment securities of unaffiliated issuers, (2) investment securities of affiliated issuers, and (3) other investments.

(b) Distributions of capital gains by other investment companies shall be shown separately under this caption.

(c) State separately any: (1) Federal income taxes and (2) other income taxes applicable to realized gain (loss) on investments, distinguishing taxes payable currently from deferred income taxes.

9. *Net income or loss.*

§ 210.6-09 Statements of changes in net assets.

Statements of changes in net assets filed for persons to whom this article is applicable shall comply with the following provisions:

Statements of Changes in Net Assests

1. *Operations.* State separately: (a) Investment income-net as shown by § 210.6-07.6; (b) realized gain (loss) on investments-net of any Federal or other income taxes applicable to such amounts; (c) increase (decrease) in unrealized appreciation or depreciation-net of any Federal or other income taxes applicable to such amounts; and (d) net increase (decrease) in net assets resulting from operations as shown by § 210.6-07.9.

2. *Net equalization charges and credits.* State the net amount of accrued undivided earnings separately identified in the price of capital shares issued and repurchased.

3. *Distributions to shareholders.* State separately distributions to shareholders from: (a) Investment income-net; (b) realized gain from investment transactions-net; and (c) other sources.

4. *Capital share transactions.* (a) State the increase or decrease in net assets derived from the net change in the number of outstanding shares or units.

(b) Disclose in the body of the statements or in the notes, for each class of the person's shares, the number and value of shares issued in reinvestment of dividends as well as the number of dollar amounts received for shares sold and paid for shares redeemed.

5. *Total increase (decrease).*

6. *Net assets at the beginning of the period.*

7. *Net assets at the end of the period.* Disclose parenthetically the balance of undistributed net investment income included in net assets at the end of the period.

§ 210.6-10 What schedules are to be filed.

(a) When information is required in schedules for both the person and its subsidiaries consolidated, it may be presented in the form of a single schedule, provided that items pertaining to the registrant are separately shown and that such single schedule affords a properly summarized presentation of the facts. If the information required by any schedule (including the notes thereto) is shown in the related financial statement or in a note thereto without making such statement unclear or confusing, that procedure may be followed and the schedule omitted.

(b) The schedules shall be examined by an independent accountant if the related financial statements are so examined.

(c) *Management investment companies.* Except as otherwise provided in the applicable form: (1) The schedules specified below in this rule shall be filed for management investment companies as of the dates of the most recent audited balance sheet and any subsequent unaudited statement being filed for each person or group.

Schedule I—Investments in securities of unaffiliated issuers. The schedule prescribed by § 210.12-12 shall be filed in support of caption 1 of each balance sheet.

Schedule II—Investments—other than securities. The schedule prescribed by § 210.12-13 shall be filed in support of caption 3 of each balance sheet. This schedule may be omitted if the investments, other than securities, at both the beginning and end of the period amount to less than one percent of the value of total investments (§ 210.6-04.4).

Schedule III—Investments in and advances to affiliates. The schedule prescribed by § 210.12-14 shall be filed in support of caption 2 of each balance sheet.

Schedule IV—Amounts due from directors and officers. The schedule prescribed by § 210.12-03 shall be filed with respect to each person among the directors and officers from whom any amount was owed at any time during the period for which related statements of changes in net assets are required to be filed.

Schedule V—Investments—securities sold short. The schedule prescribed by § 210.12-12A shall be filed in support of caption 10(a) of each balance sheet.

Schedule VI—Open option contracts written. The schedule prescribed by § 210.12-12B shall be filed in support of caption 10(b) of each balance sheet.

Schedule VII—Short-term borrowings. The schedule prescribed by § 210.12-10 shall be filed in support of any amounts included in caption 13 of each balance sheet which are payable within one year to banks for borrowings; factors and other financial institutions for borrowings; and holders of any short-term notes.

(d) *Unit investment trusts.* Except as otherwise provided in the applicable form: (1) Schedules I and II, specified below in this section, shall be filed for unit investment trusts as of the dates of the most recent audited balance sheet and any subsequent unaudited statement being filed for each person or group.

(2) Schedule III, specified below in this section, shall be filed for unit investment trusts for each period for which a statement of operations is required to be filed for each person or group.

Schedule I—Investment in securities. The schedule prescribed by § 210.12-12 shall be

filed in support of caption 1 of each balance sheet (§ 210.6–04).

Schedule II—Allocation of trust assets to series of trust shares. If the trust assets are specifically allocated to different series of trust shares, and if such allocation is not shown in the balance sheet in columnar form or by the filing of separate statements for each series of trust shares, a schedule shall be filed showing the amount of trust assets, indicated by each balance sheet filed, which is applicable to each series of trust shares.

Schedule III—Allocation of trust income and distributable funds to series of trust shares. If the trust income and distributable funds are specifically allocated to different series of trust shares and if such allocation is not shown in the statement of operations in columnar form or by the filing of separate statements for each series of trust shares, a schedule shall be submitted showing the amount of income and distributable funds, indicated by each statement of operations filed, which is applicable to each series of trust shares.

(e) *Face-amount certificate investment companies.* Except as otherwise provided in the applicable form:

(1) Schedules I, V and X, specified below, shall be filed for face-amount certificate investment companies as of the dates of the most recent audited balance sheet and any subsequent unaudited statement being filed for each person or group.

(2) All other schedules specified below in this seciton shall be filed for face-amount certificate investment companies for each period for which a statement of operations is filed, except as indicated for Schedules III and IV.

Schedule I—Investment in securities of unaffiliated issuers. The schedule prescribed by § 210.12–21 shall be filed in support of caption 1 and, if applicable, caption 5(a) of each balance sheet. Separate schedules shall be furnished in support of each caption, if applicable.

Schedule II—Investments in and advances to affiliates and income thereon. The schedule prescribed by § 210.12–22 shall be filed in support of captions 1 and 5(b) of each balance sheet and caption 1 of each statement of operations. Separate schedules shall be furnished in support of each caption, if applicable.

Schedule III—Mortage loans on real estate and interest earned on mortages. The schedule prescribed by § 210.12–23 shall be filed in support of captions 1 and 5(c) of each balance sheet and caption 1 of each statement of operations, except that only the information required by column G and note 8 of the schedule need be furnished in support of statements of operations for years for which related balance sheets are not required.

Schedule IV—Real estate owned and rental income. The schedule prescribed by § 210.12–24 shall be filed in support of captions 1 and 5(a) of each balance sheet and caption 1 of each statement of operations for rental income included therein, except that only the information required by columns H, I and J, and item "Rent from properties sold during the period" and note 4 of the schedule need be furnished in support of statements of operations for years for which related balance sheets are not required.

Schedule V—Qualified assets on deposit. The schedule prescribed by § 210.12–27 shall be filed in support of the information required by caption 4 of § 210.6–06 as to total amount of qualified assets on deposit.

Schedule VI—Amounts due from officers and directors. The schedule prescribed by § 210.12–03 shall be filed with respect to each director, officer, or employee from whom any amount was owed at any time during the period for which related statements of operation are filed. State if an exemption has been granted by the Commission with respect to amounts included in this schedule.

Schedule VII—Short-term borrowings. The schedule prescribed by § 210.12–10 shall be filed in support of any amounts included in caption 8 of each balance sheet which are payable within one year to banks for borrowings; factors and other financial institutions for borrowings; and holders of any short-term notes.

Schedule VIII—Indebtedness to affiliates—not current. The schedule prescribed by §210.12–05 shall be filed in support of any amounts included in caption 9 of each balance sheet. This schedule and Schedule II may be combined.

Schedule IX—Supplementary profit and loss information. The schedule prescribed by § 210.12–25 shall be filed in support of each statement of operations.

Schedule X—Guarantees of securities of other issuers. The schedule prescribed by § 210.12–08 shall be filed with respect to any guarantees of securities of other issuers by the person for which the statement is filed.

Schedule XI—Certificate reserves. The schedule prescribed by § 210.12–26 shall be filed in support of caption 7 of each balance sheet.

Schedule XII—Valuation and qualifying accounts. The schedule prescribed by § 210.12–09 shall be filed in support of all other reserves included in the balance sheet.

§ 210.6–30 [Removed]

4. By removing § 210.6–30 and adding a new § 210.6A–01 as follows:

Employee Stock Purchase, Savings and Similar Plans

§ 210.6A–01 Application of §§ 210.6A–01 to 210.6A–05.

(a) Sections 210.6A–01 to 210.6A–05 shall be applicable to financial statements filed for employee stock purchase, savings and similar plans.

§ 210.6–31 [Removed]

5. By removing § 210.6–31 and adding a new § 210.6A–02 as follows:

§ 210.6A–02 Special rules applicable to employee stock purchase, savings and similar plans.

The financial statements filed for persons to which this article is applicable shall be prepared in accordance with the following special rules in addition to the general rules in §§ 210.1–01 to 210.4–10. Where the requirements of a special rule differ from those prescribed in a general rule, the requirements of the special rule shall be met.

(a) *Investment programs.* If the participating employees have an option as to the manner in which their deposits and contributions may be invested, a description of each investment program shall be given in a footnote or otherwise. The number of employees under each investment program shall be stated.

(b) *Net asset value per unit.* Where appropriate, the number of units and the net asset value per unit shall be given by footnote or otherwise.

(c) *Federal income taxes.* (1) If the plan is not subject to Federal income taxes, a note shall so state indicating briefly the principal assumptions on which the plan relied in not making provision for such taxes.

(2) State the Federal income tax status of the employee with respect to the plan.

(d) *Valuation of assets.* The statement of financial condition shall reflect all investments at value, showing cost parenthetically. For purposes of this rule, the term "value" shall mean (1) market value for those securities having readily available market quotations and (2) fair value as determined in good faith by the trustee(s) for the plan (or by the person or persons who exercise similar responsibilities) with respect to other securities and assets.

§ 210.6–32—210.6–34 [Redesignated as §§ 210.6A–03—210.6A–05]

6. By redesignating §§ 210.6–32, 210.6–33, and 210.6–34 as §§ 210.6A–03, 210.6A–04, and 210.6A–05, respectively.

7. By revising § 210.12–01 to read as follows:

§ 210.12–01 Application of §§ 210.12–01 to 210.12–27.

These sections prescribe the form and content of the schedules required by §§ 210.5–04, 210.6–10, 210.6A–05, 210.7–05 and 210.9–05.

8. By revising § 210.12–12 and adding new §§ 210.12–12A and 210.12–12B to read as follows:

§ 210.12–12 Investments in securities of unaffiliated issuers.

Col. A	Col. B	Col. C
Name of issuer and title of issue [1] and [2].	Balance held at close of period. Number of shares—principal amount of bonds and notes. [3]	Value of each item at close of period. [3] [4] [5] [6]

[1] Each issue shall be listed separately: *Provided,* however, that an amount not exceeding five percent of the total of Column C may be listed in one amount as "Miscellaneous securities," provided the securities so listed are not restricted, have been held for not more than one year prior to the date of the related balance sheet, and have not previously

been reported by name to the shareholders of the person for which the schedule is filed or to any exchange, or set forth in any registration statement, application, or annual report or otherwise made available to the public.

[2] List separately: (a) Common shares; (b) preferred shares; (c) bonds and notes; (d) time deposits; and (e) put and call options purchased. Within each of these subdivisions, classify in an appropriate manner according to type of business; e.g., aerospace, banking, chemicals, machinery and machine tools, petroleum, utilities, etc.; or according to type of instrument; e.g., commercial paper, bankers' acceptances, certificates of deposit. Short-term debt instruments of the same issuer may be aggregated, in which case the range of interest rates and maturity dates shall be indicated. For issuers of periodic payment plan certificates and unit investment trusts, list separately: (i) Trust shares in trusts created or serviced by the depositor or sponsor of this trust; (ii) trust shares in other trusts; and (iii) securities of other investment companies. Restricted securities shall not be combined with unrestricted securities of the same issuer. Repurchase agreements shall be stated separately showing for each the name of the party or parties to the agreement, the date of the agreement, the total amount to be received upon repurchase, the repurchase date and description of securities subject to the repurchase agreements.

[3] The subtotals for each category of investments, subdivided by business grouping or instrument type, shall be shown together with their percentage value compared to net assets (§§ 210.6–04.19 or 210.6–05.4).

[4] Column C shall be totaled. The total of column C shall agree with the correlative amounts shown on the related balance sheet.

[5] Indicate by an appropriate symbol each issue of securities which is non-income producing. Evidences of indebtedness and preferred shares may be deemed to be income producing if, on the respective last interest payment date or date for the declaration of dividends prior to the date of the related balance sheet, there was only a partial payment of interest or a declaration of only a partial amount of the dividends payable; in such case, however, each such issue shall be indicated by an appropriate symbol referring to a note to the effect that, on the last interest or dividend date, only partial interest was paid or partial dividends declared. If, on such respective last interest or dividend date, no interest was paid or no cash or in kind dividends declared, the issue shall not be deemed to be income producing. Common shares shall not be deemed to be income producing unless, during the last year preceding the date of the related balance sheet, there was at least one dividend paid upon such common shares.

[6] Indicate by an appropriate symbol each issue of restricted securities. State the following in a footnote: (a) As to each such issue: (1) Acquisition date, (2) carrying value per unit of investment at date of related balance sheet, e.g., a percentage of current market value of unrestricted securities of the same issuer, etc., and (3) the cost of such securities; (b) as to each issue acquired during the year preceding the date of the related balance sheet, the carrying value per unit of investment of unrestricted securities of the same issuer at: (1) The day the purchase price was agreed to; and (2) the day on which an enforceable right to acquire such securities was obtained; and (c) the aggregate value of all restricted securities and the percentage which the aggregate value bears to net assets.

[7] Indicate by an appropriate symbol each issue of securities held in connection with open put or call option contracts or loans for short sales.

[8] State in a footnote the following amounts based on cost for Federal income tax purposes: (a) Aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost, (b) the aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value, (c) the net unrealized appreciation or depreciation, and (d) the aggregate cost of securities for Federal income tax purposes.

§ 210.12–12A Investments—securities sold short.

[For management investment companies only]

Col. A	Col. B	Col. C
Name of issuer and title of issue.[1]	Balance of short position at close of period. (number of shares).	Value of each open short position.[2]

[1] Each issue shall be listed separately.

[2] Column C shall be totaled. The total of column C shall agree with the correlative amounts shown on the related balance sheet.

§ 210.12–12B Open option contracts written.

[For management investment companies only]

Col. A	Col. B	Col. C	Col. D	Col. E
Name of issue.[1,2]	Number of contracts.[3]	Exercise price.	Expiration date.	Value.[4]

[1] Information as to put options shall be shown separately from information as to call options.

[2] Options of an issuer where exercise prices or expiration dates differ shall be listed separately.

[3] If the number of shares subject to option is substituted for number of contracts, the column name shall reflect that change.

[4] Column E shall be totaled and shall agree with the correlative amount shown on the related balance sheet.

9. By revising § 210.12–13 as follows:

§ 210.12–13 Investments other than securities.

[For management investment companies only]

Col. A	Col. B	Col. C
Description.[1]	Balance held at close of period—quantity.[2,3,5]	Value of each item at close of period.[4,6,7]

[1] List each major category of investments by descriptive title.

[2] If practicable, indicate the quantity or measure in appropriate units.

[3] Indicate by an appropriate symbol each investment which is non-income producing.

[4] Indicate by an appropriate symbol each investment not readily marketable. The term "investment not readily marketable" shall include investments for which there is no independent publicly quoted market and investments which cannot be sold because of restrictions or conditions applicable to the investment or the company.

[5] Indicate by an appropriate symbol each investment subject to option. State in a footnote: (a) The quantity subject to option, (b) nature of option contract, (c) option price, and (d) dates within which options may be exercised.

[6] Column C shall be totaled and shall agree with the correlative amount shown on the related balance sheet.

[7] State in a footnote the following amounts based on cost for Federal income tax purposes: (a) Aggregate gross unrealized appreciation for all investments in which there is an excess of value over tax cost, (b) the aggregate gross unrealized depreciation for all investments in which there is an excess of tax cost over value, (c) the net unrealized appreciation or depreciation, and (d) the aggregate cost of investments for Federal income tax purposes.

10. By revising § 210.12–14 as follows:

§ 210.12–14 Investments in and advances to affiliates.

[For management investment companies only]

Col. A	Col. B	Col. C	Col. D	Col. E
Name of issuer and title of issue or nature of indebtedness.[1]	Number of shares—principal amount of bonds, notes and other indebtedness held at close of period.	Amount of equity in net profit and loss for the period.[2,6]	Amount of dividends or interest.[2,5]	Value of each item at close of period.[2,3,4,6]
			(1) Credited to income..	
			(2) Other.....	

[1] (a) List each issue separately and group (1) investments in majority-owned subsidiaries, segregating subsidiaries consolidated; (2) other controlled companies; and (3) other affiliates. (b) If during the period there has been any increase or decrease in the amount of investment in and advance to any affiliate, state in a footnote (or if there have been changes to numerous affiliates, in a supplementary schedule) (1) name of each issuer and title of issue or nature of indebtedness; (2) balance at beginning of period; (3) gross additions; (4) gross reductions; (5) balance at close of period as shown in Column E. Include in the footnote or schedule comparable information as to affiliates in which there was an investment at any time during the period even though there was no investment at the close of the period of report.

[2] Give totals for each group. If operations of any controlled companies are different in character from those of the company, group such affiliates (1) within divisions and (2) by type of activities.

[3] columns C, D and E shall be totaled. The totals of Column E shall agree with the correlative amount shown on the related balance sheet.

[4] (a) Indicate by an appropriate symbol each issue of restricted securities. The information required by instruction 5 of § 210.12–12 shall be given in a footnote. (b) Indicate by an appropriate symbol each issue of securities subject to option. The information required by instruction 5 of § 210.12–13 shall be given in a footnote.

[5] (a) Include in Column D (1) as to each issue held at the close of the period, the dividends or interest included in caption 1 of the statement of operations. In addition, show as the final item in column D (1) the aggregate of dividends and interest included in the statement of operations in respect of investments in affiliates not held at the close of the period. The total of this column shall agree with the correlative amount shown on the related statement of operations.

(b) Include in Column D (2) all other dividends and interest. Explain in an appropriate footnote the treatment accorded each item.

(c) Indicate by an appropriate symbol all non-cash dividends and explain the circumstances in a footnote.

(d) Indicate by an appropriate symbol each issue of securities which is non-income producing.

[6] The information required by column C shall be furnished only as to controlled companies.

§§ 210.12–19 and 210.12–20 [Removed]

11. By removing §§ 210.12–19 and 210.12–20.

PART 270—GENERAL RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

12. By revising paragraph (a)(4) and the introductory text of paragraph (a) of § 270.2a–4 to read as follows:

§ 270.2a–4 Definition of "current net asset value" for use in computing periodically the current price of redeemable security.

(a) The current net asset value of any redeemable security issued by a registered investment company used in computing periodically the current price for the purpose of distribution, redemption, and repurchase means an amount which reflects calculations, whether or not recorded in the books of account, made substantially in accordance with the following, with

estimates used where necessary or appropriate.

* * * * *

(4) Expenses, including any investment advisory fees, shall be included to date of calculation. Appropriate provision shall be made for Federal income taxes if required. Investment companies which retain realized capital gains designated as a distribution to shareholders shall comply with paragraph (h) of §210.6-03 of Regulation S-X.

* * * * *

(Secs. 7, 8, and 19(a) of the Securities Act of 1933 (15 U.S.C. 77g, 77h, and 77s(a)); secs. 12, 13, 15(d) and 23(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78l, 78m, 78o(d), 78w); and secs. 8, 30(d), 31(c), and 38(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-8, 80a-29(d), 80a-30(c), and 80a-37(a)))

Dated: December 6, 1982.

By the Commission.

Shirley E. Hollis,

Assistant Secretary.

Regulatory Flexibility Act Certification

I, John S.R. Shad, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b) that the rules adopted in Securities Act Release No. 6442 which revise the financial statement requirements for registered investment companies will not have a significant economic impact on any entity subject to its provisions and, therefore, will not have a significant economic impact on a substantial number of small entities. The reason for this certification is that it is anticipated that the effects of the final rules will not be significant for any class of registrants for the following reasons. First, the compliance burden is not being significantly changed. In addition, the required information is readily available from existing accounting records or otherwise readily available to the affected companies at little or no cost. Finally, the disclosure of such information, both in form and content, would not impose significant competitive advantages or disadvantages or other significant costs.

Dated: December 6, 1982.

John S. R. Shad,

Chairman.

BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 145

[Docket No. 78N-0138]

Canned Pears; Standard of Quality; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date for compliance with the provisions of the amended standard of quality for canned pears.

DATES: Effective July 1, 1985, for all affected products initially introduced or initially delivered for introduction into interstate commerce on or after this date. Voluntary compliance may have begun November 22, 1982.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF-214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204; 202-245-1164.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 21, 1982 (45 FR 41526), FDA issued a final regulation amending the standard of quality for canned pears (21 CFR 145.175(b)) in consideration of the quality provisions of the Recommended International Standard for Canned Pears developed by the Codex Alimentarius Commission and requests by the Canners League of California and the United States Department of Agriculture. Any person who would be adversely affected by the regulation could have, at any time on or before October 21, 1982, filed written objections to the final regulation and requested a hearing on the specific provisions to which there were objections. No objections or requests for a hearing were received.

List of Subjects in 21 CFR Part 145

Canned fruit, Food standards; Fruits.

PART 145—[AMENDED]

§ 145.175 [Amended]

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), notice is given that the effective date for compliance with paragraph (b) of the standard of quality for canned pears (§ 145.175 *Canned pears* (21 CFR 145.175(b)) as amended in the **Federal Register** of September 21, 1982 (47 FR 41526) is July 1, 1985. Voluntary compliance may have begun November 22, 1982.

Dated: December 15, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 1505-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510 and 522

Implantation or Injectable Dosage Form New Animal Drugs Not Subject To Certification; Iron Dextran Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Fisons Corp. providing for safe and effective use of an iron dextran injection for prevention or treatment of baby pig anemia due to iron deficiency and to add the sponsor to the list of sponsors of approved NADA's.

EFFECTIVE DATE: December 21, 1982.

FOR FURTHER INFORMATION CONTACT: Lonnie W. Luther, Bureau of Veterinary Medicine (HFV-128), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301-443-4317.

SUPPLEMENTARY INFORMATION: Fisons Corp., Two Preston Ct., Bedford, MA

01730, filed an NADA (99-667) providing for intramuscular use of an iron dextran injection for baby pigs for prevention and treatment of baby pig anemia due to iron deficiency. Approval is based on the fact that the drug is identical to products which were reviewed by the National Academy of Sciences/National Research Council (NAS/NRC), found effective for prevention or treatment of baby pig anemia due to iron deficiency, and codified in 21 CFR 522.1183. The NAS/NRC notice was published in the **Federal Register** of February 14, 1969 (34 FR 2211). Based on the data and information in the NAS/NRC reviews and the information from published scientific literature, the NADA is approved and the regulations are amended to reflect the approval. In addition, the list of sponsors of approved NADA's in 21 CFR 510.600(c) is amended to add this new sponsor.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement therefore will not be prepared. The Bureau's finding of no significant impact and the evidence supporting this finding, contained in a statement of exemption (pursuant to 21 CFR 25.1(f)(1)(iii)) may be seen in the Dockets Management Branch (address above).

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 522

Animal drugs, Injectable.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 510 and 522 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. In Part 510, § 510.600 is amended by adding a new sponsor alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2) to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 166

Defense Contracting: Reporting Procedures on Defense Related Employment

AGENCY: Office of the Secretary, DOD.

ACTION: Amendment of final rule.

SUMMARY: This rule is the fiscal year 1982 update of the section listing DOD contractors receiving negotiated contract awards of $10 million or more. The regulation is published to comply with the provisions of Section 410, Pub. L. 91–121, November 19, 1969.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Mrs. Cynthia V. Springer, Office of the Director for Information Operations and Reports, Washington Headquarters Services, The Pentagon, Washington, DC 20301. Telephone (202) 694–5614.

SUPPLEMENTARY INFORMATION: In FR Doc. 70–15846 appearing in the **Federal Register** on November 25, 1970 (35 FR 18040), the Office of the Secretary of Defense published a final rule establishing criteria, prescribing procedures, and assigning responsibilities for monitoring contracting within the Department of Defense. Subsequently, paragraphs (a) and (d) of § 166.11, which constitute the list of DOD contractors receiving negotiated contract awards for $10 million or more, were updated for fiscal years 1971 (36 FR 18464); 1972 (37 FR 18727); 1973 (38 FR 25990); 1974 (39 FR 32985); 1975 (40 FR 44135); 1976 (41 FR 20466); 1977 (43 FR 1617); 1978 (44 FR 3049); 1979 (44 FR 75631); 1980 (45 FR 83486); and 1981 (46 FR 60821).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 716

[OPTS-84003C; TSH-FRL 2250-8]

Toxic Substances Control Act; Health and Safety Data Reporting; Submission of Lists and Copies of Health and Safety Studies

Correction

In FR Doc. 82-32843 beginning on page 54624 in the issue of Friday, December 3, 1982, make the following correction:

On page 54624, middle column, in the list under **"Economic Impact,"** the entry for Corporate Rule Review now reading "$81,000" should have read "$8,000".

BILLING CODE 1505-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 2

[Docket FEMA-GEN-2A]

Organization, Functions, and Delegations of Authority

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule

SUMMARY: This rule adds to the delegations of authority to implement the Coastal Barrier Resources Act. It delegates to the Associate Director, State and Local Programs and Support, and to the Federal Insurance Administrator, responsibilities assigned to FEMA under the Act which limits Federal financial assistance to undeveloped coastal barriers.

EFFECTIVE DATE: December 21, 1982.

FOR FURTHER INFORMATION CONTACT: William L. Harding, Office of General Counsel, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0377.

SUPPLEMENTARY INFORMATION: This regulation adds to the delegations of authority of the Federal Emergency Management Agency (FEMA) in order to implement the Coastal Barrier Resources Act (Pub. L. 97-348). As the document relates to agency management, FEMA has not engaged in notice and public comment rule making and has made the regulations effective immediately.

List of Subjects in 44 CFR Part 2

Authority delegations (Government Agencies), Organization and functions (Government Agencies).

PART 2—[AMENDED]

Accordingly, Part 2 is amended as follows:

Subpart B—Delegations

1. Section 2.61 is amended by adding a new paragraph (m) as follows:

§ 2.61 Associate Director, State and Local Programs and Support.

* * * * *

(m) Exercise the following authorities under the Coastal Barrier Resources Act:

(1) Apply the Coastal Barrier Resources Act (Pub. L. 97-348) to the Disaster Relief Act of 1974 (Pub. L. 93-288).

(2) Determine those areas which are included in the Department of Interior's (DOI's) designation of the Coastal Barrier Resources System, transpose DOI's designations onto FEMA's floodplain maps, and perform all other actions necessary to interpret DOI's maps.

(3) Determine, with the advice of the FIA, the meaning of the terms "new construction" and "substantial improvements" as used in the Coastal Barrier Resources Act.

(4) Issue the regulations necessary to implement this § 2.61.

2. Section 2.64 is amended by adding a new paragraph (d)(14) and a new paragraph (e).

§ 2.64 Federal Insurance Administrator.

* * * * *

(d) * * *

(14) Exercise the authority set out at § 2.61(m) of this subpart.

(e) The Federal Insurance Administrator is authorized to perform the functions necessary to make flood insurance unavailable pursuant to the Coastal Barrier Resources Act (Pub. L. 97-348). The Administrator is also authorized to define the term "new flood insurance coverage" as used in the Coastal Barrier Resources Act, and to issue any regulations necessary to implement this § 2.64(e).

(5 U.S.C. 552; Sec. 106, Reorganization Plan No. 3 of 1978; E.O. 12127 of March 31, 1979; E.O. 12148 of July 10, 1979, as amended; Coastal Barrier Resources Act (Pub. L. 97-348).)

Dated: December 14, 1982.

Louis O. Giuffrida,

Director.

[FR Doc. 82-34383 Filed 12-20-82; 8:45 am]

BILLING CODE 6718-01-M

44 CFR PART 64

[Docket No. FEMA 6460]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 3429, Bethesda, Maryland, 20034, Phone: (800) 638-6620.

FOR FURTHER INFORMATION CONTACT Mr. Richard E. Sanderson, Chief, Natural Hazards Division (202) 287-0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has

identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

PART 64—[AMENDED]

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and county	Location	Community	Effective dates of authorization/cancellation of sale of Flood Insurance in community	Special flood hazard area identified
Tennessee: Sullivan	Unincorporated areas	470181B	Mar. 6, 1979, emergency; Sept. 30, 1982, regular; Sept. 30, 1982, suspended; Nov. 3, 1982, reinstated.	Dec. 30, 1977.
Virginia: Accomack	Tangier, town of	510004A	Mar. 28, 1975, emergency; Oct. 15, 1982, regular; Oct. 15, 1982, suspended; Nov. 3, 1982, reinstated.	May 31, 1974.
Florida: Polk	Lakes Wales, city of	120390	Nov. 4, 1982, emergency	Oct. 17, 1975.

[Gen. Docket No. 82-182; FCC 82-506]

Amendment To Remove Station Log Requirements and To Provide for Additional Utilization of Specific MHz Frequencies in the Aviation Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the rules: (1) To eliminate the requirement for stations in the Aviation Services to maintain logs, (2) to permit the frequency 122.050 MHz to be used by air carrier aircraft as well as private aircraft for en route flight advisory service, and (3) to make the frequencies 122.775 and 122.850 MHz available for communications between aircraft on the ramp area of an airport and aviation service organizations at the airport. These actions result from an informal request from the Federal Aviation Administration and FCC review of its rules. These amendments are intended to eliminate unnecessary regulations and provide service to the aviation public in a more efficient, expeditious manner.

EFFECTIVE DATE: January 17, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554, (202) 632-7175.

FOR FURTHER INFORMATION CONTACT: Robert H. McNamara, Private Radio Bureau.

Report and Order

(Proceeding Terminated)

Adopted: November 18, 1982.

Released: December 17, 1982.

In the matter of Amendment of Parts 2 and 87 of the rules to remove station log requirements and to provide for

additional utilization of the frequencies 122.050, 122.775 and 122.850 MHz in the Aviation Services. General Docket No. 82–182; FCC 82–506.

1. In this Report and Order we are: (1) Removing the requirements for most stations in the Aviation Services to maintain logs; (2) making the frequency 122.050 MHz available to air carrier aircraft stations as well as private aircraft stations for en route flight advisory service; and (3) making the frequencies 122.775 and 122.850 MHz available for communications between stationary aircraft on the apron (ramp) area of an airport [1] and aeronautical utility mobile stations operating on the airport.

Station Log Requirements

2. Currently stations at fixed locations in the Aviation Services are required to maintain logs showing hours of operation, frequencies used, and hours of duty and signature of the operator(s) on duty. Where applicable, information concerning distress and emergency situations and antenna illumination must be recorded. Generally, logs in the Aviation Services may be destroyed after 30 days.

3. As part of our regulatory review program we examined the necessity and usefulness of these station log requirements. As to the logs of station operation, we found that, typically, logs of subject stations in the Aviation Services merely contain a daily entry of the hours of operation and the signature of the operator. As to records of distress or emergency situations, we learned of no instances where subject station logs containing a record of distress or emergency communications were used for any purpose. Regarding antenna illumination records, we observed that it is extremely rare that an antenna in this service would be large enough to require illumination. Even if antenna illumination is required in a given case, Section 17.49 of the Commission's rules provides for recordation of the required information elsewhere.[2] Therefore, we proposed in the Notice of Proposed Rule Making [3] in this proceeding to delete the requirement to maintain station logs in the Aviation Services.

Comments

4. In response to the Notice of Proposed Rule Making (hereafter NPRM) comments were filed by:

—Aircraft Owners and Pilots Association (AOPA) representing more than 260,000 aircraft owners and pilots;
—National Business Aircraft Association, Inc. (NBAA) representing 2,638 members;
—Lee L. Robbins (Robbins);
—Aeronautical Radio, Inc. (ARINC) a communications intermediary for the air transport industry, which is the principal licensee of ground stations in the aeronautical en route service;
—Aerospace and Flight Test Radio Coordinating Council (AFTRCC) which represents entities in the aerospace manufacturing industry that are the primary licensees of aeronautical flight test stations; and
—Minneapolis-St. Paul Metropolitan Airports Commission (Minneapolis).

AOPA, NBAA, Robbins, AFTRCC and Minneapolis support the proposed removal of station log requirements in the Aviation Services. They concur that such recordkeeping requirements no longer serve a useful purpose. ARINC, although not opposing the deletion of the requirement for station logs, notes that paragraph 3.5, Volume II, Annex 10 to the Convention of International Civil Aviation requires the maintenance of certain records for stations in the International Aeronautical Telecommunications Service. ARINC interprets this requirement as applying only to aeronautical stations in the international mobile service and not applicable to stations in the domestic service. ARINC suggests that the Commission may wish to reflect in the rules the requirement for stations at fixed locations in the international aeronautical mobile service to maintain either written or automatic logs (the Convention permits automatic logs) for compliance with Annex 10 of the Convention.

Conclusion

5. For the reasons indicated in the NPRM, and in view of the strong support of the aviation community, we conclude that, except for en route stations providing international service, it is in the public interest to delete the rules requiring stations in the Aviation Services to maintain radio station logs. As suggested by ARINC, we believe the rules should reflect the requirement contained in Annex 10 of the Convention for stations at fixed locations in the international aeronautical mobile service to maintain either a written or automatic log of messages. This requirement only affects the relatively few aeronautical stations which are authorized to provide international VHF or HF en route service. Therefore, except for stations providing international services in accordance with the provisions of Annex 10 to the Convention on International Civil Aviation, we are removing the requirement for stations in the Aviation Services to maintain a log.

Air Carrier Aircraft Use of 122.050 MHz

6. Several years ago the Federal Aviation Administration (FAA) instituted en route flight advisory service (EFAS). This service allows aircraft in flight to communicate directly with a meteorologist at an FAA flight service station. The frequency 122.0 MHz, which is available for use by both air carrier and private aircraft, has been utilized for EFAS. The FAA indicates that the EFAS program has been so successful that a second frequency is needed to avoid interference problems.

7. The FAA informally requested that the Commission's rules be amended to provide for such use of the frequency 122.050 MHz by both air carrier and private aircraft. Presently the rules make this frequency available only to private aircraft. The FAA indicates that this frequency would be very helpful in relieving congestion on the single assigned EFAS frequency. Accordingly, in the NPRM we proposed to amend the rules as requested by the FAA to make the frequency 122.050 MHz available to both air carrier aircraft and private aircraft for en route flight advisory service.

Comments

8. AOPA, NBAA, Robbins, and ARINC favor the proposed change in the utilization of the frequency 122.050 MHz. AFTRCC and Minneapolis did not comment on this issue.

Conclusion

9. In light of the benefits noted in the NPRM and the support received for the amendment requested by the FAA, we conclude it is in the public interest to amend the rules as proposed. Therefore, we are revising the rules to make the frequency 122.050 MHz available to both air carrier and private aircraft.

---

[1] The Federal Aviation Administration's Pilot/Controller Glossary describes the apron/ramp as a defined area, on a land airport, intended to accommodate aircraft for purposes of loading or unloading passengers or cargo, refueling, parking, or maintenance. (With regard to seaplanes, a ramp is used for access to the apron from the water.)

[2] If applicable the licensee of any type of radio station must maintain a record of tower light inspections as specified in Section 17.49 of the rules.

[3] Gen. Docket No. 82–182, released April 15, 1982, FCC 82–149, 47 FR 17309.

Airport Ground Communications

10. In recent years general aviation [4] interests have indicated a need for a frequency in the VHF voice aeronautical band (118–136 MHz) to be made available for direct communications between aircraft on the ground and various aviation service entities, e.g., fuel trucks, avionics repair personnel and the like. Currently the rules do not provide a frequency which is generally available for direct communications between aircraft and mobile ground units operated by aviation service organizations. Typically, the use of an aeronautical advisory frequency assigned at an airport is requested for such purposes. However, since aeronautical advisory (unicom) frequencies are primarily utilized for safety-related communications, and are very heavily loaded in most regions of the United States, their additional use by numerous mobile units and service organizations is not considered a viable option. Further, unicom frequencies are used primarily at uncontrolled airports (i.e., airports without a control tower) for pilots to report their position in and near the airport traffic pattern. This critical air safety use should not be diluted by ground communications.

11. A frequency dedicated for such airport ground communications, although not essential for safety purposes, would undoubtedly contribute to more efficient and convenient aircraft operations. In the NPRM we proposed to make the frequency 122.775 MHz available on a primary basis for communications between stationary aircraft located on the apron/ramp area of an airport and aeronautical utility mobile stations operating on the airport. Any aviation service organization [5] operating on an airport would be eligible for an aeronautical utility mobile station authorization for such ground communications.

12. The frequency 122.775 MHz is the last of the unassigned 25 kHz VHF frequencies that were set aside for future assignment in the Aviation Services in Docket No. 20123.[6] Although almost all new aircraft radio equipment has 25 kHz channelization, we recognize that many general aviation aircraft have older radio equipment with 50 kHz channelization (i.e., they have 360 channels available rather than 720 channels). Therefore, we also proposed to make the frequency 122.850 MHz available on a secondary noninterference basis for such ground communications. This frequency is one of the three frequencies currently assigned for communications between aircraft and aeronautical multicom stations.[7] We believed the use of 122.850 MHz for the proposed ground communications would be compatible with multicom usage. However, to protect multicom assignments should harmful interference result, we proposed to make 122.850 MHz available on a secondary basis.

Comments

13. AOPA, NBAA, Robbins, Minneapolis and ARINC support the proposal to make the frequencies 122.775 and 122.850 MHz available for communications between aircraft on the ramp area of an airport and aviation service organizations on the airport. AFTRCC's comments did not address this proposal.

14. Although AOPA supports the proposal and in fact argues that such service is desperately needed, it expresses concern over the designation of a 25 kHz-spaced channel as the primary frequency. AOPA observes that a 1979 FAA report indicated that only 35% of general aviation aircraft were able to utilize 25 kHz spaced channels, while 86% were able to use 50 kHz spaced channels. Thus, AOPA submits that it would be preferable to designate a 50 kHz channel as the primary channel for the proposed ground communications.

15. NBAA indicates that it believes the proposal would not only improve and expedite aircraft servicing but would also increase safety. Minneapolis suggests, however, the limitation that aircraft be located on the airport ramp area be deleted. It feels aviation service organizations would prefer to be able to communicate with aircraft while they are still airborne. It also questions the enforceability of such a limitation.

16. ARINC notes that the proposal would primarily provide relief for general aviation aircraft at uncontrolled airports. The availability of 122.725 and 122.850 MHz would not provide spectrum for such use by scheduled air carriers at the larger commercial airports.[8] However, other aircraft operators would be provided with needed operating flexibility.

Conclusion

17. As we indicated in the NPRM, we recognize that although almost all new aircraft radio equipment has 25 kHz channelization, many general aviation aircraft have older equipment with 50 kHz channelization. We proposed to make 122.775 MHz available because it is the last of the unassigned VHF aeronautical frequencies. All the other VHF voice frequencies in the band are assigned for one or more uses. We proposed to make 122.850 MHz available on a secondary basis in order to alleviate the problem with older aircraft radios and because we felt that the proposed use for ground communications would be compatible with most multicom operations. However, we also sought to protect multicom assignments on 122.850 MHz if harmful interference develops at a given airport.

18. We still believe the proposed frequency assignments represent the best solution. There is little doubt that 25 kHz channelization is a necessary part of the future of aviation communications in the VHF band. The frequency 122.775 MHz is currently the only unassigned frequency in the band and, thus, a logical and convenient place to provide for the proposed ground communications. Additionally, with each passing year the number of aircraft equipped with 720 channel radios continues to grow. The availability of 122.850 MHz should accommodate the near term problem with the number of older 360 channel radios in use. The effect of making 122.850 MHz available on a secondary basis is to protect multicom assignments if harmful interference develops in a given location. We expect that this will be the exception. Thus, as a practical matter, at most airports 122.850 MHz would be available as the "primary" frequency for the proposed ground communications.

19. Additionally, we feel that the proposed limitation on the use of the

[4] General aviation encompasses all facets of civil aviation except certificated air carriers and large commercial aircraft operator. For example, corporate jets, light single engine aircraft and sailplanes are all considered within the "General Aviation" Classification.

[5] For the purposes of Part 87, an aviation service organization means any business firm which maintains facilities at a landing area for the purpose of one or more of the following general aviation activities: (1) Aircraft fueling; (2) aircraft services (e.g., parking, storage, tiedowns); (3) aircraft maintenance and/or sales; (4) avionics equipment maintenance; (5) aircraft rentals, air taxi service and/or flight instruction; and (6) baggage and cargo handling, and other passenger/freight services.

[6] Report and Order, adopted April 5, 1977, 64 FCC 2d 573, 42 FR 40469.

[7] Essentially, multicom communications pertain to activities of a temporary, seasonal or emergency nature which depend upon aircraft in flight for the successful or safe conduct of the activity. Such communications are limited to the directing of ground activities from the air, the directing of aerial activities from the ground, and related air-to-air communications.

[8] Air carrier ground crews employ UHF frequencies in the Business Radio Service to coordinate the servicing of aircraft at airport terminal areas.

subject frequencies for communications with aircraft on the ground must be retained. This proposal was initiated to satisfy a requirement for direct communications between aviation service organizations and aircraft on airport ramp areas. Other frequencies are available for necessary air-ground communications. Enforcement of this limitation does not pose a significant problem. First, the aviation community is highly self-disciplined and can be expected to cooperate in the use of these frequencies for the purpose designated. Second, should enforcement problems arise, it is relatively easy to determine if an aircraft is on the airport ramp area or not.

20. Further, as ARINC noted, it is not practical or desirable that these two frequencies be routinely utilized by scheduled air carriers at large commerical airports. The general aviation community is the intended beneficiary of the subject frequency usage.

21. For the reasons indicated above, including the strong support received from the aviation community, we believe it is in the public interest to make the frequencies 12.775 and 122.850 MHz available for communications between aircraft on the airport ramp area and aviation service organizations. Accordingly, we are amending the rules as proposed.

Summary of Actions

22. In summary, we are: (1) Revising § 87.99 and deleting §§ 87.103, 87.105, 87.107, and 87.109 to eliminate station logs in the Aviation Services, except where required by treaty; (2) amending § 87.195(e) to permit air carrier aircraft to utilize the frequency 122.050 MHz for enroute flight advisory service; and (3) revising §§ 87.183, 87.431, 87.432 and 87.433 to make the frequencies 122.775 and 122.850 MHz available for communications between aircraft on the ramp area of an airport and aviation service organizations on the airport. We are also amending U.S. footnote 31 in § 2.106 (Table of Frequency Allocations) to reflect these new frequency uses.

23. The rule amendments proposed in this proceeding, while expected to benefit the aviation public as described above, will not result in a significant economic impact on any person or entity. Therefore, the Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rule making proceeding, because the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

24. Regarding questions on matters covered in this document contact Robert H. McNamara (202) 632–7175.

25. Accordingly, it is ordered, That under the authority contained in Sections 4(i) and 303(b), (c) and (r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(b), (c) and (r), the Commission's rules are amended as set forth in the attached Appendix, effective January 17, 1983.

26. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 2 and 87 of chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

In § 2.106 footnote US31, the third, fourth and fifth paragraphs are revised to read as follows:

§ 2.106 Table of frequency allocations.

* * * * *

US31 * * *

The frequencies 122.850, 122.900 and 122.925 MHz may be assigned to aeronautical multicom stations. In addition, 122.850 MHz may be assigned on a secondary noninterference basis to aeronautical utility mobile stations. In case of 122.925 MHz, US213 applies.

Air carrier aircraft stations may use 122.000 and 122.050 MHz for communication with aeronautical stations of the Federal Aviation Administration and 122.700, 122.800, 122.900 and 123.000 MHz for communications with aeronautical stations pertaining to safety of flight with and in the vicinity of landing areas not served by a control tower.

Frequencies in the band 121.9375–122.6875 MHz may be used by aeronautical stations of the Federal Aviation Administration for communication with private aircraft stations only, except that 122.000 and 122.050 MHz may also be used for communication with air carrier aircraft stations concerning weather information.

* * * * *

PART 87—AVIATION SERVICES

1. Section 87.99 is revised to read as follows:

§ 87.99 Station Logs.

Stations at fixed locations in the international aeronautical mobile service (aeronautical enroute stations licensed to provide international VHF or HF service) shall maintain a written or automatic log in accordance with the provisions of Paragraph 3.5, Volume II, Annex 10 to the Convention on International Civil Aviation.

§ 87.103 [Amended]

2. Part 87 is amended by removing § 87.103.

§ 87.105 [Amended]

3. Part 87 is amended by removing § 87.105.

§ 87.107 [Amended]

4. Part 87 is amended by removing § 87.107.

§ 87.109 [Amended]

5. Part 87 is amended by removing § 87.109.

6. In § 87.183 paragraph (h) is revised to read as follows:

§ 87.183 Frequencies available.

* * * * *

(h) The frequencies 121.600 through 121.925 MHz listed in 87.401(a) may be used by aircraft on the ground for airport utility communications. In addition, the frequency 122.775 MHz and, on a secondary noninterference basis to aeronautical multicom stations, the frequency 122.850 MHz may be used by stationary aircraft on the apron/ramp area of an airport for utility communications in accordance with § 87.431 of this part.

* * * * *

7. In § 87.195 paragraph (e) is revised to read as follows:

§ 87.195 Frequencies available.

* * * * *

(e) The frequencies 122.000 and 122.050 MHz are available to air carrier aircraft stations for enroute flight advisory service (EFAS) provided by the Federal Aviation Administration

* * * * *

8. In § 87.201 paragraph (b) is amended by adding a note at the end of the table to read as follows:

§ 87.201 Frequencies available.

* * * * *

(b) * * *

Note.—The frequencies 122.000 and 122.050 MHz are available to private aircraft stations for enroute flight advisory service (EFAS) provided by the Federal Aviation Administration.

* * * * *

9. In § 87.431, new paragraph (d) is added to read as follows:

§ 87.431 Frequencies available.

* * * * *

(d) Additionally the frequency 122.775 MHz and, on a secondary noninterference basis to aeronautical

multicom stations, the frequency 122.850 MHz are available for communications between aeronautical utility mobile stations and stationary aircraft on the apron/ramp area of an airport.

10. In § 87.432, new paragraph (c) is added to read as follows:

§ 87.432 Eligibility.

* * * * *

(c) Authorization to operate an aeronautical utility mobile station on the frequencies 122.775 and 122.850 MHz will be issued to airport operators and aviation service organizations [1] located at a landing area.

11. In § 87.432, new paragraph (c) is added to read as follows:

§ 87.433 Scope of service.

* * * * *

(c) The frequencies 122.775 and 122.850 MHz may be used by aeronautical utility mobile stations for communications with stationary aircraft on the airport apron/ramp area concerning the safe and efficient portal-to-portal transit of the aircraft, such as the types of fuel and ground services available at the airport. These frequencies shall not be used for air traffic control purposes, to communicate with aircraft moving on the ground, or to transmit information pertaining to runway, wind or weather conditions.

BILLING CODE 6712-01-M

---

47 CFR Part 22

[General Docket 80-183; FCC 82-503]

Public Mobile Radio Services; Allocate Spectrum in the 928-941 MHz Band and To Establish Other Rules, Policies, and Procedures for One-Way Paging Stations in the Domestic Public Land Mobile Radio Service; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: The *Memorandum Opinion and Order on Reconsideration (Part 1),* in General Docket 80-183, FCC 82-503, released November 16, 1982 and published at 47 FR 53380, November 26, 1982, pertaining to allocation of spectrum for common carrier one-way paging systems in the 900 MHz band, contains inaccurate rule citations. The rule citations in paragraphs 20, 25 and 26 are hereby corected.

FOR FURTHER INFORMATION CONTACT: Lisa Wershaw, Common Carrier Bureau, (202) 632-6450.

SUPPLEMENTARY INFORMATION:

Released: December 13, 1982.

In the matter of amendments of Parts 2 and 22 of the Commission's Rules to Allocate Spectrum in the 928-941 MHz Band and to Establish Other Rules, Policies, and Procedures for One-Way Paging Stations in the Domestic Public Land Mobile Radio Service; General Docket No. 80-183, RM-2365, RM-2750, RM-3047 and RM-3068.

The *Memorandum Opinion and Order on Reconsideration (part 1),* in the captioned proceeding, General Docket 80-183, FCC 82-503, released November 16, 1982, (47 FR 53380, November 26, 1982) should be corrected as set forth below.

1. In paragraph 20 on page 53380, we waived the submission of topographic maps with 900 MHz common carrier paging applications. In this paragraph the rule citation for topographic maps should be corrected to read § 22.15 (j)(8), instead of § 22.115(j)(8).

2. Paragraph 26 on page 53383 should read as follows:

26. It is further ordered, That the topographic maps required by 47 CFR 22.15(j)(8) and the profile graphs required by 47 CFR 22.115 are hereby waived for a one-way paging applicant requesting a 900 MHz one-way paging frequency.

3. Finally, in paragraph 25 on page 53382, the reference to Part 2 of the Commission's Rules should be deleted.

Federal Communications Commission.

BILLING CODE 6712-01-M

DEPARTMENT OF THE INTERIOR
Office of the Secretary

50 CFR Parts 11 and 12

Civil Procedures, Seizure and Forfeiture Procedures; Implementation of Lacey Act Amendments of 1981

AGENCY: Office of the Solicitor, Interior.

ACTION: Final rule.

SUMMARY: The Office of the Solicitor of the Department of the Interior is issuing a final rule to implement recent amendments to the Lacey Act. This rule amends current procedural regulations governing civil procedures for the assessment of civil monetary penalties and the administrative forfeiture of items seized for alleged violations of various Federal wildlife laws, including the Lacey Act. This rule reflects new amendments to the Lacey Act which provide for the administrative forfeiture and strict liability forfeiture for items seized under the Act, in addition to provisions for assessment of civil monetary penalties for violations of various Federal and State wildlife laws. Further, in order to alleviate the confusion that has arisen regarding civil monetary penalty and administrative forfeiture procedures under the Lacey Act Amendments, and to effectuate clear Congressional intent which mandates these new regulations, this rule is effective immediately.

EFFECTIVE DATE: December 21, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Young, Attorney-Advisor, Division of Conservation and Wildlife, Office of the Solicitor, Department of the Interior, Washington, D.C. 20240 (202) 343-2172.

SUPPLEMENTARY INFORMATION: Recently, Congress amended various provisions of, and recodified the Lacey Act, formerly found at 18 U.S.C. 42-44 by Pub. L. 97-79, known as the Lacey Act Amendments of 1981 (hereinafter "the Act" or "the amendments"). The amendments modified, among other things, the procedures for the forfeiture of fish, wildlife and plants imported, exported, transported, sold, received, acquired, or purchased contrary to the provisions of the Act or regulations implementing the Act. 16 U.S.C. 3374. These amendments altered pre-existing forfeiture procedures in the following ways:

1. The Lacey Act previously authorized only judicial forfeiture. The amendments now authorize administrative forfeiture in the case of property having a value not greater than $10,000. 16 U.S.C. 3374(b). *See* H.R. Rep. No. 97-276, 97th Cong., 1st Sess. 23 (1981).

2. The Lacey Act previously authorized forfeiture only after a criminal conviction or the assessment of a civil penalty. The amendments provide that all fish, wildlife and plants imported, exported, transported, sold, received, acquired or purchased contrary to 16 U.S.C. 3372 (except subsection 3372(b)), or implementing regulations, are subject to forfeiture, without regard for any additional evidence of culpability as required for a civil penalty assessment or criminal conviction. 16 U.S.C. 3374(a). That is,

[1] For the purpose of this subpart, an aviation service organization means any business firm which maintains facilities at a landing area for the purposes of one or more of the following general aviation activities: (i) Aircraft fueling; (ii) aircraft services (e.g., parking, storage, tiedowns); (iii) aircraft maintenance and/or sales; (iv) avionics equipment maintenance and/or sales; (v) aircraft rental, air taxi service and/or flight instruction; and (vi) baggage and cargo handling, and other passenger/freight services.

forfeiture proceedings may now be brought prior to the initiation of civil penalty or criminal proceedings and even in cases where no civil penalty or criminal proceeding will be brought. *See* H.R. Rep. No. 97–276, *supra* at 22.

3. The Lacey Act did not previously authorize the assessment of costs, such as storage costs, associated with seizure and forfeiture of fish, wildlife and plants. The amendments provide that any person who is convicted or assessed a civil penalty for a violation of the Act is liable for costs incurred by the Government in storing, caring for, and maintaining any fish, wildlife, or plant seized in connection with the violation. 16 U.S.C. 3374(c).

In amending the Lacey Act in the above ways, Congress recognized that efficient forfeiture procedures are a prerequisite for an effective conservation program for protected fish, wildlife and plants. *See* H.R. Rep. No. 97–276, *supra* at 22–23. These regulations facilitate this effort by implementing the changes in Lacey Act forfeiture procedures directed by the recent amendments.

Current regulations found at 50 CFR Part 12 govern seizure and forfeiture of contraband under various Federal conservation statutes such as the Endangered Species Act, 16 U.S.C. 1531 *et seq.*, the Eagle Protection Act, 16 U.S.C. 668 *et seq.*, the Airborne Hunting Act, 16 U.S.C. 742j–1, and the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.* All of these statutes, with the exception of the Marine Mammal Protection Act, authorize administrative forfeiture and forfeiture without regard to culpability. In addition, the Endangered Species Act authorizes the assessment of costs connected with storage of contraband seized pursuant to that Act. As a result, existing provisions of 50 CFR Part 12 provide procedures for administrative forfeiture, forfeiture without culpability, and the assessment of costs for violations under that above statutes. The effect of the amendments to the Lacey Act is to authorize administrative forfeiture under that Act corresponding to that authorized by the above statutes and the implementing regulations in 50 CFR Part 12. This rule applies the pre-existing forfeiture procedures of current regulations to forfeitures under the amended Lacey Act. A discussion of the specific provisions of 50 CFR Part 12 which are affected by this rule follows.

Recodification of Lacey Act Citations

Pub. L. 97–79 recodified those portions of the Lacey Act formerly appearing at 18 U.S.C. 43–44 as 16 U.S.C. 3371 *et seq.* Technical amendments to the following provisions of 50 CFR Part 12 are made to add the new citation to the Lacey Act as amended: The Authority Citation; Scope of regulations, § 12.2(j); Bonded release, § 12.6(a); Civil actions to obtain forfeiture, § 12.22; and Transfer in settlement of civil penalty claims, § 12.25.

In addition, Lacey Act citations appear in 50 CFR Part 11 which governs civil penalty proceedings under the Lacey Act as well as other conservation laws. Although the amendments to the Lacey Act did not modify provisions relating to civil penalty procedures, amendment of Part 11 is also necessary to reflect the citation to the Lacey Act Amendments. Accordingly, technical amendments are made to the authority citation for Part 11 and to section 11.2, scope of regulations. No other changes to Part 11 are made by this rule.

This rule adds the citation to the Lacey Act Amendments of 1981 and does not replace the citation to the pre-existing Lacey Act in the above-referenced sections in 50 CFR Parts 11 and 12. This addition makes clear that proceedings can still be brought for alleged violations which occurred prior to the amendment of the Lacey Act. As a result, procedures and remedies available under the pre-existing Lacey Act can still be pursued for actions occurring prior to the amendment of the Lacey Act.

Administrative Forfeiture

As previously stated, the Lacey Act Amendments of 1981 now authorize administrative forfeiture proceedings. The following provisions of 50 CFR Part 12, which currently apply to administrative forfeiture pursuant to other wildlife laws, are amended to reflect this new authorization under the Lacey Act Amendments: Appraisement, § 12.12; Administrative forfeiture proceedings, § 12.23(a); Petition for remission, § 12.24(a); Petition for restoration of proceeds, § 12.41(a).

Pursuant to these regulatory amendments, when property is seized under the Lacey Act Amendments of 1981, its value must first be determined before forfeiture proceedings may be initiated. If the value of the property is not greater than $10,000, the property is subject to administrative forfeiture under pre-existing agency procedures set forth in 50 CFR Part 12. These procedures include the opportunity for property owners to petition the Department for remission and, in certain cases when the property has already been sold, for restoration of proceeds. The availability of petitions for remission and restoration of proceeds is in conformance with a discussion in the legislative history of the Lacey Act Amendments. *See* H.R. Rep. No. 97–276, *supra* at 22. This discussion recognized that in certain cases, forfeiture, while required as a matter of law, may nevertheless be unnecessarily harsh. Therefore, the Secretary has the discretion to remit or mitigate a forfeiture based upon the equities of a given case.

The provisions of 50 CFR Part 12 have also been changed to allow for any person claiming an interest in seized property to move for a temporary stay of administrative forfeiture proceedings during the pendency of existing federal criminal proceedings against the claimant for alleged violations of the law related to the seized property. Such a stay may be granted upon the satisfaction of certain conditions. First, the motion must contain the claimant's verified statement showing that he or she holds an absolute, undivided title to the seized property and that there are no liens, encumbrances, or other third-party security interests on the items. Second, the claimant moving for a stay must agree to pay in advance all reasonable costs anticipated to be incurred in the storage, care, and maintenance of the seized property during the stay of the administrative forfeiture proceedings. A suitable bond may be required to secure the payment of these reasonable storage costs. This procedure will apply to all future administrative forfeiture proceedings brought under the various federal wildlife statutes.

Strict Liability Forfeiture

The Act now authorizes forfeiture independent of criminal convictions or the assessment of civil penalties. To reflect this amendment, 50 CFR 12.22 is amended to authorize the Solicitor to request the Attorney General to file a civil action to obtain forfeiture of items over $10,000 in value or for contested adminstrative forfeitures under the Lacey Act Amendments of 1981. A criminal conviction or the assessment of a civil penalty is not necessary for such an action to be filed.

Recovery of Storage Costs

The Lacey Act Amendments of 1981 authorize the recovery of certain costs associated with the storage of property seized in conjunction with a violation of the Act. Section 12.42 of 50 CFR is amended to reflect this new authority.

Furthermore, § 12.42 has also been amended to provide for an appeals procedure whereby the past owner of the forfeited property could promptly raise objections to the reasonableness of the assessed storage costs. Although

informal contacts with the Fish and Wildlife Service to resolve objections concerning the reasonableness of bills for storage costs are strongly encouraged, it is recognized that a more formal review procedure might be advantageous. Under the new procedure adopted by this rule, the recipient of a bill may file written objections including a statement of facts upon which the reasonableness of assessed costs is being challenged, within 30 days of the date of the bill with the Regional Director of the Fish and Wildlife Service for the Region in which the seizure and forfeiture occurred. The Regional Director will promptly review any written objections presented by a party and shall mail his response to the party within 30 days of receipt of the written objections. In all cases, the Regional Director's decision on these written objections to the Service's assessed costs will constitute the final administrative decision of the agency. This procedure will apply to cases under the Endangered Species Act as well as under the Lacey Act Amendments of 1981.

Analysis of Comments Received

The proposed rulemaking was published on pages 40670–40673 of the **Federal Register** of September 15, 1982, and invited comments for 15 days ending September 30, 1982. Comments were received in a timely fashion from 3 sources: Safari Club International, the American Fur Industry, Inc., and a private individual. The following summarizes the comments, suggestions and actions taken.

Safari Club International (SCI) expressed four major concerns with the proposed rulemaking. First, SCI stated that the administrative and strict liability forfeiture provisions pose constitutional concerns, in that no provision exists to guarantee an individual that statements he might make in contesting administrative forfeiture proceedings under the Lacy Act Amendments can not be used against him in any subsequent criminal proceeding. Second, SCI suggested that these regulations be amended to provide an individual with the opportunity to move for a stay of administrative forfeiture proceedings until disposition of any criminal charges through court action or running of the applicable statute of limitations. Third, the guidelines for determining storage costs were criticized by SCI as being "insufficient and loose," and an amendment was proposed to provide an individual with an opportunity to contest the alleged "reasonableness" of these costs. Finally, SCI objected to the appraisal procedure for property seized in accordance with 50 CFR Part 12. In particular, SCI stated that an appraisal should be conducted by independent appraisers (not employed by the United States Government, and restricted to a maximum number of appraisals annually so as to preclude the alleged possibility of conflict of interest) and that the standard for value should be the value "at the time and place of seizure"—not the time and place of appraisement standard found in 50 CFR 12.3(a)(2) and 12.12.

Some of the comments made by SCI reflected general criticisms of the existing seizure and forfeiture procedures in 50 CFR Part 12. Insofar as SCI desires a general amendment to 50 CFR Part 12, it is strongly encouraged to file an original petition for rulemaking under 43 CFR Part 14. To the extent that the Department deemed it possible, however, some of the general comments of SCI have already been incorporated into this rulemaking.

To begin with, SCI's comments regarding the need to immunize any statements made by an individual while contesting administrative forfeiture are at odds with the actual nature of administrative forfeiture proceedings under 50 CFR Part 12. No hearing is held before the agency during administrative forfeiture proceedings: the individual "contests" forfeiture by filing a claim and bond under 50 CFR 12.23(b)(2) setting forth his or her interest in the property. If the claim and bond is filed within 30 days after the date of first publication or posting of the notice of proposed forfeiture, these documents are transmitted to the Attorney General for the institution of forfeiture proceedings in United States District Court. 50 CFR 12.23(b)(3). At this point in the proceedings control over the matter transfers to the Justice Department. Therefore, it would be beyond the jurisdiction and authority of the Interior Department to incorporate the "immunization" recommendation of SCI in this rulemaking.

SCI's advocacy of a "motion for stay" procedure could operate to indefinitely delay forfeiture proceedings, thereby creating problems instead of solving them, in cases involving multiple-party ownership or security interests. However, whole due process would mandate the swift prosecution of forfeiture proceedings in each instance where third-party interests in the seized property are involved, the same would not be true in the case of an owner who holds absolute, fee simple title in seized property, free of all liens and encumbrances, who voluntarily and knowingly requests a stay of administrative forfeiture proceedings during the pendency of actual criminal proceedings against him relating to the property. In the absence of third-party interests, the owner's motion for a stay—a voluntary action on his part—would constitute a knowing written waiver of his due process right to a swift resolution of the forfeiture process. The final rule contains a new motion for stay procedure as described earlier in the preamble. As stated previously, this new procedure will apply to all administrative forfeiture proceedings initiated under 50 CFR Part 12.

The Lacey Act Amendments of 1981 also provide that "[a]ny person convicted of an offense, or assessed a civil penalty, under (16 U.S.C. 3373) shall be liable for the costs incurred in the storage, care, and maintenance of any fish or wildlife or plant seized in connection with the violation concerned." 16 U.S.C. 3374(c). The determination of liability for storage costs is made in accordance with 50 CFR 12.42, which provides for a standard of a "reasonable fee for expenses." This standard is in keeping with the Lacey Act Amendments and can be properly administered. Although any determination of liability under this procedure would be subject to review when the Service seeks the recovery of these costs through judicial collection remedies, it has been determined that an initial appeals process on assessment of costs will be adopted. This new administrative review procedure is contained in the final rule, and its features were described earlier in the preamble. It will apply to assessment of costs submitted under both the Endangered Species Act and the Lacey Act Amendments of 1981.

Finally, regarding SCI's comments suggesting changes in the appraisement procedure set out in 50 CFR Part 12, the current procedure predates the Lacey Act Amendments and has been used as a uniform procedure in all seizure and forfeiture cases. In fact, the Department's appraisement procedure is patterned after that followed by the Customs Service under the Tariff Act of 1930, 19 U.S.C. 1606. See 19 CFR 162.43(a). The present rulemaking thus provides for continued uniformity for seizure and forfeiture procedures. At this point, therefore, the Department questions the need for changing the appraisal system since the present system is functional, an adequate review mechanism exists, an independent appraisal system would involve great expense, and a referral to

independent appraisers would entail unaffordable delays.

A private individual commented that the 15-day public comment period was not practical and was contrary to the public interest. He further stated that this rule will have a significant economic impact on a substantial number of small entities due to civil penalty assessments. He also raised various other procedural questions regarding the proposed rule.

As stated in the proposed rulemaking, it was necessary to limit the public comment period to 15 days for this rule because actions on many wildlife violation cases are pending which urgently require the clarification of procedures provided by this rule. Further delays might have caused due process problems in pending forfeiture cases. The public interest, as expressed by Congress, is best served by the prompt implementation of the Lacey Act Amendments of 1981.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities. Although assessments of civil penalties, where appropriate, will occur for violations of the Lacey Act Amendments under these procedures, "these regulations will only impact those individual members of the general public involved in violations of state and federal wildlife laws," and "it is highly unlikely that entire small business entities as a group would be affected unless they were involved in a conspiracy to violate the law." Determination of Effects of Rule at page 4.

In further response to this individual's general comments, 16 U.S.C. 3374(b) makes the customs laws applicable to Lacey Act forfeiture proceedings. Under this provision, administrative forefeiture can be had on seized property having a value not exceeding $10,000; seized property having a value exceeding $10,000 must be referred to the Attorney General for institution of judicial forfeiture proceedings. This individual's argument that "[e]vidence of culpability should be required when considering forfeiture" has been rejected by Congress with regard to fish, wildlife, or plants. 16 U.S.C. 3374(a)(1). However, procedures exist for the remission of forfeitures or the restoration of proceeds in appropriate cases. See 50 CFR 12.24, 12.41.

Finally, this individual's protest against the use of existing Lacey Act procedures and remedies to seek penalties and forfeiture for violations which preceded the passage of the Lacey Act Amendments of 1981 misinterprets the effect of this rule. Although violations of the former Lacey Act, 18 U.S.C. 43–44, can still be the subject of civil penalty and forfeiture proceedings, those proceedings must conform to the procedures and remedies available under the pre-existing law.

The American Fur Industry, Inc. (AFI) requested an amendment to the proposed rulemaking to require the Fish and Wildlife Service to store seized articles in proper facilities to avoid needless loss (deterioration). AFI stated that instances occur where seized articles are later returned to the owner due to a mistake on the Service's part or due to the furnishing of appropriate documentation, and yet the owner incurs damage because his property has deteriorated due to alleged improper storage. AFI's comment goes beyond the scope of the proposed rulemaking, which deals solely with the Solicitor's Office procedural responsibilities for processing civil penalty and forfeiture cases under the Lacey Act Amendments of 1981. The final rule, therefore, will not be amended to address storage facility requirements. It is suggested instead that the AFI raise the issue of adequacy of storage procedures directly with the United States Fish and Wildlife Service.

Regulation Promulgation

These amendments are being published as a final rule effective immediately. This rule implements changes to the Lacey Act which are technical in nature and which require only slight modifications to existing procedural regulations regarding administrative forfeiture and assessment of civil monetary penalties. Because actions on a large and growing number of wildlife violations which have occurred since the amendments to the Lacey Act have been held in abeyance pending clarification of the correct administrative procedure to follow, there is an urgent need to resolve this confusion. To alleviate this confusion and effectuate clear Congressional intent with regard to civil penalty and forfeitures under the Lacey Act as amended and to facilitate persons who have been alleged to have violated the law in obtaining prompt resolution of issues pertaining to the alleged violations, it has been determined by the Department that these regulations should be adopted and become effective as soon as practicable. Thus, failure to place this rule in immediate effect would be impracticable, unnecessary and contrary to the public interest. As explained above, good cause exists for placing this rule in immediate effect.

Primary Author: The primary author of this document is W. Michael Young, Division of Conservation and Wildlife, Office of the Solicitor, Department of the Interior.

Note.—The Department of the Interior has determined that this is not a major rule and does not require preparation of a regulatory analysis under Executive Order 12291. The Department has also determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act. As a result of this rule, violations of the Lacey Act involving fish, wildlife or plants which are not deemed to be of criminal culpability can continue to be processed efficiently through civil penalty proceedings. Persons whose conduct is alleged to be violative of the law are enable to obtain prompt administrative hearings of the issues under administrative procedures. The administrative forfeiture of contraband fish, wildlife or plants whose value is not greater than $10,000 is also more efficient because disposition of the items will not only reduce the overall cost to the government by reducing the number of more time-consuming and expensive judicial forfeitures to be sought, but may also generate a similar reduction in legal costs to members of the public whose property is involved in expedited administrative forfeiture proceedings. In addition, although the overall number of forfeitures is expected to rise due to the simplification of the forfeiture process, the current rate of property relinquishment is such that the change will probably not have a significant impact on any type of group or organization. These are merely procedural enforcement regulations that will be applied to individuals alleged to have violated the law, and it is unlikely that entire organizations or entities would be affected by these regulations absent a conspiracy to violate the law.

The revisions to the regulations contain no information collection or record-keeping requirement under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

In accordance with Appendix 1.4 of Chapter 516 of the Departmental Manual, these proposed regulations concern law enforcement and legal transactions and are therefore categorically excluded from preparation of an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969.

Amendment of Existing Regulation

For the reasons set out in the preamble, Subchapter B, Chapter I of Title 50 of the Code of Federal Regulations is amended as follows:

PART 11—CIVIL PROCEDURES

1. The Authority citation for Part 11 is revised to read as follows:

Authority: Lacey Act, 83 Stat. 279–281, 18 U.S.C. 42–44; Lacey Act Amendments of 1981, 95 Stat. 1073–1080, 16 U.S.C. 3371 *et seq.*; Bald Eagle Protection Act, sec. 2, 54 Stat. 251, 16 U.S.C. 668a; Endangered Species Act of 1973, sec. 11(f), 87 Stat. 884, 16 U.S.C. 1540(f); Marine Mammal Protection Act of 1972, sec. 112(a), 86 Stat. 1042, 16 U.S.C. 1382.

2. Section 11.2 is revised to read as follows:

§ 11.2 Scope of regulations.

The regulations contained in this part apply only to actions arising under the following laws and regulations issued thereunder:

Lacey Act, 18 U.S.C. 43;
Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*;
Bald Eagle Protection Act, 16 U.S.C. 668–668d;
Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 *et seq.*; and Marine Mammal Protection Act of 1972, 18 U.S.C. 1361–1384 and 1401–1407.

PART 12—SEIZURE AND FORFEITURE PROCEDURES

3. The Authority citation for Part 12 is revised to read as follows:

Authority: Act of September 6, 1966, 5 U.S.C. 301; Bald and Golden Eagles Protection Act, 16, U.S.C. 668–668b; National Wildlife Refuge System Administration Act, 16 U.S.C. 668dd(e)–(f); Migratory Bird Treaty Act, 16 U.S.C. 704, 706–707, 712; Migratory Bird Hunting and Conservation Stamp Act, 16 U.S.C. 718f–718g; Fish and Wildlife Act of 1956 [Airborne Hunting Amendments], 16 U.S.C. 742j–l(d)–(f); Black Bass Act, 16 U.S.C. 852d–853; Marine Mammal Protection Act of 1972, 16 U.S.C. 1375–1377, 1382; Endangered Species Act of 1973, 16 U.S.C. 1540; Lacey Act, 18 U.S.C. 43, 44; Lacey Act Amendments of 1981, 95 Stat. 1073–1080, 16 U.S.C. 3371 *et seq.*; Tariff Act of 1930, 19 U.S.C. 1602–1624; Fish and Wildlife Improvement Act of 1978, 16 U.S.C. 7421; Exotic Organisms, E.O. 11987, 42 FR 26949; American Indian Religious Freedom Act, 42 U.S.C. 1996.

4. Amend § 12.2 by adding a new paragraph (j) to read as follows:

§ 12.2 Scope of regulations.

* * * * *

(j) The Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*

5. Amend § 12.6 by revising paragraph (a) to read as follows:

§ 12.6 Bonded release.

(a) Subject to the conditions set forth in paragraphs (b) and (c) of this section, and to such additional conditions as may be appropriate, the Service, in its discretion, may accept an appearance bond or other security (including, but not limited to, payment of the value as determined under § 12.12) in place of any property seized under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*; Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*; Lacey Act, 18 U.S.C. 43; Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*; Airborne Hunting Act, 16 U.S.C. 742j–1; or Eagle Protection Act, 16 U.S.C. 668 *et seq.*

* * * * *

6. Revise §12.12 to read as follows:

§ 12.12 Appraisement.

The Service shall determine the value of any cargo, of a vessel or other conveyance employed in unlawful taking, seized under the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, and the value of any property seized under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*; Eagle Protection Act, 16 U.S.C. 668 *et seq.*; Airborne Hunting Act, 16 U.S.C. 742j–1, *et seq.*; or the Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.* If the seized property may lawfully be sold in the United States, its domestic value shall be determined in accordance with § 12.3. If the seized property may not lawfully be sold in the United States, its value shall be determined by other reasonable means.

7. Revise § 12.22 to read as follows:

§ 12.22 Civil actions to obtain forfeiture.

The Solicitor may request the Attorney General to file a civil action to obtain forfeiture of any property subject to forfeiture under the Airborne Hunting Act, 16 U.S.C. 742j–1; Lacey Act, 18 U.S.C. 43–44; Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*; Black Bass Act, 16 U.S.C. 851 *et seq.*; Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*; Migratory Bird Treaty Act, 16 U.S.C. 703 *et seq.*; Migratory Bird Hunting Stamp Act, 16 U.S.C. 718 *et seq.*; Eagle Protection Act, 16 U.S.C. 668 *et seq.*; or Endangered Species Act, 16 U.S.C. 1531 *et seq.*. Before any such action is filed against property subject to forfeiture under the Lacey Act, 18 U.S.C 43, or against property, other than the cargo of a vessel or other conveyance employed in unlawful taking, subject to forfeiture under the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, a civil penalty must first be assessed in accordance with the statute and applicable regulations, and no such action may be filed more than 30 days after the conclusion of civil penalty assessment proceedings.

8. Amend § 12.23 by revising paragraph (a) and by adding paragraph (b)(4) to read as follows:

§ 12.23 Administrative forfeiture proceedings.

(a) *When authorized.* Whenever any property subject to forfeiture under the Eagle Protection Act, 16 U.S.C. 668 *et seq.*, or Airborne Hunting Act, 16 U.S.C. 742j–1, or any wildlife or plant subject to forfeiture under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*, or any fish, wildlife or plant subject to forfeiture under the Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*, is determined under § 12.12 to have a value not greater than $10,000, the Solicitor may obtain forfeiture of such property in accordance with this section.

(b) * * *

(4) *Motion for stay.* Upon issuance of the notice of proposed forfeiture, any person claiming the seized property may file with the Solicitor's regional or field office indicated in the notice a motion to stay administrative forfeiture proceedings. Any motion for stay must be filed within 30 days after the date of first publication or posting of the notice of the proposed forfeiture. Each motion must contain: (i) The claimant's verified statement showing that he or she holds absolute, fee simple title to the seized property, free and clear of all liens, encumbrances, security interests, or other third-party interests, contingent or vested; and (ii) the claimant's offer to pay in advance all reasonable costs anticipated to be incurred in the storage, care, and maintenance of the seized property for which administrative forfeiture is sought. Where a stay of administrative forfeiture proceedings would not injure or impair the rights of any third parties and where the claimant has agreed to pay in advance anticipated, reasonable storage costs associated with the granting of a stay, the Regional or Field Solicitor as appropriate may, in his discretion, grant the motion for stay and specify reasonable and prudent conditions therefor, including but not limited to the duration of the stay, a description of the factors which would automatically terminate the stay, and any requirement for a bond (including amount) to secure the payment of storage and other maintenance costs. If a motion for stay is denied, or if a stay is terminated for any reason, the claimant must file, if he or she has not already done so, a claim and bond in accordance with paragraph (b)(2) of this section not later than 30 days after receipt of the Solicitor's

Office denial or termination order. Failure to file the claim and bond within 30 days will result in summary foreiture under paragraph (c) of this section.

* * * * *

9. Amend § 12.24 by revising paragraph (a) to read as follows:

§ 12.24 Petition for remission of forfeiture.

(a) Any person who has an interest in cargo, of a vessel or other conveyance employed in unlawful taking, subject to forfeiture under the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, or any person who has an interest in any property subject to forfeiture under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*; Eagle Protection Act, 16 U.S.C. 668 *et seq.*; Airborne Hunting Act, 16 U.S.C. 742j–1; or the Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*, or any person who has incurred or is alleged to have incurred a forfeiture of any such property, may file with the Solicitor or, when forfeiture proceedings have been brought in United States District Court, the Attorney General, a petition for remission of forfeiture.

* * * * *

10. Revise § 12.25 to read as follows:

§ 12.25 Transfers in settlement of civil penalty claims.

In the discretion of the Solicitor, an owner of wildlife or plants who may be liable for civil penalty under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*; Lacey Act, 18 U.S.C. 43; Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*; Eagle Protection Act, 16 U.S.C. 668 *et seq.*; or Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, may be given an opportunity to completely or partially settle the civil penalty claim by transferring to the United States all right, title, and interest in any wildlife or plants that are subject to forfeiture. Such transfer may be accomplished by the owner's execution and return of a United States Customs Form 4607 or a similar compromise transfer of property instrument provided by the Department.

11. Amend § 12.41 by revising paragraph (a) to read as follows:

§ 12.41 Petition for restoration of proceeds.

(a) Any person claiming any property or interest therein which has been forfeited under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*; Eagle Protection Act, 16 U.S.C. 668 *et seq.*; Airborne Hunting Act, 16 U.S.C. 742j–1; or the Lacey Act Amendments of 1981, 16 U.S.C. 3371 *et seq.*, and sold according to law, or any person claiming cargo or an interest therein, of a vessel or other conveyance employed in unlawful taking which has been forfeited under the Marine Mammal Protection Act, 16 U.S.C. 1361 *et seq.*, and sold according to law, may file with the Solicitor or, where forfeiture proceedings have been brought in United States District Court, the Attorney General, a petition for restoration of proceeds.

* * * * *

12. Revise § 12.42 to read as follows:

§ 12.42 Recovery of certain storage costs.

If any wildlife, plant, or evidentiary item is seized and forfeited under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*, any person whose act or omission was the basis for the seizure may be charged a reasonable fee for expenses to the United States connected with the transfer, board, handling, or storage of such property. If any fish, wildlife or plant is seized in connection with a violation of the Lacey Act Amendments of 1981, 16 U.S.C. 3371, *et seq.*, any person convicted thereof, or assessed a civil penalty therefor, may be assessed a reasonable fee for expenses of the United States connected with the storage, care and maintenance of such property. Within a reasonable time after forfeiture, the Service shall send to such person by registered or certified mail, return receipt requested, a bill for such fee. The bill shall contain an itemized statement of the applicable costs, together with instructions on the time and manner of payment. Payment shall be made in accordance with the bill. The recipient of any assessment of costs under this section who has an objection to the reasonableness of the costs described in the bill may, within 30 days of the date on which he received the bill, file written objections with the Regional Director of the Fish and Wildlife Service for the Region in which the seizure occurred. Upon receipt of the written objections, the appropriate Regional Director will promptly review them and within 30 days mail his final decision to the party who filed objections. In all cases, the Regional Director's decision shall constitute final administrative action on the matter.

Dated: November 26, 1982.

William H. Coldiron,

Solicitor.

BILLING CODE 4310–17–M

Proposed Rules

Federal Register
Vol. 47, No. 245
Tuesday, December 21, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Parts 3, 6, 7, and 32

[Docket No. 82-25]

National Bank Lending Limits

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Office of the Comptroller of the Currency proposes to amend the regulations and interpretive rulings regarding national bank lending limits to reflect amendments of R.S. 5200 (12 U.S.C. 84) made by Congress in Section 401(a) of Pub. L. 97-320 (Oct. 15, 1982). The proposed amendments to the regulations and interpretive rulings would generally: (1) Clarify the manner in which the lending limits and exceptions thereto apply; (2) set forth rules under which loans made to one person are to be combined with loans made to other persons for purposes of the lending limits; and (3) define and further define terms used in the amended statute. These amendments will be of substantial interest to the banking industry. Interested persons are invited to submit written data, views, or arguments regarding the proposed amendments for a period of 45 days.

DATE: Comments must be received by February 4, 1983.

ADDRESSES: Please send comments to Docket No. 82-25, Communications Division, Third Floor, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, S.W., Washington, D.C. 20219. Attn: C. Christine Jones ((202) 447-1768). All Comments received will be made available for public inspection.

FOR FURTHER INFORMATION CONTACT: Carol M. Beaumier, Manager, International Examinations ((202) 447-1747); Howard J. Finkelstein, Attorney, Legal Advisory Services Division ((202) 447-1880); Claire Owen, National Bank Examiner, Commercial Examinations ((202) 447-1164).

SUPPLEMENTARY INFORMATION: Section 401(a) of Pub. L. 97-320 (Oct. 15, 1982) made a number of substantive changes to R.S. 5200 (12 U.S.C. 84), including the following:

(a) The lending limit generally applicable to national banks was changed from 10 percent of capital and surplus to 15 percent.

(b) A new exception to the lending limits was created by which national banks could lend an additional 10 percent of their capital and surplus if such loan was fully secured by "readily marketable collateral having a market value, as determined by reliable and continuously available price quotations, at least equal to the amount of the funds outstanding * * *."

(c) The term "loan and extension of credit" was substituted for "obligation" and the term was defined for the first time.

(d) The term "person" was defined for the first time. Explicitly included in the definition were sovereign governments, their agencies, subdivisions, and instrumentalities.

(e) The existing fourteen exceptions were modified and simplified; some were eliminated.

(f) An additional exception was added governing loans or extensions of credit secured by deposits in the lending bank.

(g) Rules regarding combining loans to individual borrowers were eliminated from the statute. Instead, the Comptroller was explicitly empowered to make these determinations.

(h) The Comptroller was granted explicit rulemaking and interpretive authority in determining when a commitment by a national bank to advance funds is to be considered a loan or extension of credit subject to the lending limits.

(i) The Comptroller was granted authority to "prescribe rules and regulations to administer and carry out the purposes of [section 84], including rules or regulations to define or further define terms used in [section 84] and to establish limits or requirements other than those specified in [section 84] for particular classes or categories of loans or extensions of credit."

These statutory changes made it necessary for the Comptroller to amend the Office's existing regulations under Section 84 and, in addition, to promulgate new regulations to carry out the intention of the statute. In order to simplify the existing regulations from a structural viewpoint, all current and new regulations and interpretations in this area will be incorporated in a new Part 32 of 12 CFR. It is believed that this change will make it easier to reference the laws governing national banks' lending limits.

Generally, the new Part 32 retains many of the Comptroller's Interpretive Rulings now found in Part 7. In addition, new regulations have been proposed in a number of areas. The public is invited to comment on all aspects of the proposed regulation.

The following are among the significant matters addressed by the proposal:

1. *Definition of "loan and extension of credit."* The proposed definition follows the definition found in section 84(b)(1).

The Office considered including in the regulation a listing of specific transactions which come within the definition of "loan and extension of credit" and a listing of transactions which will not be considered "loan and extension of credit." It was felt, however, that specific transactions were best dealt with in interpretations or on a case-by-case basis. Comment is specifically solicited on whether the definition in the Regulation should be expanded and on whether various transactions should be dealt with specifically.

2. *Definition of "person".* The proposed definition quotes verbatim from subsection (b)(2) of the revised Section 84.

3. *Definition of "unimpaired capital and unimpaired surplus."* The proposed regulation refers to the Office's generally applicable definition of this term. It should be noted that the Office is in the process of revising that definition. A proposed regulation was published on August 10, 1981 (46 FR 40520), and it is expected that the regulation will be adopted in final prior to the effective date of the revised Section 84 (April 14, 1983).

4. *Definition of "contractual commitment to advance funds."* The revised statute gives the Comptroller the authority to determine when a contractual commitment to advance funds would be included in a person's liability under 12 U.S.C. 84. The Office's position has generally been that a

liability on the part of the borrower is not created until funds are advanced, with the exception of standby letters of credit and guarantees. The Office has held that when the bank has obligated itself to make payment to a third party on behalf of a customer in the event of the customer's default, the obligation is subject to the customer's lending limit. Thus, the proposed regulation includes standby letters of credit and guarantees, to the extent permitted by law, as "loan and extension of credit" under Section 84. The Office would appreciate comments on the following questions related to commitments:

(a) Should fee paid commitments to lend or undisbursed loan funds be considered loans or extensions of credit subject to section 84's limits?

(b) Are there other third-party type commitments that should be included in a borrower's liability under section 84 limits, but do not meet the definition of § 32.2(f)?

5. *General limitation.* Proposed section 3(a) of the proposed regulation would restate the general rule of section 84. In preparing the regulation, the Office considered inserting a provision stating that the limitations of section 84 are applicable to loans made by a national bank's foreign subsidiaries, Edge Act Corporations, and Agreement Corporations. The Office would appreciate comments on the effects this type of provision would have on worldwide lending by national banks and on their ability to compete with other lenders abroad. The Office is also interested on the interplay between this type of provision and the lending limits contained in the Federal Reserve Board's Regulation K (12 CFR Part 211).

6. *Loans fully secured by readily marketable collateral.* Proposed § 32.4 would set forth rules for compliance with the newly created additional limitation for "loans fully secured by readily marketable collateral having a market value, as determined by reliable and continuously available price quotations, at least equal to the amount of the funds outstanding * * *." In formulating the regulation, the Office dealt with the following significant issues:

a. *Eligible collateral.* The proposed regulation would limit the collateral eligible under this limitation to certain financial instruments. In arriving at this definition, the Office attempted to define classes of collateral which shared a number of characteristics, such as: (i) Fungibility; (ii) easily traded; (iii) reliable price quotations available on a daily basis; (iv) traded through a regulated market. While these were not the only criteria used, they are significant ones. The Office believes that the basis for the additional 10 percent is the fact that loans secured by certain types of collateral are inherently less risky than other loans. It would therefore be unwise to permit, under this limitation, loans collateralized by items upon which the bank cannot almost immediately avoid loss by foreclosure and disposal of the collateral. Therefore, collateral such as lettered stock, which must be registered before it is sold, or a controlling share of a stock issuance, which cannot be disposed of easily, would not be eligible. The Office does solicit the views of the public as to other classes of collateral which might meet the above criteria.

b. *Margin requirements.* Under the terms of section 84(a)(2), loans eligible for the additional limitation must be "fully secured" at all times. Since market value for any type of collateral must fluctuate, the proposed regulation would require that, at the inception of the loan, collateral will have a market value of 115 percent of the loan. Banks would be required to make good-faith, reasonable efforts to maintain this margin throughout the life of the loan. This should be done through the establishment of internal procedures for monitoring both the value of the collateral and its relationship to the amount outstanding on the loan. In addition, if the value of the collateral falls below 115 percent of the outstanding loan for more than a short period of time, the bank would be obligated to take actions to restore the margin to the 115 percent level.

This is not to say, however, that the loan would be considered to be in violation of Section 84 whenever the collateral-to-loan ratio drops below 115 percent. The proposed regulation provides that the Office will generally consider the loan to be in violation of Section 84 only when the ratio drops below 100 percent. The proposed regulation would provide that once the value of the collateral falls to or below 100 percent of the amount of the loan outstanding the bank must, within a reasonable period of time (but in no case longer than five business days), take action to either obtain additional collateral, require reduction of the loan, or liquidate the collateral in its entirety. A bank failing to do so with respect to a loan that had previously qualified under section 84(a)(2) will be considered to have been in violation of its lending limits from the date the collateral-to-loan ratio fell to 100 percent.

It should also be noted that the 115 percent margin requirement is not especially burdensome or unreasonable. If, for example, a bank's capital was $1 million, it could, under the revised section 84, loan $250,000 to one individual ($150,000 under 84(a)(1) and $100,000 under (a)(2)) secured by only $115,000 of collateral eligible under section 84(a)(2). It is believed that the 115 percent ratio will provide banks with some margin of safety.

7. *Combining loans to separate borrowers.* Before its revision, 12 U.S.C. 84 required that loans to partnerships be combined with loans to members thereof and that loans to corporations be combined with loans to subsidiaries thereof. The Comptroller's Interpretive Rulings clarified these general rules and, in carrying out Congress's intent, defined certain relationships among borrowers which indicated that certain loans should be combined. These characteristics, referred to here as factors indicating a "common enterprise," dictated that loans to separate entities be combined when: (i) The bank is looking to a single source for repayment, (ii) a loan to one party is made for the accommodation of another, (iii) the borrowers are in reality merely departments of a single enterprise, or (iv) the borrowers are engaged in a common enterprise. Thus, Interpretive Ruling 7.1310, 12 CFR 7.1310, added that loans to subsidiaries of a common parent will be combined even where the parent has not borrowed when certain factors indicating a common enterprise are found to exist. Interpretive Ruling 7.1320, 12 CFR 7.1320, added that loans to any person engaged in a common enterprise in any form whatsoever will be combined. Finally, Interpretive Ruling 7.1330, 12 CFR 7.1330, was adopted in 1979 in response to the growth in national bank lending to foreign governments and instrumentalities thereof. It set forth two tests ("means" and "purpose") to judge when loans to foreign sovereigns and instrumentalities were to be combined. In addition to these Rulings, the Comptroller's Office issued numerous interpretive letters over the years addressing whether and when loans should be combined in a wide variety of circumstances.

The revised section 84 does not deal with combining loans to separate borrowers, except to grant the Comptroller authority to determine when such loans are to be combined. Section 5 of the proposed regulation sets forth these rules. In general, the section deviates from the law currently applicable only in a few instances. Insofar as it embodies positions of the Office not previously codified, it is believed that the regulation will provide more certainty than exists at the present time.

a. *General rule.* Paragraph (b)(1) of the proposed § 32.5 sets forth the general rule that loans to separate borrowers will be combined if the proceeds are to be used for the benefit of the other person or if a "common enterprise" is deemed to exist. The general rule would apply to all cases not covered in paragraphs (c), (d), and (e) of § 32.5. It is thus intended that the general rule will apply to a wide variety of circumstances where the legal relationships among the parties do not fit the special characteristics set forth in paragraphs (c), (d), and (e).

It is important to note that the defined characteristics of "common enterprise" will not be applied rigidly. The tests set forth in § 35.5(b)(2) are codifications of factors which arise frequently in fact situations reviewed by the Office's examiners and attorneys. As courts construing Section 84 have recognized, it is impossible to deal with the issue of combination of loans by *per se* rules which would cover all cases. Thus, there will be instances where logic and public policy dictate that certain loans should be combined even where the specific factors set forth in proposed § 35.5(b)(2) do not exist.

b. *Loans to corporations.* The proposed regulation for loans to corporations would require combination of loans to a corporation with loans to any person which owns a controlling interest in such corporation. In addition, loans to corporations would be combined with loans to any corporations controlled by the same legal entity. This subsection would expand on existing law in a number of ways:

(i) Under current law, absent a common enterprise, loans to corporations are not combined with loans to persons, other than corporations, which own a controlling interest therein. Under the proposed regulation, loans to a corporation will be combined with loans to individuals, partnerships, or other entities which own controlling interests in such corporations. This change is based upon the premise that, viewing Section 84 as a risk diversification device, there is no reason to distinguish a corporation owned by another corporation from a corporation owned by any other entity.

(ii) Under current law, loans to separate corporations which are subsidiaries of a common parent are not combined, absent a common enterprise, if the parent is not borrowing from the bank. The proposal would alter this rule and require combination regardless of whether the parent is borrowing. Once again, it is believed that this change will remove a distinction which, in terms of risk diversification, is needless and artificial.

The regulation would also clarify that a corporation is considered a subsidiary of a legal entity even where the person's ownership of the corporation is indirect. Thus, loans to a corporation will be combined with loans to its second- and third-tier subsidiaries.

c. *Loans to partnerships, joint ventures, and associations.* The proposed regulation would require combination of loans to partnerships, joint ventures, and associations with loans to members of such entities. This rule would also apply to persons who control majority interests in other legal entities, such as partnerships and corporations, where those legal entities are members of partnerships. The rationale for this rule is that members of partnerships, joint ventures, and associations are generally liable for the debts of such entities. The mandatory combination rules would not, however, be applicable to persons who own limited partnership interests; loans to these persons and partnerships would only be combined under the general rule of proposed § 32.5. The proposed regulation would bring a great deal of clarity to an area of the law which has become confused in recent years.

d. *Loans to foreign governments, their agencies and instrumentalities.* The proposed regulation sets forth the tests currently found in Interpretive Ruling 7.1330, 12 CFR 7.1330. The Comptroller does not recommend any change in these tests at the present time.

8. *Exceptions to the lending limits.* Before its revision, 12 U.S.C. 84 contained fourteen exceptions to the lending limits. The revised statute eliminates exceptions 1, 3, 4, 11, and 12, to the extent they are not covered by other exceptions. In addition, an exception has been added for loans secured by deposits in the lending bank. The proposed regulations generally follow the Office's current Interpretive Rulings on the individual exceptions.

The only major change would affect the valuation of United States obligations held as collateral. The current regulation, 12 CFR 6.2, allows these obligations to be valued at face or par. The proposed regulation would require that these obligations be valued at market value.

9. *Transitional rules.* Proposed § 32.7 sets forth transitional rules for loans made prior to the effective date of the revised Section 84. These rules are necessary to deal with: (a) Loans that violate the current Section 84 but would be permissible under the revision and (b) loans which were not in violation of the current Section 84 but will violate the revised Section 84 due to the elimination of one or more of the statutory exceptions, changes in the rules for combining loans to separate borrowers or other changes in applicable law.

Loans or extensions of credit which were previously in violation of 12 U.S.C. 84 would, under the proposal, be considered to remain in violation regardless of whether or not the loans or extensions of credit would be conforming under this Part. These violations would be subject to directors' liability and civil money penalties until they are paid in full. However, additional legal advances to these borrowers would, to the extent permitted under the proposal, be permissible.

Loans or extensions of credit which were previously conforming, but become nonconforming under the new statute, would not generally be considered violations of law. However, this Office believes that these loans should be brought into conforming status as soon as practicable. Whether the bank has made a reasonable effort to do so will be left to the discretion of the examiners. If examiners determine that a reasonable effort has not been made, the loans will be cited as violations of law subject to directors' liability and civil money penalties. Additional advances may not be made if they would themselves create a violation of Section 84, regardless of whether a commitment to lend was entered into prior to the enactment of this Part.

The Office would appreciate comments on the question of whether irrevocable commitments to lend should be considered legal if they are conforming at the time they are entered into, although nonconforming at the time funds are advanced. In addition, the Office requests comments on whether there are other transitional problems not covered by the proposed rules.

10. *Interpretations.* The proposal contains eleven proposed Interpretations, all of which would adopt existing Interpretive Rulings. The following lists the source of the proposed Interpretations:

New Sec.	*Old* Sec.
32.101	7.1125(c)
32.102	7.1130
32.103	7.1131
32.104	7.1160
32.105	7.1161
32.106	7.1120
32.107	7.1135
32.108	7.1150
32.109	7.1165
32.110	7.1161
32.111	7.1160

All changes from the originals reflect existing policies of the Office in the implementation of its Interpretive Rulings.

Regulatory Impact Analysis. Pursuant to section 3(g) (1) of Executive Order 12291 of February 17, 1981, it has been determined that the proposed regulations do not constitute a "major rule" within the meaning of section 1(b) of the Executive Order. The amendment would not have an effect on the economy or $100 million or more, would not affect costs or prices for consumers, individual industries, government agencies, or geographic regions, and would not have adverse effects on competition, employment, investment, productivity, or on the ability of United States based industries to compete with foreign based enterprises in domestic or export markets.

Regulatory Flexibility Act Analysis. Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 5 U.S.C. 601 *et seq.*) the Secretary of the Treasury has certified that the proposed amendment, if adopted, will not have a significant economic impact on a substantial number of small entities.

List of Subjects

12 CFR Parts 3, 6 and 32

National banks, Lending limits.

12 CFR Part 7

National banks, Management, and ownership rights, Other powers.

Accordingly, pusuant to authority under 12 U.S.C. 84 and 93a, the Comptroller of the Currency hereby proposes to amend Title 12 of the Code of Federal Regulations by removing Parts 3 and 6, by amending Part 7 and adding new Part 32 to read as follows:

PART 3—NATIONAL BANK LOANS SECURED OR COVERED BY GOVERNMENTAL GUARANTIES [RESERVED]

1. The authority for Part 3 is:

Authority: R. S. 5200; 12. U.S.C. 84(10).

2. Removing and reserving Part 3 in its entirety.

PART 6—LOANS MADE BY NATIONAL BANKS SECURED BY OBLIGATIONS OF THE UNITED STATES [RESERVED]

3. The authority for Part 6 is:

Authority: R.S. 5200; as amended 12 U.S.C. 84(8)).

4. By Removing and reserving Part 6 in its entirety.

PART 7—INTERPRETIVE RULINGS

5. The authority for Part 7 is:

Authority: R.S. 324 et seq., as amended; 12 U.S.C. 1 et seq.,

§§ 7.1110 through 7.1630 [Removed]

6. By removing §§ 7.1110 through and including 7.1630.

7. By establishing a new Part 32 to read as follows:

PART 32—LENDING LIMITS

Sec.

32.1 Authority, purpose, and scope.
32.2 Definitions.
32.3 General limitation.
32.4 Additional general limitation: Loans fully secured by readily marketable collateral.
32.5 Combining loans to separate borrowers.
32.6 Exceptions to the lending limits.
32.7 Transitional rules.

Interpretations

32.101 Obligations of accommodation parties.
32.102 Sale of Federal Reserve funds.
32.103 Purchase of securities subject to repurchase agreement.
32.104 Standby letters of credit.
32.105 Overdrafts.
32.106 Loans charged off in whole or in part.
32.107 Sale of loan participations.
32.108 Interest or discount on loans.
32.109 Loans to or guaranteed by general obligations of a State or political subdivision.
32.110 Loans to industrial development authorities.
32.111 Separate limitations for 12 U.S.C. 84 and 12 U.S.C. 24.

Authority: R.S. 5200(b)(1), (d)(1), and (d)(2); (12 U.S.C. 84(b)(1), (d)(1), and (d)(2)) and R.S. 5239A; (12 U.S.C. 93a).

§ 32.1 Authority, purpose, and scope.

(a) *Authority.* This Part is issued pursuant to authority granted in R.S. 5200(b)(1), (d)(1), and (d)(2); (12 U.S.C. 84(b)(1), (d)(1), and (d)(2)) and R.S. 5239A; (12 U.S.C. 93a).

(b) *Purpose and scope.* R.S. 5200 (12 U.S.C. 84) is intended to prevent one individual, or a relatively small group, from borrowing an unduly large amount of the bank's funds. It is also intended to safeguard the bank's depositors by spreading the loans among a relatively large number of persons engaged in different lines of business. This Part applies to loans and extensions of credit made by national banks.

§ 32.2 Definitions.

For purposes of this Part:

(a) "Loans and extensions of credit" means any direct or indirect advance of funds to a person made on the basis of any obligation of that person to repay the funds or repayable from specific property pledged by or on behalf of a person. "Loans and extensions of credit" also includes a "contractual commitment to advance funds" as that term is defined in this section.

(b) "Person" means an individual, sole proprietorship, partnership, joint venture, association, trust, estate, business trust, corporation, sovereign government or agency, instrumentality, or political subdivision thereof, or any similar entity or organization.

(c) "Unimpaired capital and unimpaired surplus" has the meaning set forth in 12 CFR 7.1100.

(d) "Contractual commitment to advance funds" means: (1) An obligation on the part of the bank to make payments (directly or indirectly) to a designated third party contingent upon a default by the bank's customer in the performance of an obligation under the terms of that customer's contract with the third party or (2) an obligation to guarantee or stand as surety for the benefit of a third party to the extent permitted by law. The term includes, but is not limited to, standby letters of credit (as defined and limited in 12 CFR 32.104), guarantees, and letters of indemnity. For purposes of this Part, undisbursed loan funds and loan commitments not yet drawn upon are not considered a "contractual commitment to advance funds."

§ 32.3 General limitation.

12 U.S.C. 84(a)(1) provides:

The total loans and extensions of credit by a national banking association to a person outstanding at one time and not fully secured, as determined in a manner consistent with paragraph (2) of this subsection, by collateral having a market value at least equal to the amount of the loan or extension of credit shall not exceed 15 per centum of the unimpaired capital and unimpaired surplus of the association.

§ 32.4 Additional general limitation: loans fully secured by readily marketable collateral

(a) *Law.* 12 U.S.C. 84(a)(2) provides:

The total loans and extensions of credit by a national banking association to a person outstanding at one time and fully secured by readily marketable collateral having a market value, as determined by reliable and continuously available price quotations, at least equal to the amount of the funds outstanding shall not exceed 10 per centum of the unimpaired capital and unimpaired surplus of the association. This limitation shall be separate from and in addition to the limitation contained in paragraph (1) of this subsection.

(b) *Compliance with Section 84(a)(2).* Each loan or extension of credit based on the foregoing limitation shall be secured by readily marketable collateral having a current market value of at least 15 percent greater than the amount of

the loan or extension of credit at the time the loan or extension of credit is made. "Current market value" means the closing price listed for an item in a regularly published listing or an electronic reporting service. The bank must make every effort to maintain a collateral margin of 115 percent. However, since collateral values may fluctuate, the current market value of the collateral may, for short periods of time, fall below the 115 percent coverage required. At no time, however, may current market value of the collateral be less than 10 percent of the funds outstanding except as provided in paragraph (e) of this section.

(c) For purposes of this Part, "readily marketable collateral" means financial instruments which are salable under ordinary circumstances with reasonable promptness at a fair market value based on continuously available daily bid and ask price quotations. "Financial instruments" include stocks, notes, bonds, and debentures traded on a national securities exchange, "OTC margin stocks" (as defined in Regulation U of the Federal Reserve Board), and negotiable certificates of deposit.

(d) Collateral must be repriced at least monthly or more frequently as necessary to ensure that margin requirements are maintained. Financial instruments may be denominated in foreign currencies which are freely convertible to U.S. dollars. If collateral is denominated and payable in a currency other than that of the loan or extension of credit which it secures, the collateral must be revalued at least monthly, using appropriate foreign exchange rates, in addition to being repriced at current market value.

(e) Each bank must monitor the current market value of collateral held for purposes of compliance with section 84(a)(2). If collateral values fall to or below 100 percent of the outstanding loan, the bank must, within a reasonable period of time: (1) Obtain additional collateral in an amount sufficient to provide 115 percent coverage, (2) require reduction of the loan or extension of credit, or (3) sell the collateral and liquidate the debt. Generally, a reasonable period of time is considered no longer than five business days. During this period, the loan or extension of credit will be considered nonconforming. Failure to comply with one of these alternatives will result in a violation of law.

§ 32.5 Combining loans to separate borrowers.

(a) *Authority.* 12 U.S.C. 84(d)(2).

(b)(1) *General rule.* Loans or extensions of credit to one person shall, for purposes of this Part, include loans made to other persons when (i) the proceeds of the loans or extensions of credit are to be used for the direct benefit of the first person of (ii) the persons are engaged in a "common enterprise."

(2) *"Common enterprise."* For purposes of this Part, one or more of the following circumstances is evidence that two or more persons are engaged in a "common enterprise":

(i) The persons are engaged in interdependent business and, as such, there is a substantial volume of transactions between the persons. Generally, when 50 percent or more of the persons' gross revenues or gross expenditures are attributable to each other, a "common enterprise" will be deemed to exist.

(ii) The expected source of repayment for each loan or extension of credit is the same for each person.

(iii) Each person intends or expects to use the proceeds of the loan or extension of credit for identical or related purposes.

(iv) Other facts and circumstances (including, but not limited to, interlocking directors and/or management) exist which indicate that the persons are operated as a common enterprise.

(c) *Special rules for corporations.* (1) Loans or extensions of credit to a corporation will be combined with loans or extensions or credit to any person of which such corporation is a subsidiary.

(2) Loans or extensions of credit to a subsidiary of one person will be combined with all loans or extensions of credit to other subsidiaries of that person.

(3) For purposes of the rule set forth in this subsection, a corporation is a "subsidiary" of any person which owns or beneficially owns or controls a majority interest in the corporation. such ownership need not be direct.

(d) *Special rules for partnerships, joint ventures, and associations.* (1) loans or extensions of credit to each member of a partnership, joint venture, or association shall be combined with loans or extensions of credit to all partnerships, joint ventures, or associations of which such person is a member.

(2) Loans or extensions of credit to a partnership, joint venture, or association shall be combined with direct loans or extensions of credit to all members thereof.

(3) For purposes of the rules set forth in this subsection, a member of a partnership, joint venture, or association includes any person who owns or beneficially owns or controls an interest in such partnership, joint venture, or association.

(4) The rules set forth in this subsection are not applicable to limited partners in limited partnerships. Loans to limited partners will be combined with one another or with loans to the limited partnership only if the criteria set forth in paragraph (b)(1) of this section are met.

(e) *Loans to Foreign governments, their agencies, and instrumentalities.* (1) Notwithstanding paragraphs (b), (c), and (d) of this section, loans or extensions of credit to foreign governments, their agencies, and instrumentalities will be combined with one another under Section 84 only if they fail to meet either of the following tests at the time the loan or extension of credit is made:

(i) The borrower has resources or revenue of its own sufficient over time to service its debt obligations (" means" test);

(ii) The purpose of the loan or extension of credit is consistent with the purposes of the borrower's general business ("purpose" test).

(2) In order to show that the "means" and "purpose" tests have been satisfied, a bank shall, at a minimum, assemble and retain in its files the following items:

(i) A statement (accompanied by supporting documentation) describing the legal status and the degree of financial and operational autonomy of the borrowing entity.

(ii) Financial statements for the borrowing entity for a minimum of three years prior to the date the loan or extension of credit was made or for each year less than three that the borrowing entity has been in existence.

(iii) Financial statements for each year the loan or extension of credit is outstanding.

(iv) The bank's assessments of the borrower's means of servicing the loan or extension of credit, including specific reasons in support of that assessment. The assessment shall include an analysis of the borrower's financial history, its present and projected economic and financial performance, and the significance of any financial support provided to the borrower by third parties, including the borrower's central government. If the government's support exceeds the borrower's annual revenues from other sources, it will be presumed that the "means" test has not been satisfied. No such presumption will be made, however, because of a guarantee by the central government of the borrower's debt.

(v) A loan agreement or other written statement from the borrower which clearly describes the purpose of the loan or extension of credit. The written

representation will ordinarily constitute sufficient evidence that the "purpose" test has been satisfied. However, when, at the time the funds are disbursed, the bank knows or has reason to know of other information suggesting that the borrower will use the proceeds in a manner inconsistent with the written representation, it may not, without further inquiry, accept the representation.

§ 32.6 Exceptions to the lending limits.

(a) *Discount of commercial or business paper.* (1) *Law.* 12 U.S.C. 84(c)(1) provides:

> Loans or extensions of credit arising from the discount of commerical or business paper evidencing an obligation to the persons negotiating it with recourse shall not be subject to any limitation based on capital and surplus.

(2) This exception applies to: (i) Negotiable paper given in payment of the purchase price of commodities purchased for resale or to be used in connection with fabrication of a product, or to be used for any other business purpose which may reasonably be expected to provide funds for payment of the paper; and (ii) negotiable paper given in payment of the purchase price of commodities in export transactions. Loans or extensions of credit arising from the discount of paper of the kind described in paragraph (a)(2)(i) of this section must bear the full recourse endorsement of the owner. Loans or extensions of credit arising from the discount of paper of the kind described in paragraph (a)(2)(ii) of this section may bear either the full or limited recourse endorsement of the owner. If endorsed without full recourse, however, the paper must be supported by an assignment of appropriate insurance covering the political credit, and transfer risks applicable to the paper. Insurance provided by the Export-Import Bank or the Foreign Credit Insurance Association is considered appropriate for this purpose. Loans or extensions of credit based on this exception are not subject to any limitation.

(3) Renewal of negotiable paper is permitted when the renewal is consistent with the conditions described above.

(4) Since the reason for the unlimited credit under this exception is that the paper arises from the sale of commodity which may reasonably be expected to provide funds for payment of the paper, failure to pay either principal or interest when due removes the reason for unlimited credit. Therefore, although the line of credit to the maker or endorser should not be classified as excessive by reason of such default, the paper on which the default has occurred must thereafter be taken into consideration in determining whether additional loans or extensions of credit may be made within the limits of 12 U.S.C. 84.

(b) *Banker's acceptances.* (1) *Law.* 12 U.S.C. 84(c)(2) provides:

> The purchase of bankers' acceptances of the kind described in section 13 of the Federal Reserve Act and issued by other banks shall not be subject to any limitation based on capital and surplus.

(2) This exception permits the purchase by a national bank without limitation of bankers' acceptances created by other banks, provided that such acceptances are of the kind described in 12 U.S.C. 372 and 373 (eligible acceptances). Acceptances other than those described in sections 372 and 373 must be included within the purchasing bank's lending limit to each acceptor bank.

(3) The limits under which a national bank may itself accept drafts eligible for rediscount are contained in sections 372 and 373. These limits are distinct from the limits under section 84. Acceptances by a national bank of "ineligible" drafts, *i.e.*, time drafts which do not meet the requirements for discount with a Federal Reserve bank, are subject to the limitations of section 84.

(4) During any period within which a national bank holds its own acceptances, eligible or ineligible, having given value therefor, the amount given is considered, for purposes of this Part, to be a loan or extension of credit to the customer for whom the acceptance was made and is subject to the lending limits. To the extent that a loan or extension of credit created by discounting the acceptance (rather than the acceptance itself) is covered by a bona fide participation agreement, the discounting bank need only consider that portion of the discounted acceptance which it retains as being subject to the limitations of section 84.

(c) *Loans secured by shipping documents or warehouse receipts covering readily marketable staples.* (1) *Law.* 12 U.S.C. 84(c)(3) provides:

> Loans and extensions of credit secured by bills of lading, warehouse receipts, or similar documents transferring or securing title to readily marketable staples shall be subject to a limitation of 35 per centum of capital and surplus in addition to the general limitations if the market value of the staples securing each additional loan or extension of credit at all times equals or exceeds 115 per centum of the outstanding amount of such loan or extension of credit. The staples shall be fully covered by insurance whenever it is customary to insure such staples.

(2) A readily marketable staple means an article of commerce, agriculture, or industry of such uses as to make it the subject of dealings in a ready market with sufficiently frequent price quotations as to the make: (i) the price easily and definitely ascertainable, and (ii) the staple itself easy to realize upon sale at any time at a price which would not involve any considerable sacrifice from the amount at which it is valued as collateral. Staples eligible for this exception must be nonperishable, may be refrigerated or frozen, and must be fully covered by insurance when such insurance is customary. This exception is intended to apply primarily to basic commodities, such as wheat and other grains, cotton, wool, and basic metals such as tin, coppper, lead and the like. Whether a commodity is readily marketable depends upon existing conditions and it is possible that a commodity that qualifies at one time may cease to qualify at a later date. Fabricated commodities which do not constitute standarized interchangeable units and do not possess uniformly broad marketability do not qualify as readily marketable collateral.

(3) Commodities sometimes fail to qualify as nonperishable because of the manner in which they are handled or stored during the life of the loan or extension of credit. Accordingly, the question as to whether a staple is nonperishable must be determined on a case-by-case basis.

(4) This exception is applicable to a loan or extension of credit arising from a single transaction or secured by the same staples for: (i) Not more than 10 months if secured by nonperishable staples; and (ii) not more than six months if secured by refrigerated or frozen staples.

(5) The important characteristic of warehouse receipts, order bills of lading, or other similar documents is that the holder of such documents has control of the commodity and can obtain immediate possession. Only documents with these characteristics are eligible security for loans under this exception. In the event of default on a loan secured by such documents, the bank must be in a position to sell the underlying commodity and promptly transfer title and possession to the purchaser, thus being able to protect itself without extended litigation.

(6) Field warehouse receipts are an acceptable form of collateral when they are issued by a duly bonded and licensed grain elevator or warehouse having exclusive possession and control of the commodities even though the grain elevator or warehouse is

maintained on the commodity owner's premise.

(7) Warehouse receipts issued by the borrower-owner which is a grain elevator or warehouse company, duly-bonded and licensed and regularly inspected by state or federal authorities, may be considered eligible collateral under this exception only when the receipts are registered with an independant registrar whose consent is required before the commodities can be withdrawn from the warehouse.

(d) *Loans secured by U.S. obligations.* (1) *Law.* 12 U.S.C. 84(c)(4) provides:

> Loans or extensions of credit secured by bonds, notes, certificates of indebtedness, or Treasury bills of the United States or by other such obligations fully guaranteed as to principal and interest by the United States shall not be subject to any limitation based on capital and surplus.

(2) This exception applies only to the extent that loans or extensions of credit are fully secured by the current market value of obligations of the United States or guaranteed by the United States.

(e) *Loans to or guaranteed by a federal agency.* (1) *Law.* 12 U.S.C. 84(c)(5) provides:

> Loans or extensions of credit to or secured by unconditional takeout commitments or guarantees of any department, agency, bureau, board, commission, or establishment of the United States or any corporation wholly owned directly or indirectly by the United States shall not be subject to any limitation based on capital and surplus.

(2) This exception may apply to only that portion of a loan or extension of credit that is covered by a federal guarantee or commitment.

(3) For purposes of this exception, the commitment or guarantee must be payable in cash or its equivalent within sixty days after demand for payment is made.

(4) A guarantee or commitment is unconditional if the protection afforded the bank is not substantially diminished or impaired in the case of loss resulting from factors beyond the bank's control. Protection against loss is not materially diminished or impaired by procedural requirements, such as an agreement to take over only in the event of default, including default over a specific period of time, a requirement that notification of default be given within a specific period after its occurrence, or a requirement of good faith on the part of the bank.

(f) *Loans secured by segregated deposit accounts.* (1) *Law.* 12 U.S.C. 84(c)(6) provides:

> Loans or extensions of credit secured by a segregated deposit account in the lending bank shall not be subject to any limitation based on capital and surplus.

(2) Deposit accounts which may qualify for this exception include deposits in any form generally recognized as deposits. In the case of a deposit eligible for withdrawal prior to the maturity of the secured loan, the bank must establish internal procedures which will prevent the release of the security.

(3) A deposit which is denominated and payable in a currency other than that of the loan or extension of credit which it secures must be revaluated at least monthly, using appropriate foreign exchange rates, to ensure that the loan or extension of credit remains fully secured. If foreign exchange rates fluctuate so that the market value of the collateral is less than the outstanding loan, the bank must, within five business days, (i) obtain the pledge of additional deposits, (ii) require reduction of the loan or extension of credit, or (iii) offset the loan against the deposit and thereby liquidate the debt. During this period, the loan or extension of credit will be considered nonconforming. Failure to comply with one of these alternatives will result in a violation of law.

(g) *Loans to financial institutions with the approval of the Comptroller.* (1) *Law.* 12 U.S.C. 84(c)(7) provides:

> Loans or extensions of credit to any financial institution or to any receiver, conservator, superintendent of banks, or other agent in charge of the business and property of such financial institution, when such loans or extensions of credit are approved by the Comptroller of the Currency, shall not be subject to any limitation based on capital and surplus.

(2) For purpose of this subsection, "financial institution" means a commercial bank, savings bank, trust company, savings and loan association, or credit union.

(h) *Discount of installment consumer paper.* (1) *Law.* 12 U.S.C. 84(c)(8) provides:

> (A) Loans and extensions of credit arising from the discount of negotiable or nonnegotiable installment consumer paper which carries a full recourse endorsement or unconditional guarantee by the person transferring the paper shall be subject under this section to a maximum limitation equal to 25 per centum of such capital and surplus, notwithstanding the collateral requirements set forth in subsection (a)(2).
>
> (B) If the bank's files or the knowledge of its officers of the financial condition of each maker of such consumer paper is reasonably adequate, and an officer of the bank designated for that purpose by the board of directors of the bank certifies in writing that the bank is relying primarily upon the responsibility of each maker for payment of such loans or extensions of credit and not upon any full or partial recourse endorsement or guarantee by the transferor, the limitations of this section as to the loans or extensions of credit of each such maker shall be the sole applicable loan limitations.

(2) This exception allows a national bank to discount negotiable or nonnegotiable installment consumer paper of one person in an amount equal to 10 percent of its capital and surplus (in addition to the 15 percent permitted by section 84(a)(1)) if the paper carries a full recourse endorsement or unconditional guarantee by the seller transferring such paper. The unconditional guarantee may be in the form of a repurchase agreement or a separate guarantee agreement. A condition reasonably within the power of the bank to perform, such as the repossession of collateral, will not be considered to make conditional an otherwise unconditional agreement.

(3) Where a bank purchases third party paper subject to an agreement that the seller will repurchase the paper at the end of a stated period, the seller's obligation to repurchase is subject to 12 U.S.C. 84 and is measured by the total unpaid balance of the paper owned by the bank less any applicable dealer reserves. Where the seller's obligation to repurchase is limited, the seller's total loans or extensions of credit, for the purpose of 12 U.S.C. 84 are measured by the total amount of paper the seller may ulitimately be obligated to repurchase. Where no more than an agreed percentage of the purchase price is retained by the bank and credited to the seller's account as a form of collateral security, but the bank has no direct or indirect recourse to the seller, the loans or extensions of credit do not constitute loans or extensions of credit to the seller subject to the limitations of section 84.

(4) For purposes of this subsection, "consumer" means the user of any products, commodities, goods, or services, whether leased or purchased, and does not include any person who purchases product or commodities for the purpose of resale or for fabrication into goods for sale.

(5) For purposes of this subsection, "consumer paper" includes paper relating to automoblies, mobile homes, residences, office equipment, household items, tuition fees, insurance premium fees, and similar consumer items. Also included is paper covering the lease (where the bank is not the owner or lessor) or purchase of equipment for use in manufacturing, farming, construction, or excavation.

(6) Under certain circumstances, installment consumer paper which otherwise meets the requirements of this exception will be considered a loan or

extension of credit to the maker of the paper rather than the seller of the paper. Specifically, where: (i) Through the bank's files or the knowledge of its officers, it has been determined that the financial condition of each maker is reasonably adequate to repay the loan or extension of credit, and (ii) an officer designated by the Board of Directors certifies in writing that the bank is relying primarily upon the maker to repay the loan or extension of credit, the loan or extension of credit is subject only to the lending limits of the maker of the paper. Where paper is purchased in substantial quantities, the records, evaluation, and certification may be in such form as is appropriate for the class and quantity of paper involved.

(i) *Loans secured by livestock or dairy cattle.* (1) *Loans secured by livestock.*

(i) *Law.* 12 U.S.C. 84(c)(9) (A) provides:

> Loans and extensions of credit secured by shipping documents or instruments transferring or securing title covering livestock or giving a lien on livestock when the market value of the livestock securing the obligation is not at any time less than 115 per centum of the face amount of the note covered, shall be subject under this section, notwithstanding the collateral requirements set forth in subsection (a)(2), to maximum limitation equal to 25 per centum of such capital and surplus.

(ii) This exception allows a national bank to make loans or extensions of credit to one person in an amount equal to 10 percent of its capital and surplus, (in addition to the 15 percent permitted by section 84(a)(1)), if the loans or extensions of credit are secured by livestock having a market value at least equal to 115 percent of the outstanding loan balance at all times. The loans or extensions of credit may be secured by shipping documents or other instruments which transfer title to, secure title to, or give a first lien on livestock. "Livestock" includes dairy and beef cattle, hogs, sheep, goats, horses, mules, poultry, and fish, whether or not held for resale. To support compliance with this exception, the bank must maintain in its files an inspection and appraisal report on the livestock pledged. The inspection and appraisal report should be performed at least annually, or more frequently as deemed prudent.

(iii) Under the laws of certain states, a person furnishing pasturage under a grazing contract may have a lien on the livestock for the amount due for pasturage. If the lien which is based on pasturage furnished by the lienor prior to the making of the loan: (A) Is assigned to the bank by a recordable instrument; and (B) is protected against being defeated by some other lien or claim, by payment to a person other than the bank, or otherwise, it would qualify under this exception provided the amount of such perfected lien is at least equal to the amount of the loan and the value of the livestock is at no time less than 115 percent of the loan. Where the amount due under the grazing contract is dependent upon future performance thereunder, the resulting lien has merely prospective value and does not meet the requirements of the exception.

(2) *Loans secured by dairy cattle.* (i) *Law.* 12 U.S.C. 84 (c)(9)(B) provides:

> Loans and extensions of credit which arise from the discount by dealers in dairy cattle of paper given in payment for dairy cattle, which paper carries a full recourse endorsement or unconditional guarantee of the seller, and which are secured by the cattle being sold, shall be subject under this section, notwithstanding the collateral requirements set forth in subsection (a)(2), to a limitation of 25 per centum of such capital and surplus.

(ii) This exception allows a national bank to discount paper of one person given in payment for dairy cattle in an amount equal to 10 percent of its capital and surplus (in addition to the general limitations of section 84 (a)(1)). The discounted paper must carry the full recourse endorsement or unconditional guarantee of the seller and the dairy cattle must secure the debt. Liens on the cattle may be in the form of recorded chattle mortgages, bills of sale, or any other form which provides security substantially equivalent to that afforded by a recorded chattel mortgage.

(3) The exceptions for loans and extensions of credit secured by livestock is separate and apart form the exception for loans and extensions of credit created by the discount of paper for the purchase of dairy cattle. Therefore, a national bank may make loans or extensions of credit to one person secured by each type of collateral in an amount equal to 10 percent of its capital and surplus (in addition to the 15 percent permitted under section 84(a)(1)).

(j) *Loans to Student Loan Marketing Association.* 12 U.S.C. 84(c)(10) provides:

> Loans or extensions of credit to the Student Loan Marketing Association shall not be subject to any limitation based on capital and surplus.

§ 32.7 Transitional rules

(a) Loans or extensions of credit which were in violation of 12 U.S.C. 84 prior to April 14, 1983, will be considered to remain in violation of section 84 and subject to remedial actions under 12 U.S.C. 93 and 1818 after that date until they are paid in full, regardless of whether the loans or extensions of credit conform to the rules established in this Part. Renewals or extensions of such loans or extensions of credit will also be considered violations of law.

(b) A national bank which has outstanding loans or extensions of credit to a person in violation of section 84 as of April 14, 1983, may make additional advances to such person after that date if the additionnal advances are permitted under this Part.

(c) Loans or extensions of credit which were in conformance with section 84 on April 14, 1983, but are in nonconformance with the rules established in this Part due to the elimination of certain exceptions or the change in methods for combining loans will generally not be considered to be violations of law. However, every effort should be made to bring the loans or extensions of credit into conformity with the rules established in this Part. Renewals or extensions of such loans or extensions of credit which are not in conformance with the rules set forth in this Part will be considered violations of law. Additional advances which do not conform with the rules set forth in this Part will be considered violations of law regardless of whether a commitment to make a loan or extension of credit was approved prior to the enactment of this Part.

Interpretations

§ 32.101 Obligations of accommodation parties.

The liability of a drawer, endorser, or guarantor who does not directly receive any of the proceeds of the loan or extension of credit is not a loan or extension of credit to such person for purposes of this Part unless one of the tests set forth in 12 CFR 32.5(b)(1) is satisfied.

§ 32.102 Sale of Federal Reserve funds.

(a) Definition. "Sale of Federal Reserve funds" means, for purposes of this Section, any transaction among depository institutions involving the disposal of immediately available funds resulting from credits to deposit balances at Federal Reserve Banks or from credits to new or existing deposit balances due from a correspondent depository institution.

(b) Sales of Federal Reserve funds with a maturity of one business day or under a continuing contract are not "loans or extensions of credit" for purposes of this Part. However, sales of Federal Reserve funds with a maturity

of more than one business day are subject to the lending limits.

§ 32.103 Purchase of securities subject to repurchase agreement.

The purchase of "Type I securities" within the meaning of 12 CFR 1.3(c) subject to an agreement that the seller will repurchase at the end of a stated period is not a "loan or extension of credit" for purposes of this Part.

§ 32.104 Standby letters of credit.

(a) *Definition.* A "standby letter of credit" is any letter of credit, or similar arrangement however named or described, which represents an obligation to the beneficiary on the part of the issuer: (1) To repay money borrowed by or advanced to or for the account of the account party or (2) to make payment on account of any indebtedness undertaken by the account party or (3) to make payment on account of any default by the account party in the performance of an obligation. As defined in this paragraph (a), the term "standby letter of credit" does not include commercial letters of credit and similar instruments where the issuing bank expects the beneficiary to draw upon the issuer, which do not "guarantee" payment of a money obligation, and which do not provide for payment in the event of default by the account party.

(b) *Subject to lending limits.* A standby letter of credit is subject to the limitations of Section 84 and must be combined with any other nonexpected loans to the account party by the issuing bank for the purposes of applying section 84. Where the standby letter of credit is subject to a nonrecourse participation agreement with another bank or banks, this subsection shall apply to the issuer and each participant in the same manner as in the case of a participated loan.

(c) *Exceptions.* All standby letters of credit shall be subject to the provisions of this Section except where:

(1) Prior to or at the time of issuance, the issuing bank is paid an amount equal to the bank's maximum liability under the standby letter of credit; or

(2) Prior to or at the time of issuance, the issuing bank has set aside sufficient funds in a segregated deposit account, clearly earmarked for that purpose, to cover the bank's maximum liability under the standby letter of credit; or

(3) The Comptroller of the Currency has found that a particular standby letter of credit or class of standby letters of credit will not expose the issuer to a similar risk of loss as would a loan to the account party.

§ 32.105 Overdrafts.

Overdrafts, whether or not prearranged, are "loans or extensions of credit" for purposes of this Part.

§ 32.106 Loans charged off in whole or in part.

The lending limits apply to all existing loans or extensions of credit to a person by the bank, including loans or extensions of credit which have been charged off on the books of the bank in whole or in part. Obligations which have become unenforceable by reason of discharge in bankruptcy are not "loans or extensions of credit" for purposes of this Part.

§ 32.107 Sale of loan participations.

When a bank sells a participation in a loan or extension of credit, including the discount of a bank's own acceptance, that portion of the loan that is sold on a nonrecourse basis will not be applied to the bank's lending limits. This is so even where the participation agreement provides that repayment must first be applied to the shares sold. As a matter of prudent banking practices, the agreement should also provide that, in case of a default or comparable event defined in the agreement, participants shall share in all subsequent repayments and collections in proportion to the percentage of participation at the time of the occurrence of the event.

§ 32.108 Interest or discount on loans.

The lending limits do not apply to the portion of a loan or extension of credit that represents accrued or discounted interest, unless such interest is past due. Past due interest must be taken into consideration in applying the limitations to additional extensions of credit.

§ 32.109 Loans to or guaranteed by general obligations of a State or political subdivision.

(a) A loan or extension of credit to a bank customer which is guaranteed or fully secured by a "general obligation" of any State or political subdivision thereof, within the meaning of 12 CFR 1.3(g), is not considered an obligation of the customer for purposes of 12 U.S.C. 84. The lending bank should obtain the opinion of competent counsel that the guarantee or collateral is a valid and enforceable obligation of the public body.

(b) A loan or extension of credit to a State or political subdivision thereof is not subject to any limitation based on capital or surplus if the loan or extension of credit constitutes a "general obligation" of the State or political subdivision within the meaning of 12 CFR 1.3(g). The lending bank should obtain the opinion of competent counsel that the loan or extension of credit is a valid and enforceable obligation of the borrower.

§ 32.110 Loans to industrial development authorities.

A loan or extension of credit to an industrial development authority or similar public entity created for the purpose of constructing and leasing a plant facility, including a health care facility, to an industrial occupant is not a loan or extension of credit to the authority for the purposes of 12 U.S.C. 84 if: (a) The bank relies on the credit of the industrial occupant in making the loan; (b) the authority's liability with respect to the loan is limited solely to whatever interest it has in the particular facility; (c) the authority's interest is assigned to the bank as security for the loan or a promissory note from the lessee to the bank provides a higher order of security than the assignment of a lease; and (d) the industrial occupant's lease rentals are assigned and paid directly to the bank. A loan or extension of credit meeting the above criteria will be deemed a loan or extension of credit to the lessee and will be combined with other obligations of the lessee for purposes of Section 84.

§ 32.111 Separate limitations for 12 U.S.C. 24 and 12 U.S.C. 84.

The lending limits prescribed by 12 U.S.C. 84 are separate and distinct from the investment limits prescribed by 12 U.S.C. 24. Accordingly, a national bank may make loans or extensions of credit to one borrower up to the full amount permitted by 12 U.S.C. 84 and also hold eligible investment securities of the same obligor up to the full amount permitted by 12 U.S.C. 24. In order for a security to be an "investment security" it must be eligible for investment by a national bank in accordance with the standards set forth in 12 CFR Part 1.

Dated: November 26, 1982.

H. Joe Selby,

Acting Comptroller of the Currency.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 221 and 250

Proposed Guideline and Request for Comments on How To Value Oil for Royalty Purposes From Federal and Indian Onshore and Offshore Leases

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Extension of comment period on proposed guideline.

SUMMARY: In reponse to requests for an extension of time to comment on the proposed guideline for valuing oil for royalty purposes as published in the Federal Register of November 29, 1982 (47 FR 53822), a 15-day extension is hereby granted. This extension will give the public more time to study and comment on the proposed guideline.

DATE: Written comments on this proposed guideline must be received in Royalty Standards and Measurements, Denver Federal Center, Denver, Colorado by 3:30 p.m., m.s.t., January 14, 1983.

ADDRESSES: Comments may be mailed to Mr. William H. Feldmiller, Chief, Royalty Standards and Measurements, Denver Federal Center, Denver, CO 80225, or delivered to Room F 211, in Building 85, Denver Federal Center.

FOR FURTHER INFORMATION CONTACT: Mr. William H. Feldmiller, (303) 231-3184, (FTS) 326-3184, or Mr.Thomas J. Blair, (303) 231-3153, FTS 326-3153.

Dated: December 17, 1982.

Robert E. Boldt,

Associate Director for Royalty Management, Minerals Management Services.

National Foundation on the Arts and the Humanities

Institute of Museum Services

34 CFR Part 64

45 CFR Part 1180

Grants to Museums

AGENCY: Institute of Museum Services, Education Department, and National Foundation on the Arts and the Humanities.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Institute of Museum Services proposes regulations governing a program of Federal financial assistance in the form of grants to museums. The regulations implement the Museum Services Act. They state eligibility conditions, application requirements, funding criteria and other rules for the administration of the grants program.

DATES: Comments must be received on or before February 22, 1983.

ADDRESSES: Comments should be addressed to: Mrs. Lilla Tower, Director, Institute of Museum Services, Room 4006, 330 C Street, S.W., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Sara E. Traut, Institute of Museum Services, Room 4006, 330 C Street, S.W., Washington, D.C. 20202.

SUPPLEMENTARY INFORMATION:

1. *Nature of program.* The Museum Services Act ("the Act") which is Title II of the Arts, Humanities and Cultural Affairs Act of 1976, was enacted on October 8, 1976 and amended on December 4, 1980.

The purpose of the Act is stated in Section 202 as follows:

> "It is the purpose of [the Museum Services Act] to encourage and assist museums in their educational role, in conjunction with formal systems of elementary, secondary, and post-secondary education and with programs of nonformal education for all age groups; to assist museums in modernizing their methods and facilities so that they may be better able to conserve our cultural, historic, and scientific heritage; and to ease the financial burden borne by museums as a result of their increasing use by the public."

The Act establishes an Institute of Museum Services (IMS) consisting of a National Museum Services Board and a Director.

The Act provides that the National Museum Services Board shall consist of fifteen members appointed for fixed terms by the President with the advice and consent of the Senate. The Chairman of the Board is designated by the President from the appointed members. Members are broadly representative of various museums, including museums relating to science, history, technology, art, zoos, and botanical gardens, of the curatorial, educational and cultural resources of the United States, and of the general public. In addition to the members appointed by the President, the following serve as members of the Board: the Chairman of the National Endowment for the Arts, the Chairman

of the National Endowment for the Humanities, the Secretary of the Smithsonian Institution, the Director of the National Science Foundation, and the Secretary of Education. The Board has the responsibility for establishing the general policies of the Institute.

The Director of the Institute is appointed by the President with the advice and consent of the Senate. The Director has responsibility for the general administration of the Institute and is authorized, subject to the policy direction of the Board, to make grants under the Act to museums.

IMS is an independent agency placed in the National Foundation on the Arts and the Humanities (National Foundation) (Pub. L. 97–100, December 23, 1981).

The Act lists a number of illustrative activities for which grants may be made, including assisting museums to meet their administrative costs for preserving and maintaining their collections, exhibiting them to the public, and providing educational programs to the public. Other activities are designed to aid museums in developing and maintaining professionally trained staff; carrying out certain conservation activities; developing and carrying out specialized museum programs for specific segments of the public; and cooperating with other museums in developing traveling exhibitions, meeting transportation costs for these exhibitions, and identifying and locating collections available for loan.

For the Federal fiscal year ending September 30, 1982, $10.2 million was awarded for grants under the Act. The Administration has requested no funds for grants for fiscal year 1983.

Public Law 97–276 (October 2, 1982) makes continuing appropriations for the Federal Government for fiscal year 1983. Sections 101(b) and 102 of Pub. L. 97–276 provide, under a continuing resolution, an appropriation for IMS for fiscal year 1983 only through December 17, 1982 *or* the enactment of either an appropriation for the program or the applicable appropriation act without a funding provision for the program, whichever first occurs.

Public Law 97–257, the Supplemental Appropriations Act, 1982 makes available through Fiscal Year 1983 $720,000 appropriated for the IMS in Fiscal Year 1982. Accompanying report language indicates that at least $645,000 of this amount is intended for Special Project Grants.

Sen. Rept. No. 97–516, 97th Cong. 2d Sess. 117 (1982).

2. *Need for regulations.* Certain rules are needed for the proper administration of a federally funded grant program. These rules relate to such matters as the types of institutions eligible to apply for grants, the types of assistance available, the information which must be put in applications, and the criteria used to judge competitive applications, among others.

Rules governing the award of grants by IMS were published in the **Federal Register** in 1978 following a period of public comment under the procedures in 5 U.S.C. 553 and were codified in the Code of Federal Regulations (CFR). These regulations were revised on August 11, 1980, again following a period of public comment, and were last codified in 34 CFR Part 64 (1981). In view of the transfer of IMS as an independent agency to the National Foundation on the Arts and the Humanities effected by Pub. L. 97–100 in December of 1981, it is appropriate that these regulations be transferred to that part of the Code of Federal Regulations that contains the regulations of the National Foundation on the Arts and the Humanities.

Moreover, as a result of the transfer of IMS to the National Foundation, certain administrative regulations of the Education Department are no longer pertinent and therefore should no longer legally be applicable to IMS grants. It is therefore necessary and appropriate that IMS regulations be adopted in a revised and simplified form appropriate to its needs and functions as an independent agency.

Accordingly, at its meetings of October 23, and December 3, 1982, the National Museum Services Board extensively considered revisions in these regulations and adopted them for publication in the **Federal Register** as proposed regulations. The proposed regulations are set forth in the form of a new Part 1180 of Subchapter E of Chapter XI of the Title 45 CFR. Public comment on these regulations is invited by this document.

The paragraphs set forth below briefly describe changes in the current regulations made by these proposed regulations.

Sections 1180.3 and 1180.4—Definitions: The definition of "museum" in § 1180.3(a) of the proposed regulations is based on the statutory definition. Under the definition in § 1180.3(a) a museum is a public or private nonprofit institution which is organized on a permanent basis for essentially educational or aesthetic purposes and which, using a professional staff, owns or uses tangible objects, whether animate or inanimate, cares for these objects, and exhibits them to the general public on a regular basis. The proposed regulations would clarify current regulations by use of the term "*general* public". The proposed regulations also make clear that the term "museum" includes aquariums and zoological parks; botanical gardens and arboretums; nature centers, museums relating to art, history, natural history, science and technology; and planetariums. With the exception of "nature centers" all these terms are found in current regulations.

To provide greater certainty and efficiency in the administration of the Act and to make maximum use of resources, the proposed regulations also clarify certain aspects of the definition of "museum". An institution would be deemed to meet the requirement that it exhibits objects to the general public on a regular basis if it exhibits objects to the general public for at least 120 days a year (§ 1180.3(a)(3)). This new provision should also serve to clarify eligibility and thus direct resources to institutions which provide a substantial level of service without excluding institutions which operate on a seasonal basis. The status of museums which exhibit objects by appointment would also be made more certain by language added to § 1180.3(a)(3). Clarification of certain other terms used in the definition of "museum" is found in other provisions of § 1180.3.

A number of terms (other than "museum") used in the regulations are defined in § 1180.4. The proposed regulations would shorten this section by eliminating several definitions which have had little or no practical effect.

Section 1180.5—Eligibility. Current regulations provide lower priority to museums which have been providing museum services for less than two years. In practice, such institutions have not been reached for funding and the two-year provision has had the effect of an eligibility requirement, albeit unclear. The proposed regulations would make this requirement explicit (§ 1180.5(2)). Similarly, the proposed regulations would state more clearly the ineligibility of museums operated by Federal departments or agencies (§ 1180.5(4)). These museums receive their operating funds from other Federal appropriations which may not be augmented by funds under the Museum Services Act.

The proposed regulations would add new provisions in (§ 1180.5(5)–(7)) which are designed to address congressional and other concerns that the maximum number of museums share in limited resources; to avoid the possibility that museums receiving funds under the Act will become dependent on Federal support; and to achieve coordination

with activities of other Federal funding agencies, an objective set forth in the Museum Services Act. These provisions would render a museum ineligible to apply for both General Operating and Special Project support in a single year; would limit the eligibility of a museum for assistance under the Act to only three years in any succeeding five year period (quinquennium); and would preclude a museum from applying for or receiving IMS assistance if it has received or will receive a Challenge Grant from another Federal agency in the same fiscal year.

Sections 1180.7, 1180.8, and 1180.9—General Operating Support; Special Project Support; Size of Grants, and Allocation of Funds. Section 1180.7 of the proposed regulations (General Operating Support) would not be substantially changed. It provides for grants to assist museums to meet their administrative, staff and operating costs. Section 1180.8 (Special Project Support) would be revised to follow more closely statutory language with respect to those activities described in the regulations which are set forth in the Museum Services Act. However, it is emphasized that the list of possible activities in § 1180.8 is not exclusive. In particular, the statutory language specifying the specific segments of the public to be served by a specialized program (§ 1180.8(a)(5)) should not be read to exclude such segments of the public as the senior citizens or the handicapped, for example.

IMS regulations have set forth a maximum amount which it was anticipated that a museum could receive if appropriations were made available. In the current regulations the figure was $35,000. The increase in this amount from the $35,000 set forth in current regulations is associated with § 1180.5(6) of the proposed regulations (beginning with fiscal year 1983, a Museum is ineligible to receive funding for more than three years under the Act in any succeeding quinquennium). The proposed regulations would not set forth a fixed percentage of any appropriations to be reserved for General Operating Support but would provide for the determination of that reservation by the Director, subject to the policy direction of the Board.

Section 1180.10—Allowable costs. In the case of a General Operating Support grant, IMS funds cover a portion of the overall operating costs of a grantee to the extent that these costs are allowable under applicable cost principles contained in OMB circulars. To determine whether a particular cost is allowable under a grant, a museum must consult OMB circulars referred to in the regulations. These circulars set forth rules about the allowability or unallowability of particular costs such as compensation for personal services and fringe benefits, meetings and conferences, professional service costs, advertising costs, bidding or proposal costs, preaward costs, rental costs, and transportation costs.

Section 1180.11—Basic requirements which a museum must meet. Application requirements in § 1180.11 have been substantially clarified. The necessity of submitting a complete and timely application is emphasized in § 1180.11(a). If the applicant is a private, nonprofit agency, it must, as is now required in current regulations, submit a copy of the letter from the Internal Revenue Service indicating its nonprofit status under the applicable provision of the Internal Revenue Code of 1954 (§ 1180.11(b)).

In order to respond to the need of museums for further guidance, the requirement for submission of a financial statement would be emphasized and amplified in § 1180.11(c)—

—By indicating the time period to which such statement must relate;

—By indicating the types of documents which a financial statement must include;

—By providing further information on the preparation and content of an audited financial statement; and

—By clarifying the type of financial information which may, with the approval of the Director, be submitted in lieu of a separate audited financial statement by museums which do not receive audits separate from those of their parent organizations.

The requirements in the current regulations for a long-range plan and an assurance regarding maintenance of fiscal effort are revised and the latter is clarified (§§ 1180.11 (d) and (e)).

Section 1180.12—Priorities. For fiscal year 1983, priorities applicable to Special Project grants would focus on projects involving innovative fund raising and financial development activities and projects involving cooperative endeavors among groups of museums. To simplify the administration of the Act and focus staff resources on processing General Operating Support and Special Project grants, authority for emergency grants would be deleted. It is believed that certain legal and administrative difficulties to which the emergency grant authority has given rise, together with the fact that relatively few grants have been awarded under the emergency grant provisions, and the fact that the regular General Operating Support program can be used to meet operating needs of museums arising from the types of events specified in § 1180.12(d) of the current regulations, are factors that justify this change.

Sections 1180.13 and 1180.14—Funding criteria. Criteria for judging competing applications and reaching funding determinations are contained in these sections. The criteria for GOS (§ 1180.13) have been revised to address concerns of IMS field readers in assessing under the same criteria an applicant's situation both with and without assistance under the Act. The criteria, as amplified, are similar to those applied in prior years.

The proposed regulations would indicate the factors, among others, which IMS considers in applying certain criteria. Applicants should address these factors in preparing applications. These factors are not intended to be exclusive. An applicant which believes that other factors are relevant to a criterion is free to address them in the application.

A criterion which attempts to measure the impact of General Operating Support assistance on the museum's ability to increase its base of non-Federal support has been added as § 1180.13(h).

Criteria for judging applications for Special Projects under § 1180.8, as proposed, would evaluate the degree to which the project is of general benefit to museums, is of unique benefit to the general public, would involve a model or exemplary benefit, or may foster innovative methods to increase private support or limit costs of operations.

Section 1180.16—Cost sharing. Section 206(c) of the Museum Services Act, as amended, provides that grants under the Act for any fiscal year may not exceed 50 percent of the cost of the program for which the grant or financial assistance is made, except that not more than 20 percent of the funds available for grants under the Act for any fiscal year may be available for grants or financial assistance in such fiscal year without regard to the 50 percent limitation. (20 U.S.C. § 965(c)). This statutory provision, of course, applies to grants for General Operating and Special Project support. It is anticipated that in applying the exception in Section 206(c) priority will be given to Special Project grants.

In implementing this provision, based

upon the policy direction of the Board, IMS has not made grants under the Act in excess of 10 percent of a museum's actual operating budget. This policy direction has previously been set forth in program announcements of the Institute published in the Federal Register. The proposed regulations would restate it in § 1180.16(b) and would also clarify that, for purposes of applying the 10 percent limitation, the proposed regulations would provide that a museum's operating budget may be increased by an amount reflecting the reasonable and conservative value of volunteer services contributed in the most recently completed fiscal year.

In order to make maximum use of limited Federal resources and to emphasize that primary reliance should be placed on non-Federal support, language is proposed which would authorize the Board to determine, for a particular fiscal year, for one or more programs, that an amount equal to the amount to be awarded in any given fiscal year (or a percentage thereof) to applicants under the Act must consist of non-Federal funds contributed to the museum in excess of the non-Federal funds contributed to the museum for its immediately preceding fiscal year (§ 1180.16(c)). Finally, under proposed § 1180.16(d) language would be added which would require a museum to maintain a restricted account for funds received under the Act. The purpose of this is to assure proper accounting of grant funds and to assist museums in the event that they must respond to possible audits under the Act.

Subparts B and C of the proposed regulation would provide for general administrative provisions specifically tailored to the needs of the IMS program which greatly reduce the number of regulatory provisions which have in the past been applicable to the IMS program under the Education Department General Administrative Regulations.

Sections 1180.11 and 1180.55 of these proposed regulations contain information collection requirements. As required by 44 U.S.C. 3504(h), enacted by the Paperwork Reduction Act of 1980, IMS is submitting to the Office of Management and Budget, for its review, these information collection requirements. Comments can be submitted in accordance with the instructions in this notice of proposed rulemaking.

Executive Order 12291: These regulations have been reviewed in accordance with Executive Order 12291. They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification: The Director certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities.

To the extent that these regulations affect States and State agencies they will not have an impact on small entities because States and State agencies are not considered to be small entities under the Regulatory Flexibility Act.

These regulations will affect certain museums receiving Federal financial assistance under the Museum Services Act. However, the regulations will not have a significant economic impact on the small entities affected because they do not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations impose minimal requirements to ensure the proper expenditure of program funds.

Invitation to Comment: Written comments and recommendations may be sent to the person listed at the beginning of this preamble as ADDRESSEE. All comments received on or before February 22, 1983, will be considered in developing the final regulations.

All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 4006, 330 C Street, S.W., Washington, D.C. 20202 between the hours of 9:00 a.m. and 4:30 p.m. Monday through Friday of each week, except Federal holidays.

Comments specifically on the information collection requirements should be addressed to the Office of Information and Regulatory Affairs, Office of Management and Budget, NEOB, Washington, D.C. 20503.

List of Subjects in 45 CFR Part 1180

Museums, National boards.

Lilla Tower,

Director, Institute of Museum Services.

Dated: December 3, 1982.

Douglas Dillon,

Chairman, National Museum Services Board.

(Catalog of Federal Domestic Assistance No. 84.115, Museum Services Program)

The Education Department proposes to remove Part 64 of Title 34 of the Code of Federal Regulations upon adoption of these proposed rules as final.

The Institute of Museum Services proposes to add a new Subchapter E to Chapter XI of Title 45 of the Code of Federal Regulations as follows:

SUBCHAPTER E—INSTITUTE OF MUSEUM SERVICES

PART 1180—PROGRAM REGULATIONS

Subpart A—General Operating Support and Special Project Support

Sec.

1180.1 Purpose of museum services program.
1180.2 Scope of this document.
1180.3 Definition of museum.
1180.4 Other definitions.
1180.5 Eligibility and burden of proof—Who may apply.
1180.6 Related institutions.
1180.7 General Operating Support.
1180.8 Special Project Support.
1180.9 Likely size of grants and allocation of funds among activities.
1180.10 Allowable costs.
1180.11 Basic requirements which a museum must meet to be considered for funding.
1180.12 How applications are judged; priorities.
1180.13 Criteria for evaluation of applications for General Operating Support.
1180.14 Criteria for evaluation of applications for Special Project support.
1180.15 Duration of grant.
1180.16 IMS share of the cost of a proposal.
1180.17 Reports.

Subpart B—General Application, Selection and Award Procedures

Applications

1180.30 Publication of an application notice; content of the notice.
1180.31 Information in the application notice.
1180.32 Deadline date for applications.
1180.33 Applicants must meet procedural rules.
1180.34 Number of copies.
1180.35 Special Project Grant: Group applications.

Selection and Award Procedures

1180.36 Rejection of an application.
1180.37 How grants are processed.
1180.38 Applications not selected for funding.
1180.39 How the Institute makes a Special Project grant.
1180.40 The cost analysis; basis for Special Project grant amount.
1180.41 The notification of grant award.
1180.42 Effect of the grant.

Subpart C—General Conditions Which Must be Met by a Grantee

Nondiscrimination

1180.43 Federal statutes and regulations on nondiscrimination.
1180.44 Use of consultants in Special Projects.

Evaluation

1180.45 Evaluation by the grantee.
1180.46 Federal evaluation—cooperation by a grantee.

Publication and Copyrights
Sec.
1180.47 General conditions on publications.
1180.48 Copyright policy for grantees.
1180.49 Definition of "Special Project materials."

General Administrative Responsibilities

1180.50 Compliance with statutes, regulations, and its approved Grant Application.
1180.51 The grantee administers or supervises the Grant.
1180.52 Fiscal control and fund accounting procedures.
1180.53 Obligation of funds during the grant period.
1180.54 Prohibition of subgrants.

Records

1180.55 Records related to grant funds.
1180.56 Records related to compliance.
1180.57 Records related to Special Project performance.
1180.58 Applicability

Authority: Museum Services Act (20 U.S.C. 961–68), as amended, and Pub. L. 97–100, 95 Stat. 1414.

Subpart A—General Operating Support and Special Project Support

§1180.1 Purpose of museum services program.

The purpose of this program of Federal financial assistance is to ease the financial burden borne by museums as a result of their increasing use by the public and to encourage and assist them to carry out their educational and conservation roles as well as other functions and to modernize their methods and facilities.

§ 1180.2 Scope of this document.

This document establishes rules for the award of grants to museums from funds appropriated under the Museum Sevices Act including rules governing the eligibility of applicant institutions, the type of assistance which may be provided, requirements which applicants must meet and criteria to be used in judging applications.

§ 1180.3 Definition of museum.

For the purpose of this part:

(a) "Museum" means a public or private nonprofit institution which is organized on a permanent basis for essentially educational or aesthetic purposes and which, using a professional staff:

(1) Owns or uses tangible objects, either animate or inanimate;

(2) Cares for these objects; and

(3) Exhibits them to the general public on a regular basis.

(i) An institution which exhibits objects to the general public for at least 120 days a year shall be deemed to meet this requirement.

(ii) An institution which exhibits objects by appointment may meet this requirement if it can establish, in light of the facts under all the relevant circumstances, that this method of exhibition does not unreasonably restrict the accessibility of the institution's exhibits to the general public.

(b) "Museum" includes (but is not limited to) the following institutions if they satisfy the provisions of this section:

(1) Aquariums and zoological parks;

(2) Botanical gardens and arboretums;

(3) Nature Centers;

(4) Museums relating to art, history (including historic buildings), natural history, science and technology; and

(5) Planetariums.

(c) For the purposes of this section, an institution uses a professional staff if it employs at least one staff member, or the full-time equivalent, whether paid or unpaid primarily engaged in the acquisition, care, or exhibition to the public of objects owned or used by the institution.

(d) An institution does not exhibit objects to the general public for the purposes of this section if the display or use of the objects is secondary to its overall purpose.

(e) For the purposes of this section, an institution exhibits objects to the public if it exhibits the objects through facilities which it owns or operates.

§ 1180.4 Other definitions.

The following other definitions apply in this document:

"Act" means the Museum Services Act, Title II of the Arts, Humanities and Cultural Affairs Act of 1976, Pub. L. 94–462, (20 U.S.C. 961–968).

"Board" means the National Museum Services Board established under Section 204 of the Act.

"Collection" includes objects owned, used or loaned by a museum as well as these literary, archival and documentary resources specifically required for the study and interpretation of these objects.

"Foundation" means the National Foundation on the Arts and the Humanities.

"Director" means the Director of the Institute of Museum Services.

"Grantee" means the recipient of a grant under the Act.

"Institute" means the Institute of Museum Services ("IMS") established under Section 203 of the Act.

"Museum services" means services provided by a museum, primarily exhibiting objects to the general public, and including but not limited to preserving and maintaining its collections, and providing educational and other programs to the public through the use of its collections and other resources.

§ 1180.5 Eligibility and burden of proof—Who may apply.

(a) A museum located in the fifty States of the Union, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, Guam, or the District of Columbia may apply for a grant under the Act.

(b) No museum is eligible to apply for funding available under the Act unless it has provided museum services including exhibiting objects to the general public on a regular basis for at least two years prior to application.

(c) A public or private nonprofit agency which is responsible for the operation of a museum may, if necessary, apply on behalf of the museum.

(d) A museum operated by a department or agency of the Federal Government is not eligible to apply.

(e) A museum is ineligible to apply for or receive funding in any year for both Special Project and General Operating Support.

(f) Beginning with fiscal year 1983, a museum is ineligible to receive funding for more than three years in any succeeding quinquennium.

(g) A museum is ineligible to apply for or receive funds available under the Act (for General Operating or Special Project support) if it has received, or has been awarded a grant under which it will receive, from any other agency of the United States, Challenge Grant funds in the same Fiscal Year (in which funds would be received under a grant from IMS). For the purposes of the preceding sentence "Challenge Grant funds" means funds paid under any grant awarded by any agency pursuant to a program such as the Challenge Grant programs authorized by sections 5(1) and 7(h) of the National Foundation on the Arts and the Humanities Act of 1965, as amended. (20 U.S.C. 954(1) and 956(h).

(h) An applicant has the burden of establishing that it is eligible for assistance under these regulations.

§ 1180.6 Related institutions.

(a) If two or more institutions are under the common control of one agency or institution or are otherwise organizationally related and apply for assistance under the Act, the Director determines under all the relevant circumstances whether they are

separate museums for the purposes of establishing eligibility for assistance under these regulations. See §§ 1180.5; 1180.9.

(b) IMS regards the following factors, among others, as showing that a related institution is a separate museum:

(1) The institution has its own governing body;

(2) The institution has budgetary autonomy; and

(3) The institution has administrative autonomy.

§ 1180.7 General operating support.

In order to maintain, increase or improve museum services, a museum may apply for a grant under the Act to meet administrative, staff and operating costs, except as otherwise provided in these regulations.

§ 1180.8 Special project support.

(a) In order to increase or improve museum services through exemplary projects which are additional to its operating program, a museum may apply for a grant to:

(1) Provide a General, Unique, Model or Financial Benefit to museums as set forth in § 1180.14 (e), (f), (g), or (h);

(2) Develop and maintain professionally trained or otherwise experienced staff to meet its needs;

(3) Obtain expert assistance to carry out its functions or provide expert assistance to other museums;

(4) Conserve artifacts, objects, plants and animals;

(5) Develop and carry out specialized programs for specific segments of the public, such as programs for urban neighborhoods, rural areas, Indian reservations, and penal and other State institutions;

(6) Develop and carry out educational programs;

(7) Cooperate with other museums in developing traveling exhibitions, meeting transportation costs for these exhibitions, and identifying and locating collections available for loan.

(b) By notice published in the **Federal Register** and applicable to a particular fiscal year, IMS may limit the types of activities to be funded under this section.

§ 1180.9 Likely size of grants and allocation of funds among activities.

(a) In view of limited funds, it is anticipated that no museum will receive more than $50,000 under the Act for fiscal year 1983 and that most museums which are funded will receive a smaller amount. For future fiscal years, a different figure may be specified by notice published in the **Federal Register**.

(b) The Director, subject to the policy direction of the the Board, determines the percent of the funds available under the Act for grants in any fiscal year which shall be reserved for § 1180.7 General Operating Support grants.

§ 11800.10 Allowable costs.

(a) Determination of costs allowable under a grant is made in accordance with government-wide cost principles in applicable OMB circulars. (OMB Circular A–21 (educational institutions) February 26, 1979, published in 44 FR 12368 (March 6, 1979); OMB Circular A–87 (State and local governments) January 15, 1981 published in 46 FR 9548 (January 28, 1981); and OMB Circular A–122 (Nonprofit organizations) June 27, 1980, published in 45 FR 46022 (July 8, 1980)).

(b) No costs shall be allowed for the purchase of any object to be included in the collection of a museum, except library, literary, or archival material, specifically required for a designated activity under a grant under the Act.

§ 11800.11 Basic requirements which a museum must meet to be considered funding.

(a) *Application.* To apply for a grant, a museum must submit the designated application form containing the information requested in the form. Failure to submit the information required by the application at the time of filing can subject an applicant to rejection of the application without consideration on its merits.

(b) *IRS letter.* A museum applying as a private, nonprofit institution must submit a copy of the letter from the Internal Revenue Service indicating the applicant's eligibility for nonprofit status under the applicable provision of the Internal Revenue Code of 1954, as amended.

(c) *Financial statements.* (1) Each applicant museum must submit, with its application at the time of filing, *its* financial statements for the two fiscal years immediately preceding the fiscal year for which application is made or, if not available, for the second and third immediately preceding years. Each financial statement must include a statement of financial operations and balance sheet such as described in the Museum Accounting Guidelines of the Association of Science-Technology Centers (1976) or in the Museum Accounting Handbook of the American Association of Museums (1978).

(2) Every applicant which has previously received an IMS award must submit its audited financial statement for the last fiscal year immediately preceding the fiscal year in which application is made or the immediately preceding fiscal year, prepared by an individual or organization meeting the qualifications of the Comptroller General of the United States for individuals or organizations conducting Government audits. Reference is made to GAO, *Standards for Audit of Governmental Organizations, Programs and Functions* (1981 revision). The individual or organization performing the audit must certify that the financial statement of the museum presents fairly the financial position and the results of financial operations in accordance with generally accepted accounting principles.

(3) If a museum is part of an organization such as a university, State or municipality and does not receive audits separate from those of the organization of which it is a part, it may submit its financial statement as drawn from and containing only audited figures of the organization of which the museum is a part. This financial statement must clearly indicate that it has been so prepared and the Director *may*, upon written request filed at the time of the application, waive the requirement of a separate audit and proceed to process the application of its merits.

(d) *Long-range plan.* Each applicant museum must include long-range plans for program and financial development.

(e) *Maintenance of effort.* Each museum applicant must be able to show that it has maintained a continuing and successful fiscal effort of its own for the provision of funds for museum services. An applicant complies with this requirement if its aggregate expenditures for museum services (exclusive of Federal assistance) for the grant period are at least equal to those expenditures for the equivalent preceding period. Any applicant unable to furnish proof of the successful discharge of this requirement may be held ineligible to apply for funding.

(f) *Special Project Grant: schedule of completion.* An application for a Special Project grant shall establish a schedule for completing the project. An application shall describe when, during the term of the grant, the applicant plans to complete each objective or phase of the project.

§ 1180.12 How applications are judged; priorities.

(a) To select grantees and determine the amount of their awards, IMS rates applications under the applicable criteria stated in §§ 1180.13 and 1180.14. Normally, these applications are first evaluated by readers, panels of experts, or both. Final determinations as to the award of grants are made by the Director after review by the Board.

(b) In the case of Special Project applications, priority is given to applications for (1) projects involving innovative fund raising and financial development activities, and (2) projects involving innovative cooperative endeavors among groups of museums.

(c) To achieve diversity in the distribution of assistance, the Institute may consider the location, size and discipline of the applicant in addition to the criteria in §§ 1180.13 and 1180.14.

§ 1180.13 Criteria for evaluation of applications for General Operating Support.

The following criteria apply to the evaluation of all applications for General Operating Support. In applying these criteria, the total operation of the applicant museum is assessed, including the museum's operation as it would be if the General Operating Support is granted. This assessment is based primarily on the information supplied in the museum's application.

(a) *Museum services.* Are the applicant's museum services of high quality? IMS considers factors such as:

(1) The quality of the museum's educational and interpretive services and their relevance to the collections and audience including the special constituencies which the museum serves;

(2) The quality of the museum's physical facilities and the manner in which space is allocated to various museum activities; and

(3) The qualifications of the professional staff (both full-time and part-time; paid and volunteer) and the quality of the opportunities for professional staff development and in-service training afforded by the museum.

(b) *Collections and exhibits.* Are the museum's collections and exhibits of high quality and significance? IMS takes into account such factors as:

(1) The intrinsic value of the collections and exhibits;

(2) The significance of the museum's collections to the community; and

(3) The quality of the care and conservation of the collections; the quality of exhibit designs.

(c) *Accessibility.* How accessible to the general public are the museum's services, collections and exhibits? IMS considers such factors as:

(1) The percentage of the museum's collections on view to the general public on a regular basis; the extent of the museum's regular program for outreach, loans, and other means of exhibiting its collections to the public;

(2) The annual schedule of open hours for the museum; and

(3) The appropriateness of this schedule to the museum's audience.

(d) *Population served.* To what extent does the museum serve a general public which otherwise would have limited access to the type of museum services which it provides or to museum services of any type? To what extent does the public seek access to the museum's services? IMS considers such factors as:

(1) The characteristics of the audience and the community which the museum serves;

(2) The availability of other museums (or types of museums) which serve this audience and this community; and

(3) The museum's annual attendance by calendar quarters.

(e) *Financial Management.* What is the quality of the financial management of the museum? In how many of the last five years has the museum shown an excess of revenues over expenditures? IMS considers such factors as:

(1) The financial condition of the museum as reflected in its financial statements;

(2) The quality of the museum's plans for remedying any financial weaknesses in the museum's operations; and

(3) The qualifications of the museum staff assigned to financial management activities.

(f) *Long-range plans.* What is the quality of the museum's long-range plans for financial and program development? What are the museum's plans for the expenditure of the grant funds? IMS considers such factors as:

(1) The quality of the museum's long-range plans; how the museum proposes to implement them; how practical are the steps the museum plans to take to implement them?

(2) The probability that the General Operating Support grant, if awarded, will assist the museum in carrying out its long-range plans;

(3) In what manner will this grant, if awarded, contribute to maintaining, increasing or improving the museum's services?

(g) *Community commitment.* How committed to the museum are its users and supporters? Does the museum have a substantial base of non-Federal support? Does it have a strong volunteer program? IMS considers such factors as:

(1) The quality and extent of the financial support that the museum receives from the private sector and other non-Federal sources and the extent to which this support is stable, broad-based and indicative of continuing community commitment;

(2) The quality of the museum's volunteer program and its program of in-kind contributions and their importance to the museum's annual operations; and

(3) The commitment of its users to the museum as evidenced by such factors as participation in membership and docent programs, fund raising and other supportive activities.

(h) *Non-Federal support.* To what extent, if any, will the General Operating Support requested enable the museum to increase its base of State, local and private funding in the year for which assistance is requested and beyond?

(i) *Past use of IMS funds (when applicable).* Has the museum used its IMS funds effectively? How and in what amounts and in what manner have they been used?

§ 1180.14 Criteria for evaluation of applications for Special Project Support.

The following criteria apply to the evaluation of all applications for Special Project support:

(a) *Plan of operation.* What is the quality of the proposed project? In applying this criterion, IMS looks for information that shows:

(1) High quality in the design of the project;

(2) An effective plan of management that ensures proper and efficient administration of the project.

(b) *Quality of key personnel.* What is the quality of the key personnel the applicant plans to use on the project? In applying this criterion, IMS looks for information that shows:

(1) The qualifications of the project director;

(2) The qualifications of each of the other key personnel used in the project; and

(3) The time that each person referred to above is obligated to commit to the project.

(c) *Budget and cost effectiveness.* Does the project have an adequate budget to achieve its purpose? In applying this criterion, IMS looks for information that shows:

(1) The budget for the project is adequate to support the project activities; and

(2) Costs are reasonable in relation to the objectives of the project.

(d) *Adequacy of resources.* Does the applicant plan to devote adequate resources to the project?

(e) *General Benefit.* To what extent will the project, if successful, be of general benefit to museums or address a problem which is general to a number of museums but has not been adequately addressed?

(f) *Unique Benefit.* To what extent will the project provide a unique benefit to the general public?

(g) *Model or Exemplary Benefit.* To what extent does the project represent a model or exemplary approach and solution to the problem addressed?

(h) *Financial Benefit: Private support; cost control.* Is the project likely to produce innovative methods for (1) increasing museums' base of private support and/or (2) limiting a museum's cost of operation?

(i) *Other support.* Does the applicant lack alternative sources of support for the project?

(j) *Dissemination.* Has the applicant made satisfactory provision for disseminating the results of the project to other museums and the general public through the media?

§ 1180.15 Duration of Grant.

Grants under the Act normally permit the grantee to use the funds for a period of up to 12 months from the start of the grant period. The grantee may use grant funds during the period specified in the grant document unless the grant is suspended or terminated. If, in the case of a Special Project grant, the grantee needs additional time to complete the grant project, the grantee may apply for an extension of the grant period without additional funds. The Director may approve this extension at his or her discretion.

§ 1180.16 IMS share of the cost of a proposal.

(a) Section 206(c) of the Museum Services Act provides that grants under this section [Section 206] for any fiscal year may not exceed 50 per centum of the cost of the program for which the grant is made, except that no more than 20 per centum of the funds available under this section for any fiscal year may be available for grants in such fiscal year without regard to such limitation. In applying the exception in Section 206(c), priority will be given to Special Project grants.

(b) Subject to § 1180.9(a), IMS normally does not make grants for more than 10 percent of a museum's most recently completed fiscal year's actual operating budget. For future fiscal years a different figure may be specified by notice published in the Federal Register. An operating budget may be increased by an amount reflecting the reasonable and conservative value of volunteer services contributed in the most recently completed fiscal year.

(c) For a particular fiscal year, and for one or more programs, the Board may determine that an amount equal to the amount to be awarded (or a percentage thereof) to an applicant under the Act must consist of non-Federal funds contributed to the museum in excess of the non-Federal funds contributed to the museum for its immediately preceding fiscal year.

(d) A museum shall maintain a restricted account for funds received under the Act.

§ 1180.17 Reports.

In its final report a grantee shall briefly detail how the expenditure of the grant funds has satisfied the proposed use of the funds as stated in its General Operating Support application or has accomplished the proposal as set forth in its Special Project application and has served the purpose of the Act as reflected in the applicable evaluation criteria in § 1180.14.

Subpart B—General Application, Selection and Award Procedures

Applications

§ 1180.30 Publication of an application notice; content of the notice.

Each fiscal year the Director publishes application notices in the Federal Register that explain what kind of assistance is available that fiscal year under the Act.

§ 1180.31 Information in the application notice.

(a) The application notice usually includes:

(1) How an applicant can get an application packet containing detailed information about the program including an application form;

(2) Where an applicant must send its application;

(3) The amount of funds available for grants;

(4) The approximate number of grants the Institute expects to make under the program;

(5) The expected cap on grant(s) that may be applied for;

(6) Any priorities established by the Institute for that year;

(7) A reference to the applicable regulations.

(b) [Reserved]

§ 1180.32 Deadline date for applications.

(a) The application notice sets deadline date for applications to be postmarked or hand delivered to the Institute. The applicant shall:

(1) Mail the application to the address specified in the application notice on or before the deadline date; or

(2) Hand deliver the application to the address specified in the application notice by 4:30 p.m. (Washington, D.C. time) on deadline date.

(b) An applicant must be prepared to show one of the following as proof of timely mailing:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other dated proof of mailing acceptable to the Director.

(c) If an application is mailed through the U.S. Postal Service, the Director does not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not date-cancelled by the U.S. Postal Service.

§ 1180.33 Applicants must meet procedural rules.

The Director is authorized to make a grant only to an eligible applicant that submits a complete application, including attachments, on or before the deadline.

§ 1180.34 Number of copies.

Each applicant shall submit an original and four copies of its application to the Institute.

§ 1180.35 Special Project Grant: Group applications.

(a) Eligible museums may apply as a group for a Special Project grant.

(b) If a group of museums applies for a Special Project grant, the members of the group shall either:

(1) Designate one member of the group to apply for the grant; or

(2) Establish a separate, eligible legal entity, consisting solely of the museum group, to apply for the grant.

(c) The members of the group, or entity, shall enter into an agreement that:

(1) Details the activities that each member of the group plans to perform; and

(2) Binds each member of the group to every statement and assurance made by the applicant in the application.

(d) The applicant shall submit the agreement together with its application.

(e) If the Director makes a grant to a group of eligible museums, the applicant for the group is the grantee and is legally responsible for:

(1) The use of all grant funds; and

(2) Ensuring that the project is carried out by the group in accordance with applicable Federal laws, regulations, and requirements.

(f) Each member of the group is legally responsible for:

(1) Carrying out the activities it agrees to perform; and

(2) Using the funds it receives under the agreement in accordance with

applicable Federal laws, regulations, and requirements.

Selection and Award Procedures

§ 1180.36 Rejection of an application.

(a) The Director rejects an application if:

(1) The applicant is not eligible;

(2) The applicant fails to comply with procedural rules that govern the submission of the application;

(3) The application does not contain the information required;

(4) The application cannot be funded under the authorizing statute or implementing regulations.

(b) If the Director rejects an application under this section, the Director informs the applicant and explains why the application was rejected.

§ 1180.37 How grants are processed.

(a)(1) The Director may use one or more groups of experts or readers to evaluate eligible applications.

(2) Each group consists of three or more qualified persons.

(3) In each group there must be at least one person who is not an employee of the Federal Government.

(4) A person may not serve as a member of a group of experts or readers if the person is an employee of the Institute who is regularly involved in grants processing; however, the Director may sign a waiver for such person and that person may serve as a member of a group of experts or readers.

(b) When the Director uses a group of experts or readers, the group of experts or readers uses the applicable evaluation criteria set forth in the Regulations to evaluate each application.

(c) After the groups of experts or readers have evaluated the applications, a rank ordering of the applications is prepared. The rank ordering of the eligible applications is based solely on the valuations of the applications by the groups of experts.

(d) Subject to § 1180.12, the Director, in consultation with the Board, then determines the order in which applications will be selected. The Director makes these determinations on the basis of the evaluation criteria and any priorities or other program requirements that have been published in the **Federal Register**. The Director may consider the following in making these determinations:

(1) The Application.

(2) The rank ordering of the applications.

(3) Any other information relevant to applicable criteria, priorities, or any other applicable information or requirements.

(Cross reference. See § 1180.12)

§ 1180.38 Applications not selected for funding.

If an application is not selected for funding the Director informs the applicant.

§ 1180.39 How the Institute makes a Special Project grant.

The Director follows the procedures in §§ 1180.40–1180.41 to set the amount and determine the conditions of a Special Project grant.

§ 1180.40 The cost analysis; basis for Special Project grant amount.

(a) Before the Director sets the amount of a Special Project grant, a cost analysis of the project is made which involves an examination of:

(1) The cost data in the detailed budget for the project;

(2) Specific elements of costs; and

(3) The necessity, reasonableness, and allowability under applicable statutes and regulations.

(b) [Reserved]

§ 1180.41 The notification of grant award.

(a) The Director furnishes a notification of grant award to the grantee.

(b) The notification of grant award sets the amount of the grant and gives other information about the grant.

§ 1180.42 Effect of the grant.

The grant obligates both the Federal Government and the grantee to all of the requirements, regulations and statutes that apply to the grant.

Subpart C—General Conditions Which Must Be Met by a Grantee.

Nondiscrimination

§ 1180.43 Federal statutes and regulations on nondiscrimination.

Each grantee shall comply with the following statutes:

Subject	Statute
Discrimination on the basis of race, color or national origin.	Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d through 20000d–4).
Discrimination on the basis of sex.	Title IX of the Education Amendments of 1972 (20 U.S.C. 1681–1683).
Discrimination on the basis of handicap.	Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).
Discrimination on the basis of age.	The Age Discrimination Act (42 U.S.C. 6101 et seq).

§ 1180.44 Use of consultant in Special Projects.

(a) Subject to Federal statutes and regulations, a Special Project grantee shall adhere to its general policies and practices when it hires, uses, and pays a consultants as part of the Special Project staff.

(b) The grantee may not use its grant to pay a consultant unless:

(1) There is a need in the project for the services of that consultant; and

(2) The grantee cannot meet that need through using an employee rather than a consultant.

Evaluation

§ 1180.45 Evaluation by the grantee.

A grantee shall evaluate at least semi-annually:

(a) The grantee's progress in achieving the objectives set forth in its approved application; and

(b) The contribution of the grant toward meeting the pruposes of the Act.

§ 1180.46 Federal evaluation—cooperation by a grantee.

A grantee shall cooperate in any evalution by the Director of the particular grant program in which grantee has participated.

Publications and Copyrights

§ 1180.47 General conditions on publications.

(a) *Content of materials.* Subject to any specific requirements that apply to its Special Project grant, a Special Project grantee may decide the format and content of Special Project materials that it publishes or arranges to have published.

(b) *Required Statement.* The grantee shall ensure that any publication that contains Special Project materials also contains the following statement:

"The contents of this (insert type of publication, e.g., book, report, film,) were developed in whole or in part under a grant from the Institute of Museum Services. However, the contents do not necessarily represent the policy of the Institute, and endorsement by the Federal Government should not be assumed."

§ 1180.48 Copyright policy for grantees.

A grantee may copyright Special Project materials in accordance with government-wide policy applicable to copyright of publications developed under Federal grants.

§ 1180.49 Definition of "Special Project materials."

As used in §§ 1180.47–1180.48, "Special Project materials" means a copy-rightable work developed in whole or in part with funds from a Special Project grant from the Institute.

General Administrative Responsibilities

§ 1180.50 Compliance with statutes, regulations, and its approved Grant Application.

(a) A grantee shall comply with applicable statutes, regulations, and the approved grant application, and shall use Federal funds in accordance therewith.

(b) No official, agent, or employee of the Institute may waive any regulation unless the regulation specifically provides for waiver.

(c) No act or failure to act by an official, agent, or employee of the Institute can affect the authority of the Director to enforce regulations.

(d) In any circumstance for which waiver is provided, the determination of the Director shall be final.

§ 1180.51 The grantee administers or supervises the Grant.

A grantee shall directly administer or supervise the administration of the grant and be answerable therefore.

§ 1180.52 Fiscal control and fund accounting procedures.

A grantee shall exert fiscal control and employ fund accounting procedures that ensure proper disbursement of and accounting for Federal funds in accordance with OMB circulars A–102 and A–110.

§ 1180.53 Obligation of funds during the grant period.

A grantee may use grant funds for obligations it makes only during the grant period.

§ 1180.54 Prohibition of subgrants.

(a) A grantee may not make a subgrant.

(b) A grantee may contract for supplies, equipment, and services subject to § 1180.44(a).

Records

§ 1180.55 Records related to grant funds.

A grantee shall, in accordance with OMB circular A–102 and A–110, keep records that show accurately and in full:

(a) The amount of funds awarded under the grant;

(b) The exact uses of the funds;

(c) The total amount expended under the grant;

(d) The amount expended under the grant, during the grant period provided from non-Federal sources; and

(e) Other records necessary to facilitate an effective audit.

§ 1180.56 Records related to compliance.

A grantee shall, in accordance with OMB circulars A–102 and A–110, keep accurate and full records to show its compliance with specific program requirements set forth in the regulations, published notices, or contained in the grant award documents.

§ 1180.57 Records related to Special Project performance.

(a) A Special Project grantee shall keep records revealing progress and results under the grant.

(b) The grantee shall use the records under paragraph (a) of this section to:

(1) Determine progress in accomplishing Special Project Objectives; and

(2) Revise those objectives, if necessary and authorized under the grant.

§ 1180.58 Applicability.

(a) Subparts B and C (§§ 1180.30–1180.57) apply to General Operating Support and Special Project assistance, except as otherwise provided in these regulations.

(b) The Education Department General Administrative Regulations (34 CFR Parts 75–78) do not apply to programs of the Institute of Museum Services.

BILLING CODE 4550–01–M

VETERANS ADMINISTRATION

38 CFR Part 3

Allowance in Lieu of Government-Furnished Headstone or Marker

AGENCY: Veterans Administration.

ACTION: Proposed regulation change.

SUMMARY: The Veterans Administration is proposing to increase the monetary allowance payable in lieu of a Government/furnished headstone or marker from $63 to $67. The need for this action results from the fact that the actual cost of a Government-furnished headstone or marker increased from $63 to $67. The effect of this proposed amendment would be to permit payment of up to $67 in lieu of a Government-furnished headstone or marker.

DATES: Comments must be received on or before January 20, 1983. We propose to make this change effective October 1, 1982.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding this proposal to the Administrator of Veterans' Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W. Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until January 31, 1983. Any person visiting the Veterans Administration Central Office in Washington, D.C. for the purpose of inspecting comments will be received by the Central Office Veterans Services Unit in room 132. Visitors to a VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address and room number.

FOR FURTHER INFORMATION CONTACT: C. A. Wheeler, 202–389–3005.

SUPPLEMENTARY INFORMATION: Under 38 CFR 3.1612 the Veterans Administration is authorized to pay a monetary allowance in lieu of furnishing a headstone or marker at Government expense under the provisions of 38 CFR 1.631(a)(2) and (b). The amount of the allowance is the lesser of the actual cost of acquiring a non-government headstone or marker (or adding identifying information to an existing marker) or the average actual cost of a Government-furnished headstone or marker for the fiscal year preceding the fiscal year in which the non-Government-furnished headstone or marker was furnished (or identifying information added). (38 CFR 3.1612(e)(2))

The average actual cost to the Veterans Administration of headstones and markers furnished at Government expense for fiscal year 1982 (October 1, 1981 through September 30, 1982) is $67. Consequently, we are amending § 3.1612 to include this information.

The Administrator hereby certifies this proposed rule, if promulgated, will not have a significant economic impact, in terms of compliance costs, paperwork and recordkeeping, or any other regulatory burden on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), this proposed rule is therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that this regulation affects individual claimants only. It will have no significant impact on small entities in terms of compliance costs, recordkeeping requirements, or effects on competition.

The Veterans Administration has determined that this regulation is nonmajor in accordance with Executive Order 12291 because it simply implements statutory requirements and would have little or no economic impact, in itself.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

(Catalog of Federal Domestic Assistance Program number is 64.101)

Approved: December 1, 1982.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 3—ADJUDICATION

It is proposed to amend 38 CFR Part 3 as follows:

In § 3.1612, paragraph (e)(2)(ii) is revised as follows:

§ 3.1612 Monetary allowance in lieu of a Government-furnished headstone or marker.

* * * * *

(e) *Payment and amount of the allowance.* * * *

(2) The amount of the allowance payable is the lesser of the following:

* * *

(ii) The average actual cost, as determined by the Veterans Administration, of headstones and markers furnished at Government expense for the fiscal year preceding the fiscal year in which the non-Government-furnished headstone or marker was purchased or the services for adding the veteran's identifying information on an existing headstone or marker were purchased. The average actual cost of headstones and markers furnished at Government expense for fiscal year 1981 (October 1, 1980 through September 30, 1981) is $83 and $67 for fiscal year 1982 (October 1, 1981 through September 30, 1982).

38 CFR Part 3

Veterans Benefits; Definition of Nursing Home

AGENCY: Veterans Administration.

ACTION: Proposed regulation amendment.

SUMMARY: The Veterans Administration is proposing to amend its adjudication regulations to establish a definition of the term "nursing home." The General Counsel recently advised the Department of Veterans Benefits that a regulatory definition of "nursing home" was necessary to determine the scope of the term as used in the adjudication of claims. This new definition specifies the standards to be used in determining whether an extended care facility qualifies as a nursing home for the purposes of establishing entitlement to aid and attendance benefits and certain other benefit determinations.

DATES: Comments must be received on or before January 20, 1983. We propose to make this change effective the date of final approval.

ADDRESSES: Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until January 31, 1983. Any person visiting the Veterans Administration Central Office in Washington, D.C. for the purpose of inspecting comments will be received by the Central Office Veterans Services Unit in room 132. Visitors to a VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address and room number.

FOR FURTHER INFORMATION CONTACT: Robert M. White, 202–389–3005.

SUPPLEMENTARY INFORMATION: Under current provisions of law entitlement to increased benefits may be established by certain beneficiaries on the basis of being a patient in a nursing home (38 U.S.C. 315(1)(I), 322(b), 411(c), 415(g), and 502(b)). Nursing home patient status creates a presumption that an individual is so disabled as to require the regular aid and attendance of another person in performing the normal activities of daily living or for protection against the hazards of daily living (38 CFR 3.351(c)). This presumption allows the granting of increased benefits without requiring a formal rating decision as to the claimant's actual level of disability.

Nursing home patient status also affects computation of income for purposes of pension and parents' dependency and indemnity compensation (DIC) awards. Under the provisions of 38 CFR 3.262(1) and 3.272(g) unusual medical expenses may be deducted when computing countable income and they may be deducted prospectively if there is a clear and reasonable expectation that will be realized. It is the policy of the Veterans Administration to consider all expenses in connection with nursing home care as medical expenses and to allow their deduction from income prospectively.

A recent review of awards granting aid and attendance benefits based on nursing home patient status reveled that some beneficiaries were residing in facilities which did not provide a substantial level of nursing care or related services and, in some instances, no such care or services. These facilities were not licensed as nursing homes by the State in which they were located and, therefore, the presumption of need for regular aid and attendance should not have applied. Similarly, the cost of residing at these facilities, which essentially amounted to room and board, should not have been considered as medical expenses. It is considered necessary that a regulatory definition of the term "nursing home" be established to provide specific standards for determining whether an extended care facility could be considered a nursing home for benefit purposes.

The Veterans Administration is, therefore, proposing to amend 38 CFR 3.1 by adding paragraph (z) defining the term "nursing home." The proposed regulation will not impose on States or nursing homes additional standards or alteration of procedures. It will simply make State licensure the standard by which the Veterans Administration recognizes private institutions as qualifying under the terminology "nursing home" for Veterans Administration purposes.

The level of care provided by the nursing home must be such that any Veterans Administration beneficiary admitted to the facility may be presumed to require the regular aid and attendance of another person because of physical or mental disability. A review of Veterans Administration Nursing Home Care Unit requirements for admission, the requirements of community nursing homes with which the Veterans Administration contracts for extended patient care, and the Medicaid certification requirements in Title 42, Code of Federal Regulations clearly indicates that only those extended care facilities that provide skilled or intermediate-level nursing care would qualify as providers of sufficient care to create the presumption of a beneficiary's need for aid and attendance. The provision of skilled or intermediate-level nursing care would also create the presumption that expenses incurred in connection with admission to such a facility were medical in nature. Accordingly, the proposed definition requires that skilled or intermediate-level nursing care be provided. It is not required that nursing homes be Medicaid certified in order to qualify under this definition, however such a certification would clearly meet the standards of the proposed definition.

States are not required to license the nursing home care units at veterans' homes which they operate. Neither do States license the Nursing Home Care Units operated by the Veterans Administration as part of its hospital system. However, Veterans Administration Nursing Home Care Units do provide the level of care necessary to meet the requirements of the proposed definition, and nursing home care units in State veterans' homes which are approved for payment under 38 U.S.C. 642 also meet the proposed standards for level of care. They are, therefore, being specifically included in the definition since they would not otherwise meet the State licensure requirement.

Veterans Administration beneficiaries in extended care facilities which do not meet the requirements of the proposed definition or which are licensed by foreign jurisdictions will not be eligible for aid and attendance benefits on a presumptive basis. Neither will the cost of their care automatically be considered as a medical expense deduction. These beneficiaries will be required to submit medical evidence sufficient to justify a grant of aid and attendance benefits by formal rating decision, and they will be required to itemize all claimed medical expense deductions.

The Administrator hereby certifies that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. The reason for this certification is that the proposed regulatory definition would not directly affect any small entities.

Only Veterans Administration beneficiaries could be directly affected. A small number of extended care facilities may be indirectly affected, if they do not come within the definition, because some of the Veterans Administration beneficiaries who reside there would not be presumptively entitled to increased benefits. Preliminary Veterans Administration data indicate that less than 1 percent of the approximately 170,000 Veterans Administration beneficiaries currently receiving aid and attendance benefits would be affected by this regulatory change. Moreover, even this small number of beneficiaries may still be able to establish entitlement to aid and attendance benefits and medical expense deductions, on a factual basis, by submitting appropriate evidence. Since the definition refers to State licensure of a nursing home, and since that license is needed for nursing home operation in any event, no additional compliance costs, paperwork, recordkeeping, or other regulatory burden on nursing homes would result from this proposed regulation. Therefore, pursuant to 5 U.S.C. 605(b), this proposed rule is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, we have determined that this proposed regulation change is nonmajor for the following reasons:

(1) It will not have an effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

(Catalog of Federal Domestic Assistance Program numbers are 64.102, 64.104, 64.105, 64.109 and 64.110)

Approved: December 1, 1982.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 3—ADJUDICATION

The Veterans Administration proposes to amend 38 CFR Part 3 as follows:

In § 3.1, paragraph (z) is added as follows:

§ 3.1 Definitions.

* * * * *

(z) "Nursing home" means

(1) Any extended care facility which is licensed by a State to provide skilled or intermediate-level nursing care,

(2) A nursing home care unit in a State veterans' home which is approved for payment under 38 U.S.C. 642, or

(3) A Veterans Administration Nursing Home Care Unit.

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[KY-001; A-4-FRL 2161-6]

Approval and Promulgation of State Implementation Plans; Kentucky; State Regulations for Prevention of Significant Deterioration

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This notice proposes to approve Kentucky's request to revise its State Implementation Plan (SIP) to include the State regulation for Prevention of Significant Deterioration (PSD). The Kentucky Department for Natural Resources and Environmental Protection (DNREP) developed the regulation according to EPA's PSD regulations (45 FR 52676, August 7, 1980) and related EPA guidance. EPA approval of the Kentucky PSD regulation will give the DNREP full authority to implement and enforce the PSD program in Kentucky according to the State regulations.

DATE: To be considered, comments must be submitted on or before January 20, 1983.

ADDRESSES: Written comments should be addressed to Melvin Russell of EPA, Region IV's Air Management Branch (see EPA, Region IV address below). Copies of the materials submitted by Kentucky may be examined during normal business hours at the following locations:

Environmental Protection Agency, Region IV, Air Management Branch, 345 Courtland Street, N.E., Atlanta, Georgia 30365.

Kentucky Department for Natural Resources and Environmental Protection, Division of Air Pollution Control, 18 Reilly Road, Bldg. #2 Fort Boone Plaza, Frankfort, Kentucky 40601

FOR FURTHER INFORMATION CONTACT: Melvin Russell of the EPA Region IV Air Management Branch at the above address, telephone 404/881-3286). (FTS 257-3286).

SUPPLEMENTARY INFORMATION: The Commonwealth of Kentucky's Department for Natural Resources and Environmental Protection (DNREP) has submitted to EPA proposed State regulation for Prevention of Significant Deterioration (PSD). The DNREP regulation was submitted to EPA on March 19, 1982. The regulation was

considered at a public hearing held in Frankfort, Kentucky on April 29, 1982.

EPA is proposing approval of the regulation before adoption at the State level. This procedure is intended to expedite the approval process, and aid the State in its effort to adopt a final regulation that reflect EPA's recommendations and respond to comments in this proposal notice. The Kentucky regulations will be State-effective after approval by the State Legislative Research Commission.

On December 5, 1974, EPA published regulations for PSD under the 1970 version of the Clean Air Act. These regulations established a program for protecting areas with air quality better than the national ambient air quality standards (NAAQS). The Clean Air Act Amendments of 1977 changed the 1970 Act and EPA's regulations in many respects, particularly with regard to PSD. In addition to mandating certain immediately effective changes to EPA's PSD regulations, the new Clean Air Act, in sections 160–169, contains comprehensive new PSD requirements. These new requirements are to be incorporated by States into their implementation plans.

On June 19, 1978 (43 FR 26380), EPA promulgated further guidance. On August 7, 1980 (45 FR 52676), EPA promulgated the latest guidance to assist States in preparing State Implementation Plans (SIP) revisions meeting the new requirements.

The Kentucky regulation for PSD (401 KAR 51:017) is consistent with EPA's PSD regulations (45 FR 52676, August 7, 1980) and related EPA guidance. EPA delegated to Kentucky authority to implement and enforce all portions of the PSD program on May 19, 1980. The State has demonstrated the ability to implement and enforce all aspects of the PSD program.

By letter of May 14, 1982, EPA provided Kentucky with comments on the State's draft regulations for PSD (401 KAR 51:017), including the following:

PSD Regulation—401 KAR 51:017

1. Section 1(1) regarding Applicability:

EPA Comment: The State regulation indicates that "the provisions of this regulation are applicable to any major stationary source or any major modification which:

(a) Is constructed after the effective date of this regulation;"

The term "is constructed" should be "commence construction", so that the regulation will be clear as to when the State regulation takes over from the Federal regulation. Construction can occur over a period of time, but is commenced only at one point in time.

EPA Comment: The regulation should provide for the assessment of 401 KAR 51:017 on a periodic basis and within 60 days of such time as information becomes available that an applicable increment is being violated.

3. Section 2(3)(d) regarding "net emission increase."

EPA Comment: Section 2(3)(d), reference to "401 KAR 51:015, 401 KAR 51:016E, or 40 CFR 52.21" should be deleted. Only permits issued under EPA-approved State PSD regulations exclude increases and decreases from counting. Kentucky regulations 401 KAR 51:015 and 401 KAR 51:016E have not been approved by EPA.

EPA's review of Kentucky's PSD regulation revealed no major deficiencies. EPA is therefore proposing to approve the regulation, based upon the understanding that Kentucky will consider all comments received during the State and EPA comment periods and make all necessary changes in the regulation before EPA takes final action on this proposal.

Under 5 U.S.C. Section 605(B), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

[A-3-FRL 2225-7]

State and Federal Administrative Orders Permitting a Delay in Compliance With State Implementation Plan Requirements; Proposed Approval of an Administrative Order Issued by the Pennsylvania Department of Environmental Resources to InterRoyal Corp.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; invitation for public comment.

SUMMARY: EPA has proposed to approve an administrative order issued by the Pennsylvania Department of Environmental Resources to InterRoyal Corporation. The order requires the company to bring air emissions from its storage shelving manufacturing facility in Warren, Pennsylvania into compliance with certain regulations contained in the federally approved Pennsylvania State Implementation Plan (SIP) by April 9, 1985. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance under the Clear Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before January 20, 1983.

ADDRESSES: Comments should be submitted to Director, Air & Waste Management Division, EPA Region III, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Patrick M. McManus, Environmental Engineer, General Air Compliance Section (3AW22), Air & Waste Management Division, U.S. EPA Region III, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, Telephone: (215) 597–9893.

SUPPLEMENTARY INFORMATION: InterRoyal Corporation operates a storage shelving manufacturing facility at Warren, Pennsylvania. The order under consideration addresses emissions from the surface coating processes at the facility, which are subject to §129.52 of Title 25 of the Pennsylvania Code. The regulation limits the emissions of volatile organic compounds (VOC), and is part of the federally approved Pennsylvania State Implementation Plan. The order requires final compliance with the regulation by

April 9, 1985 through the use of low solvent coatings.

Because this order has been issued to a major source of VOC emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA has reviewed the order and has found that the order does satisfy the requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Pennsylvania SIP. However, source compliance with the order will not preclude assessment of any noncompliance penalties under Section 120 of the Act, unless the source is otherwise entitled to an exemption under Section 120 (a)(B) or (C).

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the **Federal Register** the Agency's final action on the order in 40 CFR Part 65.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6469]

Proposed Base Flood Elevation and Zone Designation Determinations For the City of Pratt, Pratt County, Kansas Under National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations and zone designations as described below.

The proposed base flood elevations and zone designations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in the newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations and zone designations are available for review at the Municipal Building, Third and Jackson, Pratt, Kansas.

Send comments to: Honorable Paul Hayse, Mayor, City of Pratt, Third and Jackson, P.O. Box 807, Pratt, Kansas 67124.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Associate Director, State and Local Programs and Support, gives notice of the proposed base flood elevations and zone designations for the City of Pratt, Kansas in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.

These base flood elevations and zone designations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. It should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. The proposed base flood elevations and zone designations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base flood elevations and zone designations are as follows:

Source of flooding and location	Elevation (feet) national geodetic vertical datum	Zone designation (zone)
South Fork Ninnescah River:		
At the downstream limit of detailed study.	1831	A4.
At a point located approximately 350 feet downstream of the confluence with Valley View Ditch.	1835	A4.
At a point located approximately 500 feet downstream of Haskell Street extended.	1842	A4.
At a point located approximately 200 feet upstream of Taylor Street extended.	1851	A4.
At a point located just downstream of County Road.	1865	A4.
At the upstream limit of detailed study.	1890	A4.
Valley View Ditch:		
At a point located approximately 600 feet upstream of First Street.	1853	A12.
At a point located approximately 500 feet downstream of Maple Street extended.	1854	A3.
At North Street	1876	A3.

The proposed special flood hazard areas, identified as Zone A, have been added along the South Fork Ninnescah River, Valley View Ditch, East Fork Big Ditch, and various unnamed streams throughout the extraterritorial limits. The remaining portions of the extraterritorial limits have been identified as Zones B and C.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not

have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1000

[Ex Parte No. 440]

Canons of Conduct

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rules.

SUMMARY: The Commission proposes to amend its Canons of Conduct relating to reports to the Commission, reimbursement for travel expenses, conflicts of interest and filing of confidential statements of employment and financial interest. These proposals are meant to update and clarify existing Canons and guidelines based on recommendations of the General Counsel. Additional Canons are proposed regarding agency policy prohibiting sexual harassment (Canon 30), and implementation of administrative enforcement procedures for post-employment conflicts of interest under the Ethics in Government Act.

DATE: Interested persons may submit written comments on the proposed rules and guidelines on or before January 20, 1983.

ADDRESS: Comments should be submitted to: Secretary, Interstate Commerce Commission, Room 2203, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Lawrence H. Richmond, 202–275–1857.

SUPPLEMENTARY INFORMATION:

1. *Canon 12* requires the Commission's General Counsel to report to the Commission on January 1 and June 30 of each year on the operation of the Canons. Although this semi-annual reporting requirement served a useful purpose when the Canons underwent major revision in 1979, we believe under the present circumstances an annual report (on June 30) will suffice. The Canons are now well established and any revisions are more easily managed on an annual basis.

2. *Canon 15* presently does not address whether members and employees are permitted to receive reimbursement for travel and subsistence expenses when they attend seminars or other functions. The Commission proposes to clarify the scope of reimbursement permitted in certain situations.

The Comptroller General has ruled that acceptance of a donation covering travel and subsistence expenses of a federal employee traveling on official business, whether such donation is in cash or in kind, constitutes an improper augmentation of the appropriations of the employing agency unless the employing agency has authority to accept gifts. 46 Comp. Gen. 689 (1967); see 18 U.S.C. 209. Inasmuch as the Commission has no statutory authority to accept gifts, travel and subsistence expenses of members and employees on official business may not be reimbursed.

This general prohibition concerning the agency's (and thus its members' or employees') ability to accept reimbursement, does not apply to (1) acceptance of reimbursement when the employee is on leave or otherwise in a non-official duty status at the time of the meeting or function on account of which the donation is made, or (2) payments from tax-exempt organizations (as described by 26 U.S.C. 501(c)(3) for travel incident to attendance at meetings even if the employee is on official duty status. 5 U.S.C. 4111(a). Of course reimbursement must be consistent with other provisions of Canon 15. Therefore acceptance of reimbursement from individuals or organizations which otherwise would represent a conflict of interest is prohibited.

3. *Canon 17* prohibits members or employees from participating in outside employment or other activity which might reasonably result in or appear to be a conflict of interest. Section (c), however, which precludes compensation of personnel for activities devoted substantially to the responsibilities of the Commission presently applies only to members. This provision was also intended to include employees, but they were inadvertently omitted. Therefore, the Commission proposes to amend Section (c) to include employees.

4. *Canon 18* prohibits a member or employee who "entertains a proposal for future employment by any entity subject to regulation by the Commission, or by associations or representatives of such entities," from participating in the decision or disposition of any matter in which the entity making the employment proposal has a substantial interest. Canon 18 does not, however, specify when an employee is deemed to be "entertaining a proposal." In particular, when a regulated entity contacts an employee to inquire whether he or she is interested in employment, when does Canon 18's prohibition come into play?

Whether an employee is "entertaining" a proposal for future employment depends upon the nature and substantiality of the contact by the regulated entity. It seems clear that if the employee listens to the initial contact, and then immediately responds negatively, the employee has not "entertained" the proposal because there has been no mutual expression of interest. When the contact is more substantial, the question becomes more difficult. Recognizing that no statement can address every circumstance and that each case must ultimately turn upon its own facts, the Commission proposes to adopt guidelines to Canon 18 to clarify its intended scope.

Under our proposed guidelines "entertaining a proposal" would include either: (1) Negotiations, (2) solicitation of employment by an agency or employee, or (3) situations where the Commission member or employee does not promptly reject an unsolicited offer of employment.

We believe the guidelines should distinguish between contact initiated by potential employers and contact initiated by agency members or employees. In the latter instance, the public's confidence in the agency's integrity and impartiality might be diminished if members or employees decided matters involving parties before whom they had employment applications pending. Certainly such a practice, if permitted, would give the appearance of impropriety. Mindful of the public trust which we hold and the high standards that trust entails, see Canon 11, we believe members or employees should refrain from participating in the decision or disposition of any matter in which the party who has been contacted about employment is known to have a direct or substantial interest. It should be noted that this bar on participation in

particular matters is effective for six months after negotiations have ceased.

5. *Canon 26.* This canon requires employees listed in Appendix I of Subpart B to submit confidential statements of employment and financial interests. Because of frequent organizational changes and changing responsibilities of various positions, the list contained in the Code of Federal Regulations is virtually never accurate. A current list of employees required to file is maintained and updated by the agency's Personnel Office pursuant to criteria set forth in 5 CFR Part 403. Because the list published in the regulations is of little use, and current lists are obtainable from the agency's Personnel Office we propose to delete Appendix I from the canons. Authority to designate those employees required to file statements of employment and financial interests will be delegated from the Chairman to the Director of Personnel and the Managing Director pursuant to 49 CFR 1011.4(c)(9). The Director of Personnel will make initial decisions on grievances by employees who do not believe they should be required to file statements. Appeals will be decided by the Managing Director.

6. *Canon 30.* Under section 703 of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e–2, discrimination on the basis of sex is unlawful. The Commission opposes sexual harassment in any form. Indeed, in a recent policy statement we noted that sexual harassment will be subject to strong disciplinary action. We propose to adopt a new Canon [1] in order to insure that all agency personnel have notice of this agency policy as well as the particular actions that constitute sexual harassment and the procedures for filing complaints.

7. *Miscellaneous Matters.* Appendix II to 49 CFR Part 1000, Subpart B, lists miscellaneous statutory provisions. Paragraph 4 of that Appendix restates the post-employment conflict of interest law, 18 U.S.C. 207. This section has been a constant source of inquiries from current or former members and employees. Therefore, we believe an expanded and detailed explanation of the provisions is warranted.

8. *Subpart D.* The Commission proposes to adopt regulations to implement administrative application of restrictions on post-employment activity of former officers and employees as established by Title V of the Ethics in Government Act of 1978. See 18 U.S.C. 207(j). The proposed regulations have been drafted in consultation with the Office of Government Ethics. The regulations, as adopted, will be designated as Subpart D to 49 CFR Part 1000.

Accordingly, the Commission proposes to adopt the following amendments and additions to its Canons of Conduct as set forth in the appendix below. This action is taken under authority of 49 U.S.C. 10321 and 5 U.S.C. 553.

[1] This Canon will be designated as Canon 30, the present Canon 30 which sets forth disciplinary action for violations of the Canons of Conduct will be renumbered as Canon 31.

List of Subjects in 49 CFR Part 1000

Conflicts of interest, Seals and insignias.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

Agatha L. Mergenovich,
Secretary.

Appendix

PART 1000—[AMENDED]

Title 49 CFR Part 1000 is proposed to be amended as follows:

§ 1000.735–12 [Amended]

1. Section 1000.735–12 would be amended by removing the words "January 1 and" from line 1 of paragraph (b).

2. (a) In § 1000.735–15 a new paragraph (e) would be added to read as follows:

§ 1000.735–15 Gifts, entertainment and favors.

* * * * *

(e) Neither this section nor § 100.735–17 precludes a member or employee from receipt of bona fide reimbursement, unless prohibited by law, for expenses of travel and such other necessary subsistence as is compatible with this part for which no Government payment or reimbursement is made. However, this paragraph does not allow a member or employee to be reimbursed or payment to be made on his behalf, for excessive personal living expenses, gifts, entertainment, or other personal benefits, nor does it allow a member or employee to be reimbursed by a person for travel on official business under agency orders when reimbursement is proscribed by Decision B–128527 of the Comptroller General dated March 7, 1957 (46 Comp. Gen. 689).

(b) In § 1000.735–15, the Guidelines would be amended by redesignating paragraphs (7) and (8) as paragraphs (8) and (9) respectively, and by adding a new paragraph (7) which would read as follows:

§ 1000.735–15 Gifts, entertainment and favors.

* * * * *

Guidelines * * *

(7) Paragraph (e) of this section does not allow for reimbursement of travel and subsistence expenses when members or employees travel on official business. The agency has no authority to accept gifts and acceptance of reimbursement would constitute an improper augmentation of the agency's appropriations. Payments from tax exempt organizations (as described by 26 U.S.C. 501(c)(3) for travel incident to attendance at meetings is permitted.

Examples of the types of organizations described in 26 U.S.C. 501(c)(3) include, *inter alia*, corporations, any community chest, fund, or foundation, organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary, or educational purposes and that otherwise meet the criteria outlined in the statute.

Acceptance of reimbursement from individuals or organizations which would otherwise represent a conflict of interest is prohibited except as provided in Guideline (2) of this section.

* * * * *

§ 1000.735–17 [Amended]

3. In § 1000.735–17, paragraph (c) would be amended by adding "and employees" to follow the word "Members."

4. The following Guidelines would be added to § 1000.735–18:

§ 1000.735–18 Future employment.

* * * * *

Guidelines

Members and employees are considered to be entertaining a proposal if they: (1) Are engaged in negotiations; (2) solicit employment by submitting a resume or otherwise contacting a prospective employer about employment; or (3) do not promptly reject an unsolicited offer of employment.

§ 1000.735–26 [Amended]

5(a). In paragraph (a) of § 1000.735–26 the first sentence would be amended by removing "in Appendix I of this subpart," and adding in its place "by the Director of Personnel in accordance with 5 CFR 735.403."

b. Paragraph (a) of § 1000.735–26 would be further amended by adding the following sentences to the end of that paragraph "Grievances shall be decided by the Director of Personnel. Appeals of initial decisions shall be decided by the Managing Director."

§ 1000.735–30 [Redesignated as § 1000.735–31]

6. Section 1000.735–30 would be redesignated as § 1000.735–31

7. A new § 1000.735–30 would be added to Part 1000 to read as follows:

§ 1000.735–30 Sexual harassment.

(a) Members and employees shall not engage in harassment on the basis of sex. Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when: (1) Submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment, (2) submission to or rejection of such conduct by an individual is used as the basis for employment decisions affecting such individual, or (3) such conduct has the purpose or effect of interfering with an individual's work performance or creating an intimidating, hostile, offensive or unpleasant working environment.

(b) Employees and applicants may follow the standard equal employment opportunities complaint process if they believe they have a work related sexual harassment problem. This requires that the employee or applicant contact an EEO Counselor within 20 days of the alleged harassment, or, if a personnel action is involved within 30 days of its effective date.

Appendix I [Removed]

8. Appendix I to Subpart B of Part 1000 would be removed.

Appendix II [Amended]

9. Appendix II to Subpart B of Part 1000 would be redesignated as "Appendix," and paragraph (4) would be revised to read as follows:

4. *Post employment conflict of interest (18 U.S.C. 207).*

I. General

A. The Ethics in Government Act (Pub. L. 95–521) (the Act) broadened and added new restrictions to the existing provisions of 18 U.S.C. 207, which generally prohibit a former Government employee from acting as another person's representative to the Government in matters in which the employee had been involved while in the Government. Criminal penalties or fines of not more than $10,000 and imprisonment for not more than two years, as well as administrative sanctions are provided for violation of the Act.

1. *Post-Employment Generally.* It is important to note that nothing in the Act requires a former employee to decline employment with any organization regardless of dealings with that organization while a Government employee.

2. *Required Nexus.* With the exception of the 207(c) bar, what is prohibited depends upon the former employee's degree of involvement in the matter while with the Government and whether he or she was one of a specified group of high-ranking employees ("Senior Employees")

II. General Restrictions Applicable to all Former Employees

A. *Permanent Bar.* (18 U.S.C. 207(a); 5 CFR 737.5) After leaving Government employment, a former employee may not serve as another person's representative to the Government on a case contractual matter or other similar application or proceeding, formal or informal, in which he or she participated personally and substantially while a Government employee.

1. There are two important limitations to this prohibition which attacks "switching sides." First, the former employee is not restricted unless the matter in which he or she previously participated was (i) a "particular matter involving specific parties" and (ii) is the same matter in which he or she now attempts to represent another before the Government. Thus, where an employee's prior involvement was limited to, say, the design of program policy, general rulemaking, or technical concepts, he or she is not restricted by this prohibition as to any specific matters which may involve his or her prior work. Second, this bar requires that the employee has been personally involved in the matter in a substantial way.

2. The kind of representation that is restricted includes not only acting as another's attorney or agent, but any other kind of representation or communication made with the intent to influence the United States. This includes promotional and contract representation.

B. *Two-Year Bar.* (18 U.S.C. 207(b)(i) 5 CFR 737.7) This is basically the same bar as above, except that it applies for only two years and covers all particular matters which were actually pending under the former employee's "official responsibility" in his or her last year of Government service. An employee's official responsibility is usually defined by statute, regulation, written delegation of authority or job description.

1. There may be times when a former employee is in doubt as to whether a matter was under his or her official responsibility, whether it is the same "particular matter" as that with which he or she was involved or whether the United States still has an interest in the matter. His or her former agency has an obligation to advise promptly on those questions as provided in the regulations issued by the Office of Personnel Management (5 CFR Part 737)

III. Restrictions Applicable Only to Senior Employees

A. *Two-Year Bar on Assisting in Representing.* (18 U.S.C. 207(b)(ii); 5 CFR 737.9) For two years after leaving Government employment, a former Senior Employee may not assist in the representation of another person by personal presence at an appearance before the Government on any particular matter in which he or she could not act as the person's actual representative because of his or her substantial personal participation in the matter while in Government.

1. It is important to note that this restriction does not bar a Senior Employee from assisting on a matter in which he or she participated while in Government but only from assisting "in representing" while personally present at a formal or informal appearance. Thus, such employee could work on a contract with which he or she was involved while in Government and could manage a company, institution or university where such former employee's decisions determine the manner in which his or her organization will perform under a Government contract or grant.

B. *One-Year Bar on Attempts to Influence Former Agency.* (18 U.S.C. 207(c); 5 CFR 737.11) For one year after leaving Government employment, a former Senior Employee may not represent anyone in an attempt to influence his or her former agency on a matter before, or of substantial interest to such agency.

1. This "revolving door" provision is different from the previous restrictions in the following ways:

a. It does not require that the former employee have had any prior involvement in the matter.

b. The matters covered are broader; they need not involve specific parties, so the former employee could not, for example, attempt to influence rulemaking or policy formation.

c. It is limited to contact with his or her former agency; he or she may appear before, or act to influence, any other part of the Government in regard to a matter not otherwise covered.

d. The matter must be pending before, or of substantial interest to, his or her former agency.

e. The restriction covers the former employee's self-representation except for those matters outlined in subsection 2 below.

2. There are a number of matters to which the restriction does not apply, among these are:

a. Purely social or informational communications.

b. Transmission of filings which do not require Governmental action.

c. Personal matters.

d. Representing oneself in any judicial or administrative proceeding.

e. Any expression of personal views where the former employee has no pecuniary interest.

f. Response to the former agency's request for information.

g. Participation as the principal researcher under Government grants.

IV. What Is a Senior Employee? (18 U.S.C. 207(d); 5 CFR 737.25)

A. There are four groups of Senior Employees, two are named automatically by statute: (i) Civilians paid at the Executive Level and (ii) active duty uniformed service officers serving in grade 0–9 and above. Two other groups, (iii) civilians at or equivalent to GS–17 or above and (iv) uniformed service officers in grades 0–7 and 0–8, having significant decision-making or supervisory responsibility, must first be designated by the Director of the Office of Government Ethics before they are chargeable as Senior Employees.

1. Those automatically covered by the statute were made subject to the Act's

special restrictions on Senior Employees as of July, 1979.

2. Those designated by the Director, OGE, were covered as of February 28, 1980.

PART 1000—[AMENDED]

10. Part 1000 would be amended by adding a new Subpart D to read as follows:

Subpart D—Administrative Enforcement of Improper Post-Employment Activity

Sec.

1000.737–1 General.
1000.737–2 Initiation of enforcement action.
1000.737–3 Review and investigation.
1000.737–4 Notice of proceeding and opportunity for a hearing.
1000.737–5 Presiding official.
1000.737–6 Time, date, and place of hearing.
1000.737–7 Hearing rights.
1000.737–8 Burden of proof.
1000.737–9 Hearing decision.
1000.737–10 Administrative sanctions.
1000.737–11 Judicial review.

Authority: 18 U.S.C. 207(j), 49 U.S.C. 10321 and 5 U.S.C. 553.

Subpart D—Administrative Enforcement of Improper Post-Employment Activity

§ 1000.737–1 General.

A violation of 18 U.S.C. 207 [See 49 CFR Part 1000 Subpart B, Appendix, paragraph (4)) or the regulations set forth in 5 CFR Part 737 may be cause for appropriate administrative action which may be in addition to any penalty prescribed by law. This subpart is established pursuant to the provisions of 18 U.S.C. 207(j) and 5 CFR 737.27 to implement agency procedures for administrative enforecment of post-employment restrictions.

§ 1000.737–2 Initiation of enfocement action.

Information regarding a possible violation of 18 U.S.C. 207 by a former Commissioner or former Commission employee may be brought to the attention of the Commission by filing such information with the Ethics Counselor.

§ 1000.737–3 Review and investigation.

(a) Upon receipt of information regarding a possible violation of 18 U.S.C. 207, and after determining that such information appears non-frivolous, the Ethics Counselor shall forward the information to the Commission with any recommendations he or she may wish to make on administrative action; the Counselor shall also expeditiously provide such information, along with any comments or Commission regulations, to the Director of the Office of Government Ethics and to the Criminal Division, Department of Justice. The Commission shall coordinate any investigation or administrative action with the Department of Justice to avoid prejudicing criminal proceedings, unless the Department of Justice communicates to the Commission that it does not intend to initiate criminal prosecution.

(b) Whenever the Commission has determined after appropriate review that there is reasonable cause to believe that a former Commissioner or Commission employee has violated 18 U.S.C. 207, it may designate the matter for an administrative disciplinary proceeding.

§ 1000.737–4 Notice of proceeding and opportunity for a hearing

(a) Upon designating such matter for an administrative disciplinary proceeding, the Commission shall provide the former Commissioner or former Commission employee with notice of an intention to institute a proceeding and an opportunity for a hearing. Such notice shall include:

(1) A statement of allegations (and the basis thereof) sufficiently detailed to enable the former government employee to prepare an adequate defense;

(2) Notification of the right to a hearing; and

(3) An explanation of the method by which a hearing may be requested.

(b) If such former Commissioner or Commission employee fails to request a hearing within ten (10) calendar days of receipt of the notice or has waived the opportunity for a hearing, the Commission may take such administrative action as outlined in §1000.737–10, of this subpart. The former employee shall submit a written request for a hearing to the Chairman, Interstate Commerce Commission, 12th & Constitution Ave., NW. Washington, D.C. 20423.

§ 1000.737–5 Presiding official.

(a) The presiding official at proceedings under this section shall be the Chairman or an individual designated by the Chairman to make an initial decision. This person shall be called the examiner.

(b) The examiner at such proceeding must be a Commissioner, a member of a Review Board, an Administrative Law Judge or an attorney employed by the Commission. An employee selected and appointed as an examiner shall be authorized, in writing, by the Chairman to administer oaths or affirmations under 5 U.S.C. 2903(b)(2). The examiner shall be provided with appropriate administrative and secretarial support.

(c) The examiner shall be impartial. No individual who has participated in any manner in the decision to initiate the proceedings may serve as the examiner in those proceedings.

§ 1000.737–6 Time, date, and place of hearing.

(a) The hearing shall be conducted at a reasonable time, date, and place. In setting a hearing date, the examiner shall give due regard to the former government employee's need for adequate time to prepare a defense and an expeditious resolution of allegations that may be damaging to his or her reputation.

(b) Official notice of the time, date and place shall be sent by registered mail, return receipt requested, to the former employee. The mailing shall include a copy of these precedures.

(c) Hearings will be closed unless an open hearing is requested by the former employee. A request for an open hearing shall be made at least ten (10) days prior to the hearing date.

§1000.737–7 Hearing rights.

The hearing shall include, at a minimum the following rights for all parties:

(a) To represent oneself or to be represented by counsel;

(b) To introduce and examine witnesses and to submit physical evidence;

(c) To confront and cross-examine adverse witnesses and to submit physical evidence;

(d) To present oral argument: and

(e) To a transcript or recording of proceedings, on request.

§ 1000.737–8 Burden of proof.

In any hearing under this subpart, the Commission shall have the burden of proof and must establish substantial evidence of a violation.

§ 1000.737–9 Hearing decision.

(a) The examiner shall make a determination based exclusively on matters of record in the proceeding, and shall set forth in the decision all findings of fact and conclusions of law relevant to the matters at issue. Copies of the decision shall be furnished promptly to the former employee and his or her counsel.

(b) Within 30 days after the initial decision either party to the proceeding may appeal the decision to the Commission. Unless the Commission orders otherwise, other parties to the proceeding may file comments within 20 days after such appeal is filed, and the party that filed such appeal may file a reply within 10 days after the period for filing comments has expired. The Commission shall base its decision on

such appeal solely on the record of the proceedings or those portions thereof cited by the parties to limit the issues.

(c) If the Commission modifies or reverses the initial decision, it shall specify such findings of fact and conclusions of law as are different from those of the presiding official. The Commission's decision to uphold, modify, or reverse the examiner's initial decision shall be the final agency decision on the matter.

§ 1000.737-10 Administrative sanctions.

The Commission may take appropriate action in the case of any individual found in violation of 18 U.S.C. 207 (a), (b) or (c) after a final administrative decision, or in the case of any individual who failed to request a hearing, after having received adequate notice. Appropriate action may include:

(a) Prohibiting the individual from making on behalf of any other person except the United States, any formal or informal appearance before, or with the intent to influence, any oral or written communication to, such department or agency on any matter of business for a period not to exceed five years, which may be accomplished by directing agency employees to refuse to participate in any such communication; or

(b) Taking other appropriate disciplinary action.

§ 1000.737-11 Judicial review.

Any person found to have participated in a violation of 18 U.S.C. 207 (a), (b), or (c) may seek judicial review of the administrative determination in an appropriate United States District Court.

Notices

Federal Register
Vol. 47, No. 245
Tuesday, December 21, 1982

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Vasquez Peak Wilderness Study Area; Hearing Notice

Notice is hereby given that public hearings will be held on the proposed future management of the Vasquez Peak Wilderness Study Area.

The Vasquez Peak Wilderness Study Area is comprised of approximately 12,800 acres within the Arapaho National Forest in the County of Grand in the State of Colorado. This portion of the Arapaho National Forest is administered by the Forest Supervisor of the Routt National Forest.

Hearings will be held as follows:

Tuesday, January 18, 1983, 7:00–10:00 p.m., West Portal Station Building at Winter Park Ski Area, Denver, Colorado

Wednesday, January 19, 1983, 7:00–10:00 p.m., Botanical Gardens, Denver, Colorado

A brochure containing a map and information about the proposal may be obtained from the District Ranger's Offices at Walden, Yampa, Steamboat Springs, Craig, Kremmling, and Granby, Colorado, as well as at the Supervisor's Office, 137 10th Street, Steamboat Springs, Colorado 80477.

Individuals and organizations may express their views by appearing at these hearings or may submit written comments for inclusion in the official record to the Forest Supervisor at the above address. The time available to each speaker will be limited depending on the number of people who wish to speak. To be included in the official record, written comments must be received by March 25, 1983.

Dated: December 16, 1982.

F. Dale Robertson,

Associate Chief.

BILLING CODE 3410-11-M

Soil Conservation Service

Camp Joy Flood Prevention and Land Drainage RC&D Measure, Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Camp Joy Flood Prevention and Land Drainage RC&D Measure, Tazewell County, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Manly S. Wilder, State Conservationist, Soil Conservation Service, 400 North Eighth Street, P.O. Box 10026, Richmond, Virginia 23240, telephone 804–771–2455.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Manly S. Wilder, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for drainage and flood prevention on the grounds of Camp Joy. The planned work will include grading and shaping about 0.2 acres, excavation of a waterway with associated mechanical drainage and vegetative measures will be installed. Curbing around the parking area and a concrete wingwall to divert water from a building is planned. About 350 feet of interceptor tile with a gravel filter will be installed. The planned works of improvement include seeding and mulching.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Manly S. Wilder.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: December 10, 1982.

Manly S. Wilder,

State Conservationist.

BILLING CODE 3410-16-M

Statistical Reporting Service

Changes in Grain Stocks Surveys

The statistical Reporting Service (SRS) proposes to move the October 1 Grain Stocks survey to September 1 starting in 1983. SRS is currently conducting a soybean stocks survey as of September 1, while the fall quarter stocks survey for other crops is conducted as of October 1. Many respondents to the two surveys are the same, and single fall stocks survey covering all crops would lessen respondent burden and result in cost savings. Furthermore, an earlier survey date for corn and sorghum would reduce the problem of new crop grain being erroneously reported in old crop (carryover) totals. The Statistical Reporting Service will work with the Economic Research Service to adjust 10 years of historic October 1 stocks data for all crops to a September 1 base and these data will be published.

SRS also proposed to estimate sunflower seed stocks by quarters rather than estimate rye and flaxseed stocks. Rye and flaxseed stocks estimates would be continued through June 1983 and the new series on sunflower seed

stocks would begin September 1, 1983. Sunflower production has become increasingly important while rye and flaxseed production has declined.

Comments on the above proposals should be addressed to Robert L. Schulte, Chief, Crops Branch, Estimates Division, Room 5175–S, USDA/SRS, Washington, D.C. 20250. The comment period will close February 1, 1983.

Done at Washington, D.C., this 16th day of December 1982.

W. E. Kibler,

Administrator.

BILLING CODE 3410-20-M

DEPARTMENT OF COMMERCE

International Trade Administration

Arizona State University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82–00256. Applicant: Arizona State University, Tempe, Arizona 85287. Instrument: BAF 400D Freeze Etching System & Accessories. Manufacturer: Balzers Aktiengesellschaft, Liechtenstein. Intended use of instrument: See Notice on page 32161 in the **Federal Register** of July 26, 1982.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument is an integrated system with: (1) Automatic vacuum and temperature control, (2) a microtome with motors for cutting motion and knife advance and (3) control of shadowing angle and coating thickness. The Department of Health and Human Services advises in its memorandum dated October 12, 1982 that: (1) The capabilities of the foreign instrument described above are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-25-M

Duke University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant there to (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82–00253. Applicant: Duke University, Durham, NC 27706. Instrument: Fluorescence Lifetime Instrument. Manufacturer: Photochemical Research Associated, Incorporated, Canada. Intended use of Instrument: See Notice on page 33527 in the **Federal Register** of August 3, 1982.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States. Reasons: The foreign instrument provides pulsed excitation capable of showing more than two decay components. The National Bureau of Standards advises in its memorandum dated November 2, 1982 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Georgia Institute of Technology; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82–00260. Applicant: Georgia Institute of Technology, Engineering Experiment Station, 225 North Avenue, NW, Atlanta, GA 30322. Instrument: Extended Interaction Oscillator. Manufacturer: Varian/Canada, Canada. Intended use of instrument: See Notice on page 32182 in the **Federal Register** of July 26, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: This application is a resubmission of Docket Number 81–00355 which was denied without prejudice to resubmission on March 26, 1982 for informational deficiencies. The foreign instrument provides a center frequency of 95 gigahertz. The National Bureau of Standards advises in its memorandum dated October 25, 1982 that: (1) The capability of the foreign instrument described above is pertinent

to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

University of Hawaii at Manoa; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00163. Applicant: University of Hawaii at Manoa, Procurement and Property Management Office, Bachman Hall Annex No. 3, 2444 Dole Street, Honolulu, Hawaii 96822. Instrument: Ship Motion Meter. Manufacturer: Osaka Design Model Kabushiki Kaisha, Japan. Intended use of instrument: See Notice on page 21905 in the **Federal Register** of May 20, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a decoupled output of its motion sensors which is needed for *in situ* studies and data analysis. The National Bureau of Standards advises in its memorandum dated November 10, 1982 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

BILLING CODE 3510-25-M

Yale University; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00124. Applicant: Yale University, 272 Whitney Avenue, P.O. Box 6666, New Haven, CT 06511. Instrument: Large-Solid-Angel Split-Pole Magnetic Spectrograph. Manufacturer: ANAC, Incorporated, New Zealand. Intended use of instrument: See Notice on page 30537 in the **Federal Register** of July 14, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a full solid angle equal to 12 milli-steradians over the range of radii from 51.1 centimeters to 92.0 centimeters. The National Bureau of Standards advised in its memorandum dated October 25, 1982 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

DEPARTMENT OF ENERGY

National Petroleum Council, Coordinating Subcommittee of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Coordinating Subcommittee of the Committee on Enhanced Oil Recovery will meet in March 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Coordinating Subcommittee meeting follows:

The Coordinating Subcommittee will hold its sixth meeting on Tuesday, March 22, 1983, starting at 10:00 a.m. in the Rayburn I Room, Stouffer's Greenway Plaza Hotel, Six Greenway Plaza East, Houston, Texas.

The tentative agenda for the Coordinating Subcommittee meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Coordinating Subcommittee task group study assignments.
3. Review progress of the task group study assignments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee is empowered to conduct the meeting in a fashion that will, in his

judgement, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas, and Shale Technology, Fossil Energy, 301/353–3032, prior to the meeting and reasonable provision will be made for their apppearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on December 15, 1982.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

BILLING CODE 6450–01–M

National Petroleum Council, Coordinating Subcommittee of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Coordinating Subcommittee of the Committee on Enhanced Oil Recovery will meet in February 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Coordinating Subcommittee meeting follows:

The Coordinating Subcommittee will hold its fifth meeting on Thursday, February 17, 1983, starting at 10:00 a.m. in the Azalea Room, Stouffer's Greenway Plaza Hotel, Six Greenway Plaza East, Houston, Texas.

The tentative agenda for the Coordinating Subcommittee meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Coordinating Subcommittee task group study assignments.
3. Review progress of the task group study assigments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas, and Shale Technology, Fossil Energy, 301/353–3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on December 15, 1982.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. CP80–435–005]

Alaskan Northwest Natural Gas Transportation Co.; Amendment to Application

December 15, 1982.

Take notice that on November 4, 1982, Alaskan Northwest Natural Gas Transportation Company (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP80–435–005 pursuant to Section 7(c) of the Natural Gas Act and Section 9 of the Alaska Natural Gas Transportation Act an amendment to its application for a certificate of public convenience and necessity authorizing the construction

and operation of the Alaskan segments of the Alaska Natural Gas Transportation System (ANGTS). Copies of Volume I of the amendment, which this notice addresses, are on file with the Commission and are open to public inspection.[1]

Applicant states that this filing supplements the previous filings which were submitted in this proceeding on July 1, 1980, as supplemented on October 27, 1980, November 30, 1981, and amended on December 31, 1981. Applicant states that the instant filing supplements the previous application regarding the ANGTS Alaska Gas Conditioning Facility (AGCF).

Applicant states that the instant filing reflects certain revisions to the design and cost estimate of the AGCF resulting from engineering optimization studies and design refinement completed subsequent to the December 31, 1981, amendment. This adjustment results in a net decrease of $168 million in the prior estimate, for a total AGCF cost estimate of $3.83 billion in June 1981 dollars. The specific changes comprising the $168 million reduction are as follows:

Optimization and Design Development Adjustments ($1,000):	
(1) Centralization	($105,218)
(2) NGL Extraction/CO_2 Removal Trains Design Changes	(3,581)
(3) Pipeline Compressor Reduction	(20,581)
(4) Refrigeration Design Changes	(47,867)
(5) NGL Fractionation and Storage Facilities Design Changes	(18,479)
(6) Vacuum Compression Chillers Addition	2,379
(7) Dehydration System Addition	[illegible]
(8) Engineering Contractor Cost Adjustment	[illegible]7
(9) Vibration Monitoring System Increase	[illegible]
(10) Communication System Design Changes	[illegible]510]
(11) Additional Warehousing Requirement	6,824
(12) Utilities Plant and Power Generation Design Changes	[illegible]
(13) Flare System Design Changes	[illegible]
(14) Gravel Program Modifications	(1,779)
(15) Offsite Pipeline Modifications	(3,518)
(16) Temporary Facilities Cost Adjustments	3,821
(17) Fabrication, Logistics, and North Slope Service Adjustments	[illegible]
(18) Tax and Insurance Adjustments	(5,534)
Total Other Adjustments	(140,412)
Contingency Adjustments	[illegible]
Total Cost Estimate Adjustment	(168,410)

Applicant states that the purpose of the instant filing is to update the AGCF design and cost estimate to reflect the current design as of March 31, 1982, and should be processed in conjunction with the proceeding to be established for processing the December 31, 1981, AGCF filing. Proceedings with respect to the December 31, 1981, AGCF filing in Docket No. CP80-435-003 are currently being held in abeyance.[2]

Any person desiring to be heard or to make any protest with reference to said amendment should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34483 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[1] Volume II of the amendment is said to contain proprietary information regarding the SELEXOL process and has been tendered for filing on a confidential basis. It is indicated that on March 17, 1982, the Commission issued a Protective Order which set out procedures for preserving the confidentiality of information concerning the Allied Corporation SELEXOL Solvent Process and that such order pertained to Applicant's December 31, 1981, filing in Docket No. CP80-435-003. Applicant asserts that the March 17, 1982, Protective Order should also cover supplements or amendments to its December 31, 1981, filing.

[2] On February 12, 1982 the Secretary of the Commission notified Applicant of deficiencies with regard to Exhibits A, B, C, D, I, J, L, and N in its December 31, 1981, filing and stated that the filing would be accorded expedited treatment when and as the required information has been filed. On May 27, 1982, pursuant to Applicant's recommendation, the Presiding Administrative Law Judge, held in abeyance the proceeding to process the December 31, 1981, filing pending certain additional certificate filings including Applicant's financing plan.

[Docket No. QF83-47-000]

Alpha Farm Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

December 14, 1982.

On November 9, 1982, Alpha Farm Inc., P.O. Box 187, Hackensack, New Jersey 07602, filed with the Federal Energy Reglatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The wind system will be located in Allentown, New Jersey. The electric power production capacity of the facility will be 40 kilowatts. Applicant does not own or operate any other small power production facility using wind as the primary energy source that is located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestant parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34484 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-99-000]

Arkansas Louisiana Gas Company, a Division of Arkla, Inc.; Application

December 15, 1982.

Take notice that on November 22, 1982, Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Applicant), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP83-99-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of taps on certain jurisdictional gas pipelines and related facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate taps on the lines identified below for service to the following:

Line	Name of commercial establishment
AM-44	P. M. Adkins, McNeil, Ark.
O	Craig Cope, Hartshorne, Okla.
AD	Marion Posey, McAlester, Okla.
8-A	Lowell Flies, Sayre, Okla.
JM-24	Jesse McDermott, Earle, Ark.
SM-24	Coca-Cola Bottling Company of South Ark., Camden, Ark.
KM-19	Great Lakes Chemical Corp., El Dorado, Ark.
AM-148	Fiber Resources, Inc., Pine Bluff, Ark.
9-6	Carlton H. Berry, Cement, Okla.
AD	Samuel Jefferson, Weatherford, Okla.

Applicant states that the estimated cost of the proposed tap facilities is $105,525 which cost would be financed from funds on hand.

It is stated that the gas supply for these customers would be from general system supply with impact on Applicant's supply being negligible.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34485 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. EF81-2021-002 and E-9563]

Bonneville Power Administration; Filing

December 13, 1982.

Take notice that the Bonneville Power Administration (BPA) on November 29, 1982, filed with the Commission a Petition for Extension of Transmission Rates until Janury 1, 1984.

On June 24, 1981, effective July 1, 1981, the Assistant Secretary for Conservation and Renewable Energy of the Department of Energy placed BPA's 1981 transmission rates into effect on an interim basis and filed the rates with the Commission requesting that they be granted final confirmation and approval. 46 FR 33542 (1981). On June 22, 1982, in Docket No EF81-2011, the Commission granted an extension of these interim rates until January 1, 1983. 19 F.E.R.C. section 61,281. BPA requests a twelve month extension, until January 1, 1984, of interim approval of the transmission rates schedules contained in Docket No. EF81-2021: (1) FPT-2 (Formula Power Transmission), (2) UFT-2 (Use-of-Facilities Transmission), (3) ET-2 (Energy Transmission), and (4) IR-1 (Integration of Resources). BPA also requests a twelve month extension of Set A and Set B of its General Transmission Rate Schedule Provisions, which are incorporated by reference in these four schedules.

On August 3, 1982, in Docket No. E-9563-, the Commission granted final confirmation and approval of BPA's 1976 transmission rates. 20 F.E.R.C. section 61,142. In that Order the Commission approved the FPT-1, UFT-1 and ET-1 transmission rate schedules for the period from June 10, 1977, until June 30, 1981. On July 1, 1981, BPA's 1981 rates went into effect. Some of BPA's transmission contracts, however, did not permit rates to be adjusted on July 1, 1981. Hence BPA has continued to collect under the FPT-1, UFT-1 and ET-1 schedules for these contracts. BPA therefore requests that the Commission also extend the effectiveness of the FPT-1, UFT-1 and ET-1 schedules until January 1, 1984.

In support of its request for extension, BPA indicates that it is in the process of developing a comprehensive transmission policy, which isn't expected to be finalized until January 1983. After such time BPA intends to develop new transmission rates consistent with this policy, and conduct a hearing and issue a decision on the new rates, all of which will not be completed until late 1983.

BPA also requests this extension in order to be allowed the time necessary to begin the process of complying with the commission's August 3, 1981 Order in Docket No. E-9563 before adjusting transmission rates.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34507 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5874-001]

James O. Boyd; Surrender of Preliminary Permit

December 13, 1982.

Take notice that James O. Boyd, Permittee for the proposed Burney Creek Power Project No. 5874, has requested that his preliminary permit be terminated. The permit was issued on September 9, 1982, and would have expired on March 31, 1984. The project would have been located on Burney Creek near Burney, in Shasta County, California. The Permittee states that, because of fisheries release requirements and low power purchase prices, the proposed project would not be economically feasible.

The Permittee filed his request on November 17, 1982, and the surrender of his permit for Project No. 5874 is deemed effective as of the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 4448-001]

Chasm Hydro, Inc.; Surrender of Preliminary Permit

December 13, 1982.

Take notice that Chasm Hydro, Inc., Permittee for the proposed Forge Dam Project No. 4448, has requested that its preliminary permit be terminated. The permit was issued on April 7, 1982, and would have expired on October 1, 1983. The project would have been located on the Chateaugay River in Franklin and Clinton Counties, New York.

The Permittee filed its request on November 3, 1982. The surrender of the preliminary permit for Project No. 4448

is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-82-000]

Consolidated Gas Supply Corp; Application

December 15, 1982.

Take notice that on November 12, 1982, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP83-82-000 an application pursuant to Section 7(c) of the Natural Gas act for a certificate of public convenience and necessity authorizing the construction and operation of facilities to upgrade existing compressor engine at the Cornwell Compressor Station, Kanawha County, West Virginia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to install a Cooper-Bessemer centrifugal blower kits on three existing compressor engine at its Cornwell Station. Applicant states that the modification is expected to increase the fuel efficiency of its station and incidentally increase the horsepower of each engine by 23 percent.

Applicant further states that the estimated cost of the proposed construction is $570,000 and that this cost would be financed from funds to be obtained from Applicant's parent corporation, Consolidated Natural Gas Company, from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34486 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-87-000]

Consolidated Gas Supply Corp.; Application

December 15, 1982

Take notice that on November 15, 1982, Consolidated Gas Supply Corporation (Consolidated), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP83-87-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon 7,153 feet of 12¾-inch pipeline and related facilities located in Kanawha County, West Virginia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Consolidated states that the pipeline to be abandoned, Line No. TL-293, is no longer needed because it connects Tennessee Gas Pipeline Company, a Division of Tenneco Inc.'s (Tennessee), facilities with Consolidated's Line No. TL-249 and that this interconnection has not been used for two years. It is submitted that Consolidated can receive its entitlement from Tennessee under its Rate Schedule CD-3 at higher pressures at the nearby Cornwell point of receipt where Tennessee interconnects with Consolidated's main line. Consolidated would also abandon an odorization plant because it is located on Line No. TL-293.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee or this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will by duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 3356-001]

Continental Hydro Corp.; Surrender of Preliminary Permit

December 13, 1982.

Take notice that Continental Hydro Corporation, Permittee for the proposed Wister Dam Project No. 3356, has requested that its preliminary permit be terminated. The permit was issued on September 28, 1981, and would have expired on March 1, 1983. The project would have been located on the Poteau River in LeFlore County, Oklahoma.

Continental Hydro has determined that hydro development at this time would not be economically feasible.

Permittee filed its request on October 29, 1982. The surrender of the preliminary permit for Project No. 3356

is deemed accepted of the date of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34510 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 3400-001]

Continental Hydro Corp.; Surrender of Preliminary Permit

December 13, 1982.

Take notice that Continental Hydro Corporation, Permittee for the proposed Buckhorn Dam Project No. 3400, has requested that its preliminary permit be terminated. The permit was issued on June 9, 1981, and would have expired on December 31, 1983. The project would have been located on the Middle Fork of the Kentucky River in Perry County, Kentucky.

The Permittee filed its request on October 28, 1982, and the surrender of the preliminary permit for Project No. 3400 is deemed accepted of the date of this notice.

BILLING CODE 6717-01-M

[Docket No. EC83-4-000]

The Detroit Edison Co.; Application

December 14, 1982.

Take notice that on December 2, 1982, The Detroit Edison Company (Edison), 2000 Second Avenue, Detroit, Michigan 48226, submitted an Application for Authority to Sell Certain Public Utility Facilities which are proposed to be sold and conveyed to the Michigan Public Power Agency (MPPA) and for such further relief as may be appropriate.

Edison's filing states that the facilities consist of certain coal handling facilities serving Edison's St. Clair Power Plant and which will serve Edison's Belle River Power Plant, which is presently under construction. Edison will sell and convey an approximate 8.5 to 10.3% undivided ownership interest in the facilities to MPPA, and Edison and MPPA will, thereafter, jointly own the facilities as tenants in common. The sales price is expected to be between $3,012,000 and $3,650,000. MPPA is a public body politic and corporate organized pursuant to Act 448, Public Acts of Michigan 1976 and consists of sixteen municipal electric utility members. MPPA is empowered, among other things, to plan, finance, develop, own and operate projects to supply electric power and energy for the present and future needs of its members.

The sale and conveyance to MPPA of the facilities is proposed in connection with the establishment of: (1) The respective ownership interests of Edison and MPPA in the Bille River fossil construction in St. Clair County, Michigan, (2) the respective obligations and rights of Edison and MPPA with respect to the construction, operation and maintenance of Bille River, and (3) the terms and conditions under which Edison is willing to make available to MPPA certain back-up electric capacity and energy. Edison requests approval of its Application prusuant to the provisions of Section 203 of the Federal Power Act.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordane with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 4, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34488 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-72-000]

El Paso Natural Gas Co.; Application

December 15, 1982.

Take notice that on November 8, 1982, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP83-72-000 an application pursuant to Section 311 of the Natural Gas Policy Act of 1978 and Section 284.107 of the Commission's Regulations for authorization to continue the transportation of natural gas for Westar Transmission Company, a Division of Pioneer Corporation (Westar), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that on January 1, 1979, it entered into an agreement with Westar, as amended, pursuant to which Applicant would provide transportation service for Westar for a primary term ending December 31, 1984, and thereafter from month to month. Applicant further states that such agreement initially provided for a transportation service in accordance with Section 284.102 of the Commission's Regulations for self-implementing transactions for a two-year period which commenced on January 1, 1979, and was later extended for an additional two-year period to expire on December 31, 1982.

It is submitted that under the terms of such agreement Applicant would transport natural gas received for Westar's account at the Phillips Petroleum Company Dumas Plant located in Moore County, Texas, and would concurrently deliver an equivalent volume, less 5 percent of such volumes received by Applicant, which reduction represents gas lost and unaccounted-for and mainline fuel requirements, to Mobil Oil Corporation's Waha Plant located in Pecos County, Texas, for the account of Westar.

For such service, Applicant proposes to charge Westar for each Mcf of natural gas transported by Applicant for the account of Westar at the rate in effect and reflected from time to time as the "Mainline Transmission Charge—Texas" set forth on Sheet No. 1-D.2 of Applicant's FERC Gas Tariff, Third Revised Volume No. 2, or superseding tariff. Applicant states that its maximum obligation to receive natural gas for transportation is 20,000 Mcf per day.

It is asserted that Westar would continue to use the subject gas for system supply and that without the proposed transportation Westar would be required to construct and operate additional pipeline facilities.

Any person desiring to be heard or to make any protests with reference to said application should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in

accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-22-000]

El Paso Natural Gas Co.; Petition for Issuance of Order Determining the Lawfulness of Prices To Be Applied to Certain Natural Gas Production

December 14, 1982.

Take notice that on November 19, 1982, El Paso Natural Gas Company (El Paso) submitted for filing a petition for issuance of an order under Section 5(a) of the Natural Gas Act (NGA) to determine that the prices to be applied to certain of El Paso's own production are lawful so long as such prices do not exceed statutory maximum lawful prices. Specifically, El Paso requests that the Commission determine: (1) That El Paso may establish prices for its natural gas production (described in the instant petition) at any level not exceeding the applicable maximum lawful price limits established under the Natural Gas Policy Act of 1978 (NGPA), and (2) subject to any applicable limitations established by the NGPA, that such prices are just and reasonable under the NGA, and accordingly may be reflected in El Paso's rates.

El Paso states that this petition, concerning the production that is described in Article V of the Stipulation and Agreement in Docket No. RP79-12 (Further Extension, *et al.*, is filed in response to the Commission's order dated September 30, 1982, in Docket No. TA 82-2-33, holding production at maximum lawful NGPA levels until El Paso has obtained an order so permitting issued under Section 5(a) of the NGA.

El Paso states that it maintains its challenge to the legality of the September 30 order as it pertains to the subject matter in the instant petition so filed and on other grounds; accordingly, by filing the herein referred to petition, El Paso does not concede the lawfulness of the order, and it expressly reserves its rights to contest the legality of such order in further proceedings.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protext with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-9-000]

Faustina Pipe Line Co.; Application

December 15, 1982.

Take notice that on October 6, 1982 Faustina Pipe Line Company (Applicant), P.O. Box 3102, Tulsa, Oklahoma 74101, filed in Docket No. CP83-9-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Southern Natural Gas Company (Southern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to an agreement dated June 10, 1982, Applicant proposes to transport for a term of 20 years, up to 150 billion Btu of natural gas per day for Southern from various points on Applicant's contiguous mainline facilities located in southern Louisiana to any other points located on those same facilities. It is explained that upon reasonable notice to Applicant, Southern would be permitted to tender or receive to or from Applicant each day up to the full contract demand at any point on Applicant's system which Southern would elect in its sole discretion. Such transportation would be performed on a firm basis for the fifteen year primary term of the agreement, and on an interruptible basis thereafter.

Applicant states that pursuant to authorizations recently received from or currently pending before the Louisiana Commissioner of Conservation, Applicant plans to install an additional 121 miles of mainline transmission facilities necessary to effectuate the proposed transportation service. The cost of these facilities is estimated to be $96 million. Applicant estimates that it would be prepared to commence service under the agreement by January 1, 1984.

For such service, Applicant proposes to charge a commodity rate equal to 28.27 cents per million Btu transported and redelivered. Applicant represents that such a rate is the result of competitive factors and is less than that which would be cost justified. In addition to the commodity rate, Applicant also proposes a "minimum annual charge" equal to the commodity rate times 80 percent of the applicable contract quantity multiplied by the number of days in the year. Applicant asserts that such a charge is compensatory for the service which Applicant would perform on behalf of Southern.

Applicant currently is exempt from the provisions of the Natural Gas Act pursuant to Section 1(c) thereof.[1] Accordingly Applicant requests that simultaneous with the issuance of the authorization herein sought, the Commission also affirmatively and explicitly declare that the jurisdiction of the Commission under the Natural Gas Act over Applicant and the transactions in which it is engaged would extend solely to the service authorized and that the jurisdiction of the Commission under the Natural Gas Act specifically shall not extend to any transaction which, but for the service authorized to be performed on behalf of Southern, would not be subject to such jurisdiction. Such a declaration would recognize that any sale for resale of gas to or delivery of gas to, or redelivery of gas by, Applicant by or to any intrastate pipeline would not become subject to, nor subject either Applicant or such intrastate pipeline or any other party to the jurisdiction of the Commission under the Natural Gas Act if such jurisdiction would result solely either because of the commingling of such gas with that gas redelivered by Applicant for the account of Southern for ultimate transportation and consumption in another state or because the transaction involved is with Applicant.

As a related matter, Applicant also requests that, simultaneous with the issuance of the authorization herein sought, the Commission further affirmatively authorize the abandonment of the services thus approved effective in the event of any determination by the Commission, a court or competent jurisdiction, or any other tribunal having jurisdiction in the premises that, by reason of the service so authorized, any other transportation or sale of gas by Applicant or by any other person transporting, selling, or purchasing gas through, from or to Applicant, or Applicant or any other person, has or will, if continued, become

---

[1] See order issued August 12, 1981, in Docket No. CP80-540 (16 FERC ¶61,128).

subject to the jurisdiction of the Commission under the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. GT83-7-000]

Great Lakes Gas Transmission Co.; Proposed Change in FERC Gas Tariff

December 14, 1982.

Take notice that on November 24, 1982, Great Lakes Gas Transmission Company (Great Lakes) tendered for filing the following tariff sheets:

	Proposed effective date
First Revised Volume No. 1:	
Third Revised Sheet No. 3	Dec. 22, 1982
Third Revised Sheet No. 116	Dec. 22, 1982
Original Volume No. 2:	
Seventh Revised Sheet No. 3	Dec. 22, 1982
Original Sheet No. 370-A	Nov. 1, 1982

Third Revised Sheet No. 3 of First Revised Volume No. 1 and Seventh Revised Sheet No. 3 of Original Volume No. 2 contain an updated map of Great Lakes' pipeline system as required under § 154.37 of the Commission's Regulations.

Third Revised Sheet No. 116 of First Revised Volume No. 1 sets forth an updated Index of Purchasers served under Rate Schedules contained in First Revised Volume No. 1.

Original Sheet No. 370-A of Original Volume No. 2 is a title page for Rate Schedule T-12. This page was inadvertently omitted in the initial Rate Schedule T-12 date September 28, 1981.

Copies of this letter were served upon all of Great Lakes' customers and the Public Service Commissions of Minnesota, Michigan and Wisconsin.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.11, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. EC83-3-000]

Interstate Power Co.; Application

December 14, 1982.

Take notice that on December 1, 1982, Interstate Power Company (Applicant) of Dubuque, Iowa, filed an Application pursuant to Section 203 of the Federal Power Act seeking authority to sell to Dairyland Power Cooperative certain electric transmission line facilities and real estate located in the Counties of Olmsted and Wabasha, State of Minnesota.

The facilities proposed to be sold by Applicant for a base purchase price of $16,472.22, consist of approximately 18.83 miles of 34.5KV transmission line.

Applicant represents that after the sale there will be no change in the use of the facilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 4, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-177-000]

Kansas Power & Light Co.; Filing

December 14, 1982.

Take notice that on December 6, 1982, Kansas Power and Light Company (KPL) tendered for filing a supplemental agreement to original contract dated September 21, 1973 with The Kaw Valley Electric Cooperative Company, Inc., Topeka, Kansas for wholesale service to that Cooperative with the proposed effective date of not later than December 31, 1982. KPL states that this supplement permits The Kaw Valley Electric Cooperative Company, Inc. to receive service under rate schedule RCW-81 Revised designated supplement 1 to supplement 9 to R.S. FERC No. 156. The proposed change will delete the two present delivery points of Watson and Lecompton. A new delivery point of Stull will be added and the Banning Corner delivery point maximum capacity will lowered. The redistribution of load will allow for greater efficiency by the Cooperative.

Copies of the filing have been mailed to The Kaw Valley Electric Cooperative Company, Inc. and the State Corporation Commission of Kansas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person desiring to heard or to protest said filing should file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34501 Filed 12-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-97-000]

MIGC, Inc.; Application

December 15, 1982.

Take notice that on November 18, 1982 MIGC, Inc. (Applicant), 10880 Wilshire Boulevard, Los Angeles, California 90024, filed in Docket No. CP83-97-000 an application pursuant to pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for ARCO Oil and Gas Company (ARCO), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport and exchange up to 2,000 Mcf of natural gas per day with ARCO pursuant to an exchange agreement with ARCO dated October 11, 1982. It is stated natural gas would be delivered by Applicant to ARCO at an existing point of interconnection between the parties near the Recluse facilities of ARCO located in Campbell County, Wyoming. It is further stated ARCO wishes to convert the Recluse facility from a processing operation to compression operation and perform all processing at its Kitty facility, Campbell County, Wyoming. To do so, it is stated ARCO would need up to 2,000 Mcf of natural gas per day for plant fuel and lease fuel at Recluse. Applicant proposes to deliver to ARCO the proposed volumes at the Recluse facilities from volumes of natural gas which it presently purchases from Montana-Dakota Utilities, Inc. It is asserted Applicant would accept similar volumes from ARCO at the outlet of the Kitty facility.

It is stated the arrangement is mutually beneficial, and, as such, no charge is proposed for the exchange. Applicant avers no construction of facilities is necessary for the exchange and it would not affect the ability of Applicant to serve its existing customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 5, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211), and the Regulations under the National Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificates is required by public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. GT83-6-000]

Natural Gas Pipe Line Co. of America; Proposed Change in FERC Gas Tariff

December 14, 1982.

Take notice that on November 24, 1982, Natural Gas Pipeline Company of America (Natural) submitted for filing to be effective January 1, 1982, the following tariff sheets to be part of its FERC Gas Tariff:

Third Revised Volume No. 1

Fifth Revised Sheet No. 2
Fifth Revised Sheet No. 2A
Fifth Revised Sheet No. 2B

Second Revision Volume No. 2

Eighteenth Revised Sheet No. 1
Fifth Revised Sheet No. 1A
Third Revised Sheet No. 1B.

Natural states that the purpose of the above-mentioned revised sheets is to update the Table of Contents of the Second Revised Volume No. 2 of Natural's FERC Gas Tariff.

Copies of this letter have been mailed to Natural's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this copies of this application are on file with the Commission and are available for public inspection.

[Project No. 6841-000]

Rivanna Water & Sewer Authority; Exemption From Licensing

December 15, 1982.

A notice of exemption from licensing of a small hydroelectric project known as the South Rivanna Hydropower Project No. 6841, was filed November 12, 1982, by Rivanna Water and Sewer Authority. The proposed hydroelectric project would have an installed capacity of 740 kW and would be located on the South Fork of the Rivanna River near Charlottesville, in Albermarle County, Virginia.

Pursuant to § 4.109(c) and 375.308(ss) of the Commission's regulations, and subject to the terms and conditions set forth in § 4.111 of the Commission's regulations, the Director, Office of Electric Power Regulation, issues this notification that the above project is exempted from licensing as of December 12, 1982.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation.

BILLING CODE 6717-01-M

[Project No. 5328-001]

L. MacRae Rood; Surrender of Preliminary Permit

December 13, 1982.

Take notice that L. MacRae Rood (LMR) Permittee for the proposed Moretown Project No. 5328 has requested that its preliminary permit be terminated. The preliminary permit was issued on April 16, 1982, and would have expired on September 20, 1983. The proposed project would have utilized an existing dam on the Mad River in the town of Moretown, Washington County, Vermont. LMR was unable to come to a satisfactory purchase agreement with the owner of the property at the dam site and therefore does not wish to pursue the project.

LMR made its request by letter dated November 16, 1982, and the surrender of its permit for Project No. 5328 has been deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

[Docket No. ER83-173-000]

Metropolitan Edison Co.; Filing

December 14, 1982.

Take notice that on December 3, 1982, Metropolitan Edison Company (Met-Ed) filed tariff changes increasing its rates for wholesale all requirements, partial requirements and wheeling service. Met-Ed states that the changes, in two phases, reflect an annual increase in revenues of $1,692,108 (Phase A) and $1,842,638 (Phase B). Met-Ed request effective dates of February 1 and February 2, 1982, respectively.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-8-000]

South Georgia Natural Gas Co.; Revision to Tariff

December 14, 1982.

Take notice that on December 6, 1982, South Georgia Natural Gas Company (South Geogria) tendered for filing Twentieth Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1. This tariff sheet and supporting information is being filed 30 days before the effective date of January 1, 1983, pursuant to the Purchased Gas Adjustment Provisions set out in Section 14 of South Georgia's tariff.

South Georgia states that its Twentieth Revised Sheet No. 4 reflects increases in the rates of its pipeline supplier, Southern Natural Gas Company as filed to be effective January 1, 1983. This rate change will increase the cost of purchased gas to South Georgia's jurisdictional customers $8,610,216. Also reflected in Twentieth Revised Sheet No. 4 is a Surcharge Adjustment as provided for by Section 14.3 of the General Terms and Conditions of South Georgia's FPC Gas Tariff. The debit balance in the Unrecovered Purchased Gas Cost Account of $549,717 will be amortized over the estimated sales for the six-month period commencing January 1, 1983, by a surcharge adjustment rate of 6.93 cents per MMBtu.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington,

D.C. 20426, in accordance with Sections 211 and 214 of the Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-18-000]

Texas Eastern Transmission Corp. v. North Alabama Gas District; Complaint and Petition for an Order Declaring Liability and Directing Compliance and for Expedited Consideration

December 14, 1982.

Take notice that on November 4, 1982, Texas Eastern Transmission Corporation (Texas Eastern) filed a complaint and petition to the Commission for issuance of an order declaring liability and directing North Alabama Gas District (North Alabama), a purchaser from Texas Eastern, to comply with the minimum monthly bill provisions of Texas Eastern's FERC Gas Tariff and for expedited consideration.

Texas Eastern states that its minimum monthly bill provision is an integral part of the rates, terms, provisions, and conditions pursuant to which Texas Eastern sells natural gas to North Alabama. However, for the month of June 1982, when Texas Eastern rendered to North Alabama as a part of its statement of changes for the month a minimum monthly bill charge of $1,079,394.26, North Alabama refused to pay the amount as rendered, instead, it made payment to Texas Eastern only for gas actually taken by North Alabama during June 1982, those payments being in the amount of $1,009,004.13.

North Alabama asserts that alleged events of force majeure occurring in the system of one of its customers excuses North Alabama from making the minimum monthly bill payments. However, Texas Eastern asserts that such events asserted by North Alabama do not constitute events of force majeure excusing performance by North Alabama in compliance with the minimum monthly bill provision of Texas Eastern's Tariff and Rate Schedule.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket Nos. G-12425-000, et al.]

Texaco Producing Inc. (Successor in Interest to Texaco), et al.; Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

December 14, 1982.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before December 30, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[1] Applicant has acquired by assignment the interest of Texaco Inc. Assignor, in certain properties in the Chapman Ranch Field, Nuces County, Texas effective September 1, 1982.
[2] Applicant is filing under Gas Purchase Contract dated February 19, 1957, and Replacement Contract dated July 15, 1977.
[3] By this assignment dated July 29, 1969, Gulf assigned to Sun Oil Company its interest in a lease dated April 30, 1948.
[4] Applicant is filing under Gas Purchase Contract dated December 9, 1968, amended by amendatory agreement dated September 1, 1982
[5] Applicant is filing under Gas Purchase Contract dated December 23, 1968, amended by amendment dated July 12, 1982.
[6] Applicant is filing under Gas Sale and Purchase Contract dated December 15, 1980, amended by amendment dated September 16, 1982
[7] Application was erroneously noticed as partial abandonment in Docket No. CI71-508-000 on August 19, 1982.
[8] Applicant is requesting that its certificate of public convenience and necessity issued in Docket No. CI71-508 be abandonded because of assignment effective January 1, 1982 to Curtis F Clark and Kathleen T. Clark, dba Exploration.
[9] Applicant is filing under Gas Purchase Contract dated January 2, 1981.
[10] It is no longer economical for the field to be produced for Pennzoil to purchase it.
[11] The well pressure had dropped to the point that we could no longer deliver into Northern Natural Gas Company's line against the 200 PSI line pressure. Neither Northern Natural Gas Company nor Willard Oil & Gas Inc. believed that it is economically feasible to compress the gas so that delivery could be accomplished into the line.
[12] Applicant is filing under Gas Purchase Contract dated November 18, 1977 ratified by Ratification agreement dated December 20, 1977, and amended by agreement dated November 1, 1982.
[13] Applicant is filing under Gas Sales and Purchase Agreement dated November 2, 1982.
[14] Field depleted.
[15] Applicant is filing under Gas Purchase Contract dated December 21, 1973.
[16] All remaining acreage subject to RS No. 78 was conveyed to Ted R. Stalder.
[17] Natural is filing to partially abandon a sale which it states has become uneconomic to continue. The sale was authorized in Docket No. CI64-686 pursuant to a contract dated July 24, 1943, as amended, on file as Tenneco's FERC Gas Rate Schedule No. 388. Natural acquired the nine wells here involved from Tenneco effective January 1, 1981 as part of its possible future development of certain underground geological structures in the Erick Field as a gas storage reservoir.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total succession, E—Partial succession

BILLING CODE 6717-01-M

[Docket No. TA83-1-29-001]

Transcontinental Gas Pipe Line Corp.; Proposed Change in FERC Gas Tariff

December 14, 1982.

Take notice that on November 15, 1982, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing Substitute Twenty-fourth Revised Sheet No. 12 and Substitute Twenty-fourth Revised Sheet No. 15 to Second Revised Volume No. 1 and Substitute Thirtieth Revised Sheet No. 121 to Original Volume No. 2 of Transco's FERC Gas Tariff. The proposed effective date on the above-mentioned tariff sheets is November 1, 1982.

Transco states that these substitute tariff sheets, which are being filed in compliance with Ordering paragraph (C) of the Commission's order of October 29, 1982, and also to reduce the demand charge adjustment increase because of Transco's recent decision not to curtail this winter, are in lieu of the same numbered sheets submitted with the original filing of October 1, 1982, and conditionally accepted by the said October 29 order.

The proposed tariff sheets reflect a 3.7 cents per dekatherm (dth) decrease in the commodity rate or delivery charge of Transco's CD, G, OG, E, PS and S-2 rate schedules from those rates filing of October 1, 1982, in the instant docket; a decrease from such previously filed rates of 1.1 cents per dth in the commodity or delivery charge under the ACO rate schedule; and a decrease of 2.6 cents per dth from these rates in the delivery charge under the K-20 rate schedule.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP82-57-007]

United Gas Pipe Line Co.; Proposed Change in FERC Gas Tariff

December 14, 1982.

Take notice that on November 30, 1982, United Gas Pipe Line Company (United) tendered for filing Sixtieth Revised Sheet No. 4 to its FERC Gas Tariff, the revised tariff sheet to become effective October 1, 1982, in accordance with the Commission's orders of October 14, 1982 and November 18, 1982, in Docket No. RP82-57.

United states that this revised tariff reflects the following adjustment as described hereinafter. On October 14, 1982, the Federal Energy Regulatory Commission accepted tariff sheets placing rates for FERC Docket No. 82-57 into effect on October 1, 1982. Such acceptance was subject to refund and subject to any orders in Docket Nos. RP82-57 and TA82-2-11. Among the tariff sheets accepted was Revised Fifty-Ninth Revised Sheet No. 4 to FERC Gas Tariff, First Revised Volume No. 1. On November 18, 1982, the Commission issued an order in Docket No. TA82-2-11 accepting Alternate Revised Volume No. 1. This order made Revised Fifty-Eighth Revised Sheet No. 4 moot and of no force and effect. United has therefore recomputed the current adjustment shown on Revised Fifty-Ninth Revised Sheet No. 4. The resulting current adjustment is (1.06 cents) per Mcf.

Copies of this filing were mailed to all parties in this proceeding, all of United's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-179-000]

Vermont Marble Co.; Filing

December 14, 1982.

Take notice that on December 6, 1982, Vermont Marble Company (VMC) tendered for filing as an initial rate schedule of an exchange agreement (the Agreement) between VMC; and the Connecticut Light and Power Company (CL&P), the Hartford Electric Light Company (HELCO), and Western Massachusetts Electric Company (WMECO) (together, CL&P, HELCO, and WMECO, are called the NU Companies). The agreement dated as of January 19, 1980 provides for VMC to exchange system capacity and associated energy from the VMC system, for gas turbine capacity and associated energy from several gas turbine type electric generating units owned and operated by the NU Companies.

The Agreement provides that the parties will determine daily or weekly during the term of the Agreement whether it is economically advantageous that an exchange shall take place.

VMC states that the NU Companies will pay an hourly Energy Reservation charge to VMC in an amount equal to the kilowatts of capacity exchanged in each hour times $0.003/kilowatt. The NU Companies will purchase energy from the VMC system at the forecasted cost of providing such energy. VMC will purchase energy from the NU Companies Units at the average cost of providing such energy.

VMC requests an effective date of January 19, 1980, and therefore requests waiver of the Commission's notice requirements.

The Agreement has been executed by the Vermont Marble Company and by the NU Companies and copies have been mailed to each of them.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No ER83-178-000]

Washington Water Power Co.; Filing

December 14, 1982.

Take notice that on December 6, 1982, the Washington Water Power Company (Washington) tendered for filing copies of a service schedule applicable to what Washington refers to as a "Letter Agreement" between Washington and the City of Anaheim, which applies to the sale of energy which is surplus from Washington's portion of the Centralia coal-fired steam plant and from purchases made from Potlatch Corporation, a wood products manufacturing plant located in Lewiston, Idaho.

Washington requests an effective date of October 6, 1982, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No ER83-176-000]

Western Massachusetts Electric Co.; Filing

December 14, 1982.

Take notice that on December 6, 1982, the Western Massachusetts Electric Company (WME) tendered for filing Supplement No. 5 to its Resale Service Rate CD-1 with the City of Westfield, Massachusetts.

WME states that the customer under the rate schedule concurs in the filing and supports the proposed effective date. WME further states that the rate schedule amendment provides for increased demand and energy charges which would result in an increase of approximately $839,000 in test year revenues.

WME indicates that it is in financially weakened condition and the proposed rate increase is essential to maintain its ability to provide service.

WME proposes an effective date of November 1, 1982 and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon the affected customer and the Department of Public Utilities of the Commonwealth of Massachusetts.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-180.000]

Western Massachusetts Electric Co.; Filing

December 14, 1982.

Take notice that Western Massachusetts Electric Company (WME) tendered for filing on December 7, 1982 an amendment to its wholesale for resale total requirements service (Rate Schedule No. RS-1), by which it provides firm electric service to: the Town of Chester, Massachusetts; the Town of Russell, Massachusetts; Fletcher Gas and Electric Company; Massachusetts Electric Company and New York State Electric and Gas Company.

WME states that all of the customers under the tarfff concur in the filing and support the proposed effective date. WME further states that the rate schedule amendment provides for increased demand and energy charges which would result in an increase of approximately $49,000 in test year revenues.

WME indicates that it is in a financially weakened condition and the proposed rate increase is essential to maintain its ability to provide service.

WME request an effective date of November 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon all of the affected customers, the Department of Public Utilities of the Commonwealth of Massachusetts and the Department of Public Utility Control of the State of Connecticut.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. QF83-48-000]

Zond Systems, Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

December 14, 1982.

On November 15, 1982, Zond Systems, Inc., 112 South Curry Street, Tehachapi, California 93561, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility is under construction in Kern County, California. The primary energy source to the facility will be wind. The electric power production capacity of the facility will be 28 megawatts and is being installed in increments. The facility has a present production capacity of 2 megawatts. There will be no other wind powered small power production facility owned by Zond located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordnace with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Western Area Power Administration

Falcon Project; Notice of a Rate Order

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of a rate order; Falcon Project.

SUMMARY: Notice is given of a Rate Order No. WAPA-16 of the Assistant Secretary for Conservation and Renewable Energy for extending the power rate on an interim basis for Falcon Project (Falcon) power marketed by the Western Area Power Administration (Western).

The current rate of 14 mills/kWh is being extended to cover the interim period from the expiration of the original contract, between the United States and Central Power and Light Company (CPL) which will expire on December 31, 1982, to the date on which the Amistad Powerplant is ready to deliver power.

EFFECTIVE DATES: This interim rate will become effective at 12:01 a.m. C.S.T. January 1, 1983, and shall remain in effect until the date on which the Amistad Powerplant is ready to deliver power.

ADDRESSES: For further information contact:

Mr. Albert M. Gabiola, Area Manager, Salt Lake City Area Office, Western Area Power Administration, P.O. Box 11606, Salt Lake City, UT 84147, Telephone: (801) 524–5493

Mr. Conrad Miller, Chief, Rates and Statistics Branch, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401, Telephone: (303) 231–1535

Mr. James A. Braxdale, Office of Power Marketing Coordination, Department of Energy, CE–91, Federal Building, Washington, DC 20461, Telephone: (202) 633–8338.

SUPPLEMENTARY INFORMATION: By Delegation Order No. 0204–33, effective January 1, 1979 (43 FR 60636, December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by the through the Administrator of Western, and to confirm, approve, and place in effect such rates on an interim basis, and to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, Delegation Order No. 0204–33 was amended, effective March 19, 1981, to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy. Pursuant to regulations promulgated to complement the delegation order, the Assistant Secretary for Conservation and Renewable Energy has the authority to extend, on an interim basis, rates "previously confirmed and approved by . . . the Federal Power Commission." (10 CFR 903.23 (1981).

On August 30, 1982, a comment period was initiated with an announcement of the eproposed rate extension published in the **Federal Register** at 47 FR 38186. Written comments were received through September 30, 1982. An August 30, 1982, press release was also issued.

Public comments received during the comment period have been considered in the preparation of this rate order.

Rate Order No. WAPA–16 confirming and approving the extension of the power rate on an interim basis is hereby issued.

Issued in Washington, D.C., December 13, 1982.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

Department of Energy—Assistant Secretary for Conservation and renewable Energy

In the Matter of: Western Area Power Administration—Falcon Project Power Rates. Rate Order No. WAPA–16.

Order Confirming and Approving Extension of Power Rates on an Interim Basis

(December 13, 1982)

Pursuant to section 302(a) of the Department of Energy Organization Act of August 4, 1977 (42 U.S.C. 7101 et seq.), the power marketing functions of the Secretary of the Interior for the Bureau of Reclamation under the Reclamation Act of 1902 (43 U.S.C. 372 et seq.), as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Act of 1939 (43 U.S.C. 485h(c)) and acts specifically applicable to the Falcon Project, were transferred to and vested in the Secretary of Energy, by Delegation Order No. 0204–33, effective January 1, 1979 (43 FR 60636, December 28, 1978), last amended March 19, 1981 (46 FR 25426, May 7, 1981), the Secretary of Energy delegated to the Assistant Secretary, Conservation and Renewable Energy, the authority to develop power and transmission rates, acting by and through the Administrator of the Western Area Power Administration (Western), and to confirm, approve, and place in effect such rates on an interim basis, and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. This rate order is issued pursuant to the delegation to the Assistant Secretary and the rate adjustment procedures at 45 FR 86983 (December 31, 1980) as corrected at 46 FR 6864 (January 22, 1981) and amended at 46 FR 25426 (May 7, 1981), 10 CFR, Part 903.

Background

Existing Rates

On August 1, 1977, the Federal Power Commission, pursuant to the Falcon Dam Act of 1954, approved rates contained within the original contract between the Bureau of Reclamation (BuRec) and the Central Power and Light Company (CPL). Said contract remains in effect "until the date on which the Amistad Powerplant is ready to deliver power on December 31, 1982, whichever date occurs first." The rate for power in the contract is 14 mills per kilowatthour.

On August 12, 1977, the Federal Power Commission approved a rate formula contained in a contract between the BuRec and two cooperatives. The South Texas Electric Cooperative, Inc. (STEC), and the Medina Electric Cooperative, Inc. (MEC), agreed to purchase the output of the Falcon and Amistad Powerplants for a 50-year period, beginning when initial electric service is available from Amistad. The cooperatives agreed to take all Falcon and Amistad power and to pay the United States the following:

1. The amount necessary to amortize the remaining investment costs of the power facilities at Amistad over a 50-year period:

2. The amount necessary to amortize the remaining investment costs of the power facilities at Falcon; and

3. The annual projects' operation, maintenance, replacement costs, and the administrative costs of the International Boundary and Water Commission and BuRec.

On December 21, 1977, Western was organized and both of the power marketing contracts discussed above were transferred from the BuRec to Western for administration.

Due to construction delays, the Amistad Powerplant will not be operational until approximately May 1983. Western and CPL are in the process of extending the original contract for marketing Falcon power from January 1, 1983, to such time as the Amistad Powerplant is ready to deliver power. However, no rate for this time period has been approved for Falcon power by either the Federal Power Commission or FERC.

Public Notice and Comments

On August 30, 1982, a comment period was initiated with an announcement of the proposed rate extension published in the **Federal Register** at 47 FR 38186. Written comments were received through September 30, 1982. A public press release was also issued on August 20, 1982.

Written comments were received from five interested parties. One of the commentors recommended that the power rate be increased to the current market rate for fuel replacement energy of 36 mills/kWh in order to more nearly pay off the remaining debt on the Falcon Project before the Amistad Powerplant comes on line. It is estimated by this commentor that, additional revenues of over $1,240,000 would result from increasing the rate from 14 to 36 mills/kWh during the first 5 months of 1983.

The other four commenting parties supported an extension of the 14 mills/kWh rate for the interim period and each strongly opposed the 36 mills/kWh rate proposed by the commenting party above. The main reasons for opposing the increase are summarized below:

1. The language in the Falcon Dam Act provides that electric power and energy generated at the Falcon Dam and Amistad Dam shall be transmitted and disposed of at the lowest possible rates to consumers consistent with sound business principles. Rate schedules must provide for recovery of the cost of providing and transmitting such electric energy, including the amortization of the capital investment, over a reasonable period of years.

2. The rate formula contained in the 50-year contract for power and energy produced from both the Falcon and Amistad Powerplants binds the contractors to amortize any unamortized cost of the Falcon facilities.

Discussion

The 14 mills/kWh rate has been in effect since August, 1, 1977, when it was approved by the Federal Power Commission. It was the intent of the contracting parties that this rate would remain in effect until the date of initial

electric service from the Amistad Powerplant or December 31, 1982, whichever occurs first. Since the completion of the Amistad Powerplant is expected to be within approximately 5 months after the expiration of the original contract and the amortization of the Falcon Project will be accomplished under the terms of the contract between the United States and the two cooperatives, STEC and MEC, development of a new rate is not warranted. Therefore, it is appropriate to confirm and approve the extension of the 14 mill/kWh rate for the interim period.

Other Issues

Regulatory Procedural Requirements

A. Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.), each agency, when required by 5 U.S.C. 553 to publish a final "rule," is further required to prepare and publish in the **Federal Register**, at the time of publication of the final rule, a final regulatory flexibility analysis. In this instance, the extension of the power rate on an interim basis relates to nonregulatory services provided by Western. Under 5 U.S.C. 601(2), rules of particular applicability relating to rates or services are not considered "rules" within the meaning of the act; therefore, Western believe that no flexibility analysis is required.

B. Environmental Evaluation

In compliance with the National Environmental Policy Act of 1969 (NEPA) and the Department of Energy (DOE) regulations published in the **Federal Register** on February 23, 1982 (47 FR 7976), Western has made a determination based on environmental consideration of the extension of the power rate on an interim basis that this action is not a significant action in the context of NEPA and that it will not lead to any significant environmental impacts.

C. Determination Under Executive Order 12291

The DOE has determined that this is not a major rule because it does not meet the criteria of section 1(b) of Executive Order 12291, 46 FR 13193 (February 19, 1981). Western has an exemption from sections 3, 4, and 7 of the Executive Order 12291.

Availability of Information

Information regarding this rate adjustment is available for public review in the Salt Lake City Area Office, Western Area Power Administration, 438 East 200 South, Suite 2, Salt Lake City, Utah 84111; in the Office of the Director, Division of Marketing and Rates, Western Area Power Administration, 1627 Cole Boulevard, Golden, Colorado 80401; and in the Office of Power Marketing Coordination, Department of Energy, 12th and Pennsylvania Avenue, NW., Washington, DC 20461.

Submission to the FERC

The rates herein confirmed, approved, and placed in effect on an interim basis, together with supporting documents, will be submitted to the FERC for confirmation and approval on a final basis.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective January 1, 1983, an extension of the current rate of 14 mills/kWh. This rate shall remain in effect on an interim basis until the date on which the Amistad Powerplant is ready to deliver power.

Issued at Washington, D.C., December 13, 1982.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

FEDERAL COMMUNICATIONS COMMISSION

[BC Docket No. 82-804, File No. BPCT-820721KI; et al.]

Payvision Communications, et al.; Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Payvision Communications, Biloxi, Mississippi; BC Docket No. 82-804, File No. BPCT-820721KI; the Hightower Partnership, Biloxi, Mississippi, BC Docket No. 82-05; File No. BPCT-820722KF; and Four-O, Inc., Gulfport, Mississippi; BC Docket No. 82-806, File No. BPCT-820729KG; for construction permit for a new television station.

Hearing Designation Order

Adopted: November 29, 1982.

Released: December 10, 1982.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Payvision Communications (Payvision), The Hightower Partnership (Hightower), and Four-O, Inc., (Four-O) for a new commercial television station to operate on Channel 25, Biloxi, Mississipi.[1]

2. Payvision and Hightower specify Biloxi as the city of license. Four-O, however, specifies Gulfport. Consequently, it will be necessary to determine, pursuant to Section 307(b) of the Communications Act of 1934, as amended, whether a new station in Biloxi or Gulfport would better provide a fair, efficient and equitable distribution of television service. If the Section 370(b) issue is not determinative (the applicants would serve substantial areas in common), all applicants can be considered under the comparative issue.

3. Payvision's application did not include Page 19, F.C.C. Form 301. This page contains Sections VI and VII of the Application for Construction Permit for a New Commercial Broadcast Station. It also contains the certification by the applicant that the information contained in the application is true and correct. The only portion of the application which was signed by one of Payvision's general partners was the certification of Payvisions's Equal Employment Opportunity statement. We believe that Payvision's consultant assumed that the signature certifying the EEO statement could be substituted for the signature required on Page 19. Since the Commission has previously allowed applicants to submit *nunc pro tunc* certifications [2], Payvision, accordingly, will be ordered to file a properly executed copy of this page with the Administrative Law Judge within 30 days of the release of this Order.

4. Applicants for new broadcast stations are required to give local notice of the filing of their applications, in accordance with § 73.3580 of the Commission's Rules. They must then file proof of such notice or certify that they have or will comply with the public notice requirement. We have no evidence, however, that Payvision has done either. If it has not already done so, Payvision will be required to file a statement that it has or will comply with the public notice requirement with the Administrative Law Judge within 30 days of the release of this Order.

5. No determination has been reached that the tower heights and locations proposed by Payvision and Four-O would not constitute a hazard to air navigation. Accordingly, an issue will be specfied.

6. There is a discrepancy between the azimuth of major lobes listed in Section V-C and the directional antenna pattern show in Exhibit E-1 of Hightower's application. Hightower will be required to submit the correct azimuth of major lobes to the Administrative Law Judge within 30 days of the release of this Order.

7. Section 73.636(a) of the Rules states that no license for a television broadcast station shall be granted to any party if such party directly or indirectly controls one or more AM or FM broadcast stations and the grant of such license will result in the Grade A contour of the proposed television station encompassing the entire community of

[1] Channel 25 is assigned to Biloxi, Mississippi. Gulfport, Mississippi is located within 15 miles of Biloxi. Accordingly, under Section 73.607 of the Commission's Rules, Channel 25 is available for use in Gulfport.

[2] See, e.g., *Communications Gaithersburg, Inc.*, 60 FCC 2d 537 (1976).

license of one or more of the radio stations. Zane D. Roden, Sr., Vice-President, Director and 33.75% stockholder in Four-O, is an Executive Vice-President, Director and 37% stockholder of E.O. Roden & Associates, Inc., Licensee of stations WTAM and WGCM-FM, Gulfport, Mississippi. He is also General Manager of WGCM-FM. Four-O has represented to the Commission that, in the event of a grant of its application, Mr. Roden will divest himself of his interest in the licensee of Stations WTAM and WGCM–FM. To ensure compliance with Section 73.636(a), any grant of a construction permit to Four-O will be conditioned upon the divestiture by Mr. Roden of all interest in, and connection with, WTAM and WGCM–FM.

8. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive television service of 64 dBu or greater intensity (Grade B), together with the availability of other primary television services in such areas, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accure to any of the applicants.

Conclusion and Order

9. Except as indicated by the matters set out below, the applicants are qualified to construct and operate as proposed. Since the proposals are mutually exclusive, however, they must be designated for hearing in a consolidated proceeding on the issues specified below.

10. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the areas and populations that would receive Grade B or better service from the proposals and the availability of other Grade B services to such areas and populations.

2. To determine, in light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would provide a fair, efficient and equitable distribution of television service.

3. In the event it is concluded from the foregoing issues that a choice among applicants should not be based solely on considerations relating to Section 307(b), to determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, with respect to Payvision Communications and Four-O Inc., whether there is a reasonable possibility that the tower height and location proposed by each would constitute a hazard to air navigation.

5. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

11. It is further ordered, That the Federal Aviation Administration is made a party respondent to this proceeding with respect to issue 4.

12. It is further ordered, That Payvision Communications shall, within 30 days of the release of this Order, submit a properly executed Page 19, F.C.C. Form 301, to the Administrative Law Judge.

13. It is further ordered, That Payvision Communications shall, within 30 days of the release of this Order, certify to the Administrative Law Judge that local notice of the filing of its application has or will be published.

14. It is further ordered, That The Hightower Partnership shall submit an amendment to its application correcting the discrepancy noted in paragraph six, above, to the Administrative Law Judge within 30 days of the release of this Order.

15. It is further ordered, That, in the event of a grant of Four-O, Inc's application, the construction permit shall be conditioned as follows:

Prior to the commencement of operation of the television station authorized herein, permittee shall certify to the Commission that Mr. Zane D. Roden, Sr. has divested himself of all interest in, and connection with, Stations WTAM and WGCM–FM, Gulfport, Mississippi.

16. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for hearing and to present evidence on the issues specified in this Order.

17. It is further ordered, That, the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

Memorandum Opinion and Order

Adopted: October 28, 1982.

Released: December 14, 1982.

1. The Commission has under consideration the Hearing Designation Order, 40 FR 1,326 (January 12, 1982), by the Chief, Broadcast Bureau (Bureau); Applications for Review filed on January 13, 1982, by Bay Area Community Television, Inc., (BACTV), and on January 15, 1982, by Redwood Television Ministries, Inc. (Redwood); Comments filed January 22, 1982, by the Bureau; Oppositions filed January 20 and 27, 1982, by Golden State Television, Inc. (Golden State); a Motion for Leave to file Supplement to Applications for Review and accompanying Supplement, filed on May 21, 1982, by Redwood and BACTV; an Opposition thereto filed June 3, 1982, by Golden State; Comments thereon filed June 3, 1982, by the Bureau; and a Transmission of Attachments to Opposition filed June 17, 1982, by Golden State. Also before the Commission is a Memorandum Opinion and Order (FCC 82M–2271, released July 23, 1982) by the presiding Judge in this proceeding, certifying questions to the Commission concerning whether issues should be designated to inquire into Golden State's Ownership and whether Golden State has kept the Commission

apprised of the facts and circumstances concerning its ownership.

2. *Background.* Golden State filed its application on January 30, 1979, the cut-off-date for Vallejo, California, applications. Section II, Table I of the application listed the owners and officers of Golden State as follows:

Name and interest or office held	Shares subscribed	Ownership percent
Helena H. Chen, President	16,150	9.5
Leo H. Chen, Exec.-Vice President	16,150	9.5
Ting Chai Liang	18,700	11.0
Nelson K. Chen, Secretary-Treasurer		
Recortec, Inc.		

No ownership interests were shown for either Nelson K. Chen or Recortec. In response to Section II, p. 2, q. 9, Golden State represented that none of its stock had been subscribed.

3. On June 18, 1979, after the cut-off-date, Golden State amended its application to reflect a different corporate ownership structure as follows:

Name	Shares (to be subscribed)	Ownership percent
Helena H. Chen	17,000	20
Leo H. Chen	17,000	20
Ting Chai Liang	17,000	20
James G. Freeman	17,000	20
Nelson K. Chen	5,666	6.66
Carson Chen	5,666	6.66
Han Y. Lee	5,666	6.66

The amendment indicated that none of Golden State's stock had been subscribed.

4. On October 12, 1979, golden State further amended its application to substitute two new stockholders for Ting Chai Liang, who was one of the original stockholders, as follows:

Name	Shares (to be subscribed)	Ownership percent
Helena H. Chen	17,000	20
Leo H. Chen	17,000	20
Nelson K. Chen	5,666	6.66
Carson Chen	5,666	6.66
Han Y. Lee	5,666	6.66
James G. Freeman	17,000	20
Christopher Hirose	8,500	10
Charlotte Hirose	8,500	10

(5) When the Bureau designated Golded State's application for hearing,[1] it recognized that the application did not fully disclose Golden State's ownership. The Bureau concluded, however, that the corporate structure set out in the original application never existed, and that Golden State's "true corporate structure was, and had always been, that shown in the June 1979 amendment." As a result, the Bureau found that the transfer of 20 percent of Golden State's stock, as reflected in the October 1979 amendment, did not effectuate a transfer of control and was only a minor change. The Bureau said that, although Golden State's applications was incomplete when filed, there was no basis for dismissal because Golden State perfected its application before processing and designation were completed.

(6) *The Applications for Review.* BACTV and Redwood argue that in addition to the attribution of ownership in the January 1979 application, Recortec and Nelson Chen were listed as officers, directors and stockholders in the newspaper notice published pursuant to Section 73.3580 of the Rules. They also note that Golden State did not account for 70 percent of its stock and they attribute that interest to Recortec and Nelson Chen. BACTV and Redwood assert that, if Recortec was originally a principal, Golden State's post-cut-off amendment constituted a transfer of control.[2] If Nelson Chen and Recortec were not principals in January 1979 as found by the Bureau, BACTV and Redwood argue that Golden State's application was incomplete and the Bureau improperly allowed it to allocate 70 percent of its stock 5 months after the cut-off-date. They also argue that under any permissible interpretation of the facts, there had to be a transfer of control, because the stockholders listed in the original filing held only 46.66 percent of the stock after the October 1979 amendment, while 5 new stockholders held 53.32 percent of Golden State.

(7) *The Bureau's Comments.* The Bureau argues that its conclusion in the Hearing Designation Order, that the corporate structure shown in the January 1979 application never existed, was necessary because of the confusion caused by the inconsistencies in that application. That conclusion was based on Golden State's claim that Recortec never intended to be a stockholder.[3] The Bureau insists that its action is consistent with sound policy considerations. It argues that dismissal of the application is a draconian remedy[4] which would deprive the Commission of an opportunity to have the widest comparative choice of applicants.[5] Moreover, it argues that in *Grace Missionary Baptist Church,* where the Commission considered a post-cut-off-date transfer of control, the Commission did not dismiss the offending application.[6]

8. *Subsequent Events.* On March 9, 10 and 11, 1982, Golden State's principals and former principals were deposed.[7] The depositions establish that Leo and Helena Chen held the controlling interest in Golden State when it filed its application;[8] that their ownership interests were diluted to 40% by the June 18 and October 12, 1979, amendments; and that 60% of Golden State's stock is now held by persons who did not have any ownership interest when the application was filed.[9] Relying on the foregoing, Redwood and BACTV submit that the uncertainty and confusion surrounding Golden State's ownership have now been resolved and that, accordingly, the relief requested in their previously filed applications for review should be granted; *i.e.,* the dismissal of Golden State's application because of a major change in ownership voluntarily effected after the cut-off-date. The Bureau, in its comments, acknowledges that its assumption in the Designation Order that Golden State's true corporate structure was, and had always been, as shown in the June 1979 amendment was incorrect. Accordingly, the Bureau now believes that Golden State's application should be dismissed, unless the post-cut-off amendments are withdrawn.

9. *Golden State's Arguments.* Golden State argues that the amendments did

[1] Hearing Designation Order (BC-1374), released January 8, 1982, by the Chief, Broadcast Bureau.

[2] The June 1979 amendment showed Nelson Chen with 6.66 percent of the stock. Thus, BACTV and Redwood argue that at least 63.34 percent of the stock was held by persons who did not have that stock at the time of the January 1979 filing.

[3] Comments in Opposition to Informal Objection, p. 2, filed August 31, 1979, by Golden State.

[4] *Radio Athens, Inc.* v. *FCC,* 401 F. 2d 398 (D.C. Cir. 1968).

[5] *Anax Broadcasting Inc.,* 87 FCC 2d 483 (1981).

[6] 80 FCC 2d 330 (1980). The applicant was allowed to withdraw the offending amendment.

[7] Relevant portions of the depositions were submitted with the Supplement to Applications for Review filed by Redwood and BACTV. The Supplement is not a pleading authorized by Section 1.115 of the Rules. It was, however, filed within 15 days after the depositions were made available to the parties, and the depositions clarify the confusion concerning Golden State's ownership which resulted from the omissions in its original application. Accordingly, good cause has been shown and we will grant the Motion to Accept Supplement to Applications for Review filed by Redwood and BACTV.

[8] Supplement to Applications for Review, filed May 21, 1982, Exhs. A and B (Depositions of Leo Chen, March 9, 1982 and Helena Chen, March 10, 1982).

[9] New stock ownerships are: Han Y. Lee, 6.66% (acquired on March 23, 1982); Carson Chen, 6.66% (acquired on April 20, 1979); Nelson K. Chen, 6.66% (acquired on April 27, 1979); James G. Freeman, 20% (acquired on June 15, 1979); and Christopher and Charlotte Hirose, 20% (acquired on September 14, 1979).

not effect a transfer of control because Leo and Helena Chen and their sons, Carson Chen and Nelson Chen, still hold more than 50% of the corporation's stock. Since all four members of the Chen family submitted affidavits asserting that they considered Golden State to be a family controlled corporation and that they will vote their stock as a family unit, and since Nelson Chen and Carson Chen also stated in their affidavits that it is their intent that their parents have control of the corporation, Golden State rationalizes that a transfer of control of the corporation has not taken place despite the amendments.

10. *Discussion.* Nelson Chen is 35 years old and independently employed.[10] Carson Chen is 33 years old, married, lives apart from his parents and is independently employed.[11] While their affidavits indicate an intent to insure family control over the corporation, the record establishes that Nelson Chen and Carson Chen are legally and financially independent from their parents, and that there are no legal or economic impediments to their exercising independent discretion in voting their stock.[12] Thus, Leo and Helena Chen can legally control only 40% of the stock of Golden State, and since 60% of the corporation's stock is held by persons not listed as shareholders in Golden State's original application, the amendments effectuated a post-cut-off transfer of control.

11. Section 73.3572(b) of the Commission's Rules provides that whenever amendments to an application effectuate a transfer of control, the application will be assigned a new file number and returned for processing as a new application. Here, because the amendments effectuating the transfer of control were filed after the cut-off-date for Vallijo, California, applications, strict adherence to Rule § 73.3572(b) would essentially remove Golden State's application from comparative consideration in this proceeding. However, it is well established that the Commission's procedural Rules should not be used to dismiss summarily applications where equity would warrant a different result.[13] Golden State filed its application almost three years before designation and its post-cut-off amendments were on file with the Commission for over a year and a half. During this period the Bureau raised no question concerning Golden State's corporate ownership and in designating this proceeding for hearing the Bureau rejected objections filed by Redwood and BACTV, allowing Golden State to proceed believing that there were no questions concerning its ownership.[14] These Broadcast Bureau actions give rise to significant equities which warrant permitting Golden State to avoid dismissal at this late date. Consequently, we will give Golden State 10 days from the release date of this Memorandum Opinion and Order to further amend its application so that control of Golden State will be held by those persons listed as stockholders in Golden State's application on January 30, 1979, or suffer the dismissal of its application.[15] Moreover, having concluded that Golden State's application did not fully apprise the Commission of its structure we will also designate a hearing issue concerning Golden State's compliance with Section 73.3514 of the Rules and the impact of any violation of that Rule on its basic and/or comparative qualifications to be a licensee.[16] The Commissiom is concerned about th acceptance criteria being employed by the Broadcast Bureau, and notice is given that the Commission is reexamining the standards to be employed in accepting applications for filing.

12. Accordingly, it is ordered, That the Motion for Leave to File Supplement to Applications for Review, filed jointly on May 21, 1982, by Bay Area Community Television, Inc. and Redwood Television Ministries, Inc., is granted.

13. It is further ordered, That the Applications for Review, filed on January 13, 1982, by Bay Area Community Television, Inc., and on January 15, 1982, by Redwood Televison Ministries, Inc., and as supplemented on May 21 ,1982 are granted to the extent indicated herein and in all other respects are denied.

14. It is further ordered, That Golden State Television, Inc., is granted leave to further amend its application pursuant to paragraph 11, *supra*, within 10 days from the release date of this Memorandum Opinion and Order, but, if its does not do so, the presiding Administrative Law Judge is authorized to dismiss Golden State Television, Inc.'s application.[17]

15. It is further ordered, That the hearing issues in this proceeding are enlarged to include the following:

(a) To determine the facts concerning the ownership of Goldern State Television, Inc., as they existed on the application cut-off date in this proceeding.

(b) To determine in light of the facts adduced pursuant to (a) above, whether Golden State Television, Inc., violated § 73.3514 of the Rules, and if so, the effect thereof on its basic and/or comparative qualifications to be a Commission licensee.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

[BC Docket No. 82-802, File No. BPCT-820721KH and BC Docket No. 82-803, File No. BPCT-820810KH]

Norman E. Parkhurst Rodriquez and Mari Rosa Valderas d.b.a. Interamerican Broadcasting Co. and Amilcar Gandia, for Construction Permit; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: November 29, 1982.

Released: December 10, 1982.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it the above captioned mutually exclusive applications of Norman E. Parkhurst Rodriquez and Mari Rosa Valderas d.b.a. Interamerican Broadcasting Co. (Interamerican) and Amilcar Gandia for authority to construct a new commercial television station on Channel 20, Ponce, Puerto Rico.

2. The effective rádiated visual power, antenna heights above average terrain and other technical data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would be served by each of the proposals Consequently, for the purpose of comparison, the areas and populations which would be within the predicted 64

[14] Had the Bureau recognized that the amendments effectuated a major change, it would have granted Golden State an opportunity to withdraw its amendments prior to suffering an assignment of a new file number and dismissal of its application. *See Grace Missionary Baptist Church*, 80 FCC 2d 330, 337 (1980).

[15] *Cf. Grace Missionary Baptist Church, supra* at 337–38.

[16] In view of our holdings herein, the questions raised by the ALJ's certification (FCC 28M–2271, released July 23, 1982) are mooted.

[17] In the interest of administrative efficiency, we are authorizing the ALJ to dismiss Golden State's application in the event it does not comply with this Memorandum Opinion and Order, rather than to require the application to be returned to the processing line for assignment of a new file number and other appropriate action in accordance with § 73.3572(b).

dBu (Grade B) contours, together with the availability of other television service of 64 dBu Grade B or greater intensity, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to one of the applicants.

Amilcar Gandia

3. The applicant's proposed antenna is to be mounted on the exiting AM tower of station WZBS, Ponce, Puerto Rico. Therefore, in order to insure that the AM pattern will not be adversely affected, a grant of this application will be appropriately conditioned.

4. The applicant specifies overall height above average terrain (HAAT) of 104 feet, but its exhibits show minus 329 feet. Consequently, the applicant will be required to submit the correct figure for the overall height above average terrain within 20 days of the release of this Order.

Conclusion and Order

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since these applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

6. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine which of the proposals would, on a comparative basis, better serve the public interest.

2. To determine, in light of the evidence adduced pursuant to the foregoing issue, which of the applications should be granted.

7. It is further ordered, That grant of a construction permit to Amilcar Gandia will be subject to the following condition:

During installation of the TV antenna, AM station *WZBS* shall determine operating power by the indirect method. Upon completion of the installation, antenna impedance measurements of the AM antenna shall be made. The results shall be submitted to the Commission, along with a tower sketch of the installation, in an application for the AM station to return to the direct method of power determination. Thereafter, the TV station may commence *Limited Program Tests.*

8. It is further ordered, That within 20 days of the release of this Order, Amilcar Gandia shall submit the correct figure for its overall height above average terrain.

9. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

10. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

December 14, 1982.

Background

When executive departments and independent agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 U.S.C. Chapter 35). Departments and agencies use a number of techniques to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibilities under the act also considers comments on the forms and recordkeeping requirements that will affect the public. Reporting or record-keeping requirements that appear to raise no significant issues are approved promptly. OmB's usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

List of Forms Under Review

Immediately following the submission of a request by the Federal Reserve for OMB approval of a reporting or recordkeeping requirement, a description of the report is published in the **Federal Register.** This information contains the name and telephone number of the Federal Reserve Board clearance officer (from whom a copy of the form and supporting documents is available). The entries are grouped by type of submission—i.e., new forms, revisions, extensions (burden change), extensions (no change), and reinstatements.

Copies of the proposed forms and supporting documents may be obtained from the Federal Reserve Board clearance officer whose name, address, and telephone number appear below. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-3829)

OMB Reviewer—Richard Sheppard—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202-395-6880)

Request for Extension Without Revisions

1. Report title: Bank Holding Company Financial Supplement—
Agency form number: FR Y-9
Frequency: annual; semi-annual depending on who is filing.
Reporters: bank holding companies
SIC Code: 671
Small businesses are not affected.
General description of report:
Respondent's obligation to respond is mandatory (12 U.S.C. 1844); a pledge of confidentiality is not promised.

Report completed annually by bank holding companies (BHC's) having assets exceeding $50 million and semi-annually by BHC's having assets exceeding $300 million. All of the BHC's submit parent-only financial statements and those having assets exceeding $100 million file consolidated financial statements. The report is used for monitoring and surveillance purposes and to analyze the condition of the holding company and its banks.

Board of Governors of the Federal System, December 15, 1982.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Ballston Spa Bancorp, Inc., et al.; Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Ballston Spa Bancorp, Inc.*, Ballsonn Spa, New York; to become a bank holding company by acquiring 80 percent of the voting shares of Ballston Spa National Bank, Ballston Spa, New York. Comments on this application must be received not later than January 13, 1983.

2. *Ultra Bancorporation*, Bridgewater, New Jersey; to become a bank holding company by acquiring 100 percent of the voting shares of the successor by merger to First National Bank of Central New Jersey, Bridgewater, New Jersey. Comments on this application must be received not later than January 13, 1893.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Peoria Corp.*, Peoria, Illinois; to become a bank holding company by acquiring at least 80 percent of the voting shares of The First National Bank of Peoria, Peoria, Illinois; and at least 80 percent of the voting shares of First National Bank of Metamora, Metamora, Illinois. Comments on this application must be received not later than January 13, 1983.

C. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480

1. *Duke Financial Group, Inc.*, St. Paul, Minnesota; to become a bank holding company by acquiring 87.46 percent of the voting shares of State Bank of New Prague, New Prague, Minnesota. Comments on this application must be received not later than January 13, 1983.

D. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Bassett Investment Co.*, Bassett, Nebraska; to become a bank holding company by acquiring 83.8 percent of the voting shares of Commercial Bank, Bassett, Nebraska. Comments on this application must be received not later than January 31, 1983.

E. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Fergus Falls Bancshares, Inc.*, Fergus Falls, Minnesota; to become a bank holding company by acquiring 94.1 percent of the voting shares of Security State Bank of Fergus Falls, Fergus Falls, Minnesota. This application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Comments on this application must be received not later than January 13, 1983.

2. *Security Shares, Inc.*, Abilene, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of Security State Bank, Abilene, Texas. This application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Comments on this application must be received not later than January 13, 1983.

Board of Governors of the Federal Reserve System, December 15, 1982.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank South Corp.; Proposed Acquisition of Bank South Mortgage Corp.

Bank South Corporation, Atlanta, Georgia, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C 1843(c)(8)), and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Bank South Mortgage Corporation, Atlanta, Georgia.

Applicant states that the proposed subsidiary would engage in the activities of generating marketable permanent mortgage loans and interim loans for sale to investors, and servicing such loans. These activities would be performed from offices of Applicant's subsidiary in Atlanta, Albany, Brunswick, Columbus, Mableton, Rome, Savannah, Valdosta, Marietta, and Newnan, Georgia and the geographic area to be served is the State of Georgia. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonable be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than January 12, 1983.

Board of Governors of the Federal Reserve System, December 15, 1982.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 82-34524 Filed 12-20-82; 8:45 am]

BILLING CODE 6210-01-M

Barclays Bank PLC et al.; Bank Holding Companies; Proposed de Novo Nonbank Activities

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo*, directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank PLC*, and its subsidiary, Barclays Bank International Limited, each a bank holding company whose principal office is in London, England (consumer finance and insurance activities; Lexington, Kentucky): To engage through their subsidiaries, BarclaysAmerican Corporation, Charlotte, North Carolina, and BarclaysAmerican/Financial of Kentucky, Inc. in making direct consumer loans, including loans secured by real estate, and purchasing sales finance contracts representing extensions of credit such as would be made or acquired by a consumer finance company, and wholesale financing (floor planning) and acting as agent for the sale of related credit life, credit accident and health and credit property insurance. Credit life and credit accident and health insurance sold as agent may be underwritten or reinsured by BAC's insurance underwriting subsidiaries. These activities would be conducted from an office of BarclaysAmerican/Financial of Kentucky, located in Lexington, Kentucky, serving customers in Lexington and surrounding areas in Kentucky. Comments on this application must be received not later than January 13, 1983.

2. *Citicorp*, New York New York (consumer finance and insurance activities; Indiana and Tennessee): To expand the activities and service area of an existing office of its subsidiary, Citicorp Acceptance Company, Inc., located in Louisville, Kentucky. The new activities in which the office proposes to engage *de novo* are: the sale of credit related life and accident and health or decreasing or level (in the case of single payment loans) term life insurance by licensed agents or brokers, as required; and the servicing, for any person, of loans and other extensions of credit. In addition, the office proposes to broaden its previously approved activities to include the extension of loans for the financing of inventory (floor planning) and working capital purposes and the purchasing and servicing for its own account of sales finance contracts with regard to all types of dealers and all types of consumer installment paper. The proposed expanded service area for all the aforementioned activities shall be comprised of the entire states of Kentucky, West Virginia, Indiana and Tennessee. Credit related life, accident, and health insurance may be written by Family Guardian Life Insurance Company, an affiliate of Citicorp Acceptance Company, Inc. Comments on this application must be received not later than January 13, 1983.

3. *Societe Generale*, ("Societe Generale"), Paris, France (commercial lending and leasing activities; California, Oregon, Washington, Nevada, and Arizona): To engage through de novo office of Sogelease Corporation in making or acquiring, for its own account or for the account of others, commercial loans and other extensions of credit; and leasing personal or real property or acting as agent, broker or advisor in leasing such property and servicing such leases, subject to all the qualifications specified in 12 CFR 225.4 (a) and (b), where the leases serve as the functional equivalent of an extension of credit to the lessee of the property. Such activities would be conducted from an office in San Francisco, California serving California, Oregon, Washington, Nevada, and Arizona. Comments on this application must be received not later than January 13, 1983.

B. **Federal Reserve Bank of Richmand** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First & Merchants Corporation*, Richmond, Virginia (insurance activities; Commonwealth of Virginia): To engage, through its wholly-owned subsidiary, Secutrity Atlantic Insurance Agency, Inc., in acting as insurance agent or broker with respect to the following types of insurance: the sale of credit life, credit disability, mortgage redemption and mortgage cancellation insurance in connection with extensions of credit by First & Merchants National Bank (Bank), a wholly-owned subsidiary of the holding company, and any of Bank's subsidiaries; and the sale of vendors single interest physical damage insurance for motor vehicles, mobile homes, motor homes, boats, trailers and other kinds of personal property, or attachments designed for use in connection therewith, securing loans and other extensions of credit by Bank. The activities covered by this proposal would be conducted through the offices of Bank and its subsidiaries serving the cities of Roanoke, Salem, Staunton, Portsmouth, Chesapeake, Virginia Beach, Danville, Colonial Heights, Hopewell, Petersburg, Bedford, Alexandria, Fairfax, Falls Church, Hampton, Poquoson, and Williamsburg, Virginia; and the counties of Roanoke, Augusta, Dinwiddie, Prince George, Chesterfield, Pittsylvania, Bedford, Campbell, Amherst, Loudoun, Prince William, York, James City, Henrico, and Hanover, Virginia. Comments on this application must be received not later than January 11, 1983.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *First National of Nebraska, Inc.*, Omaha, Nebraska (industrial banking; Nebraska): To engage, through its subsidiary, First of Omaha Savings Company, in operation an industrial bank as authorized by Nebraska Law, including issuing certificates of indebtedness and making and acquiring loans and other extensions of credit such as would be made by an industrial bank from offices in Omaha, Nebraska, serving the City of Omaha and Douglas County. Comments on this application must be received not later than January 13, 1983.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Alaska Pacific Bancorporation*, Anchorage, Alaska (mortgage financing and loan servicing activities; Alaska and Washington): To engage through its subsidiary, Alaska Pacific Mortgage Company, in mortgage financing and loan servicing activities. These activities would be conducted from offices in Anchorage, Alaska, serving the States of Alaska and Washington. Comments on this application must be received not later January 13, 1983.

2. *Rainier Bancorporation*, Seattle, Washington (investments to promote

community welfare; Washington): To expand the geographic scope and to continue to engage through its indirect subsidiary, Rainier Community Service Corporation, in the activities of making equity and debt investments in corporations or projects designed primarily to promote community welfare, such as the economic rehabilitation and development of low-income areas. These activities will be conducted from an existing office located in Seattle, Washington, serving the entire State of Washington. Comments on this application must be received not later than January 13, 1983.

3. *U.S. Bancorp*, Portland, Oregon (consumer finance and credit-related insurance activities; Washington): To open a *de novo* office of its wholly owned subsidiary, U.S. Bancorp Mortgage Company ("Bancorp Mortgage"). Bancorp Mortgage will engage in the making, acquiring and servicing of loans and other extensions of credit, either secured or unsecured, for its own account or for the account of others, including, but not limited to loans and other extensions of credit secured by mortgages or deeds of trust on real property, and to act as insurance agent with regard to credit life and disability insurance solely in connection with extensions of credit by Bancorp Mortgage. Bancorp Mortgage's activities will be performed from an office in Spokane, Washington, serving the city of Spokane and the surrounding rural area. Comments on this application must be received not later than January 12, 1983.

4. *U.S. Bancorp*, Portland, Oregon (consumer finance and credit-related insurance activities; Washington): To open a *de novo* office of its wholly owned susidiary, U.S. Bancorp Mortgage Company ("Bancorp Mortgage"). Bancorp Mortgage will engage in the making, acquiring and servicing of loans and other extensions of credit, either secured or unsecured, for its own account or for the account of others, including, but not limited to loans and other extensions of credit secured by mortgages or deeds of trust on real property, and to act as insurance agent with regard to credit life and disability insurance solely in connection with extensions of credit by Bancorp Mortgage. Bancorp Mortgage's activities will be performed from an office in Bellevue, Washington, serving the city of Bellevue and the surrounding rural area. Comments on this application must be received not later than January 12, 1983.

Board of Governors of the Federal Reserve System, December 15, 1982.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Chase Manhattan Bank, N.A.; Corporation To Do Business

An application has been submitted for the Board's approval of the organization of a corporation to do business under section 25(a) of the Federal Reserve Act ("Edge Corporation"), to be known as Chase Manhattan Capital Markets International, Newark, Delaware. Chase Manhattan Capital Markets International would operate as a subsidiary of Chase Manhattan Capital Markets (Holdings) Inc., which, in turn is a subsidiary of The Chase Manhattan Bank, N.A., New York, New York. The factors that are considered in acting on the application are set forth in § 211.4(a) of the Board's Regulation K (12 CFR 211.4(a)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of New York. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received not later than January 12, 1983. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identify specifically any questions of fact that are in dispute and summarize the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, December 15, 1982.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

First Community Bancorp, Inc., et al.; Acquisition of Bank Shares by Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Community Bancorp, Inc.*, Rockford, Illinois; to acquire 80 percent or more of the voting shares or assets of The Guaranty National Bank of Rockford, Rockford, Illinois. Comments on this application must be received not later than January 10, 1983.

2. *Middle State Bancorporation, Inc.*, East Moline, Illinois; to acquire 9.22 percent of the voting shares or assets of Colona Avenue State Bank, East Moline, Illinois. Comments on this application must be received not later than January 11, 1983.

3. *Northern Trust Corporation*, Chicago, Illinois; to acquire 100 percent of the voting shares (less directors' qualifying shares) of Northern Trust Bank of Florida/Palm Beach National Association, Palm Beach, Florida, which will merge with Security Trust Company of Palm Beach, Palm Beach, Florida. Comments on this application must be received not later than January 12, 1983.

4. *Northern Trust Corporation*, Chicago, Illinois; to acquire 100 percent, less directors' qualifying shares of the voting shares of Northern Trust Bank of Florida/Naples National Association, Naples, Florida, which will merge with Security Trust Company of Naples, Naples, Florida. Comments on this application must be received not later than January 12, 1983.

B. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Allied Bancshares, Inc.*, Houston, Texas; to acquire 100 percent of the voting shares or assets of Citizens National Bank of Beaumont, Beaumont, Texas. Comments on this application must be received not later than January 13, 1983.

2. *RepublicBank Corporation*, Dallas, Texas; to acquire 100 percent of the voting shares or assets of Texas National Bank of Midland, Midland, Texas. Comments on this application

must be received not later than January 13, 1983.

3. *Southwest Bancshares, Inc.*, Houston, Texas; to acquire 100 percent of the voting shares or assets of State National Bank, Odessa, Texas, Odessa, Texas. Comments on this application must be received not later than January 13, 1983.

C. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Fourth Financial Corporation*, Wichita, Kansas; to acquire 24.98 percent of the voting shares and 100 percent of the nonvoting preferred stock of Pittsburg Bancshares, Inc., Pittsburg, Kansas, and indirectly, The National Bank of Pittsburg, Pittsburg, Kansas. This application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas. Comments on this application must be received not later than January 13, 1983.

Board of Governors of the Federal Reserve System, December 15, 1982.

James McAfee,

Associate Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

National Archives and Records Service

National Archives Advisory Council; Renewal

Renewal of Advisory Committee. This notice is published in accordance with the provisions of section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), and advises of the renewal of the National Archives Advisory Council. The Administrator of General Services has determined that renewal of this advisory committee is in the public interest to ensure that the archival program is responsive to public needs and interests.

Designation. National Archives Advisory Council.

Purpose. The committee advises the Archivist of the United States on policies, procedures, programs, objectives, and other matters relating to the effectiveness of the National Archives and Records Service program.

Issued in Washington, D.C. on December 14, 1982.

Ray Kline,

Deputy Administrator of General Services.

BILLING CODE 6820-34-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

National Institute for Occupational Safety and Health; Musculoskeletal Disorders; Request for Information

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice of request for information.

SUMMARY: NIOSH is seeking information on musculoskeletal disorders involving the lower extremities (i.e., hip, knee, ankle, foot) occurring in workers. The information may be in the form of case studies or incidence data collected for a given job/occupation, descriptions of apparent risk factors for a given occupation, and examples of tool/work methods redesign for preventing lower extremity disorders. This information will be used by NIOSH to develop research projects for evaluation and control of these disorders.

DATES: Comments concerning this notice should be submitted by February 22, 1983.

ADDRESS: Comments should be submitted in writing to Dr. Vernon Putz-Anderson, Chief, Psychophysiology and Biomechanics Section, Applied Psychology and Ergonomics Branch, Division of Biomedical and Behavioral Science (C-24) NIOSH, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Frederick or Dr. Donald Badger, Project Officers, (513) 684-8383.

SUPPLEMENTARY INFORMATION: Under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651, et seq), NIOSH conducts research to develop recommendations for new and improved occupational safety and health procedures. NIOSH is currently collecting information pertaining to musculoskeletal disorders of the lower extremities (hip, knee, ankle, and foot) and information on static or constrained work postures which may contribute to these musculoskeletal strains or disorders. NIOSH is particularly interested in obtaining the following information:

1. Identification of job-related musculoskeletal strains and disorders of the lower extremities including any statistical data on incidence, risk factors, and preventive measures. Identify sources and availability of data.

2. What static of constrained work postures contribute to the development of musculoskeletal strains and disorders? This includes statistical data on incidence, risk factors, and preventive measures, along with sources and availability of data.

3. What sources of information such as case studies, accident/injury records, and epidemiology studies are currently available? What studies are being conducted or contemplated?

4. What pattern of work tasks are considered to have the most potential for the development of musculoskeletal disorders of the lower extremities? What postures for what period of time are associated with an increased risk of developing these strains or disorders?

5. What procedures have been developed, or are being used, to prevent or counteract these problems? Which of these are effective? Please describe in full detail.

All information received in response to this notice, except that designated as trade secret and protected by section 15 of the Occupational Safety and Health Act, will be available for public examination and copying at the above address.

Date: December 13, 1982.

J. Donald Millar,

Director, National Institute for Occupational Safety and Health.

BILLING CODE 4160-19-M

Food and Drug Administration

Prince AGRI Products; Iron Injectable; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) sponsored by Prince Agri Products, Inc., providing for use of Iron Injectable in baby pigs for prevention and treatment of iron deficiency anemia. The firm requested withdrawal of approval.

EFFECTIVE DATE: January 3, 1983.

FOR FURTHER INFORMATION CONTACT: Howard Meyers, Bureau of Veterinary Medicine (HFV-218), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4093.

SUPPLEMENTARY INFORMATION: Prince Agri Products, Inc., 8800 E. 63d St., Kansas City, MO 64133, is the current sponsor of NADA 033-070 which provides for intramuscular use of a colloidal ferric oxide injection in baby pigs for prevention and treatment of iron deficiency anemia.

The product, originally sponsored by Corn King Co., Cedar Rapids, IA, became effective August 5, 1966. In their submission of June 18, 1982, to the Bureau of Veterinary Medicine, Prince Agri Products requested withdrawal of approval of the NADA because the product is not being marketed. Approval of this NADA had not been codified in the Code of Federal Regulations.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84) and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 033–070 and all supplements for Prince Agri Products' Iron Injectable is hereby withdrawn, effective January 3, 1983.

Dated: December 14, 1982.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

National Park Service

Chesapeake and Ohio Canal National Historical Park; Maryland, West Virginia and District of Columbia

AGENCY: National Park Service, Interior.

ACTION: Notice of revision of park boundary.

SUPPLEMENTARY INFORMATION: For the proper management and development of the Chesapeake and Ohio Canal National Historical Park, it is necessary to modify the boundary to conform to the realignment of Maryland State Route 34 which will require the addition of one tract of land, comprising 3.16 acres hereinafter described. Paragraph 5 of Pub. L. 95–42, approved June 10, 1977, 91 Stat. 211, 16 U.S.C. sec. 460l–9, authorizes such a boundary modification.

Notice is given that the boundary of the Chesapeake and Ohio Canal National Historical Park has been revised pursuant to the above act, to include a 3.16 acre parcel of land lying on the northerly right-of-way line of Maryland State Route 34 in the First Election District, Washington County, Maryland. This parcel of land is depicted as Tract P–1 on Land Status Map numbered 412/35004, Segment 31, dated June 1971 prepared by L. Robert Kimball, Consulting Engineers, Ebensburg Pennsylvania, under contract with the National Park Service.

The map is on file and available for inspection in the administrative office of the Chesapeake and Ohio Canal National Historical Park, Sharpsburg, Maryland, 21782; in the office of the National Capital Region, 1100 Ohio Drive, SW., Washington, D.C. 20242; and in the office of the National Park Service, Department of the Interior, 18th and C Streets, Washington, D.C. 20240.

Dated: November 19, 1982.

Manus J. Fish, Jr.,

Regional Director, National Capital Region.

[Redelegation of Authority 41.8.1]

Director, Office of Commodity Management; Redelegation of Authority Regarding Furnishing of Commodities

Pursuant to the authority delegated to me by Redelegation of Authority No. 41.8, dated January 22, 1982 (47 FR 7346), from the Assistant to the Administrator for Management, I hereby redelegate to the Director, Office of Commodity Management the following authorities:

1. Authority to execute transfer or transfer/trust agreements with respect to the furnishing of commodities to international organizations having a membership consisting primarily of foreign governments, to the American Red Cross, and to voluntary nonprofit agencies registered with and approved by the Agency for International Development [1] pursuant to determinations made under section 607(a) of the Foreign Assistant Act of 1961, as amended (the Act);

2. Authority to make the determinations prescribed in section 607(c) [2] of the Act.

The authorities herein redelegated to the Director, Office of Commodity Management, may be exercised by duly authorized persons who are performing the functions of the Director in an "acting" capacity.

Only the authority to make the determinations prescribed in section 607(c) of the Act may be redelegated by the Director.

This Redelegation of Authority amends and supersedes Redelegation of Authority No. 41.8.1 dated April 22, 1982 (47 FR 21931).

This Redelegation of Authority shall be effective immediately.

Dated: December 6, 1982.

John F. Owens,

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other then household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an

[1] Section 607(b) of the Foreign Assistance Act of 1961, as amended, was redesignated as section 607(c) by an amendment in 1978 (92 Stat. 959).

[1] The reference in the Act to the Agency for International Development was substituted in lieu of a reference to the Advisory Committee on Voluntary Foreign Aid by amendment in 1979 (93 Stat. 366).

[2] Section 607(b) of the Act was redesignated as Section 607(c) by amendment in 1978 (92 Stat. 959).

application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effecitve notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract." Please direct status inquiries to Team 1, (202) 275–7992.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 82–34536 Filed 12–20–82; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice: See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922 (c) (2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries to Team One at (202) 275–7992.

Volume No. OP1–229

Decided: December 14, 1982.

By the Commission, Review Board No. 1. Members Parker, Chandler, and Fortier.

W–1310 (Sub-2), filed December 1, 1982. Applicant: PADELFORD PACKET BOAT CO., INC., Harriet Island, St. Paul, MN 55107. Representative: Andrew R. Clark, 1600 TCF Tower, Minneapolis, MN 55402, (602) 333–1341. As a *water carrier* in connection with the transportation of *passengers and their*

baggage by the use of self-propelled vessels, between points on the Mississippi River and coastal ports in FL and the Florida Keys.

MC 134781 (Sub-8), filed December 7, 1982. Applicant: FAST FREIGHT TRANSFER, INC., P.O. Box 2163, Hialeah, FL 33012. Representative: Clayton R. Byrd, 2870 Briarglen Drive, Doraville, GA 30340, (404) 491–1696. Transporting general commodities (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with K Mart Corporation, of Troy, MI.

Motor Carriers; Permanent Authority Applications; Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register**.

An original and one copy of petition for leave to intervene must be filed with the Commission within 30 days after the date of this **Federal Register** notice addressing specifically the issue(s) indicated as the purpose for republication.

Agatha L. Mergenovich,
Secretary.

MC 149565 (Sub-3) (Republication), filed April 12, 1982, published in the **Federal Register** issue of May 6, 1982. Applicant: G. L. DUNPHY & SON, INC., Box 2350, North Anson, ME 04958. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., Arlington, VA 22210. A Decision of the Commission, Review Board 3, decided August 23, 1982, and served September 14, 1982, finds that the performance by applicant of the service described herein to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities*, between Kansas, Windsor, Ashmore, and Tower Hill, IL, Huntertown, Wallen, Laotto, Swan, Avilla, Gadsden, Toto, Tefft, Charlottesville, Greenfield, Philadelphia, Gem, Cumberland, Hebron, Denham, Plainfield, Clayton, Amo, Coatesville, Fillmore, Pennville, West Cambridge City, Hillsboro, Waynetown, and Covington IN, Buzzards Bay, Sagamore, Sandwich, and Ludlow, MA, Clinton, Tekonsha, Homer, Concord, Spring Arbor, Centreville, Nottawa, Fairfax, Colon, Sherwood, and Union City, MI, Elm, Mt. Hope, Vernon, Rudeville, Highland Lakes, Blairstown, Marksboro, Greendell, Cranberry Lake, Lake Lackawanna, Pompton Plains, Pemberton, and Ft. Dix, NJ, New Milford, Rosendale, High Falls, Rifton, Tillson, Williamsville, Gardiner, Modena, Lee, Blossvale, Lima, Malone, Constable, Trout River, Leicester, LaGrange, Groveland, Mt. Morris, Sonyea, Linden, Oneida Castle, Red Oaks Mill, Fishkill Plains, St. Andrew, Plattekill, Ilion, and Stafford, NY, Berwick, Ellis, Dresden, Cadix, Patterson, Grant, Lisbon, Westerville, Galena, Sunbury, Centerburg, Bangs, Mount Liberty, Millwood, Phalanx, Garrettsville, Piney Fork, Pekin, Paris, Amsterdam, Wolf Run, Pattersonville, Augusta, Mechanicstown, Bergholz, Harrod, White Cottage, Moxahala Park, Roseville, Hepburn, Meeker, Big Island, New Lexington, Savona, Fort Jefferson, Germantown, Farmersville, Ingomar, West Alexandria, Trotwood, Brookville, Bachman, West Sonora, Eldorado, Glass Rock, Mt. Perry, Fultonham, East Fultonham, and Crooksville, OH, and Heilwood, Mountain Home, Spring City, Seiple, Strawberry Ridge, Eyers Grove, Pulaski, Upland, Carlton, Dimeling, Madera, Potts Run, Nanty Gol, Lilly, Alexandria, Mount Pleasant, Hepburnville, Woodland Park, Cochranton, Utica, Niles, New Providence, Garland, Pittsfield, Youngsville, Irvine, Starbrick, Waterford, Union City, Beaver Dam, Elgin, Spring Creek, Greason, Audubon, Newville, Oadville, Cornwall, Northwood, Vail, Bald Eagle, Port Matilda, Julian, Unionville, Wingate, South Bradford, Degolia, Custer City, Lewis Run, and Slatington, PA, on the one hand, and, on the other, points in the Unied States; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. CONDITIONS: To the extent that the authority granted embraces classes A and B explosives, it shall be limited in point of time to a period expiring 5 years from the effective date of the certificate; and issuance of a certificate in this proceeding is conditioned upon applicant certifying to the Commission, prior to commencing operations, that all rail service has actually terminated at specified points. The certification should be sent to the Deputy Director, Section of Operating Rights, Interstate Commerce Commission, Washington, DC 20423. The purpose of this republication is to give notice to those parties who have relied on the previous notice in the **Federal Register** of the application as published and may have an interest in, and would be prejudiced by the lack of proper notice to the authority granted to the extent it authorizes classes A and B explosives, household goods and service to Alaska and Hawaii.

MC 152914 (Sub-3) (republication), filed June 1, 1982, published in the **Federal Register** issue of June 25, 1982,

and republished this issue. Applicant: STATEWAY TRUCKING, INC., 2025 So. Morgan St., Chicago, IL 60608. Representative: Rick A. Rude, Suite 611, 1730 Rhode Island Ave., NW., Washington, DC 20036, (202) 223–5900. A decision of the Commission, Review Board 2, decided August 31, 1982, and served September 15, 1982, finds that the performance by the applicant of the service described herein to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *general commodities* (except household goods and classes A and B explosives), between Buckley and Enumclaw, WA, Big Sandy, Lacy, Series, Hornsby, Deanberg, Parkburg, and Silverton, TN, DeWalt and Herbert, TX, Ragan, Huntley, and Irvington, NE, Hunter, Salt Fork, LaMont, Eddy, Peckham, Middleton, and Simpson, OK, West Grove, Bloomfield, and Carbon, IA, Ehrhardt and Lodge, SC, Oakdale, MN, Davidson and Fordsville, KY, Waverly, FL, Kentmeer, DE, Ludlow, Randolph, and Newton Highlands, MA, Avondale, Elsonor, Eden Park, and Whitehall, OH, Centerville, Colon, Fairfax, Union City, Homer, Concord, Tekonsha, and Spring Arbor, MI, Rochester, Berry, Edinberg, Sharpsburg, Lakewood, Millersville, Beecher City, Iola, Louis, Windsor, Gays, Ashmore, Kansas, and Dudley, IL, Thorne, Cumberland, Gem, Greenfield, Charlottesville, Alysworth, Kouts, Hebron, Palmer, Leroy, Wallen, Huntertown, La Otto, Rupel, San Pierre, and Tefft, IN, Hepburnville, Earnst, Ironsides, Port Indian, and Betzwood, PA, Williamsville, Pittsford, Lima, Honeoye Falls, Woodbine, Aqueduct, E. Walden, Modena, Clintondale, Chauncey, Elmsford, and Eastview, NY, Finderne, E. Long Beach, Pompton West and Pompton Lakes, NJ, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii); that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. Condition: The certificate to be issued in this proceeding, to the extent it authorizes the transportation of classes A and B explosives, shall be limited in point of time to a period expirng five (5) years from the date of issuance. The purpose of the republication is to give notice to those parties who have relied on the previous notice in the **Federal Register** of the application as published and may have an interest in, and would be projudiced by the lack of proper notice to the authority granted.

MC 162355 (republication) filed June 7, 1982, published in the **Federal Register** issue of June 28, 1982. Applicant: UNIVERSAL INDUSTRIAL SERVICES, INC., 620 Wilbur Ave., Antioch, CA 94509. Representative: Elvis Lawhorn (same address as applicant), (415) 778–4430. A Decision of the Commission, Review Board 2, decided August 18, 1982 and served August 24, 1982, finds that the performance by applicant of the service will serve a useful public purpose, responsive to a public demand or need to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *hazardous materials,* between points in California, on the one hand, and, on the other, points in Owyhee County, ID, Union County, AR, and Washoe County, NV: That applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. Condition: The Certificate granted in this proceeding shall expire 5 years from its date of issuance. The purpose of this republication is to indicate that applicant is a common carrier.

BILLING CODE 7035-01-M

[Volume No. 317]

Motor Carriers; Permanent Authority Decisions; Restriction Removals

Decided: December 15, 1982.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings,

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Shaffer, Williams, and Higgins.

Agatha L. Mergenovich,

Secretary.

MC 40896 (Sub-2)X, filed November 8, 1982. Applicant: RUTGERS EXPRESS, INC., 6 Connerty Court, East Brunswick, NJ 08816. Representative: George A. Oslen, P.O. Box 357, Gladstone, NJ 07934. BILLING CODE 7035-01-M

[Section 5b Application No. 7]

Railroads Per Diem, Mileage, Demurrage and Storage Agreement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of extension of time to file comments.

SUMMARY: In the **Federal Register** notice of October 26, 1982. (47 FR 47479), the date comments were due in this proceeding on the amended rate bureau agreement, Section 5b Application No. 7, was 60 days after **Federal Register** publication or December 27, 1982. Replies were due 90 days after publication or January 24, 1983. At the request of the Association of American Railroads, the due date has been postponed 60 days to February 25, 1983. Replies are postponed to March 29, 1983.

DATES: Comments are due February 25, 1983. Replies are due March 29, 1983.

ADDRESS: Send original and 15 copies to: Interstate Commerce Commission, Office of Proceedings, Room 5344, 12th and Constitution Avenue, NW., Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

By the Commission, Reese H. Taylor, Jr., Chairman

Dated: December 14, 1982.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. 387]

Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the

notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Douglas Galloway, (202) 275–7278

or

Tom Smerdon, (202) 275–7277

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions.

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract no., and specifics	Review Board	Decided date
465	Missouri Pacific Railroad Co., ICC–MP–C–0207, (Galvanized pipe)	2	12–13–82
466	Illinois Central Gulf Railroad Co., ICC–ICG–C–0056, (Grain)	2	12–13–82
472	Southern Pacific Transportation Co., ICC–SP–C–0285, (Petroleum oil)	2	12–13–82

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

American Motors Corp. et al.; Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 3, 1983.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the Address shown below, not later than January 3, 1983.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C., this 13th day of December 1982.

Marvin M. Fooks.

Director, Office of Trade Adjustment Assistance.

[TA-W-13,280-13,326]

General Motors Corp.; Affirmation of Negative Determination Regarding Eligibility for Worker Adjustment Assistance

On September 30, 1982, a negative determination was made regarding worker petitions TA-W-13,280-13,326 for trade adjustment assistance filed by the United Auto Workers in behalf of workers and former workers of General Motors Corporation at the facilities listed in the Appendix. The notice of negative determination was published in the **Federal Register** on October 15, 1982 (47 FR 46160). The determination was based on group eligibility requirements of Section 222 of the Trade Act of 1974, 19 U.S.C. 2272, which were mandated at the time of denial by the Act as amended by Section 2501 of the Omnibus Budget Reconciliation Act of 1981, Public Law 97-35.

Title XXV of the Omnibus Budget Reconciliation Act of 1981 amended worker adjustment assistance provisions of the Trade Act of 1974. Among the amendments was one that changed the group eligibility requirements from:

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision *thereof contributed importantly to such total or partial separation,* or threat thereof, and to such decline in sales or production," Section 222(3) of the Trade Act of 1974, (Italic added for emphasis).

to:

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof *were a substantial cause of such total or partial separation,* or threat thereof, and of such decline in sales or production." Section 2501 of the Omnibus Budget Reconciliation Act of 1981. (Italic added for emphasis).

Subsequently, the Miscellaneous Revenue Act of 1982, (Public Law 97-362) enacted on October 25, 1982, postponed implementation of the amended group eligibility requirements until October 1, 1983. Because of the subsequent change in group eligibility

requirements, the Department of Labor reopened the cases in light of the "contributed importantly" test to ascertain whether a different outcome on the decision was required.

Upon reconsideration of these petitions using the "Contributed importantly" eligibility requirements, the Department concludes that the requirements of Section 222 for certification are not met.

Petitioning workers were engaged in employment related to the production and sales of all of the firms car lines. Therefore, the Department considered the effect of import competition in all categories of automobilies produced by General Motors. Information gathered in the factfinding investigation confirms that imports of foreign made automobiles did not contribute importantly to total or partial separation of workers, nor to the decline in sales or production. (See the attached Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance issued on September 30, 1982).

Conclusion

After careful reconsideration of the case file, I conclude that all workers of the facilities of General Motors Corporation listed in the Appendix are denied eligibility under the "contributed importantly" test to apply for adjustment assistance pursuant to the Trade Act of 1974.

Signed at Washington, D.C., on this 9th day of December 1982.

Harold A. Bratt,

Deputy Director, Office of Program Management Unemployment Insurance Service.

General Motors Corp., Detroit, Michigan; Negative Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents the results of an investigation regarding certification of eligibility to apply for worker adjustment assistance.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated.

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely.

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision were a substantial cause of the separations, or threat thereof, and of the absolute decline in sales or production.

The investigation was initiated on February 26, 1982 in response to petitions received on February 18, 1982 which were filed on behalf of workers providing a variety of support services at the facilities of General Motors Corporation listed in the Appendix.

The investigation revealed that criterion (3) has not been met.

During 1980 the Department issued certifications of eligibility to apply for trade adjustment assistance benefits applicable to workers at a number of support facilities (primarily sales and administrative staff) of the Central Office and each of the automotive divisions (Chevrolet, Buick, Cadillac, Oldsmobile, Pontiac) of General Motors Corporation. The certifications were based on the finding that increased imports of automobiles contributed importantly to declines in sales and employment experienced by G.M. facilities in model year (MY) 1979 and MY 1980 (October 1979–September 1980).

The Department established a termination date of November 1980 (after the end of MY 1980) in these certifications. The present group of petitions were filed by officials of General Motors Corporation because layoffs occurred at a number of the firm's support facilities subsequent to November 1980. Model years 1981 and 1982 are therefore the relevant periods under investigation regarding the present group of petitions.

Since workers at support facilities of General Motors Corporation are engaged in employment related to the production and sales of all of the firm's car lines, the Department must consider the effect of import competition in all categories of automobiles in order to determine whether increased import competition was a substantial cause of the layoffs which occurred at these G.M. facilities.

U.S. imports of subcompact automobiles decreased, in quantity, absolutely and relative to domestic production in MY 1981 from MY 1980 and in the first six months of MY 1982 (October 1981–March 1982) from the same period of MY 1981. Compared to the same quarter of the previous model year, imports of subcompact automobiles decreased, in quantity, in three of the four quarters of MY 1981 and in each of the first two quarters of MY 1982. Compared to the previous model year, U.S. production of subcompact automobiles increased during each year of the MY 1978–MY 1981 period.

U.S. imports of compact automobiles decreased, in quantity, relative to domestic production in MY 1981 from MY 1980 and decreased absolutely, in quantity, in the first six months of MY 1982 from the same period of MY 1981. Compared to the same quarter of the previous model year, imports of compact automobiles deceased, in quantity, in four of the six quarters from the first quarter of MY 1981 through the second quarter of MY 1982. U.S. production of compact automobiles increased in MY 1981 from MY 1980.

U.S. imports of intermediate automobilies decreased, in quantity, in MY 1981 from MY 1980 and in the first six months of MY 1982 from the same period of MY 1981.

U.S. imports of luxury/specialty automobiles decreased, in quantity, absolutely and relative to domestic production in MY 1981 from MY 1980. Compared to the same quarter of the previous model year, imports of luxury/speciality automobiles decreased, in quantity, relative to domestic production in each of the last three quarters of MY 1981.

Domestic production by General Motors Corporation of intermediate and luxury/specialty automobiles increased, in quantity, in each category in MY 1981 from MY 1980.

Workers at the support facilities of the central Office and each of the automotove divisions of General Motors Corporation are not separately identifiable by automobile category. Standard automobiles accounted for a relatively small proportion of total sales and domestic production by General Motors Corporation during the period under investigation. Any import influence in this automobile category could not be considered a substantial cause of the overall employment declines which occurred at support facilities of General Motors Corporation.

Two factors which contributed to declines in sales and employment throughout the automobile industry in model years 1981 and 1982 are the general recession in the U.S. economy and the high interest rates which prevailed during this period. These two developments had a significant adverse impact on automobile sales in the United States during the period under investigation.

The overall negative influence of the recession and high interest rates can be illustrated by the fact that retail sales of all automobiles in the U.S. market by General Motors Corporation, by other North American automobile manufacturers, and by foreign automobile manufacturers decreased, in quantity, in MY 1981 from MY 1980 and in the first six months of MY 1982 compared to the same period of MY 1981. Sales by Ford Motor Company, Chrysler Corporation, American Motors Corporation and Volkswagen of America.

These sales also include automobiles produced by their assembly plants in Canada. Imports from Canada represented a relatively small proportion of total U.S. sales and production. G.M.'s market share of these retail sales decreased by approximately one percentage point in MY 1981 from MY 1980 and by two percentage points in the first six months of MY 1982 from the same period of MY 1981. The market share of retail sales held by foreign automobile manufacturers remained the same in MY 1981 from MY 1980 before increasing by one percentage point in the first six months of MY 1982 from the comparable MY 1981 period. The market share held by other North American automobile manufacturers increased by one percentage point in MY 1981 from MY 1980 and by another percentage point in the first six months of MY 1982 from the comparable MY 1981 period. Therefore, most of the market share in retail sales which was lost by General Motors Corporation in MY 1981 and the first six months of MY 1982 was replaced by other North American automobile manufacturers' sales, not by foreign automobile manufacturers' sales.

Conclusion

After careful review, I determine that all workers of the facilities of General Motors Corporation listed in the Appendix are denied eligibility to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of September 1982.

Harold A. Bratt,

Acting Deputy Director, Office of Program Management, Unemployment Insurance Service.

Gibson, Inc.; Kalamazoo, Mich.; Amended Determination on Reconsideration

On November 17, 1982, the Department issued an Affirmative Determination Regarding Application for Reconsideration for former workers of the Gibson, Incorporated's plant in Kalamazoo, Michigan. This determination was published in the **Federal Register** on December 7, 1982 (47 FR 55053).

The union claims that the April 1, 1982 termination date in the initial certification denies many workers trade adjustment assistance who were adversely affected by imports.

The Department's reconsideration investigation showed that the April 1, 1982 termination date was set because Gibson Incorporated began transferring production of the Epiphone line of

musical instruments in April 1982 from a corporate facility in the Orient to the Kalamazoo plant. Company imports from the Orient would cease when the production transfer was completed. However, the Department further found that although the Kalamazoo plant began Epiphone production in April 1982, the company continued to import the Epiphone line. Current plans are to make the Kalamazoo plant solely a distribution center for the imported Epiphone line when the Gibson line of musical instruments is moved to a corporate facility in Nashville, Tennessee in 1983. Production of the Epiphone line at Kalamazoo ceased on October 15, 1982 and all workers producing that line were laid off by that date. Production ceased because that Kalamazoo plant could not produce the Epiphone line of musical instruments as cheaply as they could import them.

U.S. imports of fretted musical instruments increased absolutely in 1981 compared to 1980 and in the first nine months of 1982 compared to the same period in 1981. The imports to production ratio (I/P) was 393.0 percent in 1981.

Conclusion

After careful review of the facts obtained on reconsideration, it is concluded that increased imports of fretted musical instruments contributed importantly to the total or partial separations of former workers at the Kalamazoo, Michigan plant of Gibson, Incorported. In accordance with the provisions of the Trade Act of 1974, I make the following amended determination: All workers of Gibson, Incorporated, Kalamazoo, Michigan who became totally or partially separated from employment on or after March 16, 1981 and before October 16, 1982 are eligible to apply for trade adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, D.C., this 9th day of December 1982.

Robert A. Schaerfl,

Director, Office of Program Management Unemployment Insurance Service.

BILLING CODE 4510-30-M

TRW, Inc., et al.; Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period December 6, 1982–December 10, 1982.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–13,063; TRW, Inc., Ross Gear Div., Greeneville, TN

TA–W–13,361; Brown Boveri Electric, Inc., Downey, CA

TA–W–13,135; Mass Machine & Stamping, Inc., Nashua, NH

TA–W–13,038; Margaret Fashions, Panama City, FL

In the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA–W–13,131; Jeep Corp., Toledo, OH

TA–W–13,382; RCA Corp., Picture Tube Div., Marion, IN

TA–W–13,267; RCA Corp., Picture Tube Div., Dunmore, PA

TA–W–13,397; Fitchburg Foundry, Inc., Fitchburg, MA

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–13,374; Davis Coal Co., Kermit, WV

Aggregate U.S. imports of metallurgical coal and coke did not increase as required for certification.

TA–W–13,274; Dietz & Co., Inc., East Norwalk, CT

Aggregate U.S. imports of boy's sportcoats did not increase as required for certification.

TA–W–13,387; Commercial Honing of Detroit, Ltd., Warren, MI

The investigation revealed that criterion (3) has not been met. The workers' firm did not produce an article as required for certification under Section 222 of the Trade Act of 1974.

Affirmative Determinations

TA–W–13,355; General Electric Co., Special Products Dept., Auburn, NY

A certification was issued in response to a petition received on March 12, 1982 covering all workers separated on or after March 5, 1981.

TA–W–13,357; Rhone Poulenc, New Brunswick, NJ

A certification was issued in response to a petition received on March 1, 1982 covering all workers producing metronidazole who became separated on or after January 1, 1982.

TA–W–13,053; Tree Island Steel, Inc., Carson, CA

A certification was issued in response to a petition received on October 6, 1981 covering all workers separated on or after September 16, 1980.

TA–W–13,330; Brigham Apparel Corp., Brigham City, UT

A certification was issued in response to a petition received on February 23, 1982 covering all workers separated on or after July 24, 1981 and before April 1, 1982.

TA–W–13,331; Brigham Sportswear, Brigham City, UT

A certification was issued in response to a petition received on February 23, 1982 covering all workers separated on or after July 24, 1981 and before April 1, 1982.

TA–W–13,331A; The Los Angeles Plant of Silton Brothers, Inc., Los Angeles, CA

A certification was issued in response to a petition received on February 23, 1982 covering all workers separated on or after July 24, 1981 and before April 1, 1982.

TA–W–12,583; Fulton Shirt Co., Fulton Street, Elizabeth, NJ

A certification was issued in response to a petition received on March 27, 1981 covering all workers separated on or after March 27, 1980 and before July 1, 1981.

TA–W–12,584; Fulton Shirt Co., Division Street, Elizabeth, NJ

A certification was issued in response to a petition received on March 27, 1981 covering all workers separated on or after March 27, 1980 and before July 1, 1981.

TA–W–13,120; RCA Corp., Consumer Electronics Div., Bloomington, IN

A certification was issued in response to a petition received on November 27, 1981 covering all workers engaged in

employment related to the production of color television components and subassemblies who became separated on or after December 4, 1981 and before October 3, 1982.

TA–W–13,327; Arvin Industries, Inc., Princeton, KY

A certification was issued in response to a petition received on February 24, 1982 covering all workers separated on or after December 1, 1981.

TA–W–13,336; Missouri Resource Service, Mineral Point, MO

A certification was issued in response to a petition received on February 23, 1982 covering all workers separated on or after December 1, 1981.

TA–W–13,362; DeSoto Mining Co., Inc., Richwood, MO

A certification was issued in response to a petition received on March 15, 1982 covering all workers engaged in employment related to production of drilling mud grade barite who became separated on or after November 1, 1981.

TA–W–13,363; DeSoto Mining Co., Inc., Kingston, MO

A certification was issued in response to a petition received on March 15, 1982 covering all workers engaged in employment related to petition of drilling mud grade barite who became separated on or after November 1, 1981.

TA–W–13,026; Act III Distribution Center, Spartanburg, SC

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

TA–W–13,027; Andrew Knit, Tuscaloosa, AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

TA–W–13,031; Debra Knit, Northport, AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

TA–W–13,032; Eufaula Fashions, Eufaula, AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

TA–W–13,036; Livingston Fashions, Livingston, AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981..

TA–W–13,039; Oxford Fashions, Oxford AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

TA–W–13,041; Roanoke Fashions, Roanoke, AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

TA–W–13,044; Stevens Fashions, Carrollton, AL

A certification was issued in response to a petition received on October 5, 1981 covering all workers producing jackets and blouses separated on or after October 18, 1981.

I hereby certify that the aforementioned determinations were issued during the period December 6, 1982–December 10, 1982. Copies of these determinations are available for inspection in Room 10,332, U.S. Department of Labor, 601 D Street, NW. Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: December 14, 1982.

Glenn M. Zech,

Acting Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Occupational Safety and Health Administration

Federal Advisory Council on Occupational Safety and Health; Meeting

Notice is hereby given that the Federal Advisory Council on Occupational Safety and Health, established under Section 1–5 of Executive Order 12196 of February 26, 1980, published in the **Federal Register** February 27, 1980 (45 FR 12769), will meet on January 12, 1983 starting at 10:00 a.m. in Rooms N5437 A,B,C, of the Frances Perkins Department of Labor Building, 200 Constitution Avenue N.W., Washington, D.C. The meeting will be open to the public.

The agenda provides for:

I. Call to Order.
II. Announcement of Appointments.
III. Approval of Minutes of October 6, 1982 Meeting.
IV. Election of Vice Chairman.
V. Presidential Safety and Health Policy Statement.
VI. Reports.
A. Activities of Standing Committee on Federal Occupational Safety and Health.
B. Proposed FACOSH Action Plans.
C. Criteria for President's Safety and Health Awards.
D. Consideration of the FARS Report.
VII. New Business.
VIII. Adjournment.

The Council welcomes written data, views or comments concerning safety and health programs for Federal employees, including comments on the agenda items. All such submissions received by close of business January 7, 1983, will be provided to the members of the Council and included in the record of the meeting.

The Council will consider oral presentations relating to agenda items. Persons wishing to orally address the Council at the meeting should submit a written request to be heard by close of business January 7, 1983. The request must include the name and address of the person wishing to appear, the capacity in which appearance will be made a short summary of the intended presentation and an estimate of the amount of time needed.

All communications regarding this Advisory Council should be addressed to John E. Plummer, Director, Office of Federal Agency Programs, Department of Labor, OSHA, Frances Perkins Building, 200 Constitution Avenue, N.W., Room N3613, Washington, D.C., 20210. telephone (202)523–8081.

Signed at Washington, D.C. this 15th day of December 1982.

Thorne G. Auchter,

Assistant Secretary.

BILLING CODE 4510–26–M

Office of Pension and Welfare Benefit Programs

Proposed Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Writen Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption, unless otherwise stated in the Notice of Pendency, or or before February 4, 1983. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

[Application Nos. D–3599 and L–3600]

The Northern Minnesota-Wisconsin Area Retail Clerks Pension Plan (the Pension Plan) and the Northern Minnesota-Wisconsin Area Retail Food Health and Welfare Plan (the H/W Plan; Collectively, the Plans) Located in Duluth, Minnesota

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75.1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the sublease of office space by the Plans to Plan Administrators, Inc. (the Administrator), a fiduciary with respect to the Plans, provided the terms of the sublease are no less favorable to the Plans than the terms obtainable in an arm's length lease with an unrelated party.

EFFECTIVE DATE: If the proposed exemption is granted, the exemption will be effective on October 1, 1982.

Summary of Facts and Representations

1. The Plans are multiemployer, jointly trusteed plans, each covering approximately 2,700 employees in the retail grocery business. Each Plan is funded by a separate trust. As of December 31, 1981, the H/W Plan's assets totalled $1,448,918, and the Pension Plan's assets totalled $7,017,813. The applicant represents that the Administrator provides contract administration services to the Plans and is, accordingly, a fiduciary with respect to the Plans. The trustees of the H/W Plan—William D. Watters, Robert C. Hall, Dick Walsh, Virgil Dock, James J. Bouley, and Daniel H. Mundt—are responsible for investing the H/W Plan's assets. The trustees of the Pension Plan—William D. Watters, Jerry Miner, James J. Bouley, Bert Harstad, Vern D. Bates, Al Scott, and Daniel H. Mundt—have employed a registered investment consulting firm, Loomis Sayles, to invest the Pension Plan's assets. It is represented that neither Loomis Sayles nor the trustees of the Plans have any relationship to the Administrator aside from their working relationship as Plan fiduciaries.

2. The Administrator requires more office space than is currently available to it to process claims and to organize its whole operations more efficiently to ultimately benefit the Plans' participants and beneficiaries. Therefore, the Administrator wishes to sublease from the Plans all of the space leased to the Plans by the Duluth Labor Temple Association (the Association). The applicant represents that the Association is not a party in interest with respect to the Plans and that the Administrator will use the subleased space exclusively to conduct its administrative services to the Plans.

3. The sublease agreement (the Sublease) between the Plans and the Administrator states that the terms and conditions of the Sublease shall be identical to those in the lease agreement between the Association and the Plans (the Lease). The Lease provides, among other things, for a yearly rental of $6.00 per square foot per year for 3,100 feet of rental space, payable in equal monthly installments, for a five-year term beginning October 1, 1982, on Business Office No. 300, located on the third floor of the Duluth Labor Center, at 2002 London Road, Duluth, Minnesota. The rental shall be adjusted on a yearly basis for any increased operational costs incurred by the Association and attributable to the premises (on a square footage basis). The Lease may be renewed for an additional five years, at the Plans' option, on the same terms and condition, except that the yearly rental may be increased to a maximum of $6.60 per square foot. If the proposed exemption is granted, the Sublease shall be effective as of October 1, 1982. The Plans will not be required to pay any commissions in connection with the Sublease. The applicant represents that the terms of the Sublease are the same as those that would be available to any other disinterested tenant.

4. The decision to sublease office space to the Administrator was a joint majority decision of the trustees of the Plans, after considering the specific terms of the Sublease and whether the Sublease would be in the best interests of the participants and beneficiaries of the Plans. The applicant states that the Administrator has no investment authority or discretion with respect to the decision of the Plans to sublease the office space in question and that throughout the trustees' discussions concerning the possibility of a sublease arrangement, the Administrator has been a totally neutral party with respect to that decision. Mr. Daniel H. Mundt, who serves as a trustee for both Plans, states that the Sublease will assure the Administrator's continued involvement and participation in the administration of the Plans, will be on a strictly arm's-length basis, and will automatically

terminate if the Administrator is no longer the administrator of the Plans. Mr. Mundt also states that he is personally acquainted with other plan administrators in surrounding localities and believes that the services, information, and background provided by the Administrator is of unique and particular value. He believes that the Administrator provides services at the lowest possible cost and in the most effective manner to the participants of the Plans. He explains that the reason the Plans have entered into the Lease and the Sublease, rather than have the Association lease directly to the Administrator, is that under the Lease and Sublease arrangement the Plans will control the space. Thus, in the event of any problem with the Administrator, whether because of inability to perform, incapacity, or otherwise, the Plans will still have the right to occupy the space. For all of the foregoing reasons, Mr. Mundt believes that the Sublease will be in the best interests of the Plans and their participants and beneficiaries.

The trustees of the Plans will be solely responsible for monitoring the Sublease during its term, will act to protect the rights and interests of the Plans under the Sublease, and will ensure throughout its term that the terms and conditions of the Sublease are being complied with.

5. In summary, the applicant represents that the Sublease meets the exemptive criteria provided by section 408(a) of the Act because (a) the terms of the Sublease are the same as those that would be available to any other disinterested tenant, (b) the additional space to be made available to the Administrator under the Sublease will enable the Administrator to process claims and to organize its entire operations more efficiently to ultimately benefit Plan participants and beneficiaries, (c) the trustees of both Plans have initially decided that the Plans should enter into the Sublease, will monitor the Sublease, and will take any action necessary to protect the rights of the Plans thereunder, (d) the trustees of the Plans believe that the Sublease is in the best interests of the participants and beneficiaries of the Plans, and (e) the Plans will not be required to pay any commissions in connection with the Sublease.

[Application No. D-3623]

The Annuity Trust Fund of Exxon Corporation (the Fund) Located in Houston, Texas

Proposed Exemption

The Department is considering granting an exemption for the following transactions under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Section I. The restrictions of section 406(a), 406(b)(1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to:

(A) The contribution of certain improved real property (the Property) to the Fund by Exxon Company, U.S.A. (EUSA), a contributing employer to the Fund, provided that EUSA's Federal tax deduction for the contribution does not exceed the fair market value of the Property as of the date it is contributed to the Fund;

(B) The lease (the Lease) of office space by the Fund to Friendswood Development Company (Friendswood), a contributing employer to the Fund, entered into pursuant to the property management agreement (the Management Agreement) between the Fund and Friendswood;

(C) The grant and exchange of certain interests in the Property between Friendswood and the Fund pursuant to an easement agreement (the Easement Agreement); and

(D) The joint use of certain portions of the Property by Friendswood and the Fund pursuant to a joint operating agreement (the Joint Operating Agreement).

Section II. The restrictions of section 406(b)(1) and (2) [1] of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(E) of the Code, shall not apply to the provision of certain real property management services to the Fund by Friendswood pursuant to the Management Agreement and the Joint Operating Agreement, provided that Friendswood receives no more than reasonable compensation for such services, pursuant to section 408(b)(2) of the Act and section 4975(d) (2) of the Code and the regulations promulgated thereunder.

Section III. The restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the lease of space by the Fund to certain parties in interest with respect to the Fund, provided that no space is leased (other than pursuant to the Lease) to:

(A) A subsidiary, division or affiliate (as defined in section 407(d)(7) of the Act) of Exxon Corporation (Exxon), the Fund sponsor, or

(B) A person who exercises discretionary authority, responsibility or control, or who provides investment advice, either with respect to the investment of any assets of the Fund or with respect to the management or disposition of the Property.

The proposed exemption is subject to the condition that the terms and conditions of each of the above-described transactions are at least as favorable to the Fund as those that could be obtained from an unrelated party.

EFFECTIVE DATE: The effective date of the proposed exemption, if granted, will be December 15, 1982.

Summary of Facts and Representations

1. The Fund is composed of a number of participating defined benefit plans of affiliates and divisions of Exxon. Both EUSA and Friendswood are wholly owned subsidiaries of Exxon. As of December 31, 1981, the Fund had net assets of $3,426,000,000 and approximately 85,853 participants in the various plans comprising the Fund. The named fiduciary of the Fund is the Administrator-Finance who is the treasurer of Exxon, currently Mr. A. C. Hamilton.

2. EUSA proposes to purchase the Property from Friendswood and contribute the Property in partial satisfaction of EUSA's 1982 plan contribution. It was decided that EUSA would make the contribution of the Property, since the value of the Property would greatly exceed Friendswoods current plan funding obligation. According to an appraisal by Mr. James A. Britton, Jr., Britton Appraisal Associates, Inc., 444 Madison Avenue, New York, New York, an appraisal service company neither directly nor indirectly affiliated with Exxon or EUSA or with any other affiliate or division of Exxon, the estimated fair market value of the Property, as currently leased, is $53,630,000.00 as of July 1, 1982. Mr. Britton will reappraise the Property

[1] No exemption from section 406(a) of the Act or section 4975(c)(1)(A) through (D) of the Code is being granted for the transactions discussed in this section beyond that which is provided by the statutory exemption provided by section 408(b) (2) of the Act or section on 4975(d) (2) of the Code.

upon the granting of the exemption and EUSA will purchase the Property from Friendswood for an amount equal to this final appraisal value. EUSA will then contribute the Property to the Fund and take a Federal tax deduction in the amount of the final appraisal value. The Property is totally free of debt and encumbrance, and will represent approximately 1.6% of the Fund's current net assets.

3. The Property consists of approximately 15.1 acres of land, various office buildings and retail facilities located on the land, a 68% undivided interest in a central plant and a 41% undivided interest in a parking garage. The remaining interests in the central plant and parking garage will be held by Friendswood, in order to service a building owned by Friendswood which is adjacent to the Property. In each instance of joint ownership, the allocation of each party's interest was based upon the specific requirements and needs of each party, based upon the property serviced. The Property is located in the Greenspoint project, a 220 acre mixed-use land development project in North Houston. Friendswood acquired the Greenspoint project property in 1976 and subsequently developed the project pursuant to a controlled master plan. Friendswood currently manages the Property. Friendswood has been engaged in the business of real estate development in the Houston, Texas area since 1962, and has managed, developed or sold over 80,000 acreas of land.

4. The "North Belt" market area, within which Greenspoint is located, has undergone substantial growth in the past six years. In 1976, the area had fewer than 200,000 square feet of office space and currently there are approximately 4,600,000 square feet of office space in the area. Current projections indicate the number will grow to 7,800,000 square feet by 1983. This growth is primarily attributable to the area's proximity to excellent residential areas, the Houston Intercontinental Airport, the presence of the succesful Greenspoint Regional Shopping Mall and its location at the intersection of two primary Houston traffic arteries, Interstate 45 North Beltway 8. The area is now established as the commercial center of North Houston.

5. The facilities located on the Property are and will continue to be leased to a variety of business firms. The applicant represents that no portion of the Property (other than the office space reserved for Friendswood discussed below), will be leased to: (a) a subsidiary, division or affiliate (as defined in section 407(d)(7) of the Act) of Exxon; or (b) a person who exercises discretionary authority, responsibility, or control, or who provides investment advice, either with respect to the investment of any assets of the Fund or with respect to the management or disposition of the Property. However, because of the size of the Fund and the large number of service providers who would be parties in interest with respect to the Fund, the applicant represents that it would be extremely difficult to ascertain in all instances whether a Property tenant was a party in interest with respect to the Fund. Therefore, the applicant requests an exemption to permit leasing of space in the Property to parties other than those specified in subparts (a) and (b) above.

6. In May 1982, a total of 4,343 square feet of space in the buildings located on the Property was vacant out of a total of 546,241 square feet, for a vacancy rate of 0.8%. The credit capability of all tenants is evaluated by Friendswood and when deemed appropriate, security deposits are required. The net cash flow to the Fund from rentals in the first year of the Fund's ownership of the Property would be $4,727,607, representing an annual return of 8.8% of the appraised fair market value of the Property.

7. At the time EUSA contributes the Property to the Fund, the parties propose to enter into the Management Agreement, whereby Friendswood would agree to manage the Property on the Fund's behalf. The Management Agreement may be cancelled by the Fund upon 30 days advance notice. Friendswood's services would cover all spects of financial and physical management, operation, maintenance and leasing of the Property. Pursuant to the Management Agreement, Friendswood is required to maintain detailed records and books of account concerning the operation of the Property, which are to be available to the Fund for examination at all reasonable times. In addition, detailed monthly reports on the operation of the Property will be prepared by Friendswood and sent to the Fund.

8. Friendswood's compensation under the Management Agreement will consist of reimbursement of costs for direct on-site management plus a management fee of 3% of all receipts collected and remitted from Property tenants on a monthly basis, or $14,000 per month, whichever is greater. Additionally, pursuant to the Management Agreement, 3,781 square feet of space in Two Greenspoint Plaza (0.7% of the Property) would be reserved as office space for Friendswood to provide the above-described services. It is represented that such arrangements are customary in the real property management industry and that the Lease is considered to be a portion of Friendswood's compensation. The applicant states that the Lease of office space would facilitate Friendswood's execution of its duties as the Property manager. This reservation of office space would terminate with the termination of the Management Agreement.

9. Upon the contribution of the Property, the Fund and Friendswood would also enter into the Joint Operating Agreement, whereby Friendswood would agree to maintain and operate the jointly owned central plant and parking garage. Friendswood would be reimbursed by the Fund for the Fund's share of direct and indirect expenses properly and actually incurred, pursuant to the terms of the Joint Operating Agreement. Friendswood would be required to furnish the Fund with reports on a monthly basis, detailing all such expenses for which reimbursement is sought.

10. The third agreement to be entered into between the Fund and Friendswood upon the contribution of the Property, would be the Easement Agreement, whereby the Fund and Friendswood, as owners of adjacent properties in the Greenspoint project, will grant to each other reciprocal easements regarding the use of the common access areas of such properties. Friendswood will receive no consideration under the terms of the Easement Agreement.

11. InterFirst Bank Dallas, N.A., Trust Division (the Bank, formerly First National Bank in Dallas) has agreed to serve as an independent fiduciary on behalf of the Fund for the transactions described herein. The Bank would decide whether to enter into the proposed transactions and would monitor the Agreements to ensure Friendswood's compliance therewith. The Bank and Exxon have a number of business relationships, however, these relationships constitute less than 1% of the Bank's commercial credit and deposit business. Furthermore, although the Bank serves as an investment manager for the Fund, the amount of Fund assets currently managed by the Bank constitutes less than 1% of the Bank's trust division business.

12. The Bank has reviewed the terms and conditions of the contribution of the Property, the Management Agreement, the Joint Operating Agreement and the Easement Agreement (collectively, the Agreements). The Bank has stated that the contribution of the Property, taking

into consideration the cash flow and net rate of return, would be in the interests of the Fund participants and beneficiaries and would be an appropriate investment for the Fund. The Bank further stated that the terms and conditions of the Agreements are standard, reasonable and customary in the real property management industry and are appropriate for the management and operation of the Property.

13. In summary, the applicant represents that the proposed transactions satisfy the statutory criteria of section 408(a) due to the following: (a) the Bank has reviewed the terms and conditions of the transactions and believes they are customary and reasonable and are in the interests of the Fund and its participants and beneficiaries; (b) the Bank will make all decisions on the Fund's behalf regarding the transactions proposed herein, will monitor the transactions to ensure Friendswood's compliance therewith, and will have the authority to terminate the Management Agreement upon 30 days advance notice; (c) the Property will be contributed at its fair market value as determined by an appraiser independent of Exxon and its affiliates and divisions; (d) the Property would represent approximately 1.6% of Fund assets; (e) the Property vacancy rate is currently 0.8%; and (f) no portion of the Property (other than the office space reserved for Friendswood) would be leased to Exxon or to any of its subsidiaries, affiliates, or divisions.

FOR FURTHER INFORMATION CONTACT: Robert Sandler of the Department, telephone (202) 523-8195. (This is not a toll-free number.)

[Application No. D-3700]

Quain and Ramstad Clinic, P.C. Employees' Retirement Plan (the Plan) Located in Bismarck, North Dakota

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the loan of $2 million (the Loan) by the Plan to Quain and Ramstad Clinic, P.C. (the Employer), the sponsor of the Plan, provided the terms of the transaction are at least as favorable to the Plan as those obtainable in an arm's length transaction with an unrelated party.

Summary of Facts and Representations

1. The Plan is a defined benefit plan with 270 participants. As of May 31, 1982, the Plan had total assets of approximately $5.7 million. The Northwestern National Bank of Minneapolis (the Bank) serves as the trustee of the Plan and is responsible for Plan investment decisions. Neither the Bank, nor any affiliate thereof, maintains any commercial or banking relationship with the Employer.

2. The Employer is a multispecialty medical clinic providing medical services. The Employer leases the space it utilizes from a partnership (the Partnership) whose partners are shareholders and employees of the Employer.

3. The applicant is requesting an exemption to allow the Plan to engage in the Loan with the Employer. The Loan proceeds will be subsequently loaned to the Partnership to provide a minor portion of the permanent financing for an expansion of the building currently used by the Employer. The major portion of the financing of the expansion of the building will be through a $9.3 million loan from the First National Bank and Trust Company of Bismarck.

The Loan will be for a ten year term and will provide for equal monthly payments of principal. The Loan's interest rate will be equal to the prime rate of interest as daily quoted by the First National Bank of Minneapolis. Interest on the unpaid balance of the Loan will be payable monthly.

4. The Loan will be secured by a perfected first security interest in all of the accounts receivable of the Employer. As of August, 1982, the Employer had 23,579 receivables totalling $4,677,000. The average amount of a receivable is $198. The largest single receivable is $362,098 which is due from the Bismarck Hospital for x-ray and laboratory services. The receivables have normally been collected within 109 days from the date the medical services are rendered. A large portion (approximately 79%) of the receivables represent insurance claims that require processing by insurance carriers.

5. The Employer will enter into a loan agreement with the Plan which will provide, inter alia, that certain conditions are imposed on the Employer. Among the conditions are that the Employer will maintain a ratio of debt to total assets of not more than .9 to 1; will maintain a ratio of current assets to current liabilities of not less than 1.25 to 1; and will maintain a tangible net worth of not less than $500,000. Additional conditions include prohibitions on the Employer from incurring debt or guarantees of debt, limitations on the types and amounts of investments that it may hold, prohibitions on the payment of dividends, prohibitions with respect to the sale of its assets, prohibitions pertaining to corporate reorganizations, prohibitions on expenditures for capital expenses, and prohibitions on certain lease transactions.

6. The Bank has examined the terms and conditions of the proposed Loan. After examining the overall investment portfolio of the Plan and the diversification of Plan assets in light of the proposed Loan investment, with consideration given to the cash flow needs of the Plan and the necessity of a sale of any Plan assets, the Bank has determined that the Loan is an appropriate and suitable investment for the Plan and its participants and beneficiaries. The Bank will render the same determination immediately prior to the consummation of the transaction.

7. The Bank will completely monitor the terms and conditions of the Loan. The Bank will require the Employer to reduce the outstanding balance of the Loan if at any time the value of the collateral falls below 150% of the outstanding Loan balance. The applicant represents that in the event of any default on the Loan the Bank would be able to effectively take over receivable collections which would be adequate to pay off the Loan within 60 days. The Loan agreement provides that the Bank will be provided (1) on an annual basis with financial statements of the Employer, an unqualified audit letter of a certified public accountant, and a certification by such certified public accountant that he or she knows of no event that would constitute an event of default under the Loan agreement; (2) quarterly, with unaudited financial statements of the Employer and a certification from the chief financial officer of the Employer that he or she knows of no event of default under the Loan-agreement; and (3) monthly, with schedules of the accounts receivable of the Employer.

8. In summary, the applicant represents that the proposed Loan will satisfy the statutory criteria of section 408(a) of the Act because (a) the Loan will be secured by a perfected first security interest in collateral which will, at all times throughout the term of the Loan, have a value not less than 150% of the outstanding Loan balance, (b) the Bank, an independent, qualified party will serve as the fiduciary of the Plan with regard to the Loan, and has determined that the Loan is an

appropriate and suitable investment for the Plan; and (c) the Bank will completely monitor the Loan and enforce the performance of the Employer's obligations under the applicable Loan documents.

[Application No. D–3708]

Profit Sharing Plan for Employees of Gonzalez, Lupo, Walker, Webb & Arthur, M.D.s, P.A. (the Plan) Located in Tampa, Florida

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale of the land described below by the Plan to Buffalo Avenue Associations (the Partnership), a party in interest with respect to the Plan, provided the sales price is no less than the fair market value of land on the date of the sale.

Summary of Facts and Representations

1. The Plan covered ten participants as of August 17, 1982, and had total assets of $242,701 as of December 31, 1981. The Plan trustees—Drs. Arturo G. Gonzalez, Joseph F. Lupo, Charles G. Walker, Gilsen S. Webb, and Gary K. Arthur—make investment decisions on behalf of the Plan.

2. Eighty percent of the profits interest in the Partnership, a Florida general partnership, is owned by the Plan trustees and administrators who are also officers, directors, and employees of the Plan sponsor and who collectively own over 50% of the stock of the Plan sponsor. The parties in interest with respect to the Plan who own interests in the Partnership are Arturo G. Gonzalez, M.D., Joseph F. Lupo, M.D., Charles G. Walker, M.D., Gilson S. Webb, M.D., Gary K. Arthur, M.D. and Espy D. Ball, Ph.D.

3. The land in question is two non-contiguous lots of vacant land, #19 of Block 1 and #1 of Block, 9 totalling 19,720 square feet in the Northdale subdivision of Tampa, Florida. The lots are zoned for single-family residences only and are encumbered by a purchase money mortgage. The two lots are not located proximate to any property owned by the Partnership, the Plan sponsor, or any other party in interest. They are located in a rapidly developing residential neighborhood close to schools and numerous recently completed shopping centers. The Plan acquired these lots as an investment on November 20, 1980, from Criterion Corporation, which, according to the applicants, is not a party in interest with respect to the Plan. The purchase price paid by the Plan for the lots was $51,400.00, 10% of which was paid on the purchase date, the balance payable within five years at 10% interest with a balloon payment due at the end of the fifth year. The Plan made some principal payments under the mortgage (see 5, below). As of October 25, 1982, the Plan had paid $10,585.69 in interest under the mortgage, $974.32 in taxes on the lots, $360.88 for signs and advertisements, $100.00 for mowing, and $150.00 for appraisals of the lots on March 3, 1982.[2] The lots do not produce any income for the Plan. During 1981, the Plan attempted unsuccessfully to sell the lots.

4. The appraisals mentioned above were made by Charles K. Evanich and were reviewed by Diane G. Bussman, a member of the American Institute of Real Estate Appraisers. It is represented that neither appraiser is related to the Partnership. Both appraisers have experience appraising vacant land, among other types of real property, for savings and loan institutions and mortgage lenders, among other clients. The appraisals show that the highest and best use of each lot would be to improve it with a single family residence and estimate that Lot 19 of Block 1 had a fair market value of $27,000 on March 3, 1982, and that Lot 1 of Block 9 had a fair market value of $26,000 on that date.

5. The Plan proposes to sell both lots to the Partnership at a price equal to the fair market value of the lots as established in the appraisals described above ($53,000 total) or in another appraisal made by a qualified independent appraiser on a later date closer to the proposed sale date. The Partnership will assume the balance due under the existing mortgage and will pay cash to the Plan in the amount of the difference between the proposed sales price and such balance due. The principal balance due under this mortgage as of December 31, 1981 was $44,080.03, according to the Plan's financial statements of that date. The Plan trustees have reviewed the situation and determined that a sale of the lots, as soon as possible, for their fair market value is in the best interests of the Plan and its participants in order to eliminate the necessity of continuing to pay substantial interest expenses.

6. In summary, the applicants represent that the proposed sale meets the exemptive criteria provided by section 408(a) of the Act because (a) the proposed sale will involve the Plan in a one-time transaction in which the Plan will receive cash for its equity interest in the lots, (b) the proposed sale will relieve the Plan of both a non-income producing asset that is not readily saleable and also a mortgage obligation requiring large cash payments of interest and principal, (c) the proposed sales price will equal the fair market value of the two lots as appraised by a qualified independent appraiser, and (d) the Plan trustees believe the proposed sale is in the best interests of the Plan and its participants.

FOR FURTHER INFORMATION CONTACT: Mrs. Miriam Freund, of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

[Application No. D–3725]

H. A. Berkheimer, Inc. Profit Sharing Plan (the Plan Located in Bangor, Pennsylvania

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed loan of $100,000 by the Plan to H. A. Berkheimer, Inc., a party in interest with respect to the Plan, provided that the terms of the transaction are not less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated party at the time of consummation of the transaction.

Summary of Facts and Representations

1. The Plan, which was established in 1969, is a profit sharing plan with 81 participants and total assets as of May 31, 1982 of $322,757. First Valley Bank of Bethlehem, Pennsylvania (the Bank) is the Plan trustee and is solely responsible for the investment of Plan

[2] In this proposed exemption the Department expresses no opinion regarding whether the acquisition and holding of the lots violates any provision of Part 4 of Title I of the Act.

assets. H. A. Berkheimer, Inc. (the Employer) is a tax collection agency for municipalities and other local government agencies in Pennsylvania.[3]

2. On November 18, 1981, the Employer purchased data processing equipment from National Cash Register Corporation (NCR). The data processing equipment is known as the NCR Criterion Group V–8550 Data Processing System (the Equipment) and cost $112,512.[4] The Employer obtained interim financing for the Equipment from the bank in the form of a demand loan calling for monthly payments of interest based on the prime rate of interest.

3. The Employer proposes to pay off its loan to the Bank by borrowing $100,000 from the Plan. Under the terms of the proposed loan, the Plan would receive a security agreement collateralized by a first lien on the Equipment (evidenced by a promissory note) plus a pledge agreement on a $100,000 Bank 26-week time deposit (the Deposit).[5] The loan will be repaid in 36 equal monthly principal installments of $2,777.78 plus an interest rate of the Bank's prime rate plus 1 percent. This rate will be adjusted monthly to reflect changes in the prime rate, but in no event will be less than 10 percent per annum. Further, in the event the value of the equipment and the Deposit should ever fall to less than 150 percent of the outstanding loan balance, the Employer shall within 30 days of such a determination provide additional collateral so that the fair market value of the collateral securing the loan will always represent at least 150 percent of the outstanding loan balance. The Employer will maintain insurance on the Equipment in an amount equal to or greater than the unpaid loan balance, with the Plan being named the loss payee of the insurance policy. All costs and expenses relating to the transaction will be paid by the Employer.

4. On July 19, 1982, Mr. J. P. Rowan, an account manager of major systems for NCR Corporation issued a letter to the Employer in which he valued the Equipment at $112,512.

(5) The Northeastern Bank of Pennsylvania located in Scranton, Pennsylvania (Fiduciary Bank), has been engaged to serve as an independent fiduciary with respect to the above described transaction. The Fiduciary Bank invests approximately $60,000,000 in employee benefit plan assets. The Fiduciary Bank has no other relationship with the Employer or the Plan.

The Fiduciary Bank represents that the proposed loan is appropriate for the Plan and is in the best interests of its participants and beneficiaries. In making these determinations, the Fiduciary Bank has examined the overall portfolio of the Plan, considered the Plan's cash flow needs, considered the assets that might have to be sold in order to meet the liquidity and diversification requirements of the Plan in light of the proposed loan and reviewed the proposed loan in terms of how it fits within the Plan's funding policy.

The Fiduciary Bank has agreed to undertake the following actions as part of its responsibilities; (a) monitor the loan to insure that payments under the promissory note are made in accordance with its terms and to demand timely payment, if necessary; (b) adjust the interest rate for the loan monthly; (c) keep adequate records; (d) report at least annually to the Bank on the performance of the loan, specifically including an annual appraisal by an independent appraiser indicating that the fair market value of the collateral is never less than 150 percent of the outstanding balance of the loan; (e) demand additional collateral be pledged if necessary; (f) make certain the collateral is always insured with the Plan being named as beneficiary of the insurance policy; and (g) in the event of a default on the loan, take steps necessary to insure the collateral is repossessed, sold in conformity with Pennsylvania law and that any deficiency is collected from the Employer.

6. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because:

(a) the Employer will insure the collateral and add additional collateral so that the value of the collateral securing the loan is always at least 150% of the outstanding balance of the loan;

(b) the loan will be administered by the Fiduciary Bank; and

(c) the Fiduciary Bank has determined that the transaction is appropriate for the Plan and is in the best interests of the Plan's participants and beneficiaries.

FOR FURTHER INFORMATION CONTACT: Alan H. Levitas of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

[3] The applicant represents that the Employer is not an instrumentality of any state or local government.

[4] The total sales price for the equipment was $121,388.80, however, this included taxes and distribution charges of $8,876.80.

[5] The Deposit, including all interest earned, will be held by the Bank and will be rolled-over each 26 weeks until the loan has been repaid.

[Application No. D–3731]

The Orloff, Lowenbach, Stifelman and Siegel, P.A. Employees' Profit Sharing Plan (the Plan) Located in Roseland, New Jersey

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to (1) a loan of $300,000 (the Loan) by the Plan to Orloff, Lowenbach, Stifelman and Siegel, P.A. (the Employer), provided the terms and conditions of the Loan are at least as favorable to the Plan as those obtainable in an arm's length transaction with an unrelated party; and (2) the guarantee of repayment of the Loan by the principals of the Employer.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 16 participants and total assets of $820,795 as of June 30, 1982. The trustees of the Plan are the six principal shareholders of the Employer. These individuals make investment decisions for the Plan. The Employer is a law firm presently located in Roseland, New Jersey.

2. The Employer proposes to borrow $300,000 from the Plan [6] to finance certain expenses associated with its recent move from Newark, New Jersey to a larger office facility located in Roseland, New Jersey. The Loan, which will be evidenced by a promissory note, will be amortized in equal monthly installments of principal and interest over an 84 month period. The Loan will carry interest at one percent over the prime rate of First National State Bank of New Jersey (First National). The interest rate will have a floor of 12 percent per annum and it will be adjusted monthly by an independent fiduciary designated to oversee the proposed transactions.

[6] Financial statements accompanying the exemption application show that the Plan had made loans to three participants as of June 30, 1981. On that date, the loans had a total outstanding principal balance of $51,237. The application states that the participant loans satisfy the conditions of section 408(b)(1) of the Act. The Department expresses no opinion as to whether or not these conditions have been met.

3. The Loan will be secured by an assignment of the Employer's accounts receivable (the Receivables). The Employer will execute and file UCC financing statements giving the Plan a perfected first security interest in the Receivables. The Employer has represented that the Receivables will at all times be equal to a minimum of 150 percent of the outstanding Loan balance. If the value of the Receivables falls below 150 percent of the outstanding loan balance, the Employer will be required to pledge additional security. As further collateral for the Loan, the six principal shareholders of the Employer will give their personal guarantees. As of October 14, 1982, the shareholders had a combined net worth in excess of $3 million.

4. The Receivables represent amounts due the Employer from clients for the Employer's rendition of legal services. Between June 30, 1981 and August 31, 1982, the Receivables ranged between $630,470 and $641,358 in value. During the fourteen month period, 78 percent of the Receivables were collected, 7 percent were written off as uncollectible and 15 percent remain outstanding. Of the $244,406 in Receivables which were more than 120 days old as of June 30, 1981, 68 percent were collected during the fourteen month period, 11 percent were written off as uncollectible and 15 percent remain outstanding.

5. By letter dated July 19, 1982, First National committed itself to lend $300,000 to the Employer. The bank loan would have carried a floating interest rate of one percent over the prime rate with quarterly payments of principal and interest over a five year period. There would have been no prepayment penalty. The loan would have been secured by the personal guarantees of the principals of the Employer.

6. Mr. Irwin Gedinsky (Mr. Gedinsky), a certified public accountant and a senior tax partner with the accounting firm Granet and Granet of Union, New Jersey, has agreed to serve as the independent fiduciary for the Loan. Mr. Gedinsky has no other relationship with the Plan or the Employer. Mr. Gedinsky represents he has served as an executor and trustee of many estates and trusts in the past as well as at present. He also states that in his role as senioir tax partner for his firm, he has advised the firm's clients with respect to the design of pension and profit sharing plans, the administration of such plans (including the investment of plan assets) and compliance with provisions of the Act.

With respect to the Loan, Mr. Gedinsky indicates he has examined its specific terms and he believes the Loan is in the best interests of the Plan and its participants and beneficiaries because of the substantially higer interest rate than the Plan would otherwise earn, the fair and reasonable Loan duration, and the adequate collateral provided. Mr. Gedinsky also represents he has examined the overall Plan portfolio, considered the Plan's cash flow needs, considered the assets that might have to be sold to meet the Plan's liquidity requirements, examined the diversification of the Plan's assets in light of the proposed investment, and examined the Loan in terms of the manner in which it fits into the Plan's investment scheme.

As the independent fiduciary, Mr. Gedinsky will monitor the Loan to ensure repayment on a monthly basis. Mr. Gedinsky will also verify that the interest rate is adjusted monthly. He will further verify that the Receivables will at all times represent 150 percent of the outstanding Loan balance and if they ever fall below this level, he will demand additional collateral from the Employer. In addition, Mr. Gedinsky will take all necessary and appropriate actions to protect the interests of the plan.

7. In summary, it is represented that the proposed transactions will satisfy the requirements of section 408(a) of the Act because: (a) the Loan will be monitored by Mr. Gedinsky who believes the Loan is in the best interests of the Plan and protective of the Plan's participants and beneficiaries; (b) the Loan will be secured by the Employer's Receivables and the personal guarantees of the Employer's principals; and (c) the Receivables will at all times throughout the duration of the Loan represent 150 percent of the outstanding Loan balance and if the value of the Receivables falls below this level, Mr. Gedinsky will demand that the Employer pledge additional collateral.

FOR FURTHER INFORMATION CONTACT: Ms. Jan Broady of the Department, telephone (202) 523-8971. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibitedransaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 16th day of December, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

[FR Doc. 82-34584 Filed 12-20-82; 8:45 am]

BILLING CODE 4510-29-M

Grant of Individual Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such

exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

[Prohibited Transaction Exemption 82–217; Exemption Application No. D–2794]

The Deferred Benefits Corporation Pension Plan (the Plan) Located in Atlanta, Georgia

Exemption

The restrictions of section 406(a)(1)(A) through (D) and 406(b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (F) of the Code, shall not apply to the receipt of brokerage commissions by the Deferred Benefits Corporation (the Employer) and certain of its employees (the Employees) incidental to the purchase of investment media by the Employees through their individual accounts in the Plan provided:

(a) The terms of the sales will be at least as favorable to the Plan as the terms offered for similar purchases by unrelated third parties in the normal course of the Employees' business;

(b) The purchases by the Employees will only be made for the respective Employee's individual account in the Plan;

(c) During no plan year will the commissions paid by the Plan as a result of purchases by the Employees for their respective individual account exceed five percent (5%) of the commissions earned by such Employee during the plan year in similar purchases by unrelated third parties; and

(d) Payment of commissions by the Plan in connection with such purchases will be treated under the Employer's fee sharing agreement in the same manner as all other commissions earned by the Employees in sales of investment media by unrelated third parties in the ordinary course of business.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on October 19, 1982 at 47 FR 46599.

FOR FURTHER INFORMATION CONTACT: Paul R. Antsen of the Department, telephone (202) 523–6915. (This is not a toll-free number.)

[Prohibited Transaction Exemption 82–218; Exemption Application No. D–3076]

The Tenneco Inc. Thrift Plan (the Plan) Located in Houston, Texas

Exemption

The restrictions of section 406 (a) and (b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (F) of the Code, shall not apply, effective January 1, 1982, to the sale of individual life insurance contracts by Philadelphia Life Insurance Co. (PLI) to the Plan, and the payment of commissions to agents of PLI, provided the following conditions are met:

(a) PLI—(1) Is a party in interest with respect to the Plan by reason of a stock or partnership affiliation with Tenneco Inc. that is described in section 3(14) (E) or (G) of the Act,

(2) Is licensed to sell insurance in at least one of the United States or in the District of Columbia,

(3) Has obtained a Certificate of Compliance from the Insurance Commissioner of its domiciliary state, Pennsylvania, within the 18 months prior to the date when the transaction is entered into or when such certificates were last made available by the domiciliary state, if earlier, and (4) (i) Has undergone a financial examination (within the meaning of the law of its domiciliary state, Pennsylvania) by the Insurance Commissioner of the State of Pennsylvania within 5 years prior to the end of the year preceding the year in which the sale occurred, or

(ii) Has undergone an examination by an independent certified public accountant for its last completed taxable year.

(b) The Plan pays no more than adequate consideration for the insurance contracts.

(c) The commission paid to an agent by PLI in connection with the sale of a policy to the Plan does not exceed the commission paid to the agent by reason of placing the same policy with a person who is not a Plan participant.

(d) For taxable years of PLI beginning after December 31, 1981, the gross premiums and annuity considerations received in that taxable year by PLI for life and health insurance or annuity contracts for all employee benefit plans (and their employers) with respect to which PLI is a party in interest or disqualified person by reason of a relationship to such employers described in section 3(14) (E) or (G) of the Act and section 4975(e)(2) (E) or (G) of the Code do not exceed 50 percent of the gross premiums and annuity considerations received for all lines of insurance in that taxable year by PLI. For purposes of this condition (d):

(1) The term "gross premiums and annuity considerations received" means the total of premiums and annuity considerations received, reduced (in both the numerator and denominator of the fraction) by experience refunds paid or credited in that taxable year by PLI.

(2) All premiums and annuity considerations written by PLI for plans which it alone maintains are to be excluded from both the numerator and the denominator of the fraction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on October 15, 1982 at 47 FR 46181.

EFFECTIVE DATE: This exemption is effective January 1, 1982.

[Prohibited Transaction Exemption 82–221; Exemption Application No. L–3350]

National Production Workers Insurance Fund (the Fund) Located in Chicago, Illinois

Exemption

The restrictions of section 406(a) of the Act shall not apply to the purchase of certain computer and office equipment by the Fund from Labor Benefit Services, a party in interest with respect to the Fund, for the cash amount of $125,000, so long as the amount does not exceed the fair market value of the items purchased on the date the transaction is consummated.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on October 15, 1982 at 47 FR 46174.

EFFECTIVE DATE: This exemption is effective April 16, 1982.

FOR FURTHER INFORMATION CONTACT: Linda M. Hamilton of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Prohibited Transaction Exemption 82–222; Exemption Application Nos. L–3537 and L–3538]

Painters District Council No. 3 Vacation Fund (the Vacation Fund) and Painters District Council No. 3, Health and Welfare Fund (the Welfare Fund), Located in Kansas City Missouri

Exemption

The restrictions of section 406(b)(2) of the Act shall not apply to the transfer of unclaimed funds from the Vacation Fund to the Welfare Fund, provided that the Welfare Fund agrees to pay any future claims for benefits due former Vacation Fund participants.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on September 21, 1982 at 47 FR 41661.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Sandler of the Department, telephone (202) 523–8195. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express conditions that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 16th day of December, 1982.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standard, Pension and Welfare Benefit Programs, Labor-Managment Services Administration, Department of Labor

[FR Doc. 82–34562 Filed 12–20–82; 8:45 am]

BILLING CODE 4510–29–M

Proposed Class Exemption for Plan Asset Transactions Determined by Independent Qualified Professional Asset Managers; Hearing

AGENCY: Department of Labor.

ACTION: Notice of Proposed Class Exemption and Notice of Hearing.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed class exemption from certain prohibited transactions restrictions of the Employee Retirement Income Security Act of 1974 (ERISA) and from certain taxes imposed by the Internal Revenue Code of 1954 (the Code). The proposed exemption would permit various parties who are related to employee benefit plans to engage in transactions involving plan assets if, among other conditions, the assets are

managed by qualified professional asset managers (QPAMs) which are independent of the parties in interest and which meet specified financial standards. Additional exemptive relief is proposed for employers which provide limited amounts of goods and services in the ordinary course of business. Limited relief is also provided for leases of office space between managed funds and QPAMs or contributing employers. The proposed exemption, if granted, would affect participants and beneficiaries of employee benefit plans, the sponsoring employers of such plans, QPAM's and other persons engaging in the described transactions.

DATES: Written comments and requests for time to present oral comments at the public hearing must be received by the Department on or before February 18, 1983. The hearing will be held on March 10, 1983 beginning at 10 a.m. The exemption would be effective as of the date of publication of the final grant notice.

ADDRESSES: Written comments and requests for time to present oral comments (preferably at least three copies) should be sent to: Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Ave., N.W., Washington, D.C. 20216. Attention: Professional Asset Manager Exemption. All communications received in response to this notice will be available for public inspection in the Public Documents Room, Pension and Welfare Benefit Programs, Room N–4677 at the above address. The hearing will be held in the Department of Labor Auditorium, 200 Constitution Avenue, N.W., Washington, D.C. Hearing procedure: Any interested person who wishes to be assured of the opportunity to present oral comments at the hearing should submit by March 1, 1983: (1) A written request to be heard, and (2) an outline (preferably 5 copies) of the topics to be discussed, indicating the time to be allocated to each topic. The request to be heard and accompanying outline should be submitted to the address mentioned above.

The Department will prepare an agenda indicating the order of presentation of oral comments and the time allotted to each person making oral comments. In the absence of special circumstances, each commentator will be allotted 10 minutes in which to complete his or her presentation. Information about the agenda may be obtained on or after March 8, 1983, by telephoning Mr. Paul Antsen at (202) 523–8915. This is not a toll-free number. Individuals not listed in the agenda will be allowed to make oral comments at the hearing to the extent time permits. Those individuals who make oral comments should be prepared to answer questions regarding their comments.

A written record of the hearing will be made.

FOR FURTHER INFORMATION CONTACT: Mr. Ivan L. Strasfeld or Mr. Paul R. Antsen, Office of Fiduciary Standards, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216, telephone (202) 523–7901 or 523–8915. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of a proposed class exemption from certain of the restrictions of section 406 of ERISA, and from certain taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) of the Code. The Department is proposing the class exemption on its own motion pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code,[1] and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), specifically section 3.01 of that Procedure.

I. Background

The Department is proposing the class exemption contained in this notice as part of a continuing effort to improve the administration of the prohibited transaction rules of ERISA. The rules set forth in section 406 of ERISA prohibit various transactions between plans and certain related parties. Those parties in interest described in section 3(14) of ERISA, such as plan fiduciaries, sponsoring employers, unions, service providers and their affiliates, may not engage in a transaction described in ERISA section 406 with a plan (or an entity whose assets are plan assets). Specifically, section 406 prohibits sales, leases, loans or the provision of services between a party in interest and a plan, as well as a use of plan assets by or for the benefit of, or a transfer of plan assets to, a party in interest, unless a statutory or administrative exemption applies to the transaction. In addition, unless exempted, parties in interest who are fiduciaries of plans are not permitted to engage in acts of self-dealing or make decisions on behalf of a plan if they are in a conflict of interest situation.

The Department has in the past frequently exercised its statutory authority under section 408(a) of ERISA to grant both individual and class exemptions where it has been able to find that the criteria for granting such exemptions have been met. In general, it has responded to applications for exemption submitted by members of the public. This process has been helpful in providing relief for transactions which would otherwise have been prohibited, without impairing the interests of plans, participants and beneficiaries.

The Department recognizes the general perception that in many instances the prohibited transaction rules continue to present complex problems of compliance for fiduciaries charged with responsibility for employee benefit plan assets. Nevertheless, based on its experience in considering applications for individual and class exemptions, and in dealing with instances of abusive violations of the fiduciary responsibility rules of ERISA, the Department believes that, as a general matter, transactions entered into on behalf of plans with parties in interest are most likely to conform to ERISA's general fiduciary standards where the decision to enter into the transaction is made by an independent fiduciary.

Prohibited Transaction Exemption 78–19 (PTE 78–19) (43 FR 50915, December 22, 1978) and Prohibited Transaction Exemption 80–51 (PTE 80–51) (45 FR 49709, July 25, 1980) generally provide relief from the restrictions of section 406(a) of ERISA for transactions between parties in interest of plans and pooled separate accounts and collective investment funds maintained by insurance companies and banks, respectively, if, among other conditions, the plan has a five percent or less interest in the account or fund. Additional broad exemptive coverage is provided by PTEs 78–19 and 80–51, for parties in interest who are service providers of participating plans.

Established financial institutions, such as banks, insurance companies and registered investment advisers, must maintain current rosters or parties in interest with respect to plans that commit assets to single customer accounts, trust funds and those pooled accounts and collective funds which fail

---

[1] Section 408(a) of ERISA provides, among other things, that the Department may grant an exemption from the prohibited transaction rules only if it finds that the exemption is administratively feasible; in the interests of the plan, and of its participants and beneficiaries; and protective of the rights of participants and beneficiaries of such plan. See also section 4975(c)(2) of the Code.

Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), effective December 31, 1978 (44 FR 1065, January 3, 1979), transferred the authority of the Secretary of the Treasury to issue exemptions of this type to the Secretary of Labor.

In the discussion of the exemption, references to the various provisions of section 406 of ERISA should be read to refer as well to the corresponding provisions of section 4975 of the Code.

to qualify for the relief provided by PTEs 78–19 and 80–51. These fiduciaries are required to undertake time consuming ERISA compliance checks for the numerous investment transactions under consideration each year to ascertain whether a party in interest of a plan, any of whose assets are subject to the fiduciary's management, would cause the transaction to be prohibited. In the case of a large plan, there may be thousands of parties in interest. Where a potentially prohibited party in interest transaction is identified and is not covered by an existing class exemption, the asset manager may have to choose between applying for an individual administrative exemption or foregoing the investment opportunity entirely. The Department believes that further actions would be appropriate in order to eliminate the need for individual exemptions wherever feasible, and that substantial deregulation in this area can be accomplished by administrative means without sacrificing the interests of plan participants and beneficiaries.

The exemption proposed in this document would be available for transactions that may involve assets of single customer accounts and funds managed by insurance companies, banks and registered investment advisers, as well as pooled separate accounts and collective trust funds maintained for a number of plans. Transactions involving assets of pooled separate accounts and collective investment funds that qualify for the relief contained in PTEs 78–19 and 80–51 may be entered into pursuant to those class exemptions or, in the alternative, may be covered by the exemption for qualified professional asset managers, when granted. However, the proposed exemption would not supersede three class exemptions identified in section I(b) of the proposal. The transactions described in, and the protective conditions adopted for, those exemptions were developed with regard to highly standardized industry practices and the generally accepted regulation that surrounds residential mortgage financing, mortgage pool and securities lending arrangements.

II. Description of the Proposed Exemption

A. The QPAM Concept: As proposed, the class exemption would be available for various party in interest transactions that involve those assets of plans that are transferred for discretionary management to qualified professional asset managers (QPAMs). A QPAM is defined as a bank, insurance company or registered investment adviser that meets certain financial conditions. In following the general pattern of the definition of "investment manager" in ERISA section 3(38), the Department recognizes that each of these categories of asset manager is subject to regulation by Federal or State agencies. The minimum capital and funds-under-management standards of the proposed exemption are intended to assure that the eligible fiduciaries managing the accounts or funds ("investment funds"), consisting of the assets of one or more plans, are established institutions which are large enough to discourage the exercise of undue influence upon their decision-making processes by parties in interest.

A financial entity would not achieve QPAM status with regard to a plan unless it enters into a written management agreement or issues a contract that delineates its management authority over investment fund assets and contains a statement acknowledging that it is a fiduciary.[2] As is made explicit in a general condition of the proposed exemption, the Department is prepared to grant broad exemptive relief only where an independent asset manager has, and in fact exercises, discretionary authority to cause an investment fund to enter into a transaction which is otherwise prohibited. Party in interest transactions that are negotiated by, e.g., an employer which sponsors a plan, and are then presented to a QPAM for approval would not qualify for the class exemption as proposed. However, the exemption, as proposed, would be available even though the transfer of assets by a plan to a QPAM is subject to general investment guidelines, so long as there is no arrangement, direct or indirect, for the QPAM to negotiate, or engage in, any specific transaction or to benefit any specific person.

A QPAM, and those who may be in a position to influence its policies, are expected to maintain a high standard of integrity. Accordingly, the proposed exemption does not cover transactions if the QPAM or various "affiliates" have been convicted of various crimes (outlined in section I(g) of the proposal), that involve abuse or misuse of a position of trust, or felonies generally described in ERISA section 411.

B. General Exemption: The proposed exemption consists of four separate parts. The general exemption, set forth in Part I, would allow an investment fund managed by a QPAM to engage in all transactions described in ERISA section 406(a)(1) (A) through (D) with virtually all parties in interest except the QPAM which manages the assets involved in the transaction, and those parties most likely to have the power to influence the QPAM. In this latter regard, under section I(a), a QPAM would not be permitted to cause the investment fund to enter into a transaction if the party in interest dealing with the fund, or its "affiliate", (1) has the authority to appoint or terminate the QPAM as a manager of any of the plan's assets, (2) has the authority to negotiate the terms of the management agreement with the QPAM, or (3) has exercised such powers in the two years immediately preceding the date of the proposed transaction. Under this functional approach, the presence or absence of these disqualifying powers would be determined by the QPAM on a plan-by-plan basis; none of the parties in interest listed in section 3(14) of ERISA would be categorically excluded from the purview of the proposed relief. The principles of this paragraph may be illustrated by the following examples:

Example (1). Plan P establishes a trust fund for a portion of its assets with Bank B. Assume that B meets the criteria for a QPAM that are proposed. B uses Plan P assets to buy a building whose elevators are serviced by Company X under a maintenance contract. Under current law, an investment of Plan P assets to purchase a modern elevator from X, a party in interest described in ERISA section 3(14)(B), would violate the restrictions contained in section 406(a)(1)(A), and the transaction could not proceed until exempted by the Department. The general exemption set forth in Part I of the proposal would allow such a transaction.

Example (2). Corporation C is the named fiduciary of Plan P. C chooses Bank B to manage the portion of P's assets allocated for real estate investments. Bank B uses these assets to purchase a commercial building in New York City from Croporation Z. Z is a wholly-owned subsidiary of C. No part of the exemption would be available for

[2] Section 403(a) provides, in pertinent part, that, generally, all assets of a plan shall be held in trust by one or more trustees. Such trustee or trustees shall have exclusive authority and discretion to manage and control the assets of the plan, except to the extent that (1) the plan expressly provides that the trustee or trustees are subject to the direction of a named fiduciary who is not a trustee, or (2) authority to manage, acquire, or dispose of assets of the plan is delegated to one or more investment managers pursuant to section 402(c)(3). Section 402(c)(3) of ERISA provides that a person who is a named fiduciary with respect to control or management of the assets of the plan may appoint an investment manager or managers to manage (including the power to acquire or dispose of) any assets of a plan.

It is the view of the Department that a delegation of authority to manage plan assets must describe with specificity the scope of the delegation and the duties to be undertaken by the investment manager. See section 404(a)(1) of ERISA.

the purchase of the building because Z is an affiliate (as defined in section V(c) of the proposed exemption) of a party in interest (C) which has the authority to appoint or terminate the QPAM.

Example (3). Plan M is a collectively bargained multiemployer pension plan administered by a joint board of union and employer trustees. The board of trustees chooses Insurance Company Y to manage a portion of its assets in a pooled separate account. The Insurance Company uses a portion of the pooled separate account assets to purchase computers from corporation Z, a contributing employer to Plan M. These computers will be leased to the general public. Neither Z nor any of its affiliates is a member of the board of trustees. Although Z is a party in interest, as an employer any of whose employees are covered by the plan, the general exemption of Part I is available for the purchase of the computers. In this regard, neither Z nor an affiliate has the authority with respect to the plan described in section I(a) of the exemption.

Example (4). Assume the same facts as in Example (3) except that an officer of Corporation Z was a member of the board of trustees of Plan M for the year ending december 31, 1984. Insurance Company Y is chosen on January 1, 1986 to manage plan assets as a successor to Investment Adviser A whose 3 year management contract expired on March 15, 1985. Although the officer had the authority to participate in the appointment of the QPAM and to negotiate the terms of the management contract, this authority was never exercised. Corporation Z can engage in transactions under Part I of the proposed exemption because its affiliate, the officer, did not, at the time of the transaction have the authority, and during the immediately preceding two years (when it had the authority) did not exercise it to appoint the QPAM or negotiate a management agreement with the QPAM with regard to the Plan's assets.

Example (5). QPAM X invests part of a pension fund's managed account to acquire a parcel of unimproved real property from its president Y. QPAM X has engaged in an act of self-dealing described in section 406(b)(1) of ERISA because it has caused the fund's assets to be used in a transaction which benefits a person in whom QPAM X has an interest which may affect the exercise of its best judgment as a fiduciary. Although Part I of the proposal provides an exemption for the purchase of property from Y, it does not provide relief from acts described in section 406(b) of ERISA.

Example (6). Plan P chooses a registered investment adviser, QPAM I, to manage 40 percent of its assets. The Plan allocates an additional 30 percent of its assets to a single customer separate account maintained by QPAM II. QPAM II uses a portion of the separate account's assets to purchase U.S. Government securities directly from Broker-Dealer B, a wholly-owned subsidiary of QPAM I. Assuming that the QPAMs are unrelated entities, the general exemption of Part I is available for this transaction because neither QPAM I nor its affiliate, Broker-Dealer B has, or exercised during the preceding two years, the authority to appoint or terminate QPAM II (or negotiate the QPAM's contract) as a manager of the Plan's assets involved in the transaction. In this regard, a person who is a plan fiduciary, as defined in section 3(21)(A) of ERISA, is deemed to be a fiduciary only with respect to those plan assets over which it exercises, or has responsibility to exercise, those functions which make it a fiduciary (See 29 CFR 2510.3–21(d)(2)). Thus, a fiduciary will be treated as a party in interest other than a fiduciary (i.e., a service provider) when it engages in a transaction involving plan assets with respect to which it is not a fiduciary. Accordingly, no additional relief under the self-dealing provisions of ERISA section 406(b) is required for this transaction which would be covered by Part I of the proposal.

Section I(c) of the proposal requires that the QPAM function as the decision maker of the investment fund for all covered transactions. In general, the terms of the transactions are also to be negotiated by the QPAM. However, specific transactions may be effected by a person or entity that acts under the authority and general direction of the QPAM.

Example (7). A collective fund for plans managed by a bank that is a QPAM invests assets to acquire a large office building. Under section I(c), the QPAM could contract with an unrelated property manager or leasing agent which would operate the property on a day to day basis, under the authority and general direction of the QPAM, for the purpose of making it a productive investment. So long as the transactional criteria are generally established and monitored by the QPAM, and the QPAM approves each transaction, the property manager could negotiate lease, etc., arrangements with parties in interest eligible for the exemption.

Except as permitted in a limited special exemption for leases of office space (proposed in Part III), a QPAM or its affiliate may not enter into transactions with an investment fund which it manages. Moreover, under section I(d), the general exemption would not be available if the QPAM and the party in interest dealing with the fund are related parties. Section V(h) general provides that a party in interest and a QPAM would be "related" if either entity owns a five percent or more interest, directly or indirectly, in the other entity.

The rule proposed in section I(e) makes explicit the Department's view that a plan (and its sponsor) which provides a significant portion of the QPAM's business as a manager of plan funds would, in many cases, be in a position to improperly influence investment decisions of the QPAM. Accordingly, transactions with parties in interest of a plan would not be covered if the amount of the plan's assets that are managed by a QPAM together with the assets managed by the same QPAM that are attributable to other plans maintained by a common sponsor (or its affiliate) represent more than 10 percent of all employee benefit plan assets under the management of the QPAM.

Example (8). A QPAM is organized to manage the assets of only three plans, Plans X, Y and Z delegate responsibility for the management of $3,000,000, $6,000,000 and $1,000,000, of their respective assets to the QPAM. The proposed exemption would be available for transactions involving the parties in interest of Plan Z, only.

Example (9). Corporation X and its wholly owned subsidiary, Corporation Y, maintain separate pension plans for their employees. The assets of Corporation X's plan and Corporation Y's plan are managed by Investment Adviser Z (a QPAM) and comprise 7 percent and 6 percent, respectively, of the total employee benefit assets managed by the Investment Adviser. The Investment Adviser uses plan assets of Corporation X to purchase a shopping center. The Investment Adviser proposes to purchase landscaping shrubbery from any party in interest of either plan. The proposed exemption would not be available for this transaction because the assets of Corporation X's plan (7 percent) when aggregated with the assets of the plan maintained by its affiliate, Corporation Y (6 percent), represent more than 10 percent of the total employee benefit assets managed by the QPAM. However, as proposed, the exemption would be available for transactions

involving parties in interest with respect to other plans managed by the QPAM if the conditions of the exemption are met.

C. Special Exemptions for Employers: Part II of the proposed exemption provides limited relief under section 406 (a) and (b) of ERISA for certain transactions involving those employers and their affiliates who cannot qualify for the general exemption provided by Part I.

Part II is divided into two subparts. Section II(a) would permit transactions involving the furnishing of goods and services to an investment fund managed by a QPAM by a party in interest if certain requirements are met. Transactions must be necessary for the administration or management of the investment fund and must take place in the ordinary course of a business engaged in by the party in interest with the general public. As a limitation, the proposal requires that no more than one percent of the party in interest's annual gross receipts from all business sources may be attributable to transactions engaged in under this special exemption. The application of section II(a) may be illustrated by the following two examples.

Example (10). Pursuant to a proper plan provision, Corporation X, a pension consulting firm which provides actuarial services in the ordinary course of its business, enters into an agreement with a QPAM for the management by the QPAM of the assets of the X-sponsored plan. The QPAM wishes to retain X to provide actuarial services with regard to the trust fund established for the plan. Although the relief afforded by Part I of the proposed exemption would not be available to Corporation X because it has the authority to hire and fire the QPAM, Part II of the exemption would permit Corporation X to provide the type of services that it normally furnishes to the public and that are necessary for the plan, if the remaining conditions of Part II are met.

Example (11). The Board of Directors of Corporation X allocates a portion of Plan P's assets to Investment Adviser I for management. I uses these assets to purchase a shopping center. I contracts with X, a lighting fixtures wholesaler, to purchase and install new fluorescent fixtures throughout the shopping center. The contract sales price for the fixtures and installation amounted to .05 percent of the total gross receipts received by X during its taxable year. The special exemption for employers contained in section II(a) is available for the purchase of fixtures and the accompanying services because the total cost of these goods and services is less than one percent of X's total annual gross receipts and such goods and services are provided in the ordinary course of X's business.

Section II(b) would permit the leasing of office or commercial space by an investment fund to a party in interest if the unit of space under the lease is suitable for use by different tenants and does not exceed 15 percent of the rentable space of the office building or commercial space. The Department notes that the general exemption provided by Part I of the proposal would not provide relief from the limitations with respect to holdings by certain plans of employer securities and employer real property contained in section 407(a) of ERISA (even in the case of employers who contribute to multiple employer plans and do not hold the power of appointment over a QPAM). Section II(b), however, proposes an exemption from the restrictions of ERISA section 407(a) for transactions involving the leasing of office space to employers even where such leases might not otherwise qualify under the employer real property rules by reason of the definition of "qualifying employer real property" contained in ERISA section 407(d)(4).[3] However, in the case of a plan that is not an eligible individual account plan, immediately after the lease transaction, the aggregate fair market value of employer real property and employer securities held by the investment funds of the QPAM in which the plan has an interest may not exceed ten percent of the fair market value of the assets of the plan held in these investment funds. The application of section II(b) may be illustrated by the following example.

Example (12). Corporation X chooses Insurance Company I to manage Profit-Sharing Plan P's assets in a single customer separate account. I uses plan assets to purchase a fifty-story office building. I proposes to lease one floor of the building to Corporation Z, a wholly owned subsidiary of X. Real estate agent A will receive a commission from Z for locating the rental space. The special exemption provided by section II(b) is available for this transaction because the amount of space to be leased to Z is less than 15 percent of the rentable space of the office building and no commission will be paid by the separate account in connection with the transaction.

The availability of the relief provided by sections II(a) and II(b) of the proposal is further conditioned by the requirement that the transactions satisfy the provisions of sections I(c) through (g) of the proposed exemption.

D. Specific Lease Exemption for QPAMs: Part III of the proposed exemption provides limited relief under section 406 (a) and (b) of ERISA for the leasing of office space by an investment fund to the QPAM, an affiliate of the QPAM, or a person who cannot qualify for the general exemption provided by Part I because it holds (or has held) the power of appointment described in section I(a). For this exemption to be available, the unit of space under the lease must be suitable for use by different tenants and cannot exceed one percent of the rentable space in the office building.

The Department recognizes that a QPAM or its affiliate often needs to occupy space in close proximity to those assets managed by the QPAM on behalf of plans. The one percent limitation on the amount of space leased in an office building is designed to ensure that the terms of the lease are no more favorable to the QPAM or its affiliate than are available to other occupants of the building in which the investment fund has an investment.

E. Places of Public Accommodation: In the regular operations of places of public accommodation, such as hotels and motels, that may be purchased by a QPAM on behalf of an investment fund, many people, including parties in interest with respect to a plan managed by the QPAM, may receive the use of rooms, services, food, etc. Such hotels and motels will typically be managed by hotel management companies who probably would not be aware of the relationships of the hotel and motel guests to the QPAM and the plans whose assets are managed by the QPAM. Accordingly, based on precedents established in several class and individual exemptions, the Department is proposing a special exemption, set forth in Part IV, that would provide relief from sections 406(a)(1) (A) through (D) and 406(b) (1) and (2) of ERISA for the furnishing of services and facilities by a place of public accommodation owned by an investment fund managed by a QPAM to all parties in interest if the services and facilities are furnished on a comparable basis to the general public.

Notice to Interested Persons

Because all plan participants and beneficiaries whose plans participate in investment funds managed by QPAMs could conceivably be interested persons, the Department has determined that the

[3] For example, a lease of an office by the investment fund to the employer may not meet the requirement of ERISA section 407(d)(4)(A) that a substantial number of leased parcels be dispersed geographically.

only practical form of notice is by publication in the Federal Register.

General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of ERISA and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of ERISA and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of ERISA, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of ERISA; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of ERISA and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of ERISA and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

Proposed Exemption

The Department has under consideration the granting of the following exemption under the authority of section 408(a) of ERISA and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975).

Part I. *General Exemption.* Effective [date of grant of this exemption], the restrictions of ERISA section 406(a)(1)(A) through (D) and the taxes imposed by Code section 4975 (a) and (b), by reason of Code section 4975(c)(1) (A) through (D), shall not apply to a transaction between a party in interest with respect to an employee benefit plan and an investment fund (as defined in section V(b)) in which the plan has an interest, and which is managed by a qualified professional asset manager (QPAM) (as defined in section V(a)), if the following conditions are satisfied:

(a) At the time of the transaction the party in interest, or its affiliate (as defined in section V(c)), does not have, and during the immediately preceding two years has not exercised, the authority to——

(1) Appoint or terminate the QPAM as a manager of any of the plan's assets, or

(2) Negotiate the terms of the management agreement with the QPAM (including renewals or modifications thereof) on behalf of the plan;

(b) The transaction is not described in—

(1) Prohibited Transaction Exemption 81–6 (46 FR 7527; 1/23/81) (relating to securities lending arrangements),

(2) Prohibited Transaction Exemption 81–7 (46 FR 7520; 1/23/81) (relating to acquisitions by plans of interests in mortgage pools), or

(3) Prohibited Transaction Exemption 82–87 (47 FR 21331; 5/18/82) (relating to certain mortgage financing arrangements);

(c) The terms of the transaction are negotiated on behalf of the investment fund by, or under the authority and general direction of, the QPAM, and the QPAM makes the decision on behalf of the investment fund to enter into the transaction;

(d) The party in interest dealing with the investment fund is neither the QPAM nor a person related to the QPAM (within the meaning of section V(h));

(e) The transaction is not entered into with a party in interest with respect to any plan whose assets managed by the QPAM, when combined with the assets of other plans established or maintained by the same employer (or affiliate thereof described in section V(c)(1) of this exemption) or by the same employee organization, and managed by the QPAM, represent more than 10 percent of the total employee benefit plan assets (as defined in section V(i)) managed by the QPAM;

(f) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof, the terms of the transaction are at least as favorable to the investment fund as the terms generally available in arm's length transactions between unrelated parties;

(g) Neither the QPAM nor any affiliate thereof (as defined in section V(d)), nor any other, direct or indirect, of a 5 percent or more interest in the QPAM is a person who within the 10 years immediately preceding the transaction has been either convicted or released from imprisonment, whichever is later, as a result of: any felony involving abuse or misuse of such person's employee benefit plan position or employment, or position or employment with a labor organization; any felony arising out of the conduct of the business of a broker, dealer, investment adviser, bank, insurance company or fiduciary; income tax evasion; any felony involving the larceny, theft, robbery, extortion, forgery, counterfeiting, fraudulent concealment, embezzlement, fraudulent conversion, or misappropriation of funds or securities; conspiracy or attempt to commit any such crimes or a crime in which any of the foregoing crimes is an element; or any other crime described in section 411 of ERISA. For purposes of this section (g), a person shall be deemed to have been "convicted" from the date of the judgement of the trial court, regardless of whether that judgement remains under appeal.

Part II. *Specific Exemptions for Employers.* Effective [date of grant of this exemption], the restrictions of sections 406(a), 406(b)(1) and 407(a) of ERISA and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of Code section 4975(c)(1) (A) and (E), shall not apply to:

(a) The sale, leasing, or servicing of goods, or to the furnishing of services, to an investment fund managed by a QPAM by a party in interest with respect to a plan having an interest in the fund, if—

(1) The party in interest is an employer any of whose employees are covered by the plan or is a person who is a party in interest by virtue of a relationship to such an employer described in subparagraphs (E), (G), (H) or (I) of ERISA section 3(14),

(2) The transaction is necessary for the administration or management of the investment fund,

(3) The transaction takes place in the ordinary course of a business engaged in by the party in interest with the general public,

(4) Effective for taxable years of the party in interest furnishing goods and services after the date this exemption is granted, no more than one (1) percent of gross receipts derived from all sources may be attributable in any taxable year of the party in interest to transactions engaged in with an investment fund pursuant to section II(a) of this exemption, and

(5) The requirements of sections I (c) through (g) are satisfied with respect to the transaction;

(b) The leasing of office or commercial space by an investment fund managed by a QPAM to a party in interest with respect to a plan having an interest in the investment fund, if—

(1) The party in interest is an employer any of whose employees are covered by the plan or is a person who is a party in interest by virtue of a relationship to such an employer described in subparagraphs (E), (G), (H), or (I) of ERISA section 3(14),

(2) No commission is paid by the investment fund in connection with the transaction,

(3) Any unit of space leased to the party in interest by the investment fund is suitable (or adaptable without excessive cost) for use by different tenants.

(4) The amount of space covered by the lease does not exceed fifteen (15) percent of the rentable space of the office building or the commercial center (if the lease does not pertain to office space),

(5) In the case of a plan that is not an eligible individual account plan (as defined in section 407(a)(3) of ERISA), immediately after the transaction is entered into, the aggregate fair market value of employer real property and employer securities held by investment funds of the QPAM in which the plan has an interest does not exceed 10 percent of the fair market value of the assets of the plan held in these investment funds. For purposes of this requirement, the term "employer real property" means real property leased to, and the term "employer securities" means securities issued by, an employer any of whose employees are covered by the plan or a party in interest of the plan by reasons of a relationship to the employer described in subparagraphs(E), (G), (H), or (I) of ERISA section 3(14), and

(6) The requirements of sections I(c) through (g) are satisfied with respect to the transaction.

Part III. *Specific Lease Exemption for QPAMs.* Effective [date of grant of this exemption], the restrictions of section 406(a)(1) (A) through (D) and 406(b) (1) and (2) of ERISA and the taxes imposed by Code section 4975 (a) and (b), by reason of Code section 4975(c)(1) (A) through (E), shall not apply to the leasing of office space by an investment fund managed by a QPAM to the QPAM, a person who is a party in interest of a plan by virtue of a relationship to such QPAM described in subparagraphs (G),(H), or (I) of ERISA section 3(14) or a person not eligible for the General Exemption of Part I by reason of section I(a), if—

(a) The amount of space covered by the lease does not exceed one (1) percent of the rentable spece of the office building in which the investment fund has the investment,

(b) The unit of space subject to the lease is suitable (or adapatable without excessive cost) for use by different tenants,

(c) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof, the terms of the transaction are not more favorable to the lessee than the terms generally available in arm's length transactions between unrelated parties, and

(d) No commission is paid by the investment fund in connection with the transaction.

Part IV. *Transactions Involving Places of Public Accommodation.* Effective [date of grant of this exemption], the restrictions of section 406(a)(1)(A) through (D) and 406(b) (1) and (2) of ERISA and the taxes imposed by Code section 4975 (a) and (b), by reason of Code section 4975(c)(1) (A) through (E), shall not apply to the furnishing of services and facilities (and goods incidental thereto) by a place of public accommodation owned by an investment fund managed by a QPAM to a party in interest with respect to a plan having an interest in the investment fund, if the services and facilities (and incidental goods) are furnished on a comparable basis to the general public.

Part V. *Definitions and General Rules.* For the purposes of this exemption:

(a) The term "qualified professional asset manager" or "QPAM" means—

(1) A bank, as defined in section 202(a)(2) of the Investment Advisers Act of 1940 that has the power to manage, acquire or dispose of assets of a plan, which bank has, as of the last day of its most recent fiscal year, equity capital (as defined in section V(j)) in excess of $1,000,000, or

(2) An insurance company which is qualified under the laws of more than one State to manage, acquire, or dispose of any assets of a plan, which company has, as of the last day of its most recent fiscal year, net worth (as defined in section V(k)) in excess of $1,000,000 and which is subject to supervision and examination by a State authority having supervision over insurance companies, or

(3) An investment adviser registered under the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, total client assets under its management and control in excess of $50,000,000 and either (A) shareholders' or partners' equity (as defined in section V(1)) in excess of $750,00 or (B) all of its obligations and liabilities assumed or guaranteed by a person described in (a)(1) or (a)(2) of section V above or by a broker-dealer registered under the Securities Exchange Act of 1934 that has, as of the last day of its most recent fiscal year, net worth in excess of $750,000, that has acknowledged in a written management agreement that it is a fiduciary with respect to the plan.

(b) an "investment fund" includes single customer and pooled separate accounts maintained by an insurance company, individual trusts and common, collective or group trusts maintained by a bank, and any other account or fund to the extent that the disposition of its assets (whether or nor in the custody of the QPAM) is subject to the discretionary authority of the QPAM.

(c) For purposes of section I(a), an "affiliate" of a person means—

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person;

(2) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, partner or employee (but only if the employer of such employee is the plan sponsor); and

(3) Any director of the person or any employee of the person who is a highly compensated employee, as defined in section 4975(e)(2)(H) of the Code, or who has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.

(d) For purposes of section I(g) an "affiliate" of a person means—

(1) any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with the person;

(2) Any officer, director, relative of, or partner in, any such person;

(3) Any corporation, partnership, trust or unincorporated enterprise of which such person is an officer, director, partner, or owner; and

(4) Any employee of the person who—

(A) is a highly compensated employee, defined in section 4975(e)(2)(H) of the Code, or

(B) Has direct or indirect authority, responsibility or control regarding the custody, management or disposition of plan assets.

(e) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(f) The term "party in interest" means a person described in ERISA section 3(14) and includes a "disqualified

person," as defined in Code section 4975(e)(2).

(g) The term "relative" means a relative as that term is defined in ERISA section 3(15), or a brother, a sister, or a spouse of a brother or sister.

(h) A QPAM is "related" to a party in interest for purposes of section I(d) of this exemption if the party in interest (or a person controlling, or controlled by, the party in interest) owns, directly or indirectly, a five percent or more interest in the QPAM or if the QPAM (or a person controlling, or controlled by, the QPAM) owns, directly or indirectly, a five percent or more interest in the party in interest. For purposes of this definition, the term "interest" means with respect to ownership of an entity—

(1) The combined voting power of all classes of stock entitled to vote or the total value of the shares of all classes of stock of the entity if the entity is a corporation,

(2) The capital interest or the profits interest of the entity if the entity is a partnership, or

(3) The beneficial interest of the entity if the entity is a trust or unincorporated enterprise.

(i) For purposes of section I(e), the term "employee benefit plan assets" includes assets attributable to plans described in section 3(3) of ERISA and section 4975(e)(1) of the Code, with respect to which assets the QPAM is a fiduciary as defined in section 3(21)(A) of ERISA.

(j) For purposes of section V(a)(1), the term "equity capital" includes stock (common and preferred), surplus, undivided profits, contingency reserves and other capital reserves.

(k) for purposes of section V(a)(2), the term "net worth" includes capital, paid-in and contributed surplus, unassigned surplus, contingency reserves, group contingency reserves, and special reserves.

(l) For purposes of section V(a)(3), the term "shareholders' or partners' equity" is the equity shown in the most recent balance sheet prepared within the two years immediately preceding a transaction undertaken pursuant to this exemption, in accordance with generally accepted accounting principles.

Signed at Washington, D.C. this 14 day of December.

Jeffrey N. Clayton,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (82-68)]

NASA Advisory Council (NAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Informal Task Force for the Study of Effective Shuttle Utilization.

DATES: January 5, 1983, 9 a.m. to 5 p.m.; January 6, 1983, 8:30 a.m. to 4 p.m.

ADDRESS: Nasa Headquarters, Room 7002, 400 Maryland Avenue SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Carl R. Praktish, Code LB-4, National Aeronautics and Space Administration, Washington, DC 20546 (202/755-8380).

SUPPLEMENTARY INFORMATION: The NASA Advisory Council Informal Task Force for Effective Shuttle Utilization was established under the NASA Advisory Council to conduct a study of the directions NASA should take to ensure the most effective use of the Shuttle capability and to report its findings and recommendations to the Council. The Task Force is chaired by Edgar M. Cortright, and has a total of 11 members.

The meeting will be closed to the public from 8:30 a.m. to 4 p.m. on January 6, 1983, because the members will consider the qualifications of candidates to participate in the study either as additional Task Force members or as other contributors. Because this session will be concerned throughout with matters listed in 5 U.S.C. 552b(c)(6), it has been determined that this season should be closed to the public.

For the open sessions, visitors will be admitted to the meeting room up to its capacity, which is approximately 60 persons including Task Force members and other participants. Visitors will be requested to sign a visitor's register.

TYPE OF MEETING: Open—except for the closed session as noted in the following agenda.

AGENDA:

January 5, 1983

9 a.m.—Introduction
9:10 a.m.—Policy and Operations
10:45 a.m.—Marketing and Pricing
3:15 p.m.—Future Launch Vehicles
5 p.m.—Adjourn

January 6, 1983

8:30 a.m.—Planning Session (closed)
4 p.m.—Adjourn

Richard L. Daniels,

Director, Management Support Office, Office of Management.

December 15, 1982.

OVERSEAS PRIVATE INVESTMENT CORPORATION

Agency Report Forms Under OMB Review

AGENCY: Overseas Private Investment Corporation.

ACTION: Request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit information collection requests to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the Agency has made such a submission. The proposed form under review is summarized below.

DATE: Comments must be received within 14 calendar days of this notice. If you anticipate commenting on the form but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the Agency Submitting Officer of your intent as early as possible.

ADDRESS: Copies of the subject form and the request for review submitted to OMB may be obtained from the Agency Submitting Officer. Comments on the form should be submitted to the Agency Submitting Officer and the OMB reviewer.

FOR FURTHER INFORMATION CONTACT:

OPIC Agency Submitting Officer: L. Jacqueline Brent, Office of Personnel and Administration, Overseas Private Investment Corporation, Room 405, 1129 20th Street, NW., Washington, D.C. 20527; Telephone (202) 653-2818.

OMB Reviewer: Francine Picoult, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503; Telephone (202) 395-7231.

SUPPLEMENTARY INFORMATION:

Summary of Form Under Review

Type of Request: Reinstatement.
Title: Project Information Report.
Form Number: OPIC 71.
Frequency of Use: Annually.

Type of Respondent: Businesses.
Standard Industrial Classification Codes: All.
Description of Affected Public: Private, U.S.-owned businesses or investors having overseas investments.
Number of Responses: 60.
Reporting Hours: 1½ hours per response.
Federal Cost: $0.00.
Authority for Information Collection: Section 231(k) of the Foreign Assistance Act of 1961, as amended.
Abstract (Needs and Uses): The project information report form is necessary to elicit and record information on the developmental, environmental, and U.S. economic effects of projects assisted by OPIC. The form will be used by OPIC's staff and management solely as a basis for monitoring these projects and for reporting the results in aggregate form to Congress. The information elicited is available from OPIC's clients only and is pledged to be held in strictest confidentiality.

Dated: December 13, 1982.

Leo H. Phillips, Jr.,

Assistant General Counsel for Legislative and Administrative Affairs.

VETERANS ADMINISTRATION

Notice of Agency Forms Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

SUMMARY: The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document lists a new form and a revised form. The entries contain the following information: (1) The department or staff office issuing the form: (2) The title of the form; (3) The agency form number, if applicable; (4) How often the form must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(H) of Pub. L. 96–511 applies.

ADDRESSES: Copies of the proposed forms and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC, 20420 (202) 389–2146. Comments and questions about the items on this list should be directed to the VA's OMB Desk Officer, Andy Usher, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395–7316.

DATES: Comments on the forms should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: December 13, 1982.

By direction of the Administrator.

Dominick Onorato,

Associate Deputy Administrator for Information Resources Management.

New Form

(1) Office of Budget and Finance.

(2) Work-Study Time Record (VETERAN-STUDENT SERVICES).

(3) VA Form 4–8690.

(4) Recurring.

(5) Educational Institutions.

(6) 45,000 responses.

(7) 11,250.

(8) Not Applicable under 3504 (H).

Revision

(1) Department of Veterans Benefits, Veterans Assistance Service.

(2) Compliance Report of Proprietary Institutions.

(3) VA Form 27–4274.

(4) The collection of data is an ongoing process.

(5) All proprietary schools receiving Federal financial assistance from the VA and/or the Department of Education.

(6) 649 responses annually.

(7) 649 hours.

(8) Not applicable under 3504(H).

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [47 FR 55564. December 10, 1982.

STATUS: Closed/open meeting.

PLACE: 450 Fifth Street, N.W., Washington, D.C. Room 1C30.

DATE PREVIOUSLY ANNOUNCED: Tuesday. December 7, 1982.

CHANGES IN THE MEETING: Additional/deletion items. The following item was considered at a closed meeting scheduled for Wednesday, December 15. 1982, at 9:00 a.m.:

Access to investigative files by Federal. State, or Self-Regulatory authorities.

The following additional item was considered at an open meeting scheduled for Wednesday, December 15. 1982, 10:00 a.m.:

Consideration of whether to adopt final rules which would replace the existing

requirement for supplemental oil and gas disclosures with a requirement to provide the supplemental disclosures specified in FASB Statement No. 69. In addition, the Commission will consider certain conforming amendmens to Industry Guide 2, the proxy rules, and various "safe harbor" provisions. For further information, please contact M. Elizabeth Rader or John W. Albert at (202) 272–3081.

The following item was not considered at an open meeting scheduled for Wednesday, December 15, 1982, at 10:00 a.m.:

Consideration of whether to permit Vincent Forma to become an associated person in a non-supervisory, non-proprietary capacity with BAP Management Corporation. For further information, please contact Mary Binno at (202) 272–2318.

Chairman Shad and Commissioners Evans, Thomas, Longstreth and Treadway determined by vote that Commission Business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any matters have been added, deleted or postponed, please contact: Diane Klinke at (202) 272–2014.

December 16, 1982.

Part II

Department of Commerce

International Trade Administration

Export Trade Certificates of Review

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 325

[Docket No. 21215-252]

Export Trade Certificates of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Proposed rule.

SUMMARY: The Department of Commerce is proposing regulations to implement Title III of the Export Trading Company Act, Pub. L. 97-290. The purpose of this statute is to promote United States export trade by affording United States businesses an export trade certificate of review process. These regulations will establish the procedures for the application for and issuance of the export trade certificates of review. Persons identified in these certificates will have certain protections from liability under Federal and state antitrust laws for certified export trade, export trade activities and methods of operation conducted while the certificates are in effect.

DATE: Comments must be submitted on or before January 20, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of the Assistant General Counsel for Export Trading Companies, Department of Commerce, Room 4877, Washington, D.C. 20230.
Communications should refer to this rule by its title above.

FOR FURTHER INFORMATION CONTACT: Eleanor Roberts Lewis, Assistant General Counsel for Export Trading Companies, Department of Commerce, Washington, D.C. 20230; (202) 377-0937. This is not a toll free number.

SUPPLEMENTARY INFORMATION: On October 1, 1982, Congress passed the Export Trading Company Act (Pub. L. No. 97-290, 96 Stat. 1233) which the President signed into law on October 8, 1982. The purpose of this legislation is to increase United States exports of products and services by encouraging more efficient provision of export trade services to United States producers and suppliers. This is to be accomplished by establishing an office within the Department of Commerce to promote the formation of export trade associations and export trading companies (ETCs), by permitting bankers' banks and bank holding companies to invest in ETCs, by reducing restrictions on export financing provided by financial institutions, by affording certain protections from liability under Federal and state antitrust laws, and by clarifying the application of Federal antitrust laws to certain export trade.

These proposed regulations will implement Title III of the Export Trading Company Act. Title III (15 U.S.C. 4011-4021) authorizes the Secretary to promote and encourage export trade by issuing export trade certificates of review. A person to whom a certificate of review is issued is protected from the trebling of damages for any injury resulting from and criminal liability for export trade, export trade activities and methods of operation specified in the certificate.

Any person may apply for a certificate or review. The regulations define "person" to mean an individual who is a resident of the United States; a partnership or corporation created and existing pursuant to the laws of any state or of the United States; a state or local government entity; or any association or combination, by contract or other arrangement, between or among such persons. There is no requirement that the applicant be organized and operated principally to export or to facilitate the export of goods or services produced in the United States. However, only the applicant's export trade activities can be certified. The Secretary will publish notice of each application in the **Federal Register**. Interested parties will then have twenty days to submit to the Secretary information they consider relevant to the application.

The Secretary may issue a certificate of review to an applicant only if the Secretary, with the concurrence of the Attorney General of the United States, determines that the applicant's proposed conduct will: (1) Result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant; (2) not unreasonably enhance, stabilize, or depress prices within the United States; (3) not constitute unfair methods of competition against competitors engaged in the export of the same class of goods or services; and (4) not reasonably be expected to result in the sale for consumption or resale in the United States of goods or services exported by the applicant. The proposed regulations set out and require the applicant to submit, as part of its application, information needed by the Secretary to make this determination. The Secretary may also request such supplemental information as he or the Attorney General deems necessary to make a proper determination on an application.

The Secretary and the Attorney General are especially interested in comments on the preparation and disclosure of information on the total domestic and foreign sales of the applicant and its members as required in § 329.3(b)(9)(B) of the proposed regulations. The exchange and sharing of such information among competitors may, in certain circumstances, raise antitrust concerns. Since it is not dealt with in the regulations, the Secretary invites comments on how this issue should be addressed.

In addition to the submission of applications, these regulations will also establish the procedures for the review of applications by the Secretary and the Attorney General and for the issuance of a certificate or the denial of an application. The regulations will allow the applicant to withdraw its application at any time prior to a final determination. However, an application which is denied is not entitled to be submitted again for twelve months. The applicant may, within 30 days of receiving a notice of denial, request the Secretary to reconsider his determination.

A person to whom a certificate of review has been issued may subsequently apply for an amendment of the certificate. An application for an amendment will be treated in the same manner as an original application. The grounds and procedures for the modification or revocation of a cetificate are also set out in these regulations. The Secretary specifically invites comments on the appropriateness of the proposed revocation and modification procedures. Finally, the regulations will implement Section 305 of the Export Trading Company Act which governs the judicial review of decisions by the Secretary to grant, deny, amend, modify or revoke a certificate.

The Secretary, with the concurrence of the Attorney General, plans to promulgate guidelines for the issuance of certificates of review. These guidelines will set forth the standards and analytical approach which will be applied in determining whether to certify an applicant's proposed export trade, export trade activities and methods of operation. The Secretary will publish these guidelines in the **Federal Register** when they are developed.

The Department is providing a period of 30 days for public comments on this rule. All comments received before the close of the comment period will be considered by the Department in the development of final regulations. While comments received after the end of the comment period will be considered if possible, their consideration cannot be assured. Public comments that are

accompanied by a request that part or all of the material be treated confidentially because of its business proprietary nature or for any other reason will not be accepted. Such comments and materials will be returned to the submitter and will not be considered in the development of final regulations.

All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, comments in written form are preferred. If oral comments are received, they must be followed by written memoranda which will also be a matter of public record and will be available for public review and copying. Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 4001–B, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Patricia L. Mann, the International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulations issued by the President on February 17, 1981. The proposed regulations are procedural in nature and will not have an annual effect on the economy of $100 million or more. Analysis of the regulations also indicates that they will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions, or have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, a preliminary Regulatory Impact Analysis of this rule is not required.

The only potential costs of the proposed regulations are those to businesses associated with applying for certification and the costs to the Government for processing applications. The recordkeeping, administrative burdens, and direct financial costs to a business to prepare an application under the regulations are expected to be minimal and there is no requirement on a firm wishing to conduct an export venture to utilize the certification mechanism: It is entirely voluntary. Comments from the public regarding costs are specifically requested by the Department to aid in preparing a final rule to ensure cost minimization. The costs to the Federal Government for conducting the antitrust reviews are not expected to be significant.

The proposed rule is not a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969. Accordingly, no assessment of environmental impact statement has or will be prepared.

The proposed rule is exempt from the Regulatory Flexibility Act since the requirements of Section 603 of the Regulatory Flexibiity Act since the Department is not required by Section 553 of Title V, United States Code, or any other law, to publish general notice of proposed rulemaking for interpretative rules, general statements of policy, and rules of procedure or practice. However, even if the proposed rule were not exempt, preparation of an initial Regulatory Flexibility Analysis would not be required because the record keeping, administrative burdens and other costs on any individual entity applying for a certificate of review under the regulations would be minimal and those costs would not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

The Department has requested approval by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) of the information collection requirements contained in these regulations.

List of Subjects in 15 CFR Part 325

Exports, Antitrust, Administrative practice and procedure, Reporting requirements, and Freedom of information.

Accordingly, the Department proposes to amend 15 CFR Chapter III by adding a new Part 325 to read as follows:

PART 325—EXPORT TRADE CERTIFICATES OF REVIEW

Sec.

325.1 Scope.
325.2 Definitions.
325.3 Application for certification.
325.4 Issuance of certificate.
325.5 Publication in the Federal Register.
325.6 Amendment.
325.7 Expedited certification.
325.8 Reconsideration of denial of application for certificate.
325.9 Modification or revocation of certificate.
325.10 Judicial review.
325.11 Return of documents.
325.12 Nonadmissibility in evidence.
325.13 Reports.
325.14 Confidentiality of information.

Authority: Title III of the Export Trading Company Act, Pub. L. 97–290 (96 Stat. 1240–1245, 15 U.S.C. 4011–4021).

§ 325.1 Scope.

This part contains regulations for the issuance of Export Trading Certificates of Review under Title III of the Export Trading Company Act, Pub. L. No. 97–290. Persons identified in these certificates have certain protections from liability under the antitrust laws for certified export trade, export trade activities and methods of operation engaged in while the certificates are in effect.

§ 325.2 Definitions.

As used in this part:

(a) "Act" means Title III of Pub. L. 97–290, Export Trade Certificates of Review.

(b) "Antitrust laws" means the antitrust laws, as such term is defined in the first section of the Clayton Act (15 U.S.C. 12), section 5 of the Federal Trade Commission Act (15 U.S.C. 45) (to the extent that section 5 prohibits unfair methods of competition), and any State antitrust or unfair competition law.

(c) "Applicant" means the person or persons submitting an application for a certificate.

(d) "Application" means an application for a certificate issued pursuant to this Act.

(e) "Attorney General" means the Attorney General of the United States or his designee.

(f) "Certificate" means a certificate of review issued pursuant to this Act.

(g) "Control" means either: (1) Holding 50 percent or more of the outstanding voting securities of an issuer; or

(2) having the contractual power presently to designate a majority of the directors of a corporation, or in the case of unincorporated entities, of individuals exercising similar functions.

(h) "Controlling entity" means an entity which directly or indirectly controls a member or applicant, and is not controlled by any other entity.

(i) "Export trade" means trade or commerce in goods, wares, merchandise, or services exported, or in the course of being exported, from the United States or any territory thereof to any foreign nation.

(j) "Export trade activities" means activities or agreements in the course of export trade.

(k) "Member" means a partner in the parnership or joint venture, if the applicant is a partnership or joint venture; a shareholder of the corporation, if the applicant is a corporation; or a participant in the association, cooperative, or other form of profit or nonprofit organization if the applicant is an association, cooperative or other form of profit or nonprofit organization, where such partner, shareholder or participant is seeking protection under the certificate.

(l) "Method of operation" means any method by which a person conducts or proposes to conduct export trade.

(m) "Person" means an individual who is a resident of the United States; a partnership that is created under and exists pursuant to the laws of any State or of the United States; a state or local government entity; a corporation, whether organized as a profit or nonprofit corporation, that is created under and exists pursuant to the laws of any State or of the United States; or any association or combination, by contract or other Arrangement, between or among such persons.

(n) "Secretary" means the Secretary of the Department of Commerce, or his designee.

(o) "United States" means the several States of the United States the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

§ 325.3 Application for certification.

(a) *Place of filing.* An original and two copies of an application for certification shall be submitted for filing by personal delivery during normal business hours or by registered mail to the Department of Commerce, Washinton, D.C. 20230.

(b) *Contents of Application.* Any person may submit an application for certification. Such application shall contain the following information:

(1) Name and principal address of the applicant and of its controlling entity, if any. Include the name, title, address, telephone number and relationship to the applicant of the individual or individuals to whom all correspondence should be addressed.

(2) The name and principal address of each member, and of each member's controlling entity, if any.

(3) A copy of any legal instrument under which the applicant is organized or will operate. Include copies, as applicable, of its corporate charter, bylaws, partnership, joint venture, membership or other agreements or contracts under which the applicant is organized and conducts or proposes to conduct its export trade activity.

(4) An organization chart or table for the export-related operations of the applicant.

(5) A copy of the applicant's most recent annual report, if any, and that of its controlling entity, if any. To the extent the information is not included in the annual report, or other documents submitted in connection with this application, a brief description of the applicant's operations, including the nature of its business, the types of products or services with which it deals, the places where it does business and its methods of operation.

(6) A copy of the most recent annual report of each member and of its controlling entity, if any. To the extent the information is not included in the annual report, or other documents submitted in connection with this application, a brief description of each member's business operations, including the types of products it manufactures or sells, the types of services it provides, and the places where it does business.

(7) The names, titles, and responsibilities of the applicant's directors, officers, partners and managing officials, and their business affiliations with other members or other businesses engaged in the production or sale of any types of goods or services described in paragraph (b)(8) of this section.

(8)(i) A description refleting customary industry product or service definitions of the goods or services which the applicant exports or proposes to export for itself, its members or its customers.

(ii) To the extent it is reasonably ascertainable, an identification of the goods or services according to the Standard Industrial Classification (SIC) number. Goods should normally be identified according to the 7-digit level. Services should be identified at the most detailed SIC level available.

(9) For each class of the goods, wares, merchandise or services set forth in paragraph (b)(8) of this section:

(i) The principal geographic area or areas in the United States in which the sales of the applicant and each member are made.

(ii) For the previous two calendar years, the dollar value of the applicant's and each member's (A) total domestic sales and (B) total foreign sales. The value of sales of the controlling entity and all entities under its control should be included.

(10) For each class of the goods, wares, merchandise or services set forth in paragraph (b)(8) of this section, the best information or estimate accessible to the applicant of the total value of sales in the United States for the last two years. Identify the source of the information or basis of the estimate.

(11) A description of the specific export trade activities and methods of operation which the applicant seeks to have certified. Only the specific activities and methods described in the application will be eligible for certification. Examples indicating the degree of specificity that the applicant may want to provide, and thus have certified, include:

(i) The types of services which the applicant will provide to or secure for persons engaged in export trade and the manner in which those services will be provided;

(ii) The manner in which prices and quantities of products and services to be exported will be established;

(iii) Any agreements to sell exclusively to or through the applicant or other person, any agreements with foreign persons who may act as joint or exclusive agents, any agreements for pooling tangible or intangible property or resources, and any territorial or price maintenance restrictions to be imposed or agreed to;

(iv) The nature of any restrictions for withdrawal by members.

(12) A statement of whether the export trade, export trade activities or methods of operation for which certification is sought will involve, directly or indirectly, any agreement or any exchange of information with respect to domestic prices, production or sales, or will involve any exchange of other business confidential information. If so, specify the nature of any such agreement or exchange of information.

(13) A statement of whether the applicant intends or foresees that any exported goods or services will re-enter the United States, either in its original or modified form. If so, identify the goods or services and the manner in which they may re-enter the U.S.

(14) The number of employees of the applicant, and of each member of the applicant.

(15) A proposed non-confidential summary of the conduct for which certification is sought for publication in the **Federal Register** pursuant to § 325.5(a).

(16) A draft porposed certificate for the export conduct which the applicant seeks to have certified.

(17) A statement of whether the applicant proposes to engage in the export of goods or services supplied by persons not covered by the certificate.

(18) Such other information as the applicant believes necessary or helpful to a determination on the application under the standards of the Act.

(19) Such other information as the Secretary deems necessary.

(c) *Conformity with regulations.* No application shall be deemed submitted unless such document is in compliance with these regulations. Applicants are encouraged to consult with the Department of Commerce prior to filing an application in order to avail themselves of guidance and assistance in the preparation and documentation of their application.

(d) *Review and acceptance.* On the day of delivery of an application, the Secretary shall stamp the application as received. The Secretary shall have five working days from the stamped date of delivery of the application to determine whether the application is complete, has been properly prepared and can be deemed submitted under this Act. On the date on which the application is deemded submitted, the Secretary shall stamp the application with that date, and notify the applicant of the determination. Where the application cannot be deemed submitted, the Secretary shall advise the applicant that it may be refiled when the specified deficiencies have been corrected.

(e) *Withdrawal of application.* An application may be withdrawn by an applicant by written request at any time before a determination under § 325.4 is made on the application. An applicant who withdraws an application may at any time thereafter submit a new application in accordance with these regulations.

(f) *Supplemental information.* In addition to the information contained in the application, the Secretary shall request such supplemental information as he or the Attorney General deems necessary to make a determination on the application. If such a request is made, and the applicant consents to supply the additional information, the time period for determination on the application will be suspended from the date on which the request is sent until the supplemental information is received and deemed complete by the Secretary. If the applicant does not agree to provide the additional information, and the Secretary or Attorney General deems the information in their possession insufficient to make a determination on the application, the application may be withdrawn by the applicant, or shall be denied by the Secretary.

§ 325.4 Issuance of certificate

(a) *Time period.* The Secretary shall issue or decline to issue a certificate to an applicant within 90 days after an application is deemed submitted under this Act pursuant to § 325.3(d) (excluding any time period which has been suspended pursuant to § 325.3(f)). Upon agreement by the applicant, the Secretary may, if he deems it necessary, or at the request of the Attorney General, take up to an additional 30 days before issuing or declining to issue a certificate.

(b) *Determination.* The Secretary shall issue a certificate to the applicant if he determines, and the Attorney General concurs, that the proposed export trade, export trade activities and methods of operation will—

(1) Result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant;

(2) Not unreasonably enhance, stabilize, or depress prices within the United States of the class of the goods, wares, merchandise or services exported by the applicant;

(3) Not constitute unfair methods of competition against competitors engaged in the export of goods, wares, merchandise or services of the class exported by the applicant; and

(4) Not include any act that may reasonably be expected to result in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the applicant.

(c) *Concurrence of the Attorney General.* (1) Within seven days after an application is deemed submitted under this Act pursuant to § 325.3(d), the Secretary shall forward to the Attorney General a copy of the application, any information submitted in connection with the application, and any other relevant information in his possession. The Secretary and the Attorney General shall make available to each other copies of other relevant information obtained in connection with the certification review process, unless otherwise prohibited by law.

(2) Immediately upon completion of an initial draft of a certificate, but in no event later than twenty days prior to the expiration of the time period for a determination on the application, the Secretary shall make it available to the Attorney General for discussion and comment. If the Attorney General disagrees with the proposed certificate, he shall, no later than ten days prior to the running of the time period for a determination on the application, so advise the Secretary and state the reasons for the disagreement. The Secretary, with the concurrence of the Attorney General, may modify or revise the proposed certificate to resolve the objections and problems raised by the Attorney General, or deny the application for a certificate.

(3) If, after having received the draft certificate by the date specified in paragraph (c)(2) of this section, the Attorney General does not render advice within the time period specified in the preceding paragraph, he shall be deemed to concur in the proposed certificate.

(d) *Content of certificate.* The certificate shall specify the export trade, export trade activities, methods of operation, and all persons which are protected from liability under the antitrust laws. The Secretary may certify in whole or in part the proposed export trade, export trade activities, and methods of operation contained in the applicant's draft certificate with such changes, modifications, terms or conditions as appropriate.

(e) *Effect of denial.* If an application is denied, on the merits, in whole or in part, the applicant shall not be entitled, without the approval of the Secretary, to resubmit the application for certification within the twelve month period succeeding the date of the denial. The Secretary shall consult with the Attorney General regarding any request to resubmit an application prior to the twelve month period.

(f) *Certificate procured by fraud.* A certificate shall be void ab initio with respect to any export trade, export trade activities, or methods of operation for which a certificate was procured by fraud.

(g) *Minimum thirty day period.* No certificate of review may be issued earlier than thirty days from the date of publication of notice in the **Federal Register** pursuant to § 325.5

§ 325.5 Publication in the "Federal Register."

(a) Not more than ten days after an application is deemed submitted for filing under § 325.3(d), the Secretary shall publish notice of the submission of such application in the **Federal Register**, identifying the name of the applicant,

and a non-confidential summary of the conduct for which certification is sought.

(b) Interested parties may, within twenty days from the date of publication in the **Federal Register**, submit to the Secretary information relevant to the determination of whether to issue a certificate.

(c) If a certificate is issued to an applicant, the Secretary shall publish a copy of the certificate in the **Federal Register**. If an application for a certificate is denied, the Secretary shall publish a brief statement of its action on the application.

§ 325.6 Amendment.

An application for an amendment shall be treated in the same manner as an original application under these regulations. The application for an amendment to a certificate shall set forth the proposed amendment(s) and the reasons therefor, and shall contain the information specified in § 325.3(b) which is relevant to the determination of the application for an amendment. The application shall also include a copy of the original application, copies of any previous applications for amendment, and a copy of the certficate under which the applicant has been operating. The effective date of an amendment, if granted, shall be the date on which the application for the amendment is deemed submitted for filing pursuant to § 325.3(d).

§ 325.7 Expedited certification.

(a) *Request for expedited action.* (1) An applicant may request expedited action on its application where circumstances indicate a special need for prompt disposition. Such applicant should set forth the facts and circumstances which warrant expedited processing of its application.

(2) The Secretary shall, with the concurrence of the Attorney General, advise the applicant within 10 days after an application is deemed submitted under this Act pursuant to § 325.3(d) whether it will receive expedited action. The Secretary may grant the request in part, and process the remainder of the application through the normal procedures.

(b) *Time period.* The Secretary shall, with regard to any application for which a request for expedited action has been granted, and subject to the minimum time period in § 325.4(g), issue or decline to issue a certificate within forty five days after an application is deemed submitted under this Act pursuant to § 325.3(d) (excluding any time period which has been suspended pursuant to § 325.3(f)).

(c) *Concurrence of the Attorney General.* (1) Immediately upon completion of an initial draft of a certificate, but in no event later than ten days prior to the expiration of the time period for a determination on the application, the Secretary shall make it available to the Attorney General for discussion and comment. If the Attorney General disagrees with the proposed certificate, he shall, no later than five days prior to the running of the time period for a determination on the application, so advise the Secretary and state the reasons for the disagreement. The Secretary, with the concurrence of the Attorney General, may modify or revise the proposed certificate to resolve the objections and problems raised by the Attorney General, or deny the application for a certificate.

(2) If, after having received the draft certificate by the date specified in paragraph (c)(1) of this section, the Attorney General does not render advice within the time period specified, he shall be deemed to concur in the proposed certificate.

§ 325.8 Reconsideration of denial of application for certification.

(a) If the Secretary determines to deny a certificate to an applicant, in whole or in part, he shall notify the applicant in writing of his decision and the reasons for his determination.

(b) Within 30 days of receipt of a notice of denial, the applicant may request the Secretary to reconsider his determination.

(1) The request for reconsideration should include a written statement setting forth the reasons why the applicant believes the decision should be reconsidered, and such additional information as the applicant deems pertinent.

(2) In the discretion of the Secretary, upon the request of the applicant, the Secretary, and the Attorney General may meet informally with the applicant and/or his representative to discuss the reasons why the determination on the application should be changed.

(c) The Secretary shall consult with the Attorney General with regard to the reconsideration of the application. The Secretary may not modify his original determination without the concurrence of the Attorney General.

(d) The Secretary shall notify the applicant, in writing, of his final determination upon reconsideration and the reasons therefor within thirty days after the request for reconsideration has been received.

§ 325.9 Modification or revocation of certificate.

(a) *Action subject to modification or revocation.* A person holding a certificate whose export trade, export trade activities or methods of operation no longer comply with the requirements set forth in § 325.4(b) or the terms and conditions set forth in the certificate, or who fails to comply with a request for information pursuant to paragraph (b) of this section, may be subject to any of the following actions:

(1) Revocation of certificate. A certificate may be revoked, in whole or in part.

(2) Modification of certificate. A certificate may be modified by the Secretary in such manner and upon such terms and conditions as necessary.

(b) *Request for information.* If the Secretary or the Attorney General has reason to believe that the export trade, export trade activities, or methods of operation of a person holding a certificate no longer comply with the requirements set forth in § 325.4(b), the Secretary shall request such information as he or the Attorney General deems necessary to resolve the matter.

(c) *Proceedings for the revocation or modification of a certificate.* (1) *Notification letter.* If, upon the review of such relevant information as is in their possession, the Secretary or the Attorney General believes that the export trade, export trade activities, or methods of operation of a person holding a certificate no longer comply with the requirements set forth in § 325.4(b), the Secretary shall notify the holder of a certificate in writing by registered or certified mail to the address specified in the certificate of his intent to revoke or modify the certificate. The notification shall include a detailed statement setting forth the facts, conduct or circumstances which may warrant the revocation or modification of the certificate.

(2) *Answer.* The certificate holder shall respond to the notification letter within 30 days of receipt thereof. The answer shall respond specifically to the statement included with the notification letter and state in detail why the facts, conduct or circumstances described in the notification letter are not true, of if true, do not warrant the revocation or modification of the certificate. The failure to respond within the specified period shall be deemed an admission of the allegations contained in the notification letter.

(3) *Resolution of factual disputes.* Where material facts are in dispute, the Secretary and the Attorney General may meet informally with the certificate

holder, and may require the certificate holder to provide such documents or information as necessary to support its contentions. Upon the review of the statements of the certificate holder and the documents or information submitted in support thereof, and upon consideration of other relevant documents or information in his possession, the Secretary shall make a proposed determination of the factual matters in dispute. The Attorney General shall not be bound by the proposed determination.

(4) *Final determination.* The Secretary and Attorney General shall review the notification letter and the answer thereto, the proposed factual determination made pursuant to paragraph (c)(3) of this section, and any other relevant documents or information in their possession. If, upon such review, the Secretary or Attorney General determines that the export trade, export trade activities or methods of operation no longer comply with the standards set forth in § 325.4(b), the Secretary shall revoke or modify the certificate as appropriate. The decision shall be final and will be issued to the certificate holder in writing. The decision shall include a statement of the circumstances underlying, and the reasons in support of the determination. If the determination is made to revoke or modify the certificate, the decision shall specify the effective date for the revocation or modification, which date shall be no earlier than thirty days nor later than ninety days after notice of the determination is given.

(d) *Investigative information.* In proceedings under this section, the Attorney General shall make available to the Secretary any information obtained in response to Civil Investigative Demands issued pursuant to Section 304(b)(3) of this Act. The Attorney General and the Secretary shall also make available to each other such other information which each is relying upon under these proceedings, unless such disclosure is prohibited by law.

§ 325.10 Judicial review.

(a) *Review of certain determinations.* (1) Any person aggrieved by final orders of the Secretary pursuant to §§ 325.4, 325.6, and 325.9 of these regulations may, within thirty days of the determination, bring an action in an appropriate district court of the United States to set aside the determination on the ground that such determination is erroneous.

(2)(i) For purposes of this section, an order shall be deemed final under §§ 325.4 and 325.6 when notice is published in the **Federal Register** of the final determination: (A) To grant, in whole or in part, the application or request for amendment; or (B) to deny, in whole or in part, the application or request for amendment, unless the applicant requests reconsideration of the determination within 30 days pursuant to § 325.8. If the applicant requests reconsideration, the final determination upon reconsideration shall be deemed final when notice is published in the **Federal Register.**

(ii) For purposes of this section, an order shall be deemed final under § 325.9 when notice is published in the **Federal Register** of a final determination pursuant to § 325.9(c)(4).

(b) *Record for review.* For purposes of this section, the record, unless otherwise stipulated by the parties, shall consist of:

(1) with regard to the determination to grant or deny an application for a certificate, a copy of all information presented to or obtained by the Secretary which had a bearing on the determination;

(2) with regard to the revocation or modification of a certificate, all information relating to the preparation of the notification letter or which had a bearing on the final determination;

(3) A copy of the determination and the supporting statement.

(c) *Confidential or privileged material.* In any action under this section, the parties shall seek an appropriate protective order prior to the disclosure of any confidential or privileged documents or information.

(d) *Limitation on judicial review.* Except as provided in paragraph (a) of this section, no agency action taken under this Act shall be subject to judicial review.

§ 325.11 Return of documents.

(a) Upon the denial or withdrawal of an application for a certificate in its entirety, an applicant may request the return of all documents and all copies of the documents available to the Department of Commerce or the Department of Justice. The applicant shall submit such a request to both the Secretary and the Attorney General.

(b) The Secretary and the Attorney General shall return all such documents to the applicant not later than thirty days after receipt of the request, except to the extent that the information contained in a document has been made available to the public.

§ 325.12 Nonadmissibility in evidence.

The denial of an application for a certificate, in whole or in part, or for an amendment to a certificate, and the revocation or modification of a certificate, and any statement of reasons in support thereof shall not be admissible in evidence in any administrative or judicial proceeding in support of any claim under the antitrust laws.

§ 325.13 Reports.

On the anniversary date of each year following the issuance of a certificate, a certificate holder shall submit to the Secretary a report which shall contain any changes relevant to the matters specified in the certificate, an update of the information contained in the application, and any other information the Secretary deems appropriate, after consultation with the Attorney General.

§ 325.14 Confidentiality of information.

(a) Any information submitted by any person pursuant to this Act shall be exempt from disclosure under the Freedom of Information Act, (5 U.S.C. 552).

(b)(1) Except as authorized under paragraph (b)(2) of this section, no officer or employee of the United States shall disclose commercial or financial information submitted pursuant to this Act if the information is privileged or confidential and if disclosure of the information would cause harm to the person who submitted the information.

(2) An officer or employee of the United States may disclose such information under the following circumstances—

(i) Upon a request made by either House of Congress or a Committee or Subcommittee of the Congress,

(ii) In a judicial or administrative proceeding, subject to issuance of an appropriate protective order,

(iii) With the consent of the person who submitted the information,

(iv) When the Secretary deems disclosure of the information to be necessary for a determination with respect to the issuance, amendment, or revocation of a certificate, provided that—

(A) The Secretary determines that a non-confidential summary of the information is inadequate; and

(B) The person who submitted the information is informed of the intent to disclose the information, and has an opportunity to advise the Secretary of the potential harm which disclosure may cause,

(v) In accordance with any requirement imposed by a statute of the United States.

Dated: December 16, 1982.

Malcolm Baldrige,

Secretary of Commerce.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

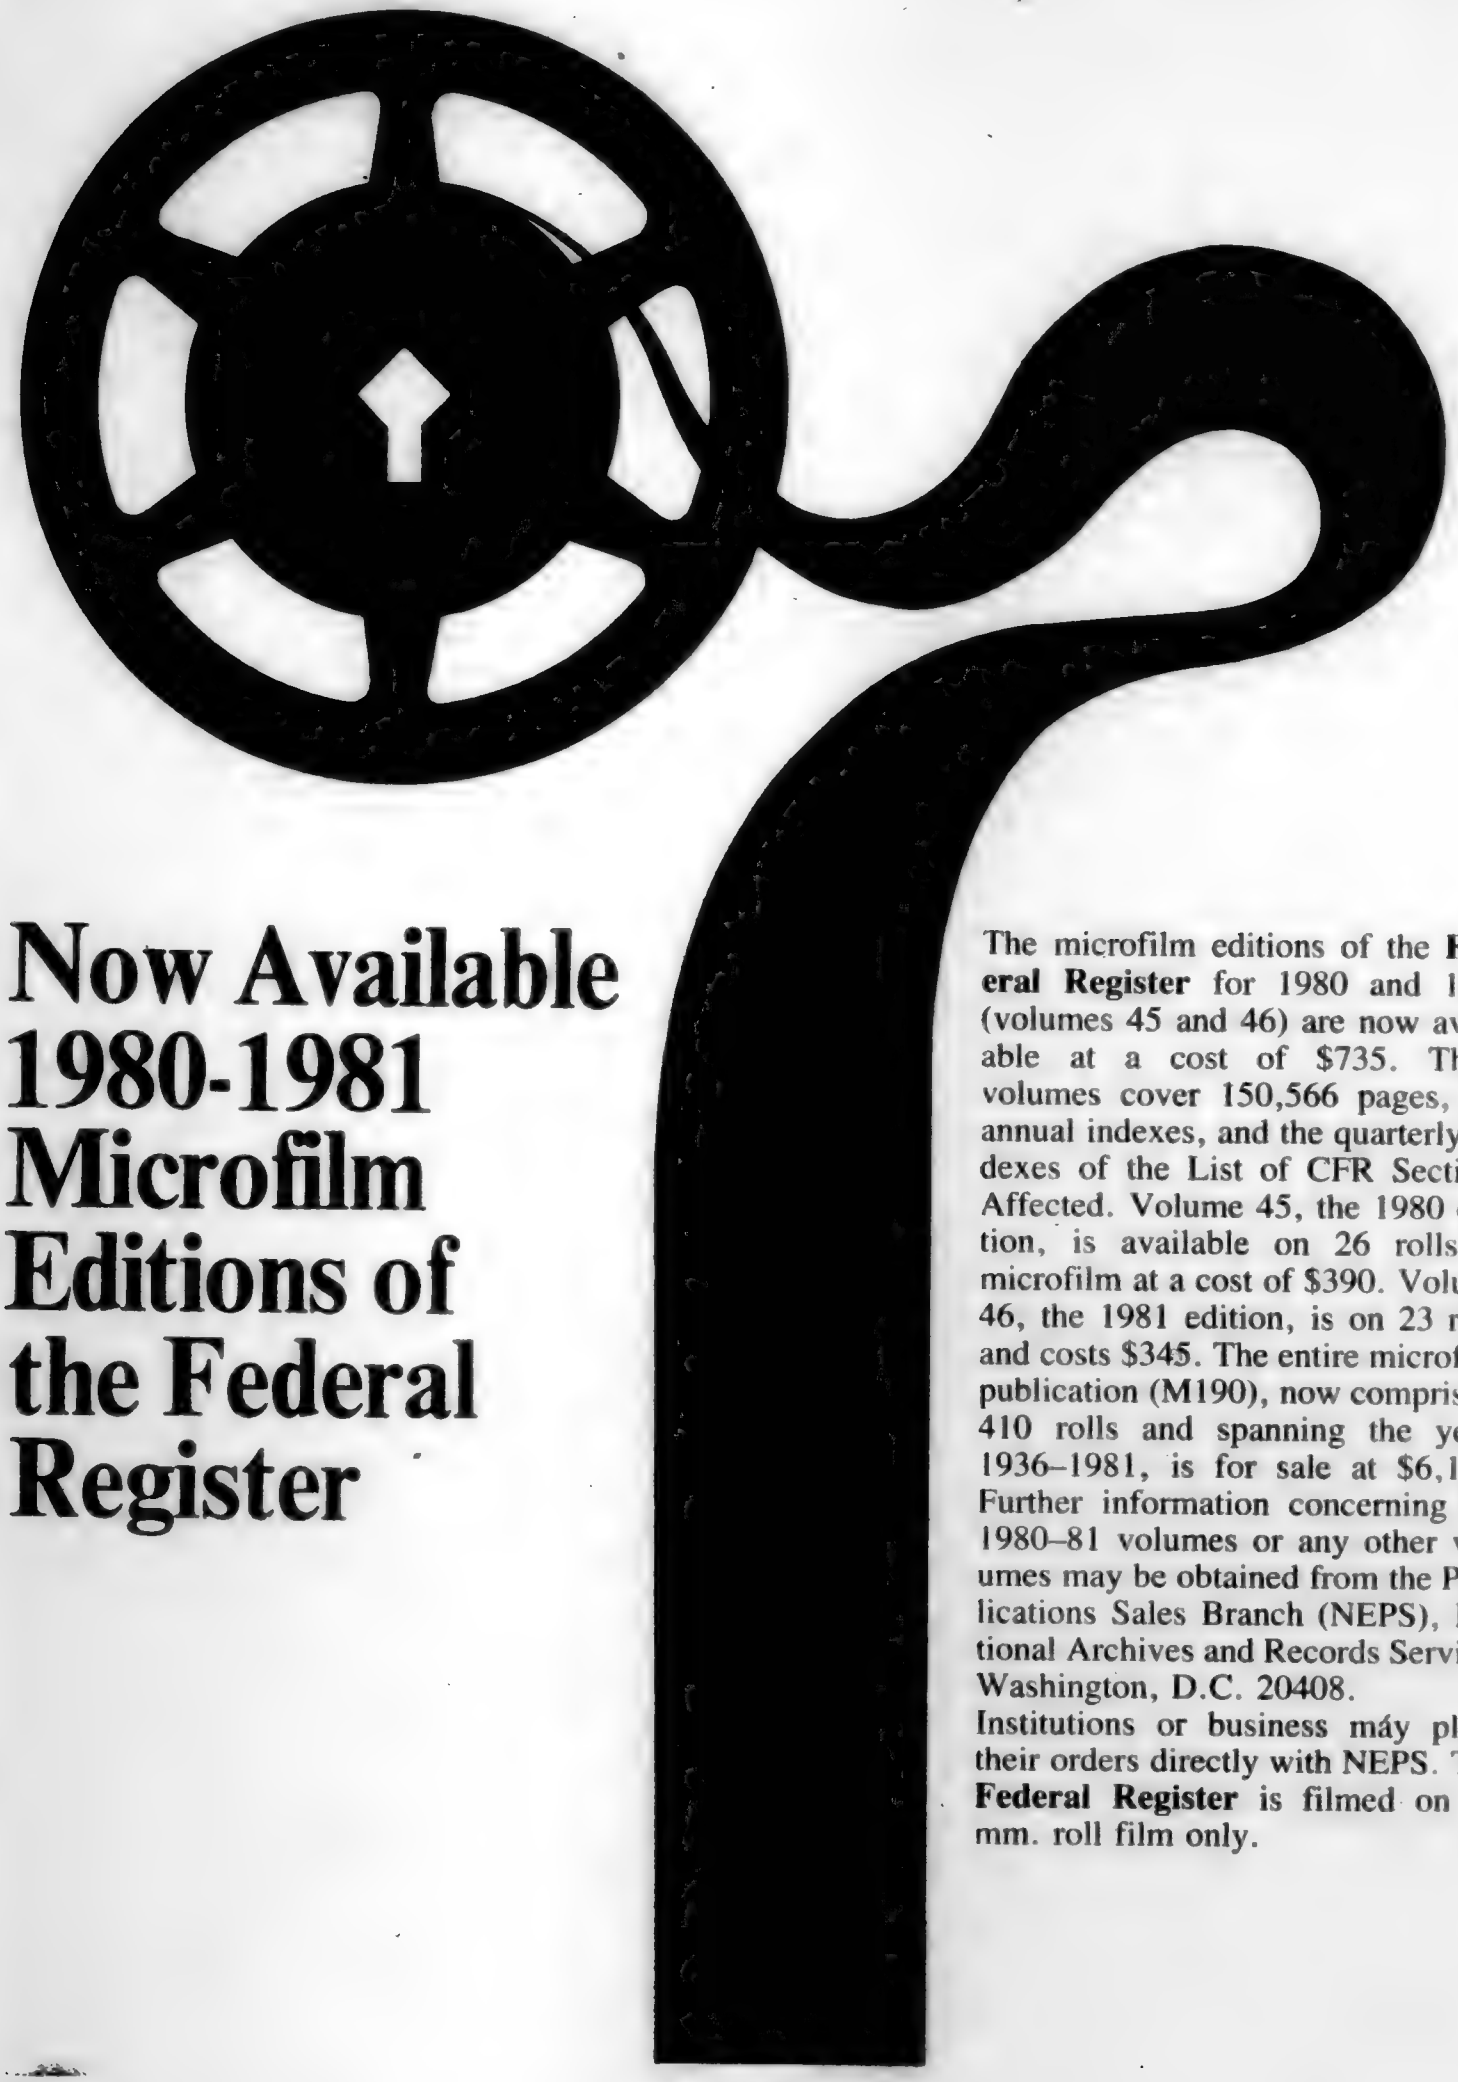
The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last Listing October 28, 1982



Now Available 1980-1981 Microfilm Editions of the Federal Register

The microfilm editions of the **Federal Register** for 1980 and 1981 (volumes 45 and 46) are now available at a cost of $735. These volumes cover 150,566 pages, the annual indexes, and the quarterly indexes of the List of CFR Sections Affected. Volume 45, the 1980 edition, is available on 26 rolls of microfilm at a cost of $390. Volume 46, the 1981 edition, is on 23 rolls and costs $345. The entire microfilm publication (M190), now comprising 410 rolls and spanning the years 1936–1981, is for sale at $6,150. Further information concerning the 1980–81 volumes or any other volumes may be obtained from the Publications Sales Branch (NEPS), National Archives and Records Service, Washington, D.C. 20408.

Institutions or business máy place their orders directly with NEPS. The **Federal Register** is filmed on 35 mm. roll film only.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 47, No. 246
Wednesday, December 22, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

GENERAL ACCOUNTING OFFICE

4 CFR Parts 2, 3, 4, 5, 6, 7, 8, 9, 11, 21, 22, 30, 31, 32, 33, 34, 35, 36, 51, 52, 53, 75, 81, 82, 91, 92, and 93

Technical and Conforming Amendments

AGENCY: General Accounting Office.

ACTION: Final rule.

SUMMARY: This rule makes technical and conforming amendments to change citations of law or references to provisions of law appearing in GAO's existing rules and regulations. This is necessary because of the enactment of the codification of Title 31, U.S.C., into positive law. As a result of this enactment, the substance of provisions of law currently cited in our regulations have been included in the codification while the currently cited provisions of law themselves have been repealed. This rule makes no substantive changes in any of our rules or regulations.

EFFECTIVE DATE: December 22, 1982.

FOR FURTHER INFORMATION CONTACT: Richard Cambosos, Office of General Counsel, U.S. General Accounting Office, 275–5544.

SUPPLEMENTARY INFORMATION: Section 1 of Pub. L. 97–258, September 13, 1982, 97 Stat. 877, revised, codified and enacted certain general and permanent laws of the United States relating to money and finance as Title 31, U.S.C., entitled "Money and Finance."

The purpose of the codification is to restate without substantive change previously adopted provisions of law and to replace them with the code provisions. Section 4(a) of Pub. L. 97–258, 96 Stat. 1067. Consequently, upon enactment of Title 31, U.S.C., by the Congress, all provisions of law restated in the codification were repealed. Section 5 of Pub. L. 97–258, 96 Stat. 1068. However, any order, rule or regulation in effect under any law repealed by Pub. L. 97–258, continues in effect under the corresponding provision of Title 31, U.S.C. Section 4(c) of Pub. L. 97–258, 96 Stat. 1067.

Since GAO's rules and regulations appearing in Title 4 of the CFR were adopted under authority of provisions of law the substance of which have been carried forward into Title 31, U.S.C., we are amending our regulations to change legal references and citations to the appropriate corresponding section of Title 31, U.S.C.

PART 2—[AMENDED]

Accordingly, Title 4, CFR is amended as follows:

1. The Authority of citation for Part 2 is revised to read as follows:

Authority: 31 U.S.C. 732.

§ 2.2 [Amended]

2. Paragraph (a) of 2.2 is revised to read as follows:

(a) Subchapters III and IV of Chapter 7 of Title 31, U.S.C.

3. Section 2.3 is revised to read as follows:

§ 2.3 GAO Personnel Appeals Board.

The General Accounting Office Personnel Appeals Board is established by 31 U.S.C. 751. This Board will promulgate regulations providing for employee appeals and establishing its operating procedures.

PART 3—[AMENDED]

4. The Authority citation for Part 3 is revised to read as follows:

Authority: 31 U.S.C. 732.

PART 4—[AMENDED]

5. The Authority citation for Part 4 is revised to read as follows:

Authority: 31 U.S.C. 732.

PART 5—[AMENDED]

6. The Authority citation for Part 5 is revised to read as follows:

Authority: 31 U.S.C. 732.

§ 5.1 [Amended]

7. Paragraph (b)(2) of § 5.1 is amended by removing the citation "section 5(a)(4) of the GAO Personnel Act of 1980" and inserting, in its place, the citation "31 U.S.C. 733(c)".

PART 6—[AMENDED]

§ 6.1 [Amended]

8. The parenthetical citation following the text of § 6.1 is revised to read as follows:

(31 U.S.C. 732)

PART 7—[AMENDED]

9. The Authority citation for Part 7 is revised to read as follows:

Authority: 31 U.S.C. 732.

PART 8—[AMENDED]

§ 8.1 [Amended]

10. The parenthetical citation following the text of § 8.1 is revised to read as follows:

(31 U.S.C. 732)

PART 9—[AMENDED]

11. Paragraph (b) of § 9.1 is revised to read as follows:

§ 9.1 GAO Senior Executive Service.

* * * * *

(b) Requirements for positions included in the GAO Senior Executive System. The GAO Senior Executive Service may include—

(1) The 100 positions authorized by 31 U.S.C. 732(c)(4);

(2) The position of General Counsel authorized by 31 U.S.C. 731(c);

(3) The 5 positions authorized by 31 U.S.C. 731(d); and,

(4) The 10 positions authorized by 31 U.S.C. 731(e)(2);

12. The two parenthetical citations "(31 U.S.C. 1154(d))" and "(Sec. 5, Pub. L. 96–191; 94 Stat. 31 (31 U.S.C. 52–4))" following the text of § 9.1 are removed and inserted, in their place, the parenthetical citation "(31 U.S.C. 733)".

PART 11—[AMENDED]

13. The Authority citation for Part 11 is revised to read as follows:

Authority: 31 U.S.C. 711.

PART 21—[AMENDED]

14. The Authority citation for Part 21 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 31 U.S.C. 3526 and 3529.

PART 22—[AMENDED]

15. The Authority citation for Part 22 is revised to read as follows:

Authority: 31 U.S.C. 711 and 3529.

§ 22.3 [Amended]

16. Paragraph (e) of § 22.3 is amended by removing the citation "4 CFR Part 1" and inserting, in its place, the citation "4 CFR Part 11".

PART 30—[AMENDED]

17. The Authority citation for Part 30 is revised to read as follows:

Authority: 31 U.S.C. 711 and 3702.

PART 31—[AMENDED]

18. The Authority citation for Part 31 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 31 U.S.C. 3702.

§ 31.5 [Amended]

19. Paragraph (a) of § 31.5 is amended by removing the citation "31 U.S.C. 71a" and inserting, in its place, the citation "31 U.S.C. 3702(b)".

20. Paragraph (b) of § 31.5 is amended by removing the citation "31 U.S.C. 122" and inserting, in its place, the citation "31 U.S.C. 3702(c)".

PART 32—[AMENDED]

§ 32.1 [Amended]

21. The Authority citation for Part 32 is revised to read as follows:

Authority: 31 U.S.C. 711.

PART 32—[AMENDED]

22. Section 32.1 is amended by removing the citation "31 U.S.C. 71" and inserting, in its place, the citation "31 U.S.C. 3702".

PART 33—[AMENDED]

23. The Authority citation for Part 33 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 5 U.S.C. 5583, unless otherwise noted.

§ 33.6 [Amended]

24. Paragraph (c)(3) of §33.6 is amended by removing the citation "section 1(b) of the act of August 28, 1957, Pub. L. 85–183, 31 U.S.C. 132" and inserting, in its place, the citation "31 U.S.C. 3328(b)".

PART 34—[AMENDED]

25. The Authority citation for Part 34 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 10 U.S.C. 2771; 32 U.S.C. 714; sec. 3, 70A Stat. 619, as amended, 33 U.S.C. 857a; and, sec. 4, 70A Stat. 619, as amended, 42 U.S.C. 213a.

§ 34.3 [Amended]

26. Paragraph (b)(3) of § 34.3 is amended by removing the citation "section 1(b) of the act of August 28, 1957, Pub. L. 85–183, 31 U.S.C. 132." and inserting, in its place, the citation "31 U.S.C. 3328(b)."

PART 35—[AMENDED]

27. The Authority citation for Part 35 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 31 U.S.C. 3702.

PART 36—[AMENDED]

28. The Authority citation for Part 36 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 31 U.S.C. 3702.

PART 51—[AMENDED]

§ 51.1 [Amended]

29. Section 51.1 is amended as follows:

(a) By removing the citation "section 309, 42 Stat. 25, 31 U.S.C. 49" and inserting, in its place, the citation "31 U.S.C. 3511"; and,

(b) By revising the parenthetical citation immediately following the text to read as follows: (31 U.S.C. 711. Interpret and apply 31 U.S.C. 3511 and 3512.)

PART 52—[AMENDED]

30. The Authority citation for Part 52 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 31 U.S.C. 3511, 3512 and 3523.

§ 52.2 [Amended]

31. The parenthetical citation following the text of § 52.2 is revised to read as follows:

(31 U.S.C. 711. Interpret or apply 31 U.S.C. 3511, 3512, 3513, 3526 and 3529; sec. 901(a), 49 Stat. 2015, 46 U.S.C. 1241(a); sec. 5, 88 Stat. 2104, 49 U.S.C. 1517)

PART 53—[AMENDED]

32. The Authority citation for Part 53 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply sec. 322, 54 Stat. 955, as amended, 49 U.S.C. 66(b).

PART 75—[AMENDED]

§ 75.1 [Amended]

33. The parenthetical citation following the text of § 75.1 is revised to read as follows:

(31 U.S.C. 711 and 3511)

PART 81—[AMENDED]

34. The Authority citation for 81 is revised to read as follows:

Authority: 31 U.S.C. 711.

PART 82—[AMENDED]

§ 82.1 [Amended]

35. Paragraph (b) of § 82.1 is amended by removing the citation "(31 U.S.C. 46)" and inserting, in its place, the citation "(31 U.S.C. 704)."

§§ 82.1, 82.2 [Amended]

36. The parenthetical citation following §§ 82.1 and 82.2 are each revised to read as follows:

(31 U.S.C. 711, 713, 714, 718, 3523, 3524, 3526 and 3529)

PART 91—[AMENDED]

37. The Authority citation for Part 91 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 5 U.S.C. 5584; 10 U.S.C. 2774; and, 32 U.S.C. 716.

PART 92—[AMENDED]

38. The Authority citation for Part 92 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 5 U.S.C. 5584; 10 U.S.C. 2774; and 32 U.S.C. 716.

§ 92.8 [Amended]

39. Paragraph (b) of § 92.8 is amended by removing the citation "31 U.S.C. 71" and inserting, in its place, the citation "31 U.S.C. 3702".

PART 93—[AMENDED]

40. The Authority citation for Part 93 is revised to read as follows:

Authority: 31 U.S.C. 711. Interpret or apply 5 U.S.C. 5584; 10 U.S.C. 2774; and, 32 U.S.C. 716.

Charles A. Bowsher,

Comptroller General of the United States.

4 CFR Parts 27 and 28

General Accounting Office Personnel Appeals Board—Organization and Procedures; Technical and Conforming Amendments

AGENCY: General Accounting Office Personnel Apppeals Board.

ACTION: Final rule.

SUMMARY: This rule makes technical and conforming amendments to change citations of law or references to

provisions of law appearing in the Board's existing rules and regulations. This is necessary because of the enactment of the codification of Title 31, U.S.C., into positive law. As a result of this enactment, the substance of currently cited provisions of law appearing in the Board's regulations have been included in the codification while the currently cited provisions of law themselves have been repealed. This rule makes no substantive changes in any of the Board's rules or regulations.

EFFECTIVE DATE: December 22, 1982.

FOR FURTHER INFORMATION CONTACT: Richard Cambosos, Office of General Counsel, U.S. General Accounting Office, 275–5544.

SUPPLEMENTARY INFORMATION: Section 1 of Pub. L. No. 97–258. September 13, 1982, 97 Stat. 877, revised, codified and enacted certain general and permanent laws of the United States relating to money and finance as Title 31, U.S.C., entitled "Money and Finance."

The purpose of the codification is to restate without substantive change previously adopted provisions of law and to replace them with the code provisions. Section 4(a) of Pub. L. No. 97–258, 96 Stat. 1067. Consequently, upon enactment of Title 31, U.S.C., by the Congress, provisions of law restated in the codification were repealed. Section 5 of Pub. L. 97–258, 96 Stat. 1068. However, any order, rule or regulation in effect under any law repealed by Pub. L. No. 97–258, continues in effect under the corresponding provision of Title 31, U.S.C. 4(c) of Pub. L. No. 97–258, 96 Stat. 1067.

Since the rules and regulations of the Board appearing Title 4 of the CFR were adopted under authority of provisions of law the substance of which have been carried forward into Title 31, U.S.C., it is necessary for the Board to amend its regulations to change legal references and citations to the appropriate corresponding section of Title 31, U.S.C.

Accordingly, Title 4, CFR is amended as follows:

PART 27—[AMENDED]

1. The Authority citation for Part 27 is revised to read as follows:

Authority: 31 U.S.C. 753.

2. Section 27.1 is amended by removing the citation "Section 4 of Pub. L. No. 96–191, 94 Stat. 29, the General Accounting Office Personnel Act of 1980" and inserting, in its place, the citation "31 U.S.C. 751".

PART 28—[AMENDED]

3. The Authority citation for Part 28 is revised to read as follows:

Authority: 31 U.S.C. 753.

§ 28.1 [Amended]

4. Paragraph (b) of § 28.1 is amended by removing the citation "section 4(h) of the Act." and inserting, in its place, the citation "31 U.S.C. 753."

§ 28.3 [Amended]

5. Section 28.3 is amended by removing paragraph "(a)" and redesignating paragraphs "(b)" through "(j)" as paragraphs "(a)" through "(i)".

6. Redesignated paragraph (e) of § 28.3 is amended by removing the citation "Sections 4(f) and (g) of the the Act" and inserting, in its place, the citation "31 U.S.C. 752(b)".

§ 28.25 [Amended]

7. Paragraph (f) of § 28.25 is amended by removing the citation "section 4(l)(1) of the Act," and inserting, in its place, the citation "31 U.S.C. 755,".

§ 28.27 [Amended]

8. Paragraph (a) of § 28.27 is amended by removing the citation "subsections 4(h)(1), (2), (3), (6), and (7) of the Act" and inserting, in its place, the citation "31 U.S.C. 753(a) (1), (2), (3), (6), and (7)".

9. Paragraph (c) of § 28.27 is amended by removing the citation "section 4(l) of the Act" and inserting, in its place, the citation "31 U.S.C. 755".

§ 28.31 [Amended]

10. Section 28.31 is amended by removing the citations "Section 3(g) of the Act" and "section 3(g)(3) of the Act" and inserting, in their places, the citations "Section 732(f) of Title 31, U.S.C." and "31 U.S.C. 732(f)(2)", respectively.

§ 28.33 [Amended]

11. Paragraph (c) of § 28.33 is amended by removing the citation "section 3(g)(3) of the Act" and inserting, in its place, the citation "31 U.S.C. 732(f)(2)".

§ 28.41 [Amended]

12. Paragraph (e) of § 28.41 is amended by removing the citation "Act, Section 3(g)(3)" and inserting, in its place, the citation "31 U.S.C. 732(f)(2)".

§ 28.61 [Amended]

13. Section 28.61 is amended by removing the citation "section 4(h)(4) and (5) of the Act" and inserting, in its place, the citation "31 U.S.C. 753(a)(4) and (5)".

14. Section 28.81 is revised to read as follows:

§ 28.81 Authority of the Board.

(a) The procedures in this subpart relate in part to the Board's function to "consider and order corrective or disciplinary action in cases arising from * * * a matter appealable to the Board under the labor-management relations program under" 31 U.S.C. 732(e)(2) "including a labor practice prohibited under" 31 U.S.C. 732(e)(1). 753(a)(6).

(b) The system so established by the Comptroller General is required to provide that each employee of the GAO has the right to form, join or assist, or not form, join, or assist, an employee organization, freely and without penalty or reprisal and for a labor-management relations program, consistent with Chapter 71 of Title 5, U.S.C. (31 U.S.C. 732(e))

§ 28.105 [Amended]

15. Paragraph (a) of § 28.105 is amended by removing the citation "section 4(g) of the Act" and inserting, in its place, the citation "31 U.S.C. 752(b)".

16. Paragraph (e) of § 28.105 is amended by removing the citation "section 4(1) of the Act" and inserting in its place, the citation "31 U.S.C. 755".

§§ 28.1, 28.3, 28.11, 28.17, 28.21, 28.33, and 28.103 [Amended]

17. In addition to the amendments set forth above 4 CFR Part 28 is amended by removing the words "the Act" and inserting, in their place, the citation "Subchapters III and IV of Chapter 7 of Title 31, United States Code" in the following places:

(a) 4 CFR 28.1(a)(3) and (4) and (c);

(b) 4 CFR 28.3(h) as redesignated above;

(c) 4 CFR 28.11(a);

(d) 4 CFR 28.17(d);

(e) 4 CFR 28.21(i);

(f) 4 CFR 28.33(b)(1) and (2); and,

(g) 4 CFR 28.103.

Edward C. Gallas,

Chairman.

BILLING CODE 1610–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Orange, Grapefruit, Tangerine and Tangelo Regulation 6, Amdt. 19]

Oranges, Grapefruit, Tangerines and Tangelos Grown in Florida; Amendment of Tangerine Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment lowers the minimum size requirement applicable to fresh domestic shipments of Honey tangerines from 2$^{8}/_{64}$ inches to 2$^{6}/_{64}$ inches in diameter on and after December 20, 1982. This action allows an increase in the supply of tangerines in recognition of demand conditions and the size composition of available supply in the interest of growers and consumers. This amendment also corrects an error in the grade requirement of domestic and export shipments of Honey tangerines.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS USDA, Washington, D.C. 20250, telephone (202) 447–5975.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a signifocamt economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the Florida Honey tangerine crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This amendment is issued under the marketing agreement and Order No. 905 (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines and tangelos grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon recommendation and information submitted by the Citrus Administrative Committee, and upon other available information. It is hereby found that the regulation of Florida Honey tangerines, as hereinafter provided, will tend to effectuate the declared policy of the Act.

This amendment would relax limitations on the handling of Honey tangerines by permitting each handler, on and after December 20, 1982, to ship Honey tangerines in domestic channels of 176 size (2$^{8}/_{64}$ inches) and larger.

The committee reports that the total quantity of Honey tangerines which are currently being harvested is less than anticipated and there is a need to augment the total available supply of fruit for market by permitting shipment of smaller sized Honey tangerines. Honey tangerines are maturing approximately four to six weeks early this season. This amendment allows shipment of smaller sizes which normally would not be matured at this time. Thus, relaxation of the regulation is necessary to allow a greater proportion of the available supply of marketable fruit to reach the market.

This regulation also corrects an error in the domestic and export grade requirements for Honey variety tangerines. Florida Orange, Grapefruit, Tangerine, and Tangelo Regulation 6, Amendments 13 and 16 (47 FR 44704 and 47 FR 54926, respectively) incorrectly list the minimum grade of Honey tangerines as U.S. No. 1 for domestic and export shipment. On and after October 1982, the correct minimum grade for domestic and export shipments of such tangerines is Florida No. 1.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the amendment at an open meeting. This amendment relieves restrictions on the handling of Florida Honey tangerines. Handlers have been apprised of such provisions and the effective date.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Tangelos, Tangerines.

PART 905—[AMENDED]

Accordingly, the provisions of § 905.306 are amended by revising the following entries in Table I, paragarph (a) applicable to domestic shipments, and Table II, paragraph (b), applicable to export shipments, to read as follows:

§ 905.306 Oranges, Grapefruit, Tangerine and tangelo regulation 6.

(a) * * *

TABLE I

Variety	Regulation period	Minimum grade	Minimum diameter (inch)
(1)	(2)	(3)	(4)
* * *	* * *	* * *	* * *
Tangerines	Oct. 18 to Dec. 19, 1982.	Florida No. 1	2$^{8}/_{64}$
Honey	On and after Dec. 20, 1982.	Florida No. 1	2$^{8}/_{64}$
* * *	* * *	* * *	* * *

TABLE II

Variety	Regulation period	Minimum grade	Minimum diameter (inch)
(1)	(2)	(3)	(4)
* * *	* * *	* * *	* * *
Tangerines:			
Honey	On and after Oct. 18, 1982.	Florida No. 1	2$^{8}/_{64}$
* * *	* * *	* * *	* * *

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 16, 1982.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 71

[Docket No. 82-091]

General Provisions; Interstate Movement of Diseased Animals and Poultry; Correction

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule; correction.

SUMMARY: On December 7, 1981 (46 FR 59527–59528), a document was published in the **Federal Register** which removed the word "screwworms" from the regulations in § 71.3(a). However, on February 23, 1982 (47 FR 7825–7826), a document published in the **Federal Register** inadvertently included the word "screwwworms" in § 71.3(a) when making other amendments to that section. This document corrects this administrative oversight which resulted in reinstating the word "screwworms" in 9 CFR 71.3(a).

EFFECTIVE DATE: December 22, 1982.

FOR FURTHER INFORMATION CONTACT: Dr. Jack R. Pitcher, Sheep, Goat, Equine and Ectoparasites Staff, VS, APHIS,

USDA, Room 738, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8231.

§ 71.3 [Corrected]

Accordingly, 9 CFR 71.3(a) is corrected by removing the word "screwworms."

(Sec. 2, 32 Stat. 792; secs. 3 and 11, 23 Stat. 32, as amended; sec 1, 32 Stat. 791 (21 U.S.C. 111, 114, 114(a), 120))

Done at Washington, D.C. this 15th day of December 1982.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

9 CFR Part 91

[Docket No. 82-084]

Port Designated for Exportation of Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document amends the regulations which lists the ports of embarkation and export inspection facilities, by adding Indianapolis, Indiana, as a port of exportation. The effect of this action will be to add an additional port through which animals may be exported. This action is necessary to save both time and additional expenses presently imposed on exporters.

DATES: Effective date: December 22, 1982. Written comments must be received on or before February 21, 1983.

ADDRESS: Written comments should be submitted to the Deputy Administrator, VS, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register**.

All written submissions made pursuant to this interim rule will be made available for public inspection at the Federal Building, Room 728, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Dr. N. Q. Faizi, VS, APHIS, USDA, Room 821, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Emergency Action

This document has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this action will not have an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived their review process required by Executive Order 12291.

Dr. George P. Pierson, Acting Director, National Program Planning Staffs, VS, APHIS, USDA, has determined that an emergency situation exists which warrants publication without prior opportunity for a public comment period on this interim rule since the export inspection facilities at the port being added to the list of designated ports of embarkation have met the standards for export inspection facilities set forth in § 91.41(c) of the regulations; and the addition of this port to the list must be made promptly in order to inform exporters of the addition of this port so that they can make appropriate plans to export their animals and avoid unnecessary restrictions on the exportation of animals.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency interim action is impracticable, unnecessary and contrary to the public interest, and good cause is found for making this emergency interim action effective less than 30 days after publication of this document in the **Federal Register**. Comments will be solicited for 60 days after publication of this document, and this action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. It is anticipated that approximately 35 shipments of animals, consisting of cattle, swine, and occasionally sheep and goats, will be exported annually through the facility at Indianapolis, Indiana. The addition of Indianapolis, Indiana, to the list of approved exportation facilities will increase the number of such facilities from twenty-three to twenty-four. According to Foreign Agricultural Service records, there are approximately 700 exporters who could use these export facilities nationwide. It is anticipated that only 8 such exporters will be utilizing this facility.

Alternatives Considered

The following alternatives were considered in making this interim rule:

1. Make no change in lists of ports.
2. Amend the regulations by adding Indianapolis, Indiana, as a port of export.

Alternative No. 1 was rejected because the export inspection facilities at the Indianapolis International Airport meet the requirements of § 91.14(c) and this alternative would be an unnecessary restriction placed upon the exporters who otherwise would choose to use this port of export.

Alternative No. 2 is the most advantageous to exporters because they can export animals from the Indianapolis International Airport instead of having the additional expense of transporting them to Dundee, Illinois, which is 250 miles away. Also, it appears that this alternative would maximize the net benefit to society at the lowest net cost.

Background

The Department has been requested to designate Indianapolis, Indiana, as a port of export through which animals can be exported. This action will facilitate approximately 35 shipments of animals annually.

Section 91.14(a) of Title 9, Code of Federal Regulations (9 CFR 91.14(a)) lists ports which have export inspection facilities which satisfy the requirements of paragraph (c) of said section and are therefore designated as ports of embarkation. The section further requires that, except for certain exceptions, all animals be exported through either the ports listed in § 91.14(a) or through ports designated in special cases under paragraph (b) of this section.

Presently, ports of exports in § 91.14(a) are listed alphabetically by State; therefore, the State of Indiana will

be added to the list as § 91.14 (a)(4) and the present § 91.14(a)(4) through § 91.14(a)(12) will be renumbered § 91.14(a)(5) through § 91.14(a)(13), respectively.

List of Subjects in 9 CFR Part 91

Animal diseases, Animal welfare, Exports, Livestock and livestock products, Transportation, Humane animal handling.

PART 91—INSPECTION AND HANDLING OF LIFESTOCK FOR EXPORTATION

Accordingly, Part 91, Title 9, Code of Federal Regulations, is amended in the following respect.

In § 91.14(a), paragraphs (4) through (12) are redesignated as (5) through (13) and a new paragraph (4) is added to read:

§ 91.14 Ports of embarkation and export inspection facilities.

BILLING CODE 3410-34-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 55

Partial Regionalization of the Operator Licensing Function

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The NRC is amending its regulations relating to operator licenses to provide information concerning the further implementation of NRC's regional licensing program. This amendment states that authority and responsibility for the issuance of licenses for operators and senior operators of licensed nuclear reactors located in Regions II and III have been assigned and delegated to the Regional Administrators of Regions II and III and specifies where applicants for these licenses should obtain necessary forms and file applications. This amendment is necessary to inform licensees, operators, applicants, and the public of current NRC organization and practice.

EFFECTIVE DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Don H. Beckhan, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; Telephone (301) 492–4868.

SUPPLEMENTARY INFORMATION: In further implementation of its regionalization program, the Commission has delegated to the Regional Administrators of Regions II and III authority and responsibility pursuant to the regulations in 10 CFR Part 55 to issue and renew licenses for operators and senior operators of nuclear reactors licensed under 10 CFR Part 50 and located in those regions.

The general delegation of authority for the Regional Administrators is described in NRC Manual Chapter 0128. Pursuant to that general delegation of authority, the Executive Director for Operations and the Director of Nuclear Reactor Regulation assigned and delegated to the Regional Administrators for Regions II and III the responsibility under 10 CFR Part 55 for licensing operators of nuclear reactors licensed under 10 CFR Part 50 and located in Regions II and III. Copies of the delegations of authority have been placed in the Commission's public document room at 1717 H Street, NW., Washington, D.C., and at the Region II Office, 101 Marietta Street, Suite 3100, Atlanta, Georgia 30303, and the Region III Office, 799 Roosevelt Road, Glen Ellyn, Illinois 60137, where they are available for inspection and copying by the public.

The revised regulations, which are intended to inform licensees and the public of current NRC practices and organization, specify where applications for operator and senior operator licenses shall be filed, where reports and communications shall be submitted and where needed information and forms may be obtained.

Since the amendments to Part 55 are nonsubstantive and relate to matters of agency organization and procedure, the notice and comment procedures of the Administrative Procedure Act (5 U.S.C. 553) do not apply and good cause exists for making the amendments effective on December 17, 1982, without the customary 30-day waiting period.

Paperwork Reduction Act Statement

This rule contains no new or amended requirements for recordkeeping, reporting, plans or procedures, applications, or any other type of information collection subject to the Paperwork Reduction Act of 1980, Pub. L. 96–511.

List of Subjects in 10 CFR Part 55

Manpower training programs, Nuclear power plants and reactors, Penalty, Reporting requirements.

Under the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the following amendments to 10 CFR Part 55 are published as a document subject to codification.

PART 55—OPERATORS' LICENSES

1. The authority citation for Part 55 is revised to read as follows:

Authority: Secs. 107, 161, 68 Stat. 939, 948, as amended (42 U.S.C. 2137, 2201); secs. 201, 202, 88 Stat. 1242, as amended, 1244 (42 U.S.C. 5841, 5842).

Section 55.40 also issued under secs. 186, 187, 68 Stat. 955 (42 U.S.C. 2236, 2237).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 55.3 and 55.31(a)–(d) are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and § 55.41 is issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. Section 55.5 is revised to read as follows:

§ 55.5 Communications.

(a) Except as provided under a regional licensing program identified in paragraph (b) of this section, any communication or report concerning the regulations in this part and any application filed under these regulations may be submitted to the Commission as follows:

(1) By mail addressed to—Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(2) By delivery in person to the Commission offices at—

(i) 1717 H St. NW., Washington, D.C. or

(ii) 7920 Norfolk Avenue, Bethesda, Maryland.

(b)(1) The Commission has delegated to the Regional Administrators of Regions II and III authority and responsibility pursuant to the regulations in this part for the issuance and renewal of licenses for operators and senior operators of nuclear reactors

licensed under 10 CFR Part 50 and located in these regions.

(2) Any application filed under the regulations in this part involving a nuclear reactor licensed under 10 CFR Part 50 and located in Region II and any inquiry, communication, information or report relating to matters subject to the regulations in this part and involving a nuclear reactor licensed under 10 CFR Part 50 and located in Region II must be submitted by mail or in person to the Regional Administrator, Region II, U.S. Nuclear Regulatory Commission, 101 Marietta Street, Suite 3100, Atlanta, Georgia 30303. The Regional Administrator of Region II, or his designee, will transmit to the Director of Nuclear Reactor Regulation any matter which is not within the scope of the Regional Administrator's delegated authority.

(3) Any application filed under the regulations in this part involving a nuclear reactor licensed under 10 CFR Part 50 and located in Region III, and any inquiry, communication, information or report relating to matters subject to the regulations in this part and involving a nuclear reactor licensed under 10 CFR Part 50 and located in Region III, must be submitted by mail or in person to the Regional Administrator, Region III, U.S. Nuclear Regulatory Commission, 799 Roosevelt Road, Glen Ellyn, Illinois 60137. The Regional Administrator of Region III, or his designee, will transmit to the Director of Nuclear Reactor Regulation any matter which is not within the scope of the Regional Administrator's delegated authority.

3. In Section 55.10, paragraph (a) is revised to read as follows:

§ 55.10 Contents of applications.

(a) As provided in § 55.5, each application for a license must be filed with the Director of Nuclear Reactor Regulation, the Director of Nuclear Material Safety and Safeguards, or a designated Regional Administrator, as appropriate. The application must be submitted in triplicate, except for the report of medical examination, and must contain the following information:

(1) The full name, citizenship, age, address, and present employment of the applicant;

(2) The education and pertinent experience of the applicant, including detailed information on the extent and nature of responsibility;

(3) Serial numbers of any operator and senior operator license issued by the Commission to the applicant and the expiration date of each;

(4) The specific facility for which the applicant seeks an operator or senior operator license;

(5) The written request of an authorized representative of the facility licensee that the operating test be administered to the applicant of the facility.

(6) Evidence that the applicant has learned to operate the controls in a competent and safe manner and has need for an operator or a senior operator license in the performance of his duties. The Commission may accept as proof of this a certification of an authorized representative of the facility licensee where the applicant's services will be utilized. This certification must include details on courses of instruction administered by the facility licensee, number of course hours, number of hours of training and nature of training received at the facility, and for reactors, the startup and shutdown experience received.

(7) A report of a medical examination by a licensed medical practitioner, in one copy in the form prescribed in § 55.60.

* * * * *

4. Section 55.41 is revised to read as follows:

§ 55.41 Notification of disability.

The licensee shall notify the Commission of the occurrence of any disability referred to in § 55.11(a)(1) that occurs after the submission of the licensee's medical examination form. As provided in § 55.5, the licensee shall notify the Director of Nuclear Reactor Regulation, the Director of Nuclear Material Safety and Safeguards, or the designated Regional Administrator, as appropriate, within 15 days after the occurrence of the disability.

5. In § 55.60, paragraph (b) and the note to the section are revised to read as follows:

§ 55.60 Examination form.

* * * * *

(b) The examining physician shall complete and sign Form NRC–396, and, as provided in § 55.5, shall mail the completed form to the Director of Nuclear Reactor Regulation, the Director of Nuclear Material Safety and Safeguards, or the designated Regional Administrator, as appropriate.

Note:—Copies of Form NRC–396 may be obtained by writing the Commission at the appropriate address provided in § 55.5.

Dated at Bethesda, Maryland, this 8th day of December 1982.

For the Nuclear Regulatory Commission.

William J. Dircks,

Excutive Director for Operations.

BILLING CODE 7590-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 523, 541, 543, 544, 545, 546, 547, 549, 552, 561, 563, 563b, 564, 565, 569a, 575, 576, 577, 578, 583, and 584

[No. 82-791]

Charters and Bylaws Available to Federal Associations, and Related Amendments; Processing of Applications

Dated: December 8, 1982.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule; request for comments.

SUMMARY: In order to implement statutory revisions contained in Public Law 97–320, the Garn-St Germain Depository Institutions Act of 1982, the Federal Home Loan Bank Board has amended its regulations governing federal association charters. Under the amendments, all federal associations (or those seeking to convert to federal associations) may elect to be chartered either as federal savings and loan associations or as federal savings banks. In addition, federal charters, whether in the stock or mutual form, may be obtained by state-chartered savings banks without the requirement that they surrender their Federal Deposit Insurance Corporation ("FDIC") insurance in favor of insurance of accounts from the Federal Savings and Loan Insurance Corporation ("FSLIC"). No charter already issued will have to be amended if an institution is content with the status quo; any amendment will be purely a business decision for an institution. Because of the addition of FDIC-insured federal savings banks to the list of Board regulatees, numerous technical and conforming amendments have been made, particularly in the merger area. This, in large degree, has been required as a result of the fact that many regulations designed to apply to federal associations are cast in terms of whether an institution is an "insured institution," i.e., one the accounts of which are insured by the FSLIC.

As an additional matter, the Board also is consolidating its application process for all de novo federal mutual associations. The amendments will combine the Permission to Organize application and the Petition for Charter application. The Board will propose de novo federal stock institution application regulations in the near future.

These changes should prove extremely beneficial to thrift

institutions. A wider range of thrifts will have access to a greater variety of federal charter forms, and to the increased empowerments and flexibility that accompany those charters. Moreover, the process of applying to organize a federal association will be simplified and streamlined, benefiting those seeking to enter the thrift industry.

DATES: Effective December 15, 1982.

Comments must be received by February 22, 1983

ADDRESS: Send comments to Director, Information Services Section, Office of Communications, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Randall H. McFarlane, Legislative Counsel, Office of General Counsel (202–377–6449), David A. Permut, Attorney, Office of General Counsel (202–377–6982), Donna K. Ralston, Attorney, Office of General Counsel (202–377–6421), or K. Diane Boyle, Program Analysis Development Division Director, Office of District Banks (202–377–6720).

SUPPLEMENTARY INFORMATION:

Charters Available to Federal Associations and Related Amendments

A. Overview

On October 15, 1982, the Garn-St Germain Depository Institutions Act of 1982 ("Act"), Pub. L. 97–320, was enacted. A major thrust of the Act is to broaden greatly the chartering and organizational options open to federal associations. Previously, federal associations could be organized on a de novo basis only as federal mutual savings and loan associations. The Board could charter federal savings banks, but only as mutual institutions with accounts insured by the FSLIC, and only as a direct consequence of a conversion from a state-chartered mutual savings bank. The Act not only permits de novo organization of federal savings banks, it allows any current or future federal association to be chartered either as a federal savings and loan association or a federal savings bank. Furthermore, federal charters, whether in the stock or mutual form, may be obtained by state-chartered savings banks without the requirement that they surrender their FDIC insurance in favor of FSLIC insurance of accounts. The Act also considerably broadens the statutory purposes of federal associations; prior to the passage of the Act, the basic purpose of a federal association was to act as a place for the investment of funds and as a source of investment for housing. The statutory purposes of federal associations now include the financing of all goods and services.

The Board has determined to respond to these changes basically by creating four new charter forms, which will be accessible to all federal associations or those institutions qualifying to convert to federal associations. Any institution wishing to organize as, or convert to, a federal mutual savings bank will seek a Charter B (Revised) instead of a Charter B. An association desirous of organizing as, or converting to, a federal stock savings bank will elect a Charter T. Those that wish to organize as, or convert to, federal mutual savings and loan associations, will have to obtain a Charter N (Revised) rather than a Charter N, or a Charter L rather than a Charter K (Revised). All the new mutual charters contain conforming changes to reflect, as a result of the Act, the broader purposes of federal associations. Charter T follows the very broadly phrased language of Charter S (for federal stock savings and loan associations). Current holders of charters will not have to amend their charters or seek new charters unless they perceive a business or other benefit, such as the ability to operate as a federal savings bank. In the interest of rapid implementation of the Act, the Board has not attempted to make extensive changes in its previous charter forms, although it believes such changes may be appropriate. The Board intends, however, to examine the need for a broad restructuring of its charter forms in the near future, and has instructed its staff to develop proposals on this subject.

Because the Act provides, for the first time, for Board regulation of FDIC-insured institutions, it has been necessary to make a large number of amendments to prior regulations to permit these institutions to fit rationally into a regulatory scheme largely keyed to a description of regulatees as "insured institutions," i.e., institutions the accounts of which are insured by the FSLIC. Among the more important of these were amendments adjusting the Board's merger regulations to accommodate the presence of FDIC-insured organizations.

B. Federal Mutual Savings Banks

Previous regulations governing federal mutual savings banks ("FMSBs") were found in 12 CFR Parts 575, 576, 577 and 578. Given the wider availability of the FMSB charter option, previously open only to converted state mutual savings banks, the removal by the Act of distinctions between FMSBs and other federal associations in such areas as branching and discrimination requirements, and the substantial changes made regarding grandfathering, it was determined to repeal those Parts, after making appropriate regulatory adjustments elsewhere in 12 CFR Part 544. Thus, 12 CFR 544.1(c) will contain Charter B (Rev.), the form that will be used by new FMSBs. That form will be virtually the same as the former Charter B, basically containing changes intended to conform to the broadened purposes of federal associations, the availability of authority to offer demand accounts as well as savings accounts, the repeal of former restrictions on equity, corporate bond and consumer loan investments, and the existence of FDIC-insured FMSBs not subject to FSLIC insurance reserve requirements. FMSBs, except as specifically noted in the regulations or their charters, will have the same powers and be subject to the same requirements as other federal associations.

C. Federal Stock Savings Banks

Federal associations (whether FSLIC-insured or FDIC-insured) wishing to operate as federal stock savings banks will do so under new Charter T, found at 12 CFR 552.3. Charter T essentially is Charter S with the phrase "Charter T" substituted for "Charter S," the words "Federal Savings Bank" substituted for the words "Federal Savings and Loan Association," and the word "bank" substituted for the word "association". Charter T associations will be regulated, except as specifically provided in their charters or by regulation, on the same basis as other federal associations. Any association in the mutual form must convert to the stock form pursuant to the provisions of 12 CFR Part 563b in order to obtain a Charter T.

D. Federal Savings and Loan Associations

Charters for new mutual-form federal savings and loan associations previously were issued either as Charter N, under 12 CFR 544.1(a), or as Charter K (rev.), under § 544.1(b). Charters issued under those provisions are being modified slightly to reflect changes resulting from the Act, and are redesignated as Charter N (rev.) and Charter L, respectively. The changes involve restating the purpose of an association as being to pursue the lawful objectives of a federal association, rather than simply to promote thrift and economical home financing, and conforming the Charters, previously oriented only to holders of savings

accounts, to reflect the existence of demand accounts.

E. Adoption by Federal Associations of New Federal Charters

Large numbers of federal associations have expressed interest in converting to federal savings banks. Under these amendments, a federal savings and loan association may become a federal savings bank (and vice versa) only in connection with a change of charter under 12 CFR 544.3. This requirement is contained in 12 CFR 543.1(b), dealing with title changes. Section 544.3, which previously dealt only with changes to Charter K (rev.) from Charter N, now governs all situations where a federal mutual association seeks a new form of federal mutual charter, or a federal stock association seeks a new form of federal stock charter. The simple procedure of the old regulation, however, is preserved: when notified by an institution's board that a majority of the institution's members or stockholders have approved adoption of a new form of federal charter, the Board will issue the charter in the form desired, upon approval of any change sought in name or location. Approval of the charter and other changes, however, now may be made by the Principal Supervisory Agent.

F. Mergers

Previously, the merger regulations for federal mutual associations, found at 12 CFR Part 546, and for federal stock associations, found at 12 CFR Part 552, contemplated mergers only with FSLIC-insured institutions. With the provision of authority to charter FDIC-insured federal associations, it has been necessary to make certain regulatory adjustments. Accordingly, 12 CFR 546.1(a) is amended to allow: Under subparagraph (1), mergers between FSLIC-insured federal associations and other FSLIC-insured institutions, as per prior regulation; under subparagraph (2), mergers between FDIC-insured federal associations and other FDIC-insured institutions, provided laws applicable to the non-federal associations are complied with (for instance, the provisions of the Bank Merger Act (12 U.S.C. 1828)); and under subparagraph (3), mergers between FDIC-insured federal associations and FSLIC-insured institutions, subject to prior FDIC approval and compliance with such law as may be applicable to the non-federal associations involved. Other amendments include a revision of 12 CFR 546.1(a) to expand the definition of "association" to include commercial banks eligible to merge with a federal association, and a revision of 12 CFR 546.2(g), concerning the law governing effective dates of mergers, to cover the possibility of resulting associations other than federal associations that would not be subject to state law requirements.

Similar changes are made to the federal stock association merger regulations in 12 CFR 552.13. Section 552.13(c)(1), which previously limited merger partners to institutions insured by the FSLIC, is amended to stipulate that, where a transaction involves an FDIC-insured federal association, the constituent associations may be either FDIC-insured or FSLIC-insured (including interim federal and interim state associations). Another change in § 552.13(b)(1) provides an additional exception to the rule that a mutual association must survive its merger with a Charter S or T association. This amendment incorporates the new exception into § 552.13(c)(1) in conformity with an amendment to § 563b.10 of the Rules and Regulations for Insurance of Accounts (12 CFR 563b.10) which authorized, on a test-case basis, the filing of applications for the non-supervisory merger of insured mutual institutions into insured stock institutions. (See Board Res. No. 82–390; 47 FR 24252, June 4, 1982.) Section 552.13(b)(1) is revised to include commercial and industrial banks within the definition of association. In addition, the provision governing Board approval, § 552.13(d), is amended, as required by statute, to require prior FDIC approval of mergers of FDIC-insured federal associations with entities not so insured, and § 552.13(e), concerning board-of-director approval, is amended to acknowledge that state law may not always be determinative with respect to what procedure a board must observe to approve a merger. Finally, § 552.13(l), dealing with effective dates of mergers, is revised to recognize that state law may not be the proper source of authority as to what date is proper where a resulting association is not a federal association.

G. Delegation of Authority Regarding State Stock to Federal Stock Conversions

On October 29, 1981, by Resolution No. 81–851 (46 FR 54722, November 4, 1981), the Board amended the Rules and Regulations for the Federal Savings and Loan System to provide in § 552.2–1 (12 CFR 552–2.1) for delegation of authority to the Principal Supervisory Agent of the appropriate Federal Home Loan Bank to approve applications for conversion of state-chartered stock savings and loan institutions to federally-chartered stock savings and loan institutions.

Based on its experience with conversion applications processed pursuant to Section 552–2.1, the Board has found that applications for conversion of state-chartered stock savings and loan institutions to federally-chartered stock savings and loan institutions for supervisory reasons may present significant legal issues or policy considerations requiring review by the Board's staff in Washington, D.C. Accordingly, the Board has determined to amend its delegation of authority to the Principal Supervisory Agent to approve state stock to federal stock conversion applications to delegate to the General Counsel the authority to approve conversion applications undertaken for supervisory reasons. The amendment does not affect the delegation of authority to the Principal Supervisory Agent to approve conversion applications not undertaken for supervisory reasons.

On March 26, 1980, by Resolution No. 80–202, the Board delegated to the Principal Supervisory Agent the authority to approve unprotested applications for conversion of state-chartered institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation to federally-chartered institutions conditioned upon the applicant's satisfaction of the criteria established in § 543.9 (12 CFR 543.9) and submission of evidence from the appropriate state authorities within six months from the date of the approval of the conversion application that the conversion is in conformance with state law. The first of these conditions is contained in § 552–2.1. The Board has determined to amend § 552–2.1. to include the second of these conditions in order to ensure that the conversion of state-chartered stock savings and loan institutions to federally-chartered stock savings and loan institutions complies with the applicable laws of the applicants' jurisdictions. However, in order to expedite the conversion process, the Board is requiring that the certification that the conversion is in conformance with state law be made by independent local counsel rather than by the appropriate state authorities.

H. Miscellaneous, Technical and Conforming Amendments

1. A new § 523.3–2 authorizes the Principal Supervisory Agent to approve all unprotested FHLBank membership applications.

2. 12 CFR 523.10(b)(1) is amended to indicate that FDIC-insured banks may include stock-form as well as mutual-form savings banks.

3. 12 CFR 541.8 is amended to include savings banks chartered under section 5 of the Home Owners' Loan Act as federal associations. Previously, the section only referenced federal savings and loan associations so chartered.

4. 12 CFR 541.8–1 is amended to delete the words "A savings and loan", thus allowing the Board to charter interim federal associations that are federal savings banks.

5. In order to clarify to whom questions should be directed regarding conversions to federal mutual charters, and the status of Supervisory Agent recommendations on same, 12 CFR 543.8 is amended to incorporate the substance of former 12 CFR 576.1, regarding mutual savings bank conversions. Similar language exists at 12 CFR 543.2(a), regarding permission to organize a federal association. In addition, § 543.8 is amended to indicate that approval authority for conversions to federal charters is delegated to the Principal Supervisory Agent.

6. An amendment to 12 CFR 543.9(c) stipulates that an eligibility examination by the FSLIC is not a precondition to Board consideration of a request for a federal charter by an FDIC-insured savings bank. Section 543.9(d) is amended to delete reference to a repealed statutory requirement that a state institution seeking a federal charter must receive approval of 51 percent of its members. The question of consent now will be left entirely to state law. In addition, those sections, as well as § 543.9(a), are amended to reflect delegation of authority to the Principal Supervisory Agent to approve conversion applications.

7. 12 CFR 543.10 is removed, and 12 CFR 543.11 is redesignated as § 543.10, with an amendment to supply a reference to the procedures in new § 543.11 as constituting an exception to the normal post-conversion organization rules for federal associations. 12 CFR 576.4, governing organization after conversion to federal charter of federal mutual savings banks, is redesignated as new § 543.11, and amended to specify that it applies only to FMSBs that immediately prior to conversion were state MSBs. References are amended to conform to the new section numbers.

8. A new § 543.12 is added which states that the Board may grant federal charters to FDIC-insured savings banks notwithstanding their failure to obtain FSLIC insurance of accounts.

9. A new § 543.13 is added which states that the Board shall notify the FDIC of applications for federal charters by FDIC-insured institutions, shall consult with it before disposing of such an application, and shall notify it of the Board's determination with respect to the application.

10. 12 CFR 544.2, concerning federal charter amendments, is amended to indicate in the introductory text and paragraph (i) that it applies only to mutual savings and loan associations, and not to federal mutual savings banks, which are governed by another provision in this respect. Section 544.2(c) is amended to delete the word "savings", in recognition of the ability of federal associations to offer demand accounts as well as savings accounts, and § 544.2(f) is revised to replace obsolete references to Charter N and Charter K (rev.) with references to Charter N (Rev.) and Charter L.

11. 12 CFR 577.1–1, setting forth a preapproved mutual capital certificate amendment for federal mutual savings banks, is amended to redesignate it as 12 CFR 544.2–1, after removing existing § 544.2–1.

12. A new 12 CFR 544.2–2 is added, dealing with preapproval of federal mutual savings bank corporate title changes. The language is virtually identical to that of 12 CFR 577.1–2, repealed by these amendments, concerning the same subject.

13. 12 CFR 544.5, regarding prescribed bylaws, is amended to indicate they are applicable only to federal mutual S&Ls.

14. 12 CFR 577.2, regarding bylaws for federal mutual savings banks, is redesignated 12 CFR 544.5–1 and revised to indicate that it applies only to federal mutual savings banks.

15. A new § 544.8 is added to incorporate the substance of 12 CFR 578.1(b), removed by these amendments. Paragraph (a) essentially restates the provision in § 578.1(b) that references in the regulations to federal mutual savings and loan charters shall also be deemed references to federal mutual savings bank charters, also stipulating that references to superseded mutual association charter forms shall be references to the new forms created by these amendments. Paragraph (b) duplicates the requirement in § 578.1(a) that federal mutual savings bank trustees are subject to regulations applicable to federal savings and loan association directors.

16. A new § 544.9 is added, stipulating that Charter B federal mutual savings banks no longer must comply with a now-obsolete charter provision restricting their corporate debt, equity, and consumer loan investments.

17. 12 CFR 546.5, concerning conversions to the state mutual form under a now repealed provision of section 5(i) of the Home Owners' Loan Act of 1933, is deleted.

18. 12 CFR 547.3, 547.6, 549.1(b), 549.2 and 549.3, relating to receiverships, are amended to conform to the statutory requirement that the Board appoint the FDIC as receiver for FDIC-insured federal associations. In addition, the amendment to § 547.6 deletes a confusing reference to liquidation as the sole purpose of a receivership.

19. 12 CFR 549.5–1(a) is amended to stipulate that federal savings bank receivers shall follow procedures for deposit associations. Amendments are made to § 549.5–1 (b) and (c) to provide for the fact that federal associations now may offer demand accounts, and not just savings accounts.

20. The introductory text and paragraph (b) of 12 CFR 552.1 are amended to state that references to Charter S associations also shall be deemed to be references to Charter T associations, and to define a Charter T association, in effect, as a federal stock savings bank. Old paragraph (b) is redesignated as paragraph (c).

21. 12 CFR 552.2–1, dealing with conversions of state-stock associations to federal stock charters, is amended to delete obsolete requirements pertaining to the date on which a state institution became a stock association, and to provide for conversion of state stock savings banks.

22. 12 CFR 552.3(a) is amended by adding a clarifying reference to Charter T associations.

23. 12 CFR 552.9 is amended to substitute references to Charter N (Rev.) for obsolete references to Charter N.

24. 12 CFR 561.1 is amended to add references to federal savings banks, interim federal associations, and interim state associations as institutions that may be insured by the FSLIC, and to stipulate that, except as specifically noted, FDIC-insured federal associations will be subject to regulations applicable to "insured institutions", as are other federal associations.

25. 12 CFR 561.2, defining insured member, is amended to stipulate that, for the purposes of that provision, the term "insured institution" shall not include an FDIC-insured federal association.

26. 12 CFR 561.11 is amended to include savings accounts held at FDIC-insured federal associations within the definition of "savings accounts".

27. 12 CFR 563.7–1 is amended to remove the term "savings and loan", thus clarifying that the provision, which deals with savings deposits or shares of federal associations, applies to federal savings banks.

28. 12 CFR 563.7–4(a) is amended to change the phrase "insured mutual

institution" to clarify that it refers to all insured institutions, including FDIC-insured federal associations, that are in the mutual form.

29. 12 CFR 563.14, regarding payment of dividends, is amended to ensure its applicability to dividends paid to accountholders by FDIC-insured savings banks.

30. 12 CFR 563.15 and 563.16, regarding insurance premiums, are amended to specify that the provisions do not apply to FDIC-insured federal associations.

31. 12 CFR 563.28 is amended to indicate that an FDIC-insured federal association is prohibited from advertising itself as a member of the FSLIC.

32. 12 CFR 563.31 is amended by revising paragraph (a) to state that an FDIC-insured federal association may not obtain deposit insurance in addition to that provided by the FDIC, paralleling the requirement that FSLIC-insured institutions obtain insurance of accounts only from the FSLIC. In addition paragraph (b)(1) is amended to provide that federal savings banks as well as federal savings and loan associations may give bond or security.

33. 12 CFR 563b.3(b)(4), 563b.4(a)(xiv), and 563b.4(b) are to clarify that federal stock charters are available to federal associations insured by the FDIC.

34. 12 CFR 563b.8(d)(2) and (3) are amended to indicate that any eligible mutual, state or federal, may convert to either a Charter S or a Charter T, and that the corporate existence of the converting institution does not terminate.

35. 12 CFR Parts 564 and 565, dealing respectively with settlement of insurance and termination of insurance, are amended to create new §§ 564.11 and 565.9, specifying that those Parts do not apply to FDIC-insured federal associations.

36. 12 CFR Part 569a, dealing with receivers of non-federally chartered insured institutions, is amended by changing the heading to reflect the existence of federal associations other than federal savings and loan associations, and by revising section 569a.1(a) to ensure the non-applicability of that section to federal savings banks.

37. Subchapter E, dealing with rules and regulations for federal mutual savings banks, and consisting of 12 CFR Parts 575, 576, 577 and 578, is removed as obsolete, after relocation of appropriate provisions elsewhere.

38. 12 CFR 583.5 is amended to indicate that an insured institution subsidiary of a savings and loan holding company may be engaging in the business of a savings bank as well as the business of a savings and loan association.

39. 12 CFR 583.6 is amended to include as insured institutions all federal associations insured by the FSLIC or the FDIC.

40. 12 CFR 583.7 is amended to specify that an uninsured institution does not include a federal association insured by the FDIC.

41. 12 CFR 584.1(e) is amended to inndicate that an insured institution may be engaging in the business of a savings as well as the business of a savings and loan association.

Consolidation of Applications

The Board has determined to amend 12 CFR Part 543 to consolidate applications provided for all de novo federal mutual associations. The amendments involve combining the Permission to Organize application and the Petition for Charter application. Formerly, associations had to go through a two-step procedure in order to receive a federal charter. The first step was an application for permission to organize a federal association, which required numerous procedures and conditions. Upon compliance with these conditions, the applicants then had to submit a second application for petition for charter. This application also required numerous procedures and conditions. In combining the two applications, the Board will expedite the application process, delete several unnecessary or duplicative conditions, and cause the application process to apply to all types of new federal charters.

Final Regulatory Flexibility Analysis

Although the regulations promulgated herein have not been proposed for public notice and comment, the Board is providing the following regulatory flexibility analysis:

1. *Reason, objective and legal basis underlying the final rule.* These elements are incorporated above in the supplementary information and definitional sections regarding the regulation.

2. *Small entities to which the final rule would apply.* The final rule would apply equally to all institutions chartered by the Board.

3. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap or conflict with the final regulation.

4. *Alternatives to the final rule.* To the extent that any institution determines to adopt a new charter, the final regulation would benefit its operations. Increased flexibility for all institutions will result from this regulation as well as increased powers for federal associations. The final regulation will not have a disproportionate impact on small institutions, and there is no alternative action that would change the impact of broadened chartering authority on small institutions.

List of Index Subjects in 12 CFR Parts 541, 543, 544, 545, 546, 547, 549, 552, 561, 563, 563b, 564, 565, 569a, 575, 576, 577, 578, 583 and 584

Savings and loan associations, Securities, Insurance, Holding companies.

The Board finds that the public notice and comment procedures of 5 U.S.C. 503(b) and 12 CFR 508.13 are unnecessary for the following reasons: (1) Immediate regulatory action is in the public interest in that the Congress expressly intended, in passing the Garn-St Germain Depository Institutions Act of 1982, that Federal associations and other thrift institutions exercise increased organizational flexibility to meet current, extremely stressful economic conditions, and it will increase the availability of this new power to federal associations; (2) Most federal associations have annual meetings in the first month of the calendar year, notice of which must go out to shareholders 15 to 45 days in advance, and any change in charter would of necessity need to be considered at such a meeting; (3) It will expedite the processing of applications for the several Federal charters; and (4) It will relieve restrictions. The Board further finds that delay of the effective date of this regulatory action pursuant to 5 U.S.C. 553(d) and 12 CFR 508.14 is unnecessary for the same reasons.

Since there are a large and complex number of changes in these regulations, the Board is soliciting comments from the public as to the effect of these regulations.

Accordingly, the Board hereby amends Part 523 of Subchapter B, Parts 541, 543, 544, 545, 546, 547, 549 and 552 of Subchapter C, Parts 561, 563, 563b, 564, 565, and 569a of Subchapter D, Parts 575, 576, 577 and 578 of Subchapter E, and Parts 583 and 584 of the Subchapter F, Chapter V of Title 12, Code of Federal Regulations, to read as set forth below.

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

PART 523—MEMBERS OF BANKS

1. Part 523 is amended by adding a new § 523.3–2, to read as follows:

§ 523.3–2 Delegations.

The Principal Supervisory Agent, as that term is defined in § 545.14(a)(3)(i) of

this Chapter, is authorized to approve unprotested applications for Bank membership filed by an entity which is eligible for such membership and which satifies the criteria therefor. .

2. Amend paragraph (b) (1) of § 523.10 by removing the term "mutual".

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 541—DEFINITIONS

Revise § 541.8 to read as follows:

§ 541.8 Federal association.

A savings and loan association or savings bank chartered by the Board under section 5 of the Act and, except as the Board may otherwise provide, any building and loan, savings and loan, building, or homestead association, organized or incorporated under the laws of the District of Columbia.

§ 541.8–1 [Amended]

4. Amend § 541.8–1 by removing the phrase "A savings and loan" and inserting in lieu thereof the word "An".

PART 543—INCORPORATION, ORGANIZATION, AND CONVERSION

5. Amend § 543.1 by revising paragraph (b), as follows:

§ 543.1 Corporate title.

* * * * *

(b) *Title change.* Prior to changing its corporate title, an association must file with the Supervisory Agent a written notice indicating the intended change. The Supervisory Agency shall provide to the association a timely written acknowledgment stating when the notice was received. If, within 30 days of receipt of notice, the Supervisory Agent does not notify the association of his or her objection on the grounds set forth in paragraph (a) of this section, the association may change its title by amending its charter in accordance with § 544.2(f), or § 544.2–2, or § 552.4(c) and the amendment provisions of its charter, except that an association chartered as a Federal Savings and Loan Association may change its title to indicate that it is a Federal Savings Bank, and an association chartered as a Federal Savings Bank may change its title to indicate that it is a Federal Savings and Loan Association, only pursuant to a charter change under § 544.3 of this Chapter.

6. Amend § 543.2 by revising the third sentence of paragraph (b) and revising paragraph (g), as follows:

§ 543.2 Application for permission to organize.

* * * * *

(b) *Form; supporting information.* * * * The applicants shall request a corporate title to be approved by the Board and to be included as Section One of the association's charter. * * *

* * * * *

(g) *Approval.* Decisions on all applications for permission to organize a Federal association will be made by the Board. Approvals of applications will be conditioned on the following: (1) a minimum amount of capital to be paid into the association's accounts prior to insurance of accounts; (2) the submission of a statement that (i) the applicants have complied in all respects with the Act and these rules and regulations regarding organization of a Federal association; (ii) the applicants have incurred no expense in forming the association which is chargeable to it, and no such expense will be incurred; (iii) no money will be collected on account of the association before the Board issues its charter; (iv) an organization committee has been created (naming the committee and its officers); and (v) the committee will organize the association when the Board issues its charter and serve as temporary officers of the association until officers are elected by the association's board of directors under § 543.6 of this Part; and (3) the satisfaction of any other requirement the Board may impose. Approval of an application does not obligate the Board to issue a charter.

* * * * *

§ 543.3 [Removed effective December 15, 1982; see § 543.6(a).]

7. Remove § 543.3.

§ 543.4 [Removed effective December 15, 1982; see § 543.3.]

8. Remove § 543.4.

9. Amend § 543.6 by revising paragraph (a), as follows:

§ 543.6 Completion of organization.

(a)(1) *Temporary officers.* When the Board approves an application for permission to organize a Federal association, the applicants shall constitute the organization committee and elect a chairperson, vice-chairperson, and a secretary, who shall act as the temporary officers of the association until their successors are duly elected and qualified. The temporary officers may effect compliance with any conditions prescribed by the Board.

(2) *Organization meeting.* Promptly upon receipt of a charter, the temporary officers shall call a meeting of the association's capital subscribers; notice of such meeting shall be mailed to each subscriber at least 5 days before the meeting day. Subscribers who have subscribed for a majority of the association's capital, present in person or by proxy, shall constitute a quorum. At such meeting, directors of the association shall be elected according to the association's charter and bylaws, and any other action permitted by such charter and bylaws may be taken; any such action shall be considered an acceptance by the association of such charter and of such bylaws, which shall be in the form provided in Parts 544 and 552 of this Subchapter.

* * * * *

10. Revise § 543.8 as follows:

§ 543.8 General.

(a) With the approval of the Principal Supervisory Agent, any member may, on such conditions as the Board may prescribe, convert itself into a Federal association, if it complies with all laws of its jurisdiction expressly providing for such conversions and with these rules and regulations.

(b) Questions regarding conversions shall be directed to the Board's Supervisory Agent of the district in which the applicant is located. Recommendations by Supervisory Agents and officers and employees of the Board regarding applications for issuance of Federal charters are privileged, confidential and subject to § 505.6 of this chapter.

11. Amend § 543.9 by revising the last sentence of paragraph (a), by revising paragraph (c), and by removing paragraph (d), as follows:

§ 543.9 Applications.

(a) *Filing.* * * * The applicant shall submit any financial statements or other information the Board or the Principal Supervisory Agent may require, and pay all costs, as determined by the Principal Supervisory Agent or the Board, of consideration of the application.

* * * * *

(c) *Action on application.* The Principal Supervisory Agent will consider such application and any information submitted therewith, and may approve the application. The Principal Supervisory Agent will not consider the application of a converting insititution not insured by the Federal Savings and Loan Insurance Corporation, except in the case of a saving bank insured by the Federal Deposit Insurance Corporation, until an eligibility examination has been completed to the satisfaction of the Federal Savings and Loan Insurance Corporation. Approval of an application and issuance by the Board of a charter

will be subject to the applicant's (1) compliance with all conditions prescribed in the approval; (2) receipt of approval of the plan of conversion by such vote as may be required by the laws of the applicant's jurisdiction to consider such action; and (3) approval of its application for Federal Home Loan Bank membership, if the applicant is not a member.

§ 543.10 [Removed]

12. Remove § 543.10.

13. Amend § 543.11 by redesignating it as § 543.10 and by revising the first sentence thereof, as follows:

§ 543.10 Organization after conversion.

Except as provided in § 543.11, after a Federal charter is issued under § 543.9 the association's members shall, after due notice, or upon a valid adjournment of a previous legal meeting, hold a meeting to elect directors and take all other action necessary fully to effect the conversion and operate the association in accordance with law and these rules and regulations. * * *

14. Add a new § 543.11 by inserting the text of § 576.4 thereto, revising paragraph (a) thereof, and changing the reference to "§ 576.4" in paragraph (c)(2) thereof to read "this section", as follows:

§ 543.11 Organization, plan for governance during first years after issuance of Federal mutual savings bank charter.

(a) *Organizational meeting.* Except as provided in paragraph (c)(1) of this section, promptly upon receipt of a charter, the officers of a Federal mutual savings bank which, immediately prior to conversion, was a state chartered mutual savings bank, shall call a meeting of the members. Notice for, and conduct of, such meeting shall be in accordance with the bank's Federal charter and bylaws. Business to be conducted at the organizational meeting shall include the election of trustees and any other matters permitted by the charter and bylaws. Any action taken at such meeting shall be deemed and acceptance of the charter and bylaws issued pursuant to §-544.2–2 of this Subchapter.

* * * * *

15. Add a new § 543.12, as follows:

§ 543.12 FDIC-insured Federal savings banks.

The Board may issue a Federal charter to a state-chartered savings bank which is insured or continues to be insured by the Federal Deposit Insurance Corporation.

17. Add a new § 543.13, as follows:

§ 543.13 Notice to FDIC.

Upon receiving an application for a Federal charter by an institution insured by the Federal Deposit Insurance Corporation, the Board shall notify the Federal Deposit Insurance Corporation, shall consult with it before disposing of the application, and shall notify it of the Board's determination with respect to such application.

PART 544—CHARTER AND BYLAWS

17. Amend § 544.1(a) by revising the first sentence of that paragraph; removing the term "Charter N" as the heading at the beginning of the charter form and replacing it with the term "Charter N (Rev.)"; removing the term "savings" wherever it appears in section 4 of the charter, other than in the first sentence, and wherever it appears in section 7 thereof; and revising the introductory text and subsection (6) of section 3, the first sentence of section 4, and the last sentence of section 10 of the charter; as follows:

§ 544.1 Issuance of charter.

(a) *Charter N (Rev.).* Except as provided in paragraph (b) of this section, when the Board approves an Application for Permission to Organize for a Federal mutual association that is a Federal savings and loan association, it shall issue a charter in the following form, or a form which includes any of the additional provisions set forth in § 544.2 if such provisions are specifically requested, known as Charter N (Rev.).

Charter N (Rev.)

* * * * *

3. *Purpose and Powers.* The purpose of the association is to pursue any or all of the lawful objectives of a Federal association; and in the accomplishment of such purpose, it shall have perpetual succession and power:

* * *

(6) To raise its capital, which shall be unlimited, by accepting payments on savings and demand accounts representing share interests in the association;

* * * * *

4. *Members.* All holders of the association's savings accounts and demand accounts and all borrowers therefrom are members. * * *

* * * * *

10. *Reserves, surplus and distribution of earnings.*

* * * All holders of savings accounts and demand accounts of the association shall be entitled to equal distribution of assets, pro rata to the value of their accounts, in the event of voluntary or involuntary liquidation, dissolution or winding up of the association.

* * * * *

18. Amend § 544.1(b) by revising the introductory text of that paragraph, and removing the term "Charter K (Rev.)" at the heading of the beginning of the charter form and replacing it with the term "Charter L", as follows:

§ 544.1 Issuance of charter.

* * * * *

(b) *Charter L.* If expressly requested in the Application for Permission to Organize, or in the Application for Conversion to a Federal Association, the Board will issue, in lieu of Charter N (Rev.), a Charter L. The form of Charter L is the same as the form of Charter N (Rev.), except that the heading states "CHARTER L" instead of "CHARTER N (REV.)" and in lieu of the provision in Charter N (Rev.) designated "6. *Withdrawals,"* the following provision is substituted:

Charter L

* * * * *

19. Amend § 544.1 by adding a new paragraph (c) entitled *Charter B (Rev.)* and inserting the text and charter form of § 577.1 thereto; removing the term "Charter B" as the heading at the beginning of the charter form and replacing it with the term "Charter B (Rev.)"; and amending that charter by removing the phrases "established for the primary purpose of providing people with a convenient and safe place to invest their funds and to provide for the financing of homes, and", and *"General Objects and"* contained in section 3, revising section 5 as set forth below, revising the first sentence of section 6 as set forth below and removing the word "savings" from section 6 wherever it appears other than in the first sentence, removing the phrase "in Board Resolution No. ——, dated ——, ——," in section 7 and substituting therefore the phrase "by the Board or its delegatee in connection with action", removing the phrase "charter: *Provided, however,* That the bank's equity, corporate bond, and consumer loan investments may in no event exceed —— percent of its assets." contained in section 10 and substituting therefor the phrase "charter."; removing in section 10 the phrase "Board Resolution No. —— dated ——" and substituting therefor the phrase "action of the Board or its delegatee in connection with action", removing from the third paragraph of section 11 the word "savings" and the phrase "[and checking accounts]" wherever they appear, and removing from section 11 the phrase "Board, such reserves shall include the reserve required for insurance of accounts." and inserting in its place the phrase "Board."; as follows:

§ 544.1 Issuance of charter.

* * * * *

(c) *Charter B (Rev.).*

* * * * *

Charter B (Rev.)

Section 5. *Capital.* The bank may raise capital by accepting payments on savings accounts and demand accounts and by any other means as may be authorized by the Board.

Section 6. *Members.* All holders of the bank's savings accounts and demand accounts and all borrowers therefrom are members. * * *

* * * * *

20. Amend § 544.2 by revising the introductory text; removing from paragraph (c) the word "savings"; removing from paragraph (f) the phrase "Charter N or Charter K (rev.)" and substituting therefor the words "Charter N (Rev.) or Charter L"; and removing from paragraph (i) the word "mutual" and substituting therefor the phrase "mutual savings and loan"; as follows:

§ 544.2 Amendment of charter.

This section constitutes approval by the Board of any of the following amendments to the charter of a Federal mutual savings and loan association:

* * * * *

§ 544.2–1 [Amended]

21. Amend § 544.2–1 by removing the title and text thereof and substituting therefor the title and text of § 577.1–1.

22. Add a new § 544.2–2, as follows:

§ 544.2–2 Preapproved charter amendment.

This section constitutes approval by the Board of the amendment of section 1 of the Federal mutual savings bank charter to effect the change of the corporate title of a Federal mutual savings bank that has complied with § 543.1(b) of this Subchapter.

23. Revise § 544.3, as follows:

§ 544.3 Adoption of new Federal charter by a Federal association.

If the board of directors of a Federal mutual association proposes to amend its charter to read in the form of any other Federal mutual association charter, the amendment may be approved by a majority vote of members present at any duly called regular or special meeting of members. In the case of a Federal stock association, the board of directors of which proposes to amend its charter to read in the form of any other Federal stock association charter, the amendment may be approved by the stockholders by a majority of the total votes eligible to be cast at a legal meeting. In either case, after such vote, the association shall submit the following petition to the Principal Supervisory Agent, together with any requested change in the association's title or location of home office, and the Board thereafter will issue a charter in the form sought, upon approval by the Principal Supervisory Agent or the Board of a change in such name or location:

Federal Home Loan Bank of ————————
[City] ————————
[State] ————————

The undersigned, under § 544.3 of the rules and regulations for the Federal Savings and Loan System, petitions the Federal Home Loan Bank Board to issue to it a charter in the form of Charter ——, fixing the name of the undersigned as ————, and its home office at ————. The present charter fixes the name of the association as ———— and its home office location as ————.

The undersigned, by its secretary, hereby certifies that the members or stockholders, at a meeting duly called and held, adopted the following resolution:

Be it resolved, That the present charter of this association be amended to read in the form of Charter ———— as prescribed in the rules and regulations for the Federal Savings and Loan System, prescribing the name of the association as ———— and fixing its home office location as ————.

In witness whereof, the Secretary of the undersigned has hereunto affixed his hand and the seal of the undersigned this —— day of ————, 19—.

————————
[Name of Federal Association]
By ————————
[Corporate Seal]

24. Amend § 544.5 by revising the introductory text, as follows:

§ 544.5 Prescribed form.

A Federal mutual savings and loan association shall operate under the following bylaws, until such bylaws are amended under the procedure therein presecribed.

* * * * *

25. Add a new "§ 544.5–1" by inserting the title and text of § 577.2, removing the term "§ 577.2" wherever it appears therein and substituting therefor the term "§ 544.5–1", and revising the introductory text, as follows:

§ 544.5–1 Prescribed form.

Unless otherwise authorized by the Board, a Federal mutual savings bank shall operate under the following bylaws until such bylaws are amended under the procedure therein prescribed.

* * * * *

26. Add a new § 544.8, as follows:

§ 544.8 References to old and new charters; rules applicable to trustees of Federal mutual savings banks.

(a) References in the Rules and Regulations for the Federal Savings and Loan System to associations with a Charter K (Rev.) or Charter N shall be deemed as also referring respectively to associations with a Charter L or Charter N (Rev.) and, other than in § 545.4 of this Subchapter, as also referring to associations with a Charter B or Charter B (Rev.).

(b) The trustees of each Federal mutual savings bank shall be subject to the Rules and Regulations for the Federal Savings and Loan System (Part 541 et seq. of this Subchapter), the Regulations for the Federal Home Loan Bank System (Part 521 et seq. of this Chapter), and the Rules and Regulations for Insurance of Accounts (Part 561 et seq. of this Chapter), insofar as they pertain to directors of Federal associations, just as if they were directors.

27. Add a new § 544.9, as follows:

§ 544.9 Obsolete charter provision for Charter B associations.

The standard provision in section 10 of Charter B relating to limiting equity, corporate bond and consumer loan investments to a particular percentage of assets is of no force and effect.

PART 545—OPERATIONS

28. Amend § 545.25–1 by revising paragraph (a) as follows:

§ 545.25–1 Employment contracts.

(a) *General.* A Federal savings and loan association with bylaws amended under § 544.8(k), a Federal mutual savings bank or a Charter S or Charter T association, upon specific approval of its board of directors, may enter into employment contracts with its officers and other employees in accordance with § 563.39 of this Chapter.

* * * * *

PART 546—MERGER, DISSOLUTION, REORGANIZATION, AND CONVERSION

29. Amend § 546.1 by revising paragraph (a) as follows:

§ 546.1 Definitions.

As used in §§ 546.2 and 546.3—

(a) "Association" means a Federal association, or interim Federal association, a national bank, and any building and loan, savings and loan, or homestead association, or cooperative bank, or interim state institution, or commercial or industrial bank organized under the laws of any state which may, under those laws, or other applicable law, merge or consolidate with a Federal association.

* * * * *

30. Amend § 546.2 by revising paragraph (a), as follows, and by

removing in paragraph (g) the word "created" and substituting therefor the phrase, "created, if applicable, or any other applicable law":

§ 546.2 Procedure; effective date.

(a)(1) A Federal association insured by the Federal Savings and Loan Insurance Corporation and one or more other associations so insured may merge as prescribed in this Part if, as to any association which is not a Federal association, the merger is in accordance with the laws of the jurisdiction in which the association was organized.

(2) A Federal association insured by the Federal Deposit Insurance Corporation and any one or more other institutions so insured may merge as prescribed in this Part if, as to any such institution which is not a Federal association, the merger is in accordance with the laws of the jurisdiction in which the association was organized, if applicable, and such other laws as may be applicable.

(3) A Federal association insured by the Federal Deposit Insurance Corporation and any one or more other associations insured by the Federal Savings and Loan Insurance Corporation may merge as prescribed in this Part, subject to the prior approval of the Federal Deposit Insurance Corporation, and if, as to any association which is not a Federal association, the merger is in accordance with the laws of the jurisdiction in which the association was organized.

* * * * *

31. Remove § 546.5.

§ 546.5 Conversion from Federal mutual to state-charter mutual. [Removed effective December 15, 1982.]

PART 547—APPOINTMENT OF CONSERVATORS AND RECEIVERS

32. Amend § 547.3 by adding a second sentence, as follows:

§ 547.3 Appointment on other grounds.

* * * In the event a Federal association insured by the Federal Deposit Insurance Corporation has its insured status terminated by the Board of Directors of said Corporation, the Board shall appoint the Federal Deposit Insurance Corporation receiver for that association.

33. Revise § 547.6, as follows:

§ 547.6 Federal Savings and Loan Insurance Corporation or Federal Deposit Insurance Corporation as receiver.

The Board shall appoint only the Federal Savings and Loan Insurance Corporation as receiver for a Federal association which that Corporation insures. The Board shall appoint only the Federal Deposit Insurance Corporation as receiver for a Federal association which that Corporation insures.

PART 549—POWERS OF RECEIVERS AND CONDUCT OF RECEIVERSHIP

34. Amend § 549.1 by revising paragraph (b) as follows:

§ 549.1 Definitions.

* * * * *

(b) "Corporation" means the Federal Savings and Loan Insurance Corporation, except when the Federal Deposit Insurance Corporation is receiver, in which case it means the Federal Deposit Insurance Corporation.

35. Revise § 549.2 as follows:

§ 549.2 Procedure upon taking possession.

The procedure prescribed in § 548.1 of this Subchapter for a conservator taking possession of a Federal association shall also apply to a receiver except that the notice required by § 548.1(c) shall state:

————Federal Savings and Loan Association [or Federal Savings Bank],————, ————, ————, is in the hands of the Federal Savings and Loan Insurance Corporation [or Federal Deposit Insurance Corporation] as receiver appointed by the Federal Home Loan Bank Board.

Federal Savings and Loan Insurance Corporation [or Federal Deposit Insurance Corporation] as Receiver.

By ————————————

Title ————————————

Date ————————————

36. [Revise paragraph (b)(3) of § 549.3, as follows:

§ 549.3 Powers and duties of receiver.

* * * * *

(b) * * *

(3) Deposit funds collected in any bank(s) insured by the Federal Deposit Insurance Corporation, in a Bank, or any other depository institutions approved for that purpose by the Board. All depository bank accounts of the receiver shall be carried as follows: "Federal Savings and Loan Insurance Corporation [or Federal Deposit Insurance Corporation], Receiver for ——— Association";

* * * * *

§549.5–1 [Amended]

37. Amend § 549.5–1 by adding the phrase "or a Federal savings bank" immediately after the word "association" the second time it appears in paragraph (a) thereof; , and amend subparagraph (1) of paragraph (b) thereof by adding in the first sentence the phrase "demand accounts" immediately prior to the word "savings" the first time it appears, adding in the fourth sentence the phrase "demand account," immediately prior to the word "savings" the first time that word appears, and adding in the fifth sentence the phrase"demand account, holder of a" immediately prior to the word "savings" the first time that word appears; and amending paragraph (c) thereof by adding in subparagraph (1) the phrase "demand accounts," immediately prior to the phrase "savings accounts" wherever the latter phrase appears, adding in subparagraph (2) the phrase "demand accounts," immediately prior to the phrase "savings deposits," adding in subparagraph (3) the phrase "demand account," immediately prior to the phrase "savings deposit", and adding in subparagraph (4) the phrase "demand accounts," immediately prior to the term "savings deposits".

PART 552—STOCK ASSOCIATIONS

38. Amend § 552.1 by revising the introductory test, redesignating paragraph (b) as paragraph (c) thereof, and adding a new paragraph (b) thereto, as follows:

§ 552.1 Definitions.

All references in this Subchapter to the following terms shall, with respect to an association with a charter in the form of Charter S or Charter T, have the meaning defined herein.

* * * * *

(b) *Charter T association.* The term "Charter T association" means a Federal savings bank which has its charter in the form of a Charter T. References in this Chapter to Charter S associations or Charter S shall be deemed also as referring respectively to Charter T associations or Charter T.

* * * * *

39. Amend § 552.2–1 by removing the last sentence and revising the first sentence thereof, as follows:

§ 552.2–1 Conversion from state stock to Federal stock charter.

With the approval of the Principal Supervisory Agent or, in connection with a supervisory transaction, with the approval of the General Counsel, any state stock savings and loan association type or state stock savings bank type institution may convert to a Federal stock savings and loan association or a Federal stock savings bank, subject to its compliance with the requirements set forth in §§ 543.8 through 543.10 of this Subchapter governing conversion to a Federal mutual association and its submission of an opinion by independent local counsel within six

months from the date of the approval that the conversion is in conformance with applicable state law. * * *

§ 552.3 [Amended]

40. Amend paragraph (a) of § 552.3 by adding the phrase "or Charter T" immediately after the phrase "Charter S".

41. Amend § 552.3 by revising paragraph (b) and adding a new paragraph (c), as follows:

§ 552.3 Issuance of charter.

* * * * *

(b) A Charter S or Charter T in the following form shall be issued to a state stock institution which has converted respectively to a Federal stock savings and loan association or a Federal stock savings bank pursuant to § 552.2–1, except that in a case not involving an association that has converted from mutual to stock form, Section 7 of Charter S or Charter T requiring a liquidation account and all references thereto shall be deleted, Sections 8 and 9 shall be redesignated Sections 7 and 8 respectively, and the optional provision contained in § 552.4(b) of this Part shall not be available.

(c) Where a Charter T is issued, all references in the following form to "Charter S" shall be changed to "Charter T", all references to "Federal Savings and Loan Association" shall be changed to "Federal Savings Bank" and all references to "association" shall be changed to "bank", and the following sentence shall be added to the end of Section 3: "In addition, the bank may make any investment and engage in any activity as may be specifically authorized by action of the Board or its delegatee in connection with action approving the issuance of the charter."

42. Revise § 552.9, as follows:

§ 552.9 Investments, services and borrowings.

A Charter S association may: (a) Make any loan or investment authorized by this Subchapter for a Charter N (Rev.) association; (b) be surety and perform such services as are authorized by this Suchapter for a Charter N (Rev.) association; and (c) borrow, issue obligations, and give security to the same extent authorized by this Subchapter for a Charter N (Rev.) association which has amended its charter under § 544.2(f) of this Subchapter. A Charter T association, in addition to the above, may utilize any authority permitted by this Subchapter for Charter T associations.

43. Amend § 552.13 by revising paragraphs (b)(1), (c) (1) and (2), (d) and (e), as follows:

§ 552.13 Combinations involving Charter S associations.

* * * * *

(b) *Definitions.* * * *

(1) *Association.* Any building and loan, savings and loan, or homestead association, or commercial, industrial, cooperative or savings bank organized under Federal or state law, including interim Federal associations and interim state associations.

* * * * *

(c) *Forms of combination.* * * *

(1) Mergers or bulk purchases of assets in exchange for assumption of liabilities: *Provided,* That (i) all constituent associations have accounts insured by the Federal Savings and Loan Insurance Corporation, except that in combinations involving a Federal association insured by the Federal Deposit Insurance Corporation, all constituent associations have accounts insured either by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation, and (ii) if any constituent is a mutual association, the resulting association shall be mutually held, except in cases involving supervisory mergers, mergers approved under Part 563b of Subchapter D or mergers in which one of the constituents is an interim Federal association or an interim state institution.

(2) Consolidations among Federal associations resulting in Federal mutual associations.

(d) *Agency approval.* Prior written approval of the Board is required for every combination. In determining whether to confer such approval, the Board shall apply the criteria set out in § 571.5 of this Chapter. Prior written approval of the Federal Deposit Insurance Corporation is required for every combination involving both a Federal association insured by the Federal Deposit Insurance Corporation and an association not insured by such Corporation.

(e) *Approval of board of directors.* Before filing for Board approval, the combination shall be approved by each constituent association's board of directors: (1) By a two-thirds vote of the entire board of each Federal association, and (2) as required by state law, or other applicable law, for other constituents.

* * * * *

§ 552.13 [Amended]

44. Amend paragraph (l) of § 552.13 by inserting before the period at the end of the third sentence and the following ", or other applicable law".

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

45. Revise § 561.1, as follows:

§ 561.1 Insured institution.

An "insured institution" is a Federal savings and loan association or Federal savings bank, an interim Federal association, a building and loan, savings and loan, or homestead association, or a cooperative bank, or an interim state institution, whose accounts are insured by the Federal Savings and Loan Insurance Corporation, referred to in this Subchapter as the "Corporation". The Federal Home Loan Bank Board is referred to in this Subchapter as the "Board". Except where otherwise noted, the term "insured institution" shall also be deemed to refer to a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation.

46. Amend § 561.2 by revising the first sentence, as follows:

§ 561.2 Insured member.

The term "insured member" means a holder of an account or accounts in an insured institution, other than a Federal association insured by the Federal Deposit Insurance Corporation.

* * * * *

42. Amend § 561.11 by inserting before the period at the end thereof the following: "or held by insured depositors in a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation".

PART 563—OPERATIONS

§ 563.7–1 [Amended]

48. Amend § 563.7–1 by removing the phrase "savings and loan" the first time it appears.

§ 563.7–4 [Amended]

49. Amend the first sentence of paragraph (a) of §§ 563.7–4 by removing the phrase "insured mutual institution" and adding in its place the phrase "insured institution that is in the mutual form".

§ 563.14 [Amended]

50. Amend § 563.14 by adding the word "insured" immediately before the word "institution" wherever the latter word appears, and by adding the phrase "or other account holders" immediately after the phrase "insured members" wherever the latter phrase occurs.

51. Amend § 563.15 by adding a new paragraph (c), as follows:

§ 563.15 Insurance premiums.

* * * * *

(c) *FDIC-insured Federal associations.* As used in this section, the term "insured institution" shall not refer to a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation.

§ 563.16 [Amended]

52. Amend § 563.16 by adding in the first sentence, immediately after the term "insured institution" the first time it appears, the phrase "(which, for the purposes of this section, shall not include a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation)".

53. Revise § 563.28, as follows:

§ 563.28 Advertising of insurance of accounts.

An insured institution, other than a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation, may advertise itself as a "member" of the Federal Savings and Loan Insurance Corporation.

54. Revise paragraph (a), the introductory text of (b) and (b)(1) of § 563.31, as follows:

§ 563.31 Other insurance or guaranty.

(a) *General rule.* An insured institution may not acquire any insurance on, or guaranty of, all or any part of its insured accounts in addition to the insurance provided in Title IV of the National Housing Act, other than a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation, and a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation shall not acquire any insurance on, or guaranty of, all or any part of its deposits insured thereby in addition to the insurance provided by the Federal Deposit Insurance Corporation.

(b) *Exceptions.* Paragraph (a) of this section notwithstanding: (1) A Federal association may give bond or security pursuant to § 545.24–2 of this Chapter;

* * * * *

PART 563b—CONVERSIONS FROM MUTUAL TO STOCK FORM

55. Revise paragraph (b)(4) of § 563b.3, as follows:

§ 563b.3 General principles for conversions.

* * * * *

(b) *General requirements.* * * *

(4) The converted institution would not have its accounts insured by the Corporation, except in the case of a Federal association insured by the Federal Deposit Insurance Corporation.

* * * * *

§ 563b.4 [Amended]

56. Amend clause (xiv) of paragraph (a)(4) of § 563b.4 by inserting, immediately after the word "Corporation", the following: ", or, in the case of a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation, by the Federal Deposit Insurance Corporation".

57. Amend paragraph (b) of § 563b.4 by revising the heading for the notice to read as follows: "Notice of Filing of an Application for Conversion to Convert to a Stock Savings and Loan Association or a Stock Savings Bank".

58. Revise the first sentence of subparagraphs (2) and (3) of paragraph (d) of § 563b.8, as follows:

§ 563b.8 Procedural requirements.

* * * * *

(d) *Termination or amendment of charter.* * * *

(2) A mutual association converting to a Federal stock association shall apply to amend its charter and bylaws to read in the form of a charter and bylaws for a Charter S or Charter T association. * * *

(3) The corporate existence of a mutual association converting to a Federal stock association shall not terminate, but the converted association shall be deemed to be a continuation of the entity of the association so converted. * * *

* * * * *

PART 564—SETTLEMENT OF INSURANCE

59. Add a new § 564.11, as follows:

§ 564.11 FDIC-insured Federal associations.

Federal associations the deposits of which are insured by the Federal Deposit Insurance Corporation are not deemed to be insured institutions for the purposes of this Part.

PART 565—TERMINATION OF INSURANCE

60. Add a new § 565.9, as follows:

§ 565.9 FDIC-insured Federal associations.

Federal associations the deposits of which are insured by the Federal Deposit Insurance Corporation are not deemed to be insured institutions for the purposes of this Part.

PART 569a—RECEIVERS FOR INSURED INSTITUTIONS OTHER THAN FEDERAL SAVINGS AND LOAN ASSOCIATIONS

61. Amend the heading of Part 569a removing the phrase "SAVINGS AND LOAN".

§ 569a.1 [Amended]

62. Amend paragraph (a) of § 569a.1 by adding the phrase "or Federal savings bank" immediately after the word "association" wherever that word appears.

SUBCHAPTER E—RULES AND REGULATIONS FOR FEDERAL MUTUAL SAVINGS BANKS

63. Remove Subchapter E in its entirety, to read as follows: Subchapter E—Rules and Regulations for Federal Mutual Savings Banks [Removed effective December 15, 1982.]

SUBCHAPTER F—REGULATIONS FOR SAVINGS AND LOAN HOLDING COMPANIES

PART 583—DEFINITIONS

§ 583.5 [Amended]

64. Amend § 583.5 by adding the phrase "or savings bank" immediately after the phrase "savings and loan".

§ 583.6 [Amended]

65. Amend § 583.6 by removing the term "savings and loan" the first time it appears, and by inserting before the period at the end thereof the following: ", and any Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation".

§ 583.7 [Amended]

66. Amend § 583.7 by inserting before the period at the end thereof the following: ", but does not mean a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation".

PART 584—REGULATED ACTIVITIES

67. Amend paragraph (e) of § 584.1 by adding the phrase "or savings bank" immediately after the phrase "savings and loan" the second time the latter phrase appears.

(Sec. 2, 5, 48 Stat. 128, 132, as amended (12 U.S.C. 1462, 1464.); Sec. 401, 402, 403, 405, 406, 407, 48 Stat. 1255, 1256, 1257, 1259, 1260, as amended (12 U.S.C. 1724, 1725, 1726, 1728, 1729, 1730); Sec. 406, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947; 3 CFR, 1943–1948 Comp., p. 1071)

By the Federal Home Loan Bank Board
J. J. Finn,
Secretary.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 1, 3, 4, 15, 16, 18, 21, 32, 33, 145, 147, 155, 170 and 180

Domestic Exchange-Traded Commodity Options; Expansion of Pilot Program To Include Options on Physicals

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rules.

SUMMARY: This Commodity Futures Trading Commission ("Commission") has previously adopted regulations to govern a three-year pilot program under which options on certain commodity futures contracts will be permitted to be traded on and through the facilities of domestic boards of trade designated by the Commission as contract markets for options trading. The Commission indicated at the time that it intended to supplement those rules with rules authorizing the trading of options on physicals on presently-designated contract markets and on other boards of trade which may qualify for designation to trade such options. The Commission has now adopted rules which, subject to review by the Commission's Congressional oversight committees pursuant to Section 4c(c) of the Commodity Exchange Act, authorize the trading of options on physicals, thereby completing this first phase of the pilot program. The new rules allow any domestic board of trade, regardless of whether it is currently engaged in the trading of futures contracts or options on those contracts, to apply for contract market designation for one option on a physical. The Commission is also amending a number of other rules, which apply to futures contracts and to options on futures contracts, for purposes of clarification as well as to include appropriate references to option transactions.

EFFECTIVE DATE: Except as specified herein, the rules will become effective January 21, 1983. The amendments to §§ 1.3(*ll*), 33.4, 33.6, and 33.7 (except §§ 33.7(b)(2)(viii), (c), (d)) will become effective upon the expiration of 30 calendar days of continuous session of Congress after the transmittal of those rules, and related materials, to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry pursuant to Section 4c(c) of the Commodity Exchange Act, but not before further notice of the effective date is published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Lawrence B. Patent, Special Counsel, or Kenneth M. Rosenzweig, Assistant Chief Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street N.W., Washington, D.C. 20581. Telephone: (202) 254-8955. For information concerning amendments to 17 CFR Parts 15-18 and 21, contact: Lamont L. Reese, Associate Director, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Telephone: (202) 254-3310.

SUPPLEMENTARY INFORMATION:

I. Introduction

On November 3, 1981, the Commission published regulations to establish a three-year pilot program for the trading, on domestic exchanges, of options on certain commodity futures contracts. 46 FR 54500. Those rules, however, did not authorize or otherwise directly apply to options on actual commodities ("physicals"). The Commission noted at that time that it was "exercising only one aspect of its jurisdiction with respect to options" [1] and, on the same date, published a separate notice of proposed rulemaking in which it reaffirmed its intention to adopt rules which would permit the trading of options on physicals. 46 FR 54570.

The Commission received nineteen comments in response to that notice. Only three of those comments, however, offered specific suggestions as to how the Commission's rules should be amended to include options on physicals. In an effort to engender as much public participation as possible, the Commission thereafter published for public comment proposed rules which would further amend the Commission's regulations to accommodate options on physicals and to make minor clarifying and conforming changes to certain of the Commission's other regulations. 47 FR 28401 (June 30, 1982).

The Commission received seventeen comment letters in response to its June 1982 proposal. The commentors included six contract markets, three securities exchanges which list stock options for trading, five futures commission merchants ("FCMs"), a trade association, a law firm, and the National Futures Association. The Commission has carefully considered those comments, as well as the comments it received in response to the regulations proposed in June 1981 to establish the option pilot program [2] and its November 3, 1981 notice of proposed rulemaking and, as is discussed in greater detail below, has determined to adopt regulations which will permit any board of trade—irrespective of whether it is presently designated as a contract market for futures trading or for options on futures contracts—to apply for designation as a contract market for the trading of one option on a physical. These regulations also permit, in appropriate cases, the "cash settlement" of options on physicals.

II. Completion of the First Phase of the Pilot Program

When the Commission proposed rules to incorporate options on physicals within the scope of the pilot program, it proposed to allow any board of trade meeting the requirements of the Act and the Commission's regulations to apply for designation to trade one option on a physical.[3]

Three commentators supported the Commission's proposal on the grounds that the inclusion within the pilot program of boards of trade that are not presently designated as contract markets would enhance competition and the quality of the data generated by the pilot program. A fourth commentator disagreed, stating that such a previously-undesignated board of trade would be unable to monitor the interaction of prices for the option and the related futures contract and that the activities of persons not subject to the jurisdiction of the contract market designated to trade the related futures contract could adversely affect the operations of that contract market. The Commission has considered these comments, as well as the comments it has received in response to earlier requests for comments on this question,[4]

---

[1] *Id.* at 54501.

[2] *See* 46 FR 54570, 54571 n.2 (November 3, 1981), referring to 46 FR 33293 (June 29, 1981).

[3] Proposed § 33.4(a)(6). By comparison, before it may be designated as a contract market for options on a futures contract, § 33.4(a)(3) specifies that a board of trade must first be designated as a contract market for that underlying futures contract.

[4] In connection with its June 1981 proposal to establish a pilot program for options trading and subsequently, in a notice of proposed rulemaking relating solely to options on physicals, the Commission requested comments as to whether it should restrict the trading of options on physicals to those boards of trade which are designated as a contract market for a futures contract which draws on the same deliverable supply as the proposed option on a physical. 46 FR 33293, 33295 (June 29, 1981); 46 FR 54570, 54571 (November 3, 1981).

and has determined not to preclude previously undesignated boards of trade from participating in this portion of its pilot program.

Although, as noted earlier, a board of trade must be designated as a contract market for futures trading before it may be designated for the trading of options on that futures contract, the Commission is not convinced that similar restrictions are necessary with respect to options on physicals. In this regard, the Commission notes that all contract markets—whether designated for futures contracts, options on futures contracts, or options on physicals—must conduct regular and continuous surveillance of the underlying cash market.[5] A contract market which has been designated for a futures contract involving a commodity which also underlies an option on a physical would have market surveillance responsibilities which are essentially no different from its present obligation to monitor activity in the cash market underlying the futures contract. Thus, the Commission does not believe that any regulatory benefits would be achieved by limiting involvment in this portion of the pilot program to those exchanges and FCMs which are already participating in that program.[6]

The Commission also proposed to limit each exchange to no more than one option on a futures contract and one option on a physical. Proposed § 33.4(a)(6). In seeking to determine the appropriate scope of the pilot program, however, the Commission specifically requested comments as to whether it should nonetheless allow each exchange to trade any two option contracts, regardless of whether those option contracts would involve options on futures contracts, options on physicals, or one of each type of option. 47 FR at 28404.

The Commission received a wide range of comments on this question. A number of the commentators urged the Commission to allow the exchanges to select either two options on futures or two options on physicals. These commentators maintained that the regulatory burdens on the Commission and on the exchanges would not be significantly greater if the Commission were to allow such an election rather than limit further expansion of the pilot program to one option of each type. One of these commentators further stated that inasmuch as Section 15 of the Commodity Exchange Act ("Act") (7 U.S.C. 19) directs the Commission to endeavor to use the least anticompetitive means of accomplishing its objectives, the Commission should allow the exchanges to decide how to allocate the permitted number of option contracts between options on futures and options on physicals in order to develop whichever contract a particular exchange believed would be most economically viable. Other commentators, concurring in the Commission's decision to proceed cautiously with any expansion of the pilot program, urged the Commission to adhere to its proposal and allow only one option of each type. Finally, one commentator suggested that the Commission defer any measures which would permit the trading of options on physicals and instead, expand the pilot program solely to allow each qualifying exchange to offer two options on futures contracts.

The Commission has stated, both in the **Federal Register** releases accompanying the proposed and final regulations for exchange-traded options[7] and in the materials submitted to Congress pursuant to Section 4c(c), that it intends to proceed with due caution in any expansion of the option pilot program. After careful consideration of all the comments and other relevant factors, the Commission has decided to broaden the pilot program no further than is necessary to allow each qualifying exchange to be designated solely for one option on a futures contract and one option on a physical.[8] Although the unique attributes of options on physicals [9] will complement the Commission's assessment of the use and market performance of option contracts, the Commission has chosen to proceed in a controlled and orderly manner until both the Commission and the exchanges have had greater experience with the trading of options under the pilot program. The Commission thus views the adoption of rules implementing the inclusion of options on physicals as constituting the completion of the first phase of the option pilot program.[10] The Commission believes that the primary goal of the option pilot program—the development of data and information which will permit the Commission to determine whether and under what conditions options trading should be allowed to continue after the pilot program has terminated [11]—are best served, at least at this juncture, by this balanced approach.

This Commission is, of course, cognizant of its responsibilities under Section 15 of the Act. Section 15, however, does not require the Commission to subordinate the policies and purposes of the Act to those of the antitrust laws. Section 15 requires only that the Commission, in achieving the goals and policies of the Act, consider the public interest served by the antitrust laws and endeavor to use the least anticompetitive means available. Limitations of the type now being adopted by the Commission are, of course, inherent in an experimental pilot program. Moreover, Section 15 does not require the Commission to adopt the least anticompetitive course of action where the objectives, policies and purposes of the Commodity Exchange Act would be better served in some other way.[12] The Commission further

---

[5] *See, e.g.*, Commission rule 1.51(a)(1), 17 CFR 1.51(a)(1).

[6] The Commission expects that boards of trade which have not previously been designated as, or applied for designation as, contract markets for the trading of options on futures contracts will apply for designation for options on physicals. Because § 33.3(b)(1) presently restricts the solicitation and acceptance of option customers' orders to those FCMs which are members of the contract market on which the option is traded, the Commission expects that the participation in the pilot program of additional exchanges should further broaden the number of FCMs who may offer at least one commodity option to option customers.

[7] *See, e.g.*, 47 FR 28401, 28404 (June 30, 1982); 46 FR 54500, 54501–02 (November 3, 1981); 46 FR 33293, 33294, 33295 (June 29, 1981).

[8] By letter dated December 9, 1981, the Board of Trade of the City of Chicago ("CBT") petitioned the Commission to repeal regulation 33.4(a)(4) which, at the time that petition was submitted, prevented a board of trade from being designated as a contract market for more than one option on a futures contract and, in particular, precluded the CBT from applying for contract market designation for options on Government National Mortgage Association collateralized delivery receipt futures contracts. In amending § 33.4 to allow the boards of trade to be designated solely for one option of each type, the Commission has considered the views of the CBT in support of its petition. The petition of the CBT has been denied to the extent that the CBT would seek authority to trade more than one option on a future contract or one option on a physical.

[9] For example, and as discussed elsewhere in this **Federal Register** release, the Commission has declined to require a limited period (or a single date) for the exercise of options on physicals. As a result, unlike futures contracts which have a much more limited delivery period, options on physicals could be exercised at any time prior to expiration.

[10] The Commission has previously indicated, both in the **Federal Register** notice announcing the adoption of the pilot program regulations and in the materials provided to the Commission's Congressional oversight committees pursuant to Section 4c(c) of the Act (7 U.S.C. 6c(c)), that it intended to supplement the pilot program regulations to permit the trading of options on physicals.

[11] 46 FR 33293, 33294 (June 29, 1981).

[12] *British American Commodity Options Corp.* v. *Bagley*, Comm. Fut. L. Rep. (CCH) § 20,245 at 21,334 (S.D.N.Y. December 21, 1976), *aff'd in part and rev'd in part on other grounds*, 552 F. 2d 492 (2d Cir.), *cert. denied*, 434 U.S. 938 (1977).

believes that these restrictions are reasonable and necessary if it is to limit appropriately the phased expansion of the pilot program. The Commission nonetheless intends to monitor closely all facets of option trading under the pilot program and will use the experience gained as a result of that review to determine if further expansion of the pilot program should be permitted.[13]

When it adopted regulations governing the trading of options on futures contracts, the Commission indicated that it would simultaneously review all option designation applications which were received by a specified date. The Commission has decided, however, that this approach is unnecessary to this completion of the first phase of the pilot program and therefore, will consider applications for contract market designation for the trading of options on physicals in accordance with the policies and practices that normally apply to such applications.[14]

Although the preponderance of the rules which the Commission is now adopting will become effective thirty days after publication of this **Federal Register** notice, certain of those rules which relate specifically to the trading of options on physicals will not become effective until after the conclusion of the Congressional review period specified in Section 4c(c) of the Act. Thus, although the Commission will accept applications for contract market designation made in accordance with these rules at any time, it will not designate any board of trade as a contract market for the trading of options on physicals until such time as the Commission provides notice in the **Federal Register** that those latter rules have been transmitted to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry in accordance with the requirements of the Act and have thereafter been declared by the Commission to be effective.

III. Commodity Option Transactions

The Commission proposed to define the term "physical" principally to enable the Commission to differentiate, where necessary, between references in its regulations to options on physicals and options on futures contracts. One commentator noted that the proposed definition could apply to certain transactions which would be excluded from the Commission's jurisdiction upon the passage of legislation affecting the respective jurisdictions of the Commission and the Securities and Exchange Commission. As the Commission stated in the **Federal Register** release accompanying the proposed regulations, the definition of "physical" is intended to be coextensive with the Commission's jurisdiction with respect to commodity options and would therefore be limited by any statutory limitation of the Commission's authority with respect to options on securities or exempt securities. 47 FR 28401, 28402 (June 30, 1982). Section 1.3(11) is therefore being adopted without change.

The Commission proposed to amend § 33.4(a)(3), which relates to demonstrations by applicant exchanges of continued compliance with the requirements for contract market designation, to make the requirements of that section applicable solely to options on futures contracts. The Commission also proposed to establish a comparable rule (§ 33.4(a)(4)) for those boards of trade which are already designated as a contract market for futures contracts or options on futures contracts and which are applying for contract market designation for options on physicals. One commentator, noting that neither rule would apply to an applicant board of trade which is not yet designated as a contract market for either futures contracts or options on futures contracts, suggested that the Commission rectify this apparent disparity. As the Commission indicated when it proposed these rules, however, such a board of trade still would be required to demonstrate compliance with the requirements of Sections 5 and 5a of the Act (7 U.S.C. 7, 7a) as part of its initial application. The Commission is, therefore, adopting §§ 33.4(a) (3) and (4) without change.

Compliance with the conditions and requirements of Sections 5 and 5a of the Act would also entail compliance with, *inter alia*, Commission rules 1.51 and 1.52 (17 CFR 1.51, 1.52). Thus, the Commission notes that although the references to § 1.50 (17 CFR 1.50) contained in §§ 33.4(a) (3) and (4) necesarily would apply only to boards of trade already designated for futures or option trading in the commodity which is the subject of the application, the Commission will evaluate especially carefully any exchange's application for contract market designation for option trading where the Commission's experience with that exchange indicates that the exchange is not satisfactorily discharging its self-regulatory responsibilities under the Act and the regulations thereunder. (Of course, nothing in § 33.4(a) (3) or (4) limits the Commission's authority to make a "§ 1.50 call" with respect to any designated futures or option contract.) Similarly, the Commission would in appropriate cases consider any disciplinary actions against or sanctions imposed on an applicant by the Securities and Exchange Commission as bearing upon the board of trade's ability and willingness to comply with the requirements of the Act and the Commission's regulations.

Sections 33.4(a)(1)(ii) specifies that options on futures contracts may be exercised only by the establishment, by book entry, in the clearing organization of positions in the underlying futures contract. By comparison, the Commission's June 30, 1982 proposal did not include any restrictions on the delivery mechanism for options on physicals. Instead, the Commission announced its intention, should the proposed regulations be adopted, to "consider applications for contract market designation which provide for cash settlement in lieu of actual delivery of [the] underlying physical in the event of exercise of an option on a physical." 47 FR at 28403. In this regard, the Commission noted that cash settlement of options on physicals might be appropriate in certain circumstances, such as where cash settlement would reduce the possibility of disruption of either the cash or futures markets or facilitate trading in the option itself.

The Commission received three comments on this issue. Two commentators suggested that cash settlement should not be permitted at all while the other commentator stated that cash settlement should be permitted only where the related futures contract is settled in cash. One of these commentators further stated that a central issue in the evaluation of options on physicals is the reliability and accessibility of cash market price quotations.

The Commission has decided, after careful review of the comments, to neither prohibit nor require cash

---

[13] Legislation now pending in Congress (H.R. 5447 and S. 2109) would remove the ban, contained in Section 4c of the Act (7 U.S.C. 6c), on options involving the commodities specifically enumerated in Section 2(a)(1) of the Act (7 U.S.C. 2). If that legislation is enacted, the Commission's experience with trading under the pilot program will be of significance to Commission decisions on the appropriate regulatory framework for such options.

[14] Section 33.5(c) provides, in pertinent part, that contract market designations for option trading "shall be for a period not to exceed three years * * * or such shorter period as the Commission may specify. * * *" Because the pilot program will terminate, unless otherwise extended, on September 30, 1985 (three years after the effective date of the initial designations under the pilot program), contract market designations for options on physicals will also cease to be effective after that date absent further action by the Commission.

settlement in lieu of actual delivery of the underlying physical. The Commission reaffirms its belief that cash settlement of options on physicals may be approporiate in certain circumstances and that the appropriateness of cash settlement is best addressed in the context of specific exchange proposals for option trading where the potential benefits and drawbacks of cash settlement may be evaluated fully in the context of the terms and conditions of the option contract.

One of the commentators maintained that allowing cash settlement could increase the likelihood that an option's settlement prices would be tied to the closing or settlement prices for the related futures contract or option on that futures contract. As discussed elsewhere in this **Federal Register** release, however, the Commission recognizes the importance of a reliable and accessible cash-market price for the physical underlying an option on a physical and has adopted, in § 33.4(a)(5)(iv)(B), a requirement that the boards of trade demonstrate an adequate cash price series as part of the designation process. Indeed, one of the reasons the Commission has required an adequate cash price series is to avoid reliance on the closing or settlement prices for a related futures contract (or option on a futures contract) for the settlement price of an option on a physical.

The Commission proposed that a board of trade applying for contract market designation for the trading of options on physicals demonstrate that "the cash market for the underlying physical exhibit sufficient liquidity so that option grantors and purchasers can purchase or sell the underlying physical at its economic value in normal cash marketing channels." Proposed § 33.4(a)(5)(iv)(A). The Commission proposed this requirement because of its belief that non-commercial traders should be able to buy or sell the physical underlying the option at its economic value without significant disadvantage relative to other traders.

This rule for options on physicals parallels a requirement for futures market liquidity (§ 33.4(a)(5)(iii)) applicable to options on futures contracts. Both rules seek to prevent the trading and exercise of options from disrupting underlying cash and futures markets. The Commission's rule for options on physicals also helps to ensure that those options can be exercised at their economic value, thereby providing an opportunity for the option holder to receive the intrinsic value of the option. The lack of a liquid cash market could especially disadvantage holders of deep-in-the money options who might have to accept significant discounts from the intrinsic value of the option if the ability to receive the economic value of the physical through exercise of the option did not exist.

Four commentators objected to this proposed designation requirement. These commentators asserted that the standard was vague, that cash market liquidity was irrelevant under certain circumstances, and that the existence of a liquid cash market prior to the commencement of option trading was not necessary. The Commission believes that its rule is sufficiently specific to apprise the boards of trade of the minimum standards necessary to demonstrate liquidity in the underlying cash markets. These measures of liquidity could include, in appropriate cases, bid-ask spreads, the number of transactions per unit of time, and the closeness of the prices for large and small orders. The Commission also recognizes, as mentioned by one commentator, that option trading may itself encourage the development of liquid cash markets. However, the Commission is not persuaded that a mere expectation that such liquidity will develop after the introduction of option trading is an appropriate basis upon which to trade options on physicals in view of the limited, rigidly-controlled nature of the option pilot program. The Commission, therefore, will not authorize options on physicals which lack the basic liquidity in the underlying physicals market which the Commission deems necessary for market and customer protection. The Commission has accordingly determined to adopt § 33.4(a)(5)(iv)(A) as proposed.

The Commission also proposed that a board of trade seeking designation to trade options on physicals demonstrate the existence of an accurate, widely-disseminated price series for the underlying physical. Proposed § 33.4(a)(5)(iv)(B). In proposing this requirement, the Commission stated that it deemed such a price series to be necessary because option premiums and the intrinsic value of an option on a physical will be derived from the current market value of the underlying physical. Thus, the Commission stated that a reliable price series would be essential if option customers were to be able to measure the value of their option contracts.

Three commentators opposed this proposal on several grounds. One commentator suggested that because there is no similar requirement for futures contracts or for options on futures contracts, the Commission should not adopt such a requirement for options on physicals. The Commission disagrees. First, while futures markets can serve a price discovery and price-basing function, there is no direct analogue to these functions in the option markets. Second, a requirement concerning an appropriate cash price series is not necessary for options on futures contracts inasmuch as the futures price serves the same purpose as the cash price series serves for options on physicals. Moreover, the Commission notes that its rules already specify that options on futures contracts can be designated only where there is a liquid underlying futures market and where the applicant board of trade complies with the conditions and requirements for designation as a contract market—*i.e.*, where the underlying futures contract generates a reliable and widely-disseminated price series. *See* § 33.4(a)(5)(iii) and § 33.4(a)(3).

The Commission further notes that the functions of the option markets do not include discovery of the price of the underlying future or commodity. Specifically, there is no single or small range of prices of the underlying future or commodity which can be imputed from an option premium because the option premium also depends on such subjective elements as expected future price volatility and price distributions of the underlying future or commodity. Accordingly, the Commission does not agree with the commentator who stated that the value of the underlying commodity can be derived from the price of the option itself.

Finally, one commentator noted that the commodities markets typically do not have accurate, widely-disseminated price series. In the absence of accurate and widely-disseminated cash prices, however, market participants and members of the public do not have an objective standard against which to measure the price and performance of their options and on which to base their decisions to maintain, offset or exercise their option positions. As indicated above, the Commission believes that in order to maintain the customer information and protection standards already established for options on futures contracts, such commodities should not be eligible for designation for options on physicals. The Commission has therefore decided to adopt § 33.4(a)(5)(iv)(B) as proposed.

As proposed, § 33.4(a)(5)(iv)(C) would require an applicant board of trade to demonstrate that the trading of options

on physicals will not disrupt trading in either the cash market for the underlying physical or in any futures contract. The Commission received two comments on its proposal. One commentator stated that § 33.4(a)(5)(iv)(C) was redundant in light of proposed §§ 33.4(a)(5)(iv)(A) and (B) while the other commentator supported the proposed rule.

The Commission does not agree with the commentator who suggested that this requirement is superfluous; rather, the Commission believes that this rule complements §§ 33.4(a)(5)(iv)(A) and (B). Specifically, the Commission notes that, without proper safeguards, the trading of options on physicals could disrupt trading in liquid cash markets and in related futures markets, particularly during or immediately before the delivery period. The Commission has accordingly determined to adopt § 33.4(a)(5)(iv)(C) as proposed. The Commission notes that under this rule, applicant boards of trade will be required to demonstrate that they have taken into account potential adverse effects on the underlying cash market in the design of their proposed option on physicals contracts and, in those cases in which related futures contracts are trading, have also considered the potential adverse effects on such futures contracts. In addition, applicant boards of trade must demonstrate that they have a systematic means of monitoring and acting to prevent any disruptions of the cash market and related futures markets, if any, particularly when the period during which options on physicals are likely to be exercised is close to the futures delivery period.

Proposed §§ 33.4(a)(7), (8) and (9) would have codified and made applicable to the trading of options on physicals the requirements of Commission Guideline No. 1. Several commentators objected to this codification on the grounds that it would reduce flexibility in the contract designation process.[15] While the Commission does not necessarily agree with these comments, it has determined not to codify these requirements in its option regulations for the reasons set forth in the **Federal Register** release accompanying the Commission's recent revision of Guideline No. 1.[16] The Commission is instead adopting a requirement that an applicant board of trade demonstrate, consistent with a description of the cash market furnished by the board of trade, that the individual terms and conditions of the contract are justified. Section 33.4(a)(5)(iv)(D).[17]

Section 33.4(b)(1)(iii) has been amended to require option contract markets to specify "the point, in terms of the underlying futures contract or underlying physical, at which a new strike price will be introduced in any option which is already trading." One commentator urged the Commission alternatively to allow strike prices for options on physicals to be based upon futures contracts where there is no widely-disseminated cash price series for the underlying physical. The Commission, however, would not designate an option on a physical in the absence of such a cash price series. *See* § 33.4(a)(5)(iv). Furthermore, the Commission is concerned that allowing strike prices for options on physicals to be based, in whole or in part, on a futures contract—which may or may not be traded on the same exchange on which the option is traded—could have adverse effects on the pricing efficiency of that futures contract.

Proposed § 33.4(a)(8)(iv) would have required a board of trade applying for contract market designation for the trading of options on physicals to include in its application an analysis and justification of any proposed option expiration date. Although the Commission did not propose to otherwise restrict the time when such an option could be exercised, the Commission specifically requested comments as to whether there should be a limited period or a single date for the exercise of options on physicals. 47 FR 28401, 28403 (June 30, 1982).

The Commission received six comments on this question, three of which supported permitting exercise at any time prior to the expiration of the option and two of which opposed unlimited exercise. The sixth commentator favored exercise at any time during the life of the option only if the option expiration date occurred prior to the first notice date for delivery of any related futures contract.

After considering these comments, the Commission remains of the opinion that restrictions on the exercise of options on physicals are best reviewed on a case-by-case basis. The Commission agrees, however, with the commentator who noted that the exercise of options on physicals may be disruptive of the futures markets if, for example, option grantors or purchasers take opposite positions in the futures market and then make or take delivery on those futures contracts if the options are exercised. That commentator argued that the delivery period for a futures contract should be protected from such adverse effects in the same manner as it is protected from the trading of options on futures. The Commission finds merit in this comment and is therefore modifying § 33.4(d)(1) to extend to options on physicals the requirement that the expiration date of the option ordinarily precede by at least ten business days the first notice day or last trading day of any related futures contract.

In response to a suggestion made by one of the commentators, the Commission has modified the last sentence of paragraph (1) of the Options Disclosure Statement (§ 33.7(b)(1)) in order to clarify its meaning. The Commission has also modified that paragraph to alert option customers to the possibility that the exercise period for some options may be restricted.

Another commentator noted that the description of the profit potential of deep-out-of-the-money options as "remote" (§ 33.7(b)(6)) was not necessarily accurate. Specifically, this commentator stated that an option customer could profit on the purchase of a deep-out-of-the-money option upon offset after a price change in the underlying futures contract or physical resulted in a favorable price change in the option premium. The Options Disclosure Statement, however, does not indicate that an option purchaser cannot profit from such an option position; instead, it indicates that such profits are ulikely. Therefore, although this commentator is correct, the Commission believes that this is a matter that is best explained orally to those option customers who may be contemplating the purchase of a deep-out-of-the-money option and that further elaboration of this issue in the Disclosure Statement would be unnecessarily confusing.

The Commission proposed to amend paragraph (b)(2)(viii) of the Options Disclosure Statement to make clear that the required discussion of the effects of limit moves in the futures market did not apply to options on physicals. Specifically, that rule requires FCMs to provide their option customers with the following information for options on futures contracts:

The loss (or profit) that could be generated by the option position by a limit move (or a series of limit moves) in the underlying

[15] A number of the commentators reiterated or incorporated by reference comments they had already made in connection with the Commission's earlier proposed codification of Guideline No. 1. *See* 45 FR 73504 (November 5, 1980).

[16] 47 FR 49832 (November 3, 1982).

[17] This demonstration should be made in accordance with Sections A and B, respectively, of revised Guideline No. 1. The justification required under 33.4(a)(5)(iv)(D) is not the only economic requirement for designation of a contract market to trade options on physicals. *See, e.g.*, § 33.4(a)(5)(i), which requires a demonstration of a legitimate economic purpose, such as the reduction of commercial risks.

future, both in total dollars and as a percentage of the total cost of the option.

One commentator urged the Commission to delete this requirement. In support its position, that commentator stated that its experience had already indicated that compliance with this requirement was extremely costly and inherently difficult because it necessitated a series of complex computations that are not readily understood by option customers.

The Commission has reconsidered that portion of its disclosure rule in light of its objective that all option customers be fully informed of the risks involved in option trading. *See* 46 FR 54500, 54507 (November 3, 1981). The Commission agrees that a literal calculation of the effects of limit moves on the profit potential of an option is unduly complicated and provides information that is, at best, of little value to option customers. The Commission believes, however, that a generic discussion of the possibility of limit moves in the futures contract underlying a commodity option may well be of importance to option customers, particularly insofar as trading in pilot program options "may attract customers who heretofore have had little or no exposure to the commodity markets." *Id.* The Commission has, therefore, modified that portion of its disclosure rule to eliminate the present requirement that an FCM provide its option customers with detailed calculations of the effects of limit moves and instead, will require that an FCM provide generalized information as to the effect of such market activity.

The Commission is aware that the amendments to the Disclosure Statement necessitated by the inclusion within the pilot program of options on physicals will ultimately require revision of those Statements. The Commission does not believe that it is necessary, however, to require the amendment of those Statements prior to the commencement of trading in options of physicals. Accordingly, the Commission will deem an FCM to be in compliance with the requirements of § 33.7(a) if, subsequent to the final adoption of these amendments to § 33.7, it continues to provide to its prospective option customers Options Disclosure Statements that have not been amended to reflect the revisions that are made necessary by the trading of options on physicals. This "no action" position will terminate, however, when the Commission designates one or more exchanges as contract markets for the trading of options on physicals. All FCMs will then be required to provide the same Options Disclosure Statement, irrespective of whether a particular FCM intends to offer options on physicals to its option customers.

It has come to the Commission's attention that certain portions of its disclosure rules are susceptible of interpretations which are contrary to the Commission's intentions. For example, § 33.7(a) provides that "[t]he disclosure statement and the acknowledgment [Signed and dated by the option customer] shall be retained by the futures commission merchant in accordance with § 1.31." The Commission is aware that this provision could be interpreted to mean that an FCM must maintain one copy of that statement for each of its option customers. The rule is intended, however, generally to require only that an FCM retain a single copy of the Disclosure Statement. Of course, should an FCM provide different versions of the Disclosure Statement to different option customers (such as where the Disclosure Statement has been revised to incorporate references to options on physicals), the FCM's records must accurately reflect which version of the Disclosure Statement was provided to particular option customers. Furthermore, an FCM continues to remain obligated to retain, in accordance with § 1.31, the required acknowledgment for each of its option customers.

Section 33.7(c) presently provides that an FCM must provide an option customer with all of the information required under paragraph (b) of that rule "[p]rior to the entry into a commodity option transaction. * * *" The Commission understands that some persons have asked whether this would require an FCM to provide information to its option customers before the entry of every option order. The Commission's intention, however, was to ensure that each option customer is fully informed as to the matters discussed in the Disclosure Statement prior to the time he commences trading. The Commission has, therefore, modified that portion of its rule to require the disclosure of this information" [p]rior to the entry of the first commodity option transaction for the account of an option customer. * * *[18] Of course, this rule change does not affect an FCM's obligation to provide new or additional information to its option customers prior to the entry of an order if the information previously provided has become inaccurate or incomplete. *See* § 33.7(f). Although the rules which the Commission is now adopting generally will not become effective until after publication of this **Federal Register** notice, the Commission has instructed its staff not to take enforcement action against any FCM or person soliciting or accepting the order therefor which chooses to conform its disclosure practices to the revised requirements of § 33.7 prior to that time.

[18] The Commission has further modified paragraphs (c) and (d) of rule so that the limitations, if any, on the transfer of an option customer's account generally need only be provided prior to the commencement of trading and not prior to the entry of each option order.

IV. Amendments to Existing Regulations

The Commission is adopting minor amendments to the definitions of the terms "associated person" (§ 1.3(aa)), "commodity option transaction" and "commodity option" (§ 1.3(hh)), and "strike price" (§ 1.3(kk)) and, as noted earlier, is also adding a definition of the term "physical" § 1.3(ll)).

The Commission did not receive any comments on the proposed amendments to §§ 1.3(aa) and 1.3(kk) and they are being adopted without change. The Commission similarly did not receive any comments on the proposed amendment to § 1.3(hh), which clarifies that the terms "commodity option transaction" and "commodity option" are not defined by reference to any particular commodity but instead are determined by the descriptions of transactions provided in that paragraph. Section 1.3(hh) is therefore being adopted in the form in which it was proposed.

The Commission is making several changes to § 1.17, the minimum financial rule for futures commission merchants. In particular, the Commission has decided that no "haircut," or safety factor charge, need be taken against an FCM's adjusted net capital for inventory which is currently registered as deliverable on a contract market and is covered by a futures contract or an option on a physical. Section 1.17(c)(5)(ii)(A). Some of the commentators, while acknowledging the basis for the Commission's approach, urged the Commission to afford similar treatment to inventory which is "covered" by options on futures contracts. The Commission believes, however, that subparagraph (B) of § 1.17(c)(5)(ii) already sets forth the appropriate charge in such cases and has therefore adopted the amendment as proposed.

The Commission is also amending paragraphs (c)(1)(iii) and (c)(5)(xi) of § 1.17 to make clear that those provisions are consistent with the definition of "physical" and further, to specify that they apply regardless of whether the option involved is an option

on a physical or an option on a futures contract.[19] Finally, the Commission is amending §§ 1.17(c)(5)(x) and (c)(5)(x)(D) to make minor, clarifying changes in the terminology of those paragraphs. The Commission did not receive any comments on those portions of its proposal and they are being adopted without change.

Section 1.19 is being amended to delete specific references to various types of option transactions and by inserting the term "commodity option" in their place. No comments were submitted in response to the proposed amendment.

The Commission is adopting, without change, certain technical amendments to § 1.22. One commentator asked whether § 1.22 prohibits the use of customer funds (as defined in § 1.3(gg)) to purchase a commodity for the purpose of covering a granted option. By its terms, § 1.22 imposes obligations upon FCMs (and other depositories of customer funds); it does not, by comparison, preclude an FCM from so using customer funds pursuant to instructions from a customer or option customer.

The Commission is amending § 1.33, which relates to confirmation and monthly statements, to include references to options on physicals. Section 1.33(a) is also being amended to require FCMs to provide to their futures customers a monthly activity statement which contains, among other items, information relating to financial charges and credits during the preceding month; this information is already required to be provided to option customers. One commentator objected to this latter requirement, stating that the Commission should not establish such a rule without specifically identifying all of the items that would have to be included in the monthly statement. The Commission does not agree that any further elaboration is necessary in view of the existing and widespread industry practice of separately enumerating such charges and credits on customers' account statements and in view of the variety of debit and credit items that may be properly posted to a customer's account. The Commission had also proposed to require the itemization of commissions and fees in the monthly statements provided to futures customers. The Commission has, however, received suggestions from certain FCMs that such a requirement would be costly to implement and furthermore, may not be of significant benefit to customers, who already receive this information on a timely basis. The Commission is therefore today publishing a separate notice of proposed rulemaking in the **Federal Register** specifically requesting comments as to whether it should further amend §1.33(a)(1)(iv) to require the inclusion of commissions and fees in the monthly statements provided to futures customers.

Section 1.33(b)(2)(v) presently requires FCMs to provide to their option customers confirmation statements which specify both the expiration date and the final exercise date of the option as well as the final trading date of the contract for future delivery underlying an option on a futures contract. The Commission has become aware, however, that the inclusion of the expiration date and the final trading date of an underlying futures contract may be creating unnecessary operational difficulties for FCMs and, in some instances, causing confusion to option customers. Specifically, the Commission anticipates that many option positions will be offset or allowed to expire, in which cases the final trading date of the underlying futures contract will be of little importance to an option customer. Furthermore, the Commission is concerned that option customers could, in reviewing their confirmation statements, confuse the final exercise date of the option with either the option expiration date or the final futures trading date and inadvertently allow profitable option positions to expire unexercised.

The Commission is, therefore, deleting from § 1.33(b) any requirement that the option expiration date appear on a confirmation statement. By comparison, the Commission believes that information as to the final trading date of the underlying futures contract will be of interest to those option customers who do exercise their option positions. The Commission has accordingly removed from § 1.33(b)(2)(v) the requirement that the final trading date of the underlying futures contract appear in every option confirmation statement and instead, will require that this information be provided only in the event of exercise of an option on a futures contract. *See* § 1.33(b)(3). Although these rule changes will not become effective until thirty days after the date of this **Federal Register** notice, the Commission has instructed its staff not to take enforcement action against any FCM which chooses to conform its confirmation and monthly statements to the revised requirements of § 1.33(b) prior to that time.

No comments were received in response to proposed changes to §§ 1.34, 1.35 and 1.39. The Commission is adopting these amendments without change. The amendments are basically technical in nature and, in general, merely incorporate appropriate references to options on physicals. Section 1.35(e) has also been amended to refer to the non-competitive execution of option transactions in accordance with contract market rules submitted to and approved by the Commission in accordance with § 1.38, thereby conforming the concluding paragraph of § 1.35(e) to earlier amendments to § 1.38.[20]

When it adopted rules to govern the option pilot program, the Commission amended § 1.41(a)(2) to specify, consistent with the prohibition on the margining of option premiums contained in § 33.4(a)(2), that the term "reviewable rule" of a contract market (§ 1.41(a)(2)) included contract market rules relating to the payment or collection of commodity option premiums. 45 FR 54500, 54510 (November 3, 1981). The Commission further indicated that it had instructed its staff to review carefully the exchanges' applications for option contract market designation to ensure that each board of trade or its clearing organization, as applicable, will have in place a system to require the payment of margin by option grantors and, where applicable, their FCMs. *Id.* at 54505. Thus, when the Commission proposed rules to incorporate options on physicals within the scope of the option pilot program, it proposed, consistent with its existing practice, to amend §1.41(a)(2) to specify that the term "reviewable rule" also included any rule of a contract market "relating to the payment or collection of commodity option margin."

A number of commentators, concerned that the Commission intended to involve itself in the setting of levels of margin, maintained, *inter alia*, that the Commission was ill-equipped to act promptly in response to the changes in market conditions that not infrequently require an adjustment in the levels of margin established by the exchanges or their clearing organizations. These commentators further observed that Commission review of option margin levels could result in an anomalous situation

[19] One commentator, noting that the proposed rules referred to the "market value of the physical or futures contract which is the subject of the option," stated that a futures contract does not have a "market value" *per se*. The Commission has used the term "market value" in § 1.17 to mean the settlement price of the underlying futures contract, inclusive of unrealized gains and losses.

[20] 46 FR 54500, 54523 (November 3, 1981); *see* 47 FR 28401, 28406 (June 30, 1982).

whereby futures margin levels could be changed immediately, but option margin levels would remain unadjusted pending review and approval by the Commission. As indicated above, the Commission's proposal was not intended to abrogate the routine determination, by the exchanges, of appropriate levels of margin. Indeed, as the Commission observed when it adopted rules to establish the option pilot program, the characteristics of the futures and option markets are not at present sufficiently different to require the Commissions involvement in the setting of levels of option margin. *Id.* The Commission has accordingly modified the final rule to make clear that rules relating to the actual setting of levels of margin will not be deemed to be reviewable rules.

Many of those commentators further argued that the Commission also lacked authority under the Act to review exchange rules relating to the payment or collection of option margins. The Commission has plenary authority under Section 4c(c) of the Act to adopt such a requirement. Section 5a(12) of the Act (7 U.S.C. 7a(12)) restricts only the Commission's authority to review and approve contract market rules relating to the setting of levels of margin for futures transactions.[21] Indeed, the Commission is authorized under Section 4c(c) to review not only exchange rules relating to the payment and collection of option margins which—together with exchange rules establishing or modifying methods and systems for the payment and collection of option margin—must be submitted to the Commission as reviewable rules under § 1.41(b), but also to review the establishment of actual levels of margin for commodity option transactions.

One contract market, while expressing reservations about the Commission's proposal, stated that it did not object to seeking prior Commission approval of rules relating to the bases on which original margin for option grantors will be determined or to the times within which margin payments must be made.[22] The Commission's rule would encompass primarily these and related subjects [23] but would not, as indicated above, directly involve the Commission in the day-to-day establishment of actual levels of option margins.

Although this amendment to § 1.41 would merely continue the Commission's practice of reviewing the exchanges' methods and systems for the assessment and the payment and collection of option margin,[24] one commentator suggested that the Commission not codify this procedure in its regulations because decisions made by the Commission with respect to option margin procedures could have an effect on margin levels for futures contracts. In this regard, the Commission notes that despite the urgings of certain segments of the industry, it has thus far declined to impose upon the boards of trade a uniform system for the margining of option transactions which would be significantly more intrusive that the limited review contemplated by the rule now being adopted by the Commission. The Commission will, however, continue to assess the operation and effect of these different margining systems in order to determine whether the exchange's divergent approaches to the margining of option transactions are causing unnecessary operational difficulties for FCMs or resulting in confusion as to the obligations of option grantors.[25]

The Commission proposed to amend §§ 1.42–1.44, which relate generally to delivery notices and the storage of commodities in warehouses and similar depositories, to include appropriate references to options on physicals. One commentator stated its belief that those regulations should not apply to any futures or option contract which is settled in cash. The Commission agrees with this commentator and notes that, both as proposed and as now amended, neither § 1.43 nor § 1.44 would apply to such cash-settled contracts. Section 1.42, which requires each contract market to furnish a copy of delivery notices (or, as proposed, notices of exercise of options on physicals) has also been amended to exclude from this requirement those futures contracts and options on physicals which are settled in cash rather than by delivery of the underlying commodity or physical.

The Commission proposed to amend §§ 1.46(a) (3) and (4), which apply generally to the closing out of offsetting long and short positions, to include options on physicals within the provisions of that section. One commentator noted that, as proposed, § 1.46 could be construed to require an FCM to offset an option on a futures contract with an option on a physical where those contracts were executed on the same contract market and had the same strike price and expiration date. The Commission has modified the final regulation accordingly to eliminate this ambiguity.

The Commission is also amending the concluding paragraph of § 1.46(a) which, in addition to requiring the closing out of offsetting long and short positions, requires an FCM to furnish to its customer or option customer "a statement showing the financial results of the transactions involved." The Commission recognizes, however, that while a statement of the financial results is appropriate for futures transactions, where no gain or loss is realized until a position is closed out, similar treatment is unnecessary for options transactions because options confirmation statements will separately specify the amount of the premium paid (in the case of a long options position) or received (in the case of a short options position). Section 1.33(b).[26] As with the amendments the Commission is today making to § 1.33, the Commission has instructed its staff not to take enforcement action against any FCM which chooses, before the effective date of these rule amendments, to conform its options purchase and sale statements to the requirements of the amended rule.

Section 1.46(d)(1), which was adopted as part of the option pilot program regulations, presently provides an exemption from the provisions of that section for "purchases or sales of futures contracts for the purpose of covering the granting of options on a contract market, if such purchases or sales are accompanied by instructions and other evidence that such futures contracts are

---

[21] Similarly, Section 8a(7) of the Act (7 U.S.C. 12a(7)) would not impede the Commission's authority, in appropriate cases, to alter or supplement exchange rules relating to the levels of option margin or the methods and systems employed by the exchanges for the payment or collection of option margins.

[22] *See* 45 FR 54500, 54505 & n.12 (November 3, 1981.)

[23] For example, the Commission has earlier indicated that it intends to scrutinize especially carefully any exchange application for contract market designation which contemplates the payment of unrealized profits to option purchasers on options that are not offset, exercised or expired. *Id.* at 54505.

[24] To date, the Commission has designated four boards of trade as contract markets for the trading of options on futures contracts and has made substantial progress in the processing of four additional applications for such designation.

[25] On July 2, 1982, the Commission denied a petition by the Coffee, Sugar & Cocoa Exchange, Inc. to modify or repeal Commission rule 33.4(a)(2) which, in effect, prohibits the margining of option premiums. Although it denied that petition, the Commission nonetheless indicated that it would reconsider the issue after the Commission and the industry have gained sufficient experience with the trading of options under the pilot program.

[26] The Commission also is aware that to require the inclusion of this information on the purchase and sale statements required by § 1.46 could create significant operational difficulties for FCMs who would be required, in effect, to credit (or debit) their option customers' accounts not only when the option position was established, but then to debit and recredit (or credit and redebit) the account when the position was offset.

cover for granted options." The Commission proposed to delete that provision when it proposed regulations to implement the trading of options on physicals. As the Commission explained at that time, the exception provided by that paragraph was inappropriate insofar as it referred to futures contracts "covering" options on those contracts. By comparison, the Commission understands the term "cover" to apply only to an option on a physical (and the underlying physical) and to a futures contract (and the underlying commodity).[27] The Commission further indicated in its proposal that "in a situation where § 1.46(d)(1) would apply as presently written, a portion of the overall market position [*i.e.*, the underlying commodity] would necessarily be 'uncovered.' " 47 FR 28401, 28406 (June 30, 1982).

The comments received by the Commission on this proposal suggested that the deletion of this provision would adversely affect the liquidity and pricing efficiency of the option markets. Rather than delete § 1.46(d)(1), the commentators suggested that the Commission instead expand the exemption to permit traders to keep open offsetting option positions and exempt all options on futures transactions from the provisions of § 1.46.

The Commission also requested comments as to whether and under what circumstances it should exempt commercial option traders from the requirements of § 1.46. 47 FR 28401, 28405 (June 30, 1982).[28] The commentators generally supported such an exemption, stating that it would provide a significant opportunity to use options for the reduction of commercial risks.

The Commission has considered these comments and has further analyzed its proposal. While the Commission believes that the positions advanced by some of the commentators are not without merit, the suggested alternatives to the Commission's proposed deletion of paragraph (d)(1) do not allay the Commission's concerns in this area. Specifically, and apart from the reasons already specified by the Commission in its proposal, the Commission is concerned that continuing the exemption presently contained in § 1.46(d)(1) would have the effect of distorting open interest, to the detriment of the Commission and the exchanges in the performance of their respective market surveillance activities and to the disadvantage of users of the markets who rely upon the accuracy of that information in making trading decisions.[29] In this regard, the Commission deems it essential that any exemption for option transactions from the automatic offset provisions of § 1.46 provide specifically for the closing out of these "balanced" positions by open outcry, on the floor of the exchange, and not by transfer trade or some comparable mechanism. The Commission further believes that any such exemption should also provide adequate safeguards to ensure that the trading losses incurred by an option customer on one side of a balanced and otherwise offsetting position are not obscured by the absence of a mandatory close-out provision.

In view of these considerations, the Commission has determined to revise § 1.46(d)(1) to provide what it believes to be a limited but nonetheless appropriate exemption for commercial participants in the option markets. Specifically, the rule which the Commission is now adopting will provide an exemption for option positions held by commercial interests in the underlying commodity where those option positions have been determined by the contract market to be economically appropriate to the reduction of risks in the conduct and management of a commercial enterprise. Thus, the rule which the Commission is now adopting parallels Commission rule 1.61(b) (17 CFR 1.61(b)) and the Commission will allow the contract markets to afford the same treatment to commercial traders under both §§ 1.46 and 1.61.[30] However, in view of the Commission's concerns with respect to the effects on open interest of such offsetting positions, the Commission is further requiring that any such offsetting positions must be closed out by open outcry, on the floor of the contract market, and not by transfer trade or other, similar noncompetitive means.[31]

The Commission also wishes to emphasize that, as amended, § 1.46(d)(1) will apply only to offsetting option positions—*i.e.*, long and short call or long and short put option positions on the same contract market which have the same strike price and expiration date.

The Commission is amending certain of its registration regulations to include references, where appropriate, to commodity option transactions. The Commission did not receive any comments responding to the proposed changes. Specifically, § 3.20 (delegation of authority to deny registration) has been amended to include as a basis for denial of registration certain misdemeanor convictions involving commodity options. Section 3.33 (withdrawal from registration) has been amended to clarify that certain requirements concerning the termination of relationships with customers apply equally to option customers. Similarly, the Commission's interpretation of the "other good cause" provisions of Section 8a(2)(B)(ii) of the Act (7 U.S.C. 12a(2)(B)(ii)), is being amended to include references to commodity options (17 CFR Part 3 Appendix A).

The Commission is amending §§ 4.13, 4.21, 4.22, 4.23, 4.30, 4.31 and 4.32, which relate to the operations and activities of commodity trading advisors ("CTAs") and commodity pool operators ("CPOs"), to make clear that the provisions of the Commission's Part 4 rules apply to all "commodity interest" transactions, whether they involve futures contracts, options, or leverage contracts, and to make other conforming changes. No comments specifically responding to the proposed amendments were submitted and the amendments are being adopted in the form in which they were proposed. In this regard, the Commission wishes to note that corrections to the Disclosure Documents furnished by CPOs and CTAs (*see* §§ 4.21(a) and 4.31(a)) may be made by way of an amended Document or other similar means such as a letter or, in the case of a commodity pool, by the next periodic account statement for the pool. It should be further noted that §§ 4.21 and 4.31 only require the updating of a Disclosure Document if the Document is being used to solicit prospective customers; the Commission will not require that the Documents be amended if no solicitations are being made. If solicitation is resumed, however, the Document must be updated at that time. *See* 46 FR 26004, 26010–11 (May 8, 1981).

The Commission is amending § 32.1 by adding a new paragraph (a), which would delineate the scope of Part 32,

---

[27] *See generally* Commission rule 1.17(j), 17 CFR 1.17(j).

[28] The exemption from the requirements of § 1.46 for "bona fide hedging transactions" provided by paragraph (d)(2) of that section does not apply to option transactions. 47 FR at 28405; *see* § 1.3(z), 17 CFR 1.3(z).

[29] *See* 45 FR 57141, 57146 (August 27, 1980).

[30] Section 1.61(b), which generally requires each contract market to adopt and submit to the Commission for its approval rules which limit the maximum net long and net short futures and option positions any person may hold or control (*i.e.*, speculative position limits), provides an exception from those exchange-set speculative limits for commercial interests.

[31] Any such open and otherwise offsetting positions must be reported both to the exchange as open interest and, in appropriate cases, to the Commission on the Large Trader Reporting (Series '01) Forms. *See* § 17.00.

and by redesignating other paragraphs of that section accordingly. In addition, § 32.11(b) has been amended to clarify that the ban on certain commodity option transactions contained in § 32.11(a) does not apply to option transactions conducted on or subject to the rules of a contract market in accordance with the provisions of Section 4c(c) of the Act and the regulations promulgated thereunder.

Sections 145.5 and 147.3 are being amended to provide for the generally non-public treatment of information furnished in compliance with the reporting requirements contained in Parts 15–21 of the Commission's regulations.

The Commission is amending § 155.2 to clarify that an exchange's rules on dual trading should prohibit a floor broker from executing an order for his own account or an account in which he has an interest where such execution would involve a purchase or sale of a future or option if the floor broker is holding an executable customer or option customer's order (for the purchase or sale of a future or an option) in the same commodity and that customer or option customer's order would benefit from a market move in the same direction as the broker's trade for his own account or the account in which he has an interest. The Commission is also amending § 155.3 to establish similar requirements for FCMs. Specifically, § 155.3(a)(1) provides generally that each FCM must establish and enforce internal rules, procedures and controls to prevent the FCM's affiliated persons who know of a customer's or option customer's trading activity to transmit for execution orders in the same commodity or in an option on that commodity in advance of the customer's or option customer's order. The Commission did not receive any comments on either of those proposed rule changes.

The Commission proposed to amend certain of its regulations relating to the customer protection and arbitration programs of registered futures associations in order to include references to commodity options. One commentator was concerned that adoption of these changes could be viewed as implicitly mandating the immediate assumption of those responsibilities by the National Futures Association ("NFA"). The Commission, however, does not view the adoption of these amendments as establishing new obligations for NFA and further, does not believe that these amendments will adversely affect the orderly phase-in, by NFA, of customer protection and arbitration programs pursuant to rules which have been approved by the Commission. The Commission is also amending § 180.1, which relates to exchange-sponsored arbitration programs, to include appropriate references to commodity option transactions.

V. Amendments to the Reporting Requirements

The Commission proposed that, with two exceptions, the reporting requirements already established for options on futures be applied to options on physicals. *See* 47 FR 28401, 28407 (June 30, 1982). Those two exceptions concern the frequency with which large option trader reports must be filed and the information that must be contained in those reports. For options on futures contracts, large trader reports must be routinely filed on a weekly basis and only account identification and position information must be reported. 17 CFR 16.02. For options on physicals, the Commission proposed that large trader reports be filed daily and that option exercises, as well as account identification and position information, be reported, *See* 47 FR at 28407. The Commission received five comments on these aspects of the proposed regulation, all of which opposed the adoption of these requirements.

Four of the commentators believed that the requirements for large trader reports for options on physicals should parallel the requirements for options on futures. These commentators all maintained that these additional requirements were unwarranted in view of the added cost to, and operational burden on, the exchanges that would result from these requirements. None of these commentators provided any estimate of these additional costs, however. Another commentator stated "the collection of market surveillance data should be based on a perceived need, * * * not because of a regulation requiring it." With respect to the reporting of exercises of options on physicals, this commentator further argued that the "need for the information would vary widely, depend[ing] on the contract being traded * * * [and] would vary for the same commodity at different times and under different circumstances."

One of the commentators separately recommended that the requirements concerning daily reporting and reporting of option exercises should not apply to options on physicals which are settled in cash. The Commission agrees that when options on physicals are settled in cash, weekly large trader options reports will ordinarily be sufficient and that the reporting of options exercised by large traders may not provide useful information for market surveillance purposes. The reporting requirements for options on physicals which are settled in cash are, therefore, identical to the current reporting requirements for options on futures.

By comparison, the Commission is not persuaded that daily reporting of large option traders' positions and exercises should not be required with respect to options on physicals which call for transfer of ownership of the underlying commodity as the means of exercise. The Commission currently deems it necessary to receive daily reports concerning the positions of large futures traders and the delivery notices issued or stopped by such traders. The Commission anticipates that market surveillance concerns similar to those which the Commission experiences with maturing futures contracts may occur as options on physicals near expiration. The Commission will, however, carefully consider exchange rules, submitted in conjunction with applications for contract market designation for options on physicals, which limit or modify the applicability of the reqirements of § 16.02 in appropriate cases. The Commission has, therefore, revised the reporting requirements contained in § 16.02 for those options on physicals which are not settled in cash to reflect that the Commission may, in its discretion, approve reporting rules for a particular contract market that differ from those specified in § 16.02.[33]

In addition to the measures discussed above, the Commission proposed other amendments to its reporting

---

[33] One commentator noted that the term "reportable" had been omitted from the specification, in § 16.02, of which option positions should be reported to the Commission by the exchanges. As adopted, this term has been incorporated by the Commission into that rule.

One commentator also objected to the proposed requirement that large option trader reports for options on physicals be provided six weeks in advance of an option's expiration date, a requirement that already applies to options on futures contracts. The Commission traditionally intensifies its surveillance of a futures contract approximately six weeks prior to the last day of trading in order to make a timely assessment of potential problems and to gather any additional information to supplement that which it routinely receives. The Commission presently has no reason to believe that the requirements for surveillance of options on physicals will differ markedly from the requirements for surveillance of maturing futures contracts. For this reason, the Commission has adopted, as proposed, a six-week reporting requirement for large option trader reports. The Commission will, however, review this requirement during the pilot program and, if the situation warrants, reconsider the need for the six-week reporting period.

requirements to conform further the regulations concerning futures and options reporting. These included amendments to § 16.00 to require exchanges to provide information concerning futures positions and transactions of clearing member firms separately for proprietary and customer accounts and to § 16.01 to require the contract markets to report futures transactions and open interest in machine-readable form.

One commentator objected to the requirement that the futures transactions and positions of clearing members be reported separately by proprietary and customer accounts. That commentator noted that this requirement has not previously applied to futures transactions and claimed that the Commission has not demonstrated "* * * that the availability of this data would have been beneficial in the past or could be expected to provide a useful surveillance tool in the future."

Information provided by the exchanges under Part 16 of the Commission's regulations is, however, the only report received by the Commission that indicates, by firm, the distribution of total open contracts and transactions in a given future of a commodity. Moreover, since the Commission has discontinued the routine filing of large trader reports under § 16.00, the Commission receives information concerning the volume of trading by firms only from the reports filed under § 16.00.[33] As such, the reports filed pursuant to that regulation are used routinely to investigate concentrations of positions and the origins of large trading volume. These investigations frequently involve maturing futures contracts and, in the event of sharp price changes, analyses of all futures. Because clearing member firms are generally active traders for their own accounts, the information required under § 16.00, when separated by proprietary and customer accounts, has often been sufficient to provide the Commission with the information it requires and has eliminated the need for further investigation. Where exchanges do not separately identify positions and transactions by proprietary and customer accounts, the Commission has been forced to expend considerable time and resources to obtain the necessary breakdown. Moreover, the Commission notes that the majority of the exchanges already collect from their clearing members and provide to the Commission the information that will now be required under § 16.00. In view of these considerations, the Commission is adopting §16.00 as proposed.

One commentator questioned the need for the amendments to §16.01 which require the exchanges to provide information relating to futures transactions and open interest in machine-readable form. This commentator argued that the Commission should indicate how it would use the new reports since the adoption of this proposal would result in increased expense to the contract markets. The Commission believes this change has been made necessary by the dramatic increase in recent years in the number of contract markets for which the Commission must conduct market surveillance. The corresponding increase in the volume of data that must be analyzed by the Commission has resulted in a corresponding increase in the Commission's reliance on computers and automated data processing to screen and organize that data.

Furthermore, market information which is disseminated to the public by a number of exchanges either is, or can be, produced from the exchanges' own computer systems. In such cases, the cost of providing the information to the Commission in the form specified in the rule is insignificant relative to the cost to the Commission of translating that information into machine-readable form. In this regard, the Commission notes that provisions in its existing rules allow it to consider each exchange on a case-by-case basis in applying similar requirements;[34] this same provision will apply to the amendments to § 16.01. In view of the above considerations, the Commission has determined to adopt § 16.01 as proposed.

No comments were received with respect to the remainder of the proposed amendments to §§ 15.00, 15.05, 16.01, 16.04, 18.00, 18.01, 18.04, 18.05, and 21.02. Most of these proposals were technical amendments intended to add conforming references to options on physicals, to simplify or clarify existing regulations, and to reduce the number of reporting forms that must be filed with the Commission. Accordingly, the Commission is adopting these amendments as proposed.

VI. Related Matters

When the Commission proposed regulations to permit and govern the trading of options on physicals on domestic exchanges, the Chairman certified, on behalf of the Commission and pursuant to the Regulatory Flexibility Act, that if the regulations were promulgated as proposed, there would not be a significant economic impact on a substantial number of small entities. In this connection, the Commission noted its previous determination that contract markets, registered futures commission merchants, registered commodity pool operators, and large traders are not "small entities" for purposes of that Act (47 FR 18618 (April 30, 1982)) and that the requirements of the Regulatory Flexibility Act therefore did not apply to those entities. The Commission further noted that those provisions of the proposed regulations which affected commodity trading advisors merely would amend §§4.30–4.32 to include, where appropriate, references to "commodity interests" [35] rather than references solely to futures trading, and hence were technical in nature. Thus, the Commission expressed its belief that, if adopted, §§ 4.30–4.32 would not have a significant economic impact on commodity trading advisors. As stated above, the Commission did not receive any comments responsive to the proposed amendments to §§ 4.30–4.32 and is adopting them as proposed. The Commission also did not receive any comments on its proposed Regulatory Flexibility Act certification.

For the reasons indicated above, and pursuant to Section 3(a) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Chairman, on behalf of the Commission, hereby certifies that these regulations will not have a significant economic impact on a substantial number of small entities.

In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act and, in particular, Sections 2(a)(1), 4c(a), 4c(b), 4c(c), 4c(d), 4d, 4f, 4g, 4k, 4m, 4n, 8a, 15 and 17 thereof, 7 U.S.C. 2 and 4, 6c(a), 6c(b), 6c(c), 6c(d), 6d, 6f, 6g, 6k, 6m, 6n, 12a, 19 and 21, and pursuant to the authority contained in 5 U.S.C. 552 and 552b, the Commission hereby amends Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. Section 1.3 is amended by revising paragraphs (aa), (hh) and (kk), and by adding a new paragraph (ll) to read as follows:

§ 1.3 Definitions.

* * * * *

(aa) *Associated person.* This term means any natural person who (as provided in Section 4k of the Act) is associated with a futures commission merchant or with an agent of a futures commission merchant as a partner, officer, or employee (or any person occupying a similar status or performing similar functions), in any capacity which involves (1) the solicitation or acceptance of customers' or option customers' orders (other than in a clerical capacity) or (2) the supervision of any person or persons so engaged.

* * * * *

(hh) *Commodity option transaction; commodity option.* These terms each mean any transaction or agreement in interstate commerce which is or is held out to be of the character of, or is commonly known to the trade as, an "option," "privilege," "indemnity," "bid," "offer," "call," "put." "advance guaranty," or "decline guaranty," and which is subject to regulation under the Act and these regulations.

* * * * *

(kk) *Strike price.* This term means the price, per unit, at which a person may purchase or sell the contract of sale of a commodity for future delivery or the physical which is the subject of a commodity option: *Provided*, That for purposes of § 1.17, the term "strike price" means the total price at which a person may purchase or sell the contract of sale of a commodity for future delivery or the physical which is the subject of a commodity option *(i.e.*, price per unit times the number of units).

(ll) *Physical.* This term means any good, article, service, right or interest upon which a coimmodity option may be traded in accordance with the Act and these regulations.

2. Section 1.17 is amended by revising paragraphs (c)(1)(iii), (c)(5)(ii)(A), (c)(5)(x), (c)(5)(x)(D) and (c)(5)(xi) to read as follows: §1.17 Minimum financial requirements—futures commission merchants.

* * * * *

(c) * * *

(1) * * *

(iii) The value attributed to any commodity option which is not traded on a contract market shall be the difference between the option's strike price and the market value for the physical or futures contract which is the subject of the option. In the case of a call commodity option which is not traded on a contract market, if the market value for the physical or futures contract which is the subject of the option is less than the strike price of the option, it shall be given no value. In the case of a put commodity option which is not traded on a contract market, if the market value for the physical or futures contract which is the subject of the option is more than the strike price of the option, it shall be given no value; and

* * * * *

(5) * * *

(ii) * * *

(A) Inventory which is currently registered as deliverable on a contract market and covered by an open futures contract or by a commodity option on a physical.—No charge.

* * * * *

(x) In the case of open futures contracts and granted (sold) commodity options held in proprietary accounts carried by the applicant or registrant which are not covered by a position held by the applicant or registrant or which are not the result of a "changer trade" made in accordance with the rules of a contract market:

* * * * *

(D) For open contracts or granted (sold) commodity options for which there are no applicable maintenance margin requirements, 200 percent of the applicable initial margin requirement: *Provided*, the equity in any such proprietary account shall reduce the deduction required by this paragraph (c)(5)(x) if the such equity is not otherwise includable in adjusted net capital;

(xi) In the case of an applicant or registrant which is a purchaser of a commodity option not traded on a contract market which has value and such value is used to increase adjusted net capital, ten percent of the market value of the physical or futures contract which is the subject of such option but in no event more than the value attributed to such option;

* * * * *

3. Section 1.19 is revised to read as follows:

§ 1.19 Prohibited trading in certain options.

No futures commission merchant may make, underwrite, issue, or otherwise assume any financial responsibility for the fulfillment of, any commodity option except for commodity options traded on or subject to the rules of a contract market in accordance with the requirements of Part 33 of this chapter.

4. Section 1.22 is revised to read as follows:

§ 1.22 Use of customer funds restricted.

No futures commission merchant shall use, or permit the use of, the customer funds of one commodity and/or option customer to purchase, margin, or settle the trades, contracts, or commodity options of, or to secure or extend the credit of, any person other than such customer or option customer. Customer funds shall not be used to carry trades or positions of the same commodity and/or option customer other than in commodities or commodity options

traded throught the facilities of a contract market.

5. Section 1.33 is amended by adding paragraph (a)(1)(iv), by revising paragraphs (a)(2)(i), (a)(2)(ii), (b)(2)(iv), (b)(2)(v), (b)(3), by removing and reserving paragraph (d)(2), and by revising paragraph (e) to read as follows:

§ 1.33 Monthly and confirmation statements.

(a) * * *

(1) * * *

(iv) A detailed accounting of all financial charges and credits to the commodity customer's account during the monthly reporting period, including all customer funds received from or disbursed to the commodity customer and realized profits and losses; and

(2) For each option customer—

(i) All commodity options purchased, sold, exercised, or expired during the monthly reporting period, identified by underlying futures contract or underlying physical, strike price, transaction date, and expiration date;

(ii) The open commodity option positions carried for the option customer as of the end of the monthly reporting period, identified by underlying futures contract or underlying physical, strike price, transaction date, and expiration date;

* * * * * * *

(b) * * *

(2) * * *

(iv) The underlying futures contract or underlying physical;

(v) The final exercise date of the commodity option purchased or sold; and

* * * * *

(3) To each option customer, upon the expiration or exercise of any commodity option, a written confirmation statement thereof, which statement shall include the date of such occurrence, a description of the option involved, and, in the case of exercise, the details of the futures or physical position which resulted therefrom including, if applicable, the final trading date of the contract for future delivery underlying the option.

* * * * *

(d) * * *

(2) [Reserved]

* * * * *

(e) *Recordkeeping.* Each futures commission merchant shall retain, in accordance with § 1.31, a copy of each monthly statement and confirmation required by this § 1.33.

6. Section 1.34 is amended by revising paragraph (b) to read as follows:

§ 1.34 Monthly record, "point balance."

* * * * *

(b) Each futures commission merchant shall prepare, and retain in accordance with the requirements of § 1.31, a listing in which all open commodity option positions carried for option customers are marked to the market. Such listing shall be prepared as of the last business day of each month, or as of any regular monthly date selected, and shall be by put or by call, by underlying contract for future delivery (by delivery month) or underlying physical (by option expiration date), and by strike price.

7. Section 1.35 is amended by revising paragraphs (b)(2)(ii), (b)(3)(ii), (d) and (e) to read as follows:

§ 1.35 Records of cash commodity, futures, and option transactions.

* * * * *

(b) * * *

(2) * * *

(ii) All commodity option transactions executed for such account, including the date, whether the transaction involved a put or call, expiration date, quantity, underlying contract for future delivery or underlying physical, strike price, and details of the purchase price of the option, including premium, mark-up, commission and fees; and

(3) * * *

(ii) All commodity option transactions executed on that day, including the date, whether the transaction involved a put or call, expiration date, quantity, underlying contract for future delivery or underlying physical, strike price, details of the purchase price of the option, incuding premium, mark-up, commission and fees, and the person for whom such transaction was made.

* * * * *

(d) *Members of contract markets.* Each member of a contract market who, in the place provided by the contract market for the meeting of persons similarly engaged, executes purchases or sales of any commodity for future delivery or commodity option on or subject to the rules of such contract market, shall prepare regularly and promptly a trading card or record showing such purchases and sales. Such trading card or record shall show his own name, the name of the clearing member, transaction date, time period (as described in paragraph (g) of this section), quantity, and, as applicable, underlying commodity, contract for future delivery or physical, price or premium, delivery month or expiration date, whether the transaction involved a put or a call, and strike price. Such trading card or record shall also clearly identify the opposite floor broker or floor trader with whom such transaction was executed, and the opposite clearing member (if, in accordance with the rules or practice of the contract market, such opposite clearing member is made known to him).

(e) *Contract markets.* Each contract market shall maintain or cause to be maintained by its clearing organization a single record which shall show for each futures or option trade: the transaction date, time period (as described in paragraph (g) of this section), quantity, and, as applicable, underlying commodity, contract for future delivery or physical, price or premium, delivery month or expiration date, whether the transaction involved a put or a call, strike price, floor broker of floor trader buying, clearing member buying, floor broker or floor trader selling, clearing member selling, and symbols indicating the buying and selling customer or option customer types. The customer and option customer type indicators shall show, with respect to each person executing the trade whether such person:

(1) Was trading for his own account;

(2) Was trading for his clearing member's house account;

(3) Was trading for another member present on the exchange floor, or an account controlled by such other member; or

(4) Was trading for any other type of customer or option customer.

The record required by this paragraph (e) shall also show, by appropriate and uniform symbols, any transaction which is made non-competitively in accordance with written rules of the contract market which have been submitted to and approved by the Commission in accordance with § 1.38, and trades cleared on dates other than the date of execution. Except as otherwise approved by the Commission for good cause shown, the record required by this paragraph (e) shall be maintained in a format and coding structure approved by the Commission (i) in hard copy or on microfilm as specified in § 1.31 and (ii) for 60 days in computer-readable form on compatible magnetic tapes or discs.

* * * * *

8. Section 1.39 is amended by revising paragraph (a) to read as follows:

§ 1.39 Simultaneous buying and selling orders of different principals; execution of, for and between principals.

(a) *Conditions and requirements.* A member of a contract market who shall have in hand at the same time both buying and selling orders of different principals for the same commodity for future delivery in the same delivery

month or the same option (both puts or both calls, with the same underlying contract for future delivery or the same underlying physical, expiration date and strike price) may execute such orders for and directly between such principals at the market price, if in conformity with written rules of such contract market which have been approved by the Commission, and:

(1)(i) When trading is conducted in a trading pit or ring, such orders are first offered openly and competitively by open outcry in such trading pit or ring (A) by both bidding and offering at the same price, and neither such bid nor offer is accepted, or (B) by bidding and offering to a point where such offer is higher than such bid by not more than the minimum permissible price fluctuation applicable to such futures contract or commodity option on such contract market, and neither such bid nor offer is accepted; or

(ii) When in nonpit trading in contracts of sale for future delivery, bids and offers are posted on a board, such member (A) pursuant to such buying order posts a bid on the board and, incident to the execution of such selling order, accepts such bid and all other bids posted at prices equal to or higher than the bid posted by him, or (B) pursuant to such selling order posts an offer on the board and, incident to the execution of such buying order, accepts such offer and all other offers posted at prices equal to or lower than the offer posted by him;

(2) Such member executes such orders in the presence of an official representative of such contract market designated to observe such transactions and, by appropriate descriptive words or symbol, clearly identifies all such transactions on his trading card or other similar record, made at the time of execution, and notes thereon the exact time of execution and promptly presents said record to such official representative for verification and initialing;

(3) Such contract market keeps a record in permanent form of each such transaction showing the transaction date, by whom executed, the exact time of execution, quantity, and, as applicable, underlying commodity, contract for future delivery or physical, price or premium, whether a put or a call, and strike price; and

(4) Neither the futures commission merchant receiving nor the member executing such orders has any interest therein, directly or indirectly, except as a fiduciary.

* * * * *

9. Section 1.41 is amended by revising paragraph (a)(2) to read as follows:

§ 1.41 Contract market rules; submission of rules to Commission; exemption of temporary emergency rules and certain operational and administrative rules; emergencies.

(a) * * *

(2) The term "reviewable rule" of a contract market means any rule of a contract market which relates to terms and conditions of contracts of sale of a commodity for future delivery or of commodity option transactions to be executed on or subject to the rules of such contract market or relates to other trading requirements except those relating to the setting of levels of margin: *Provided,* That any rule of a contract market relating to the payment or collection of commodity option margin or premiums shall be a reviewable rule.

* * * * *

10. Section 1.42 is amended by revising paragraph (a) and by adding a new paragraph (c) to read as follows:

§ 1.42 Delivery notice; filing of copy.

(a) Each contract market shall furnish or cause to be furnished promptly to the Commission a copy of each notice of delivery issued by any member thereof covering the delivery of any commodity on a futures contract or on a commodity option made on or subject to the rules of such contract market, and shall also furnish or cause to be furnished promptly to the Commission a record of all endorsements of the original notice of delivery shown in the order in which such endorsements were made.

* * * * *

(c) For the purposes of this section, the term "delivery" includes the exercise of a commodity option on a physical but does not include any futures contract or option on a physical which is settled in cash rather than by delivery of the underlying commodity or underlying physicals.

11. Section 1.43 is revised to read as follows:

§ 1.43 Information required concerning warehouses, depositories, and other similar entities.

Each contract market shall file with the Commission a list of all warehouses, depositories and other similar entities in which or out of which commodities are deliverable in satisfaction of futures contracts or options on physicals made on or subject to the rules of such contract market, which list shall show the name, location, and storage capacity of each such warehouse, depository or other similar entity, together with the name and business address of the operator thereof. The Commission shall be kept currently advised of all changes affecting such information. Each contract market shall require the operator of such warehouse, depository or other similar entity to furnish, upon call by the Commission, a schedule of storage charges, handling charges, and the annual fire insurance rate applicable to such warehouse, depository or other similar entity.

12. Section 1.44 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1.44 Records and reports of warehouses, depositories, and other similar entities; visitation of premises.

Each contract market shall require the operators of warehouses, depositories and other similar entities whose receipts are deliverable in satisfaction of commodity futures contracts or options on physicals made on or subject to the rules of such contract market:

(a) To keep records showing the stocks of each commodity traded for future delivery or upon which option contracts are traded on such contract market in store in such warehouses, depositories and other similar entities by kinds, by classes, and by grades, if stored under conditions requiring such designation or identification, and including also lots and parcels stored specially or separately or in specially leased space of the warehouse, depository or other similar entity;

(b) Upon call from the Commission, to report the stocks of commodities in such warehouses, depositories and other similar entities and to furnish information concerning stocks of each commodity traded for future delivery or upon which option contracts are traded on such contract market about to be transferred or in the process of being transferred or otherwise moved into or out of such warehouses, depositories and other similar entities, as well as any other information concerning commodities stored in such warehouse, depositories and other similar entities and which are or may be available for delivery on futures contracts or options on physicals; and

* * * * *

13. Section 1.46 is amended by revising paragraphs (a)(3), (a)(4), the closing text of paragraph (a), and paragraph (d)(1), to read as follows:

§ 1.46 Application and closing out of offsetting long and short positions.

(a) * * *

(3) Purchases a put or call option for the account of any option customer

when the account of such option customer at the time of such purchase has a short put or call option position with the same underlying futures contract or same underlying physical, strike price, expiration date and contract market as that purchased; or

(4) Sells a put or call option for the account of any option customer when the account of such option customer at the time of such sale has a long put or call option position with the same underlying futures contract or same underlying physical, strike price, expiration date and contract market as that sold

shall on the same day apply such purchase or sale against such previously held short or long futures or option position, as the case may be, and shall, for futures transactions, promptly furnish such customer a statement showing the financial result of the transactions involved.

* * * * *

(d) * * *

(1) Purchases or sales of commodity options held by commercial interests in the underlying commodity, where such purchases or sales are determined by the contract market to be economically appropriate to the reduction of risks in the conduct and management of a commercial enterprise pursuant to rules of the contract market which have been adopted in accordance with the requirements of § 1.61(b) and approved by the Commission pursuant to Section 5a(12) of the Act; *Provided,* that no contract market or futures commission merchant shall permit such option positions to be offset other than by open and competitive execution in the trading pit or ring provided by the contract market, during the regular hours prescribed by the contract market for trading in such commodity option.

* * * * *

PART 3—REGISTRATION

14. The authority citation for Part 3 is revised to read as follows:

Authority: 7 U.S.C. 2, 4, 4a, 6c, 6d, 6e, 6f, 6k, 6m, 6n, 6p and 12a.

15. Section 3.20 is amended by revising paragraphs (a)(1)(ii) and (a)(1)(iii) to read as follows:

§ 3.20 Delegation of authority to deny registration.

(a) * * *

(1) * * *

(ii) Within ten years preceding the filing of the application has been convicted of a misdemeanor which (A) involves any transaction or advice concerning any commodity, contract for future delivery of a commodity, commodity option, or security; (B) arises out of the conduct of the business of a futures commission merchant, associated person, floor broker, commodity trading advisor, commodity pool operator, securities broker, securities dealer, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or employee or affiliated person of any of the foregoing; or (C) involves embezzlement, defalcation, fraudulent conversion, misappropriation of funds, securities or other property, forgery, counterfeiting, false pretenses, gambling, or similar crimes reflecting upon the ability of the applicant, if registered, faithfully to discharge the fiduciary duties imposed by the Act; or

(iii) At the time of the application, is permanently or temporarily enjoined by order, judgment or decree of any court of competent jurisdiction, or is prohibited by agreement or settlement with the Commission or the Securities and Exchange Commission, or any State agency or governmental body, (A) from acting as a commodity trading advisor, commodity pool operator, futures commission merchant, floor broker, securities broker or dealer, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or as an associated or affiliated person or employee of any of the foregoing, or (B) from engaging in or continuing any conduct or practice in connection with any such activity or involving any transaction or advice concerning commodities, contracts for future delivery of commodities, commodity options, or securities; or

* * * * *

16. Section 3.33 is amended by revising paragraphs (b)(7)(i), (b)(7)(ii), (b)(7)(iii), and (b)(7)(v) to read as follows:

§ 3.33 Withdrawal from registration.

* * * * *

(b) * * *

(7) * * *

(i) That all customer or option customer agreements, if any, have been terminated;

(ii) That all customer or option customer positions, if any, have been transferred on behalf of customers or option customers or closed;

(iii) That all customer or option customer cash balances, securities, or other property, if any, have been transferred on behalf of customers or option customers or returned, and that there are no obligations to customers or option customers outstanding;

* * * * *

(v) The nature and extent of any pending customer, option customer or commodity pool participant claims against the registrant, and, to the best of the registrant's knowledge and belief, the nature and extent of any anticipated or threatened customer, option customer or commodity pool participant claims against the registrant.

* * * * *

17. Appendix A is amended by revising paragraphs (1), (3) and (4) to read as follows:

* * * * *

(1) The operations of such person disrupt or would tend to disrupt orderly market conditions, or cause or would tend to cause sudden or unreasonable fluctuations or unwarranted changes in the price of commodities or contracts for future delivery of commodities or commodity options.

* * * * *

(3) Such person has, within ten years preceding the filing of the application for registration, been convicted of a misdemeanor which (a) involves any transactions or advice concerning any commodity, contract for future delivery of a commodity, commodity option or security; or (b) arises out of conduct of the business of a futures commission merchant, associated person, floor broker, commodity trading advisor, commodity pool operator, securities broker, securities dealer, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or an affiliated person or employee of any of the foregoing; or (c) involves embezzlement, defalcation, fraudulent conversion, misappropriation of funds, securities or other property, forgery, counterfeiting, false pretenses, gambling, or similar crimes indicating a lack of high ethical standards or unreliability in maintaining a fiduciary relationship.

(4) Such person is permanently or temporarily enjoined by order, judgment or decree of any court of competent jurisdiction, or by agreement of settlement to which the Commission, the Securities and Exchange Commission, or any State agency or governmental body is a party, from (a) acting as a futures commission merchant, associated person, floor broker, commodity trading advisor, commodity pool operator, securities broker, securities dealer, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company or employee or affiliated person of any of the foregoing or (b) engaging in or continuing any conduct or practice in connection with any such activity or involving any transaction or advice concerning commodities, contracts for future delivery of commodities, commodity options, or securities.

* * * * *

PART 4—COMMODITY POOL OPERATORS AND COMMODITY TRADING ADVISORS

18. Section 4.13 is amended by revising paragraph (b)(2)(i)(B) to read as follows:

§ 4.13 Exemption from registration as a commodity pool operator.

* * * * *

(b) * * *

(2) * * *

(i) * * *

(B) Clearly show on such statement, or on an accompanying supplemental statement, the net profit or loss on all commodity interests closed since the date of the previous statement; and

* * * * *

19. Section 4.21 is amended by revising paragraphs (a)(1)(vi) and (a)(1)(vii), by adding a new paragraph (a)(1)(viii), and by revising paragraphs (a)(9)(ii), (a)(9)(iii) and (a)(17)(i) to read as follows:

§ 4.21 Disclosure to prospective pool participants.

(a) * * *

(1) * * *

(vi) The name of the person who will make the trading decisions for the pool;

(vii) If known, the name of the futures commission merchant through which the pool will execute its trades; and

(viii) The types of commodity interests the commodity pool operator intends that the pool will trade, with a description of any restrictions or limitations on such trading established by the commodity pool operator.

* * * * *

(9) * * *

(ii) The form in which pool funds not deposited as margin or paid as premiums will be held after the commencement of trading by the pool. If those funds will be held in assets other than cash, the pool operator must disclose:

* * * * *

(iii) If pool funds not deposited as margin or paid as premiums will be held outside of the United States, its territories or possessions, the pool operator must specify where those funds will be held.

* * * * *

(17)(i) The following Risk Disclosure Statement, to be prominently disclosed as, and the only language on, the first page of the Disclosure Document:

RISK DISCLOSURE STATEMENT

YOU SHOULD CAREFULLY CONSIDER WHETHER YOUR FINANCIAL CONDITION PERMITS YOU TO PARTICIPATE IN A COMMODITY POOL. YOU MAY LOSE A SUBSTANTIAL PORTION OR EVEN ALL OF THE MONEY YOU PLACE IN THE POOL.

IN CONSIDERING WHETHER TO PARTICIPATE IN A COMMODITY POOL, YOU SHOULD BE AWARE THAT TRADING COMMODITIES CAN QUICKLY LEAD TO LARGE LOSSES AS WELL AS GAINS. SUCH TRADING LOSSES CAN SHARPLY REDUCE THE NET ASSET VALUE OF THE POOL AND CONSEQUENTLY THE VALUE OF YOUR INTEREST IN THE POOL. ALSO, MARKET CONDITIONS MAY MAKE IT DIFFICULT OR IMPOSSIBLE FOR THE POOL TO LIQUIDATE A POSITION.

IN SOME CASES, COMMODITY POOLS ARE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT, ADVISORY AND BROKERAGE FEES. IT MAY BE NECESSARY FOR THOSE POOLS THAT ARE SUBJECT TO THESE CHARGES TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETION OR EXHAUSTION OF THEIR ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS A COMPLETE DESCRIPTION OF EACH EXPENSE TO BE CHARGED THIS POOL.

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND OTHER SIGNIFICANT ASPECTS OF PARTICIPATING IN A COMMODITY POOL. YOU SHOULD THEREFORE CAREFULLY STUDY THIS DISCLOSURE DOCUMENT AND COMMODITY TRADING BEFORE YOU DECIDE TO PARTICIPATE IN A COMMODITY POOL.

* * * * *

20. Section 4.22 is amended by revising paragraph (a)(1)(iii) to read as follows:

§ 4.22 Reporting to pool participants.

(a) * * *

(1) * * *

(iii) The total amount of net gain or loss from all other transactions in which the pool engaged during the reporting period, including interest and dividends earned on funds not paid as premiums or used to margin the pool's commodity interest positions;

* * * * *

21. Section 4.23 is amended by revising paragraphs (a)(1), (a)(7), (b)(1) and (b)(2) to read as follows:

§ 4.23 Recordkeeping.

* * * * *

(a) * * *

(1) An itemized daily record of each commodity interest transaction of the pool, showing the transaction date, quantity, commodity interest, and, as applicable, price or premium, delivery month or expiration date, whether a put or a call, strike price, underlying contract for future delivery or underlying physical, the futures commission merchant carrying the account, whether the interest was purchased, sold, exercised, or expired, and the gain or loss realized.

* * * * *

(7) Copies of each confirmation of a commodity interest transaction of the pool, each purchase and sale statement and each monthly statement for the pool received from a futures commission merchant.

* * * * *

(b) * * *

(1) An itemized daily record of each commodity interest transaction of the commodity pool operator and each principal thereof, showing the transaction date, quantity, commodity interest, and, as applicable, price or premium, delivery month or expiration date, whether a put or a call, strike price, underlying contract for future delivery or underlying physical, the futures commission merchant carrying the account, whether the interest was purchased, sold, exercised, or expired, and the gain or loss realized.

(2) Each confirmation of a commodity interest transaction, each purchase and sale statement and each monthly statement furnished by a futures commission merchant to (i) the commodity pool operator relating to a personal account of the pool operator, and (ii) each principal of the pool operator relating to a personal account of such principal.

* * * * *

22. Section 4.30 is revised to read as follows:

§ 4.30 Prohibited activities.

No commodity trading advisor may solicit, accept or receive from an existing or prospective client funds, securities or other property in the trading advisor's name (or extend credit in lieu thereof) to purchase, margin, guarantee or secure any commodity interest of the client; *Provided, however,* That this section shall not apply to a futures commission merchant that is registered as such under the Act or to a leverage transaction merchant that is registered as a commodity trading advisor under the Act.

23. Section 4.31 is amended by revising paragraphs (a)(1)(iii) and (a)(1)(iv)(B), by adding a new paragraph (a)(1)(v), and by revising paragraph (a)(8)(i) to read as follows:

§ 4.31 Disclosure to prospective clients.

(a) * * *

(1) * * *

(iii) A description of the trading program;

(iv) * * *

(B) If the client is free to choose the futures commission merchant with which it will maintain its account, the trading advisor must make a statement to that effect; and

(v) The types of commodity interests the commodity trading advisor intends to trade, with a description of any restrictions or limitations on such trading established by the commodity trading advisor.

* * * * *

(8)(i) The following Risk Disclosure Statement to be prominently disclosed as, and the only language on, the first page of the Disclosure Document:

RISK DISCLOSURE STATEMENT

THE RISK OF LOSS IN TRADING COMMODITIES CAN BE SUBSTANTIAL. YOU SHOULD THEREFORE CAREFULLY CONSIDER WHETHER SUCH TRADING IS SUITABLE FOR YOU IN LIGHT OF YOUR FINANCIAL CONDITION. IN CONSIDERING WHETHER TO TRADE OR TO AUTHORIZE SOMEONE ELSE TO TRADE FOR YOU, YOU SHOULD BE AWARE OF THE FOLLOWING:

(1) IF YOU PURCHASE A COMMODITY OPTION YOU MAY SUSTAIN A TOTAL LOSS OF THE PREMIMUM AND OF ALL TRANSACTION COSTS.

(2) IF YOU PURCHASE OR SELL A COMMODITY FUTURE OR SELL A COMMODITY OPTION YOU MAY SUSTAIN A TOTAL LOSS OF THE INITIAL MARGIN FUNDS AND ANY ADDITIONAL FUNDS THAT YOU DEPOSIT WITH YOUR BROKER TO ESTABLISH OR MAINTAIN YOUR POSITION. IF THE MARKET MOVES AGAINST YOUR POSITION, YOU MAY BE CALLED UPON BY YOUR BROKER TO DEPOSIT A SUBSTANTIAL AMOUNT OF ADDITIONAL MARGIN FUNDS, ON SHORT NOTICE, IN ORDER TO MAINTAIN YOUR POSITION. IF YOU DO NOT PROVIDE THE REQUIRED FUNDS WITHIN THE PRESCRIBED TIME, YOUR POSITION MAY BE LIQUIDATED AT A LOSS, AND YOU WILL BE LIABLE FOR ANY RESULTING DEFICIT IN YOUR ACCOUNT.

(3) UNDER CERTAIN MARKET CONDITIONS, YOU MAY FIND IT DIFFICULT OR IMPOSSIBLE TO LIQUIDATE A POSITION. THIS CAN OCCUR, FOR EXAMPLE, WHEN THE MARKET MAKES A "LIMIT MOVE."

(4) THE PLACEMENT OF CONTINGENT ORDERS BY YOU OR YOUR TRADING ADVISOR, SUCH AS A "STOP-LOSS" OR "STOP-LIMIT" ORDER, WILL NOT NECESSARILY LIMIT YOUR LOSSES TO THE INTENDED AMOUNTS, SINCE MARKET CONDITIONS MAY MAKE IT IMPOSSIBLE TO EXECUTE SUCH ORDERS.

(5) A "SPREAD" POSITION MAY NOT BE LESS RISKY THAN A SIMPLE "LONG" OR "SHORT" POSITION.

(6) THE HIGH DEGREE OF LEVERAGE THAT IS OFTEN OBTAINABLE IN COMMODITY TRADING CAN WORK AGAINST YOU AS WELL AS FOR YOU. THE USE OF LEVERAGE CAN LEAD TO LARGE LOSSES AS WELL AS GAINS.

IN SOME CASES, MANAGED COMMODITY ACCOUNTS ARE SUBJECT TO SUBSTANTIAL CHARGES FOR MANAGEMENT AND ADVISORY FEES. IT MAY BE NECESSARY FOR THOSE ACCOUNTS THAT ARE SUBJECT TO THESE CHARGES TO MAKE SUBSTANTIAL TRADING PROFITS TO AVOID DEPLETION OR EXHAUSTION OF THEIR ASSETS. THIS DISCLOSURE DOCUMENT CONTAINS A COMPLETE DESCRIPTION OF EACH FEE TO BE CHARGED TO YOUR ACCOUNT BY THE COMMODITY TRADING ADVISOR.

THIS BRIEF STATEMENT CANNOT DISCLOSE ALL THE RISKS AND OTHER SIGNIFICANT ASPECTS OF THE COMMODITY MARKETS. YOU SHOULD THEREFORE CAREFULLY STUDY THIS DISCLOSURE DOCUMENT AND COMMODITY TRADING BEFORE YOU TRADE.

* * * * *

24. Section 4.32 is amended by revising paragraphs (a)(6), (b)(1) and (b)(2) to read as follows:

§ 4.32 Recordkeeping.

(a) * * *

(6) Copies of each confirmation of a commodity interest transaction, each purchase and sale statement and each monthly statement received from a futures commission merchant.

* * * * *

(b) * * *

(1) An itemized daily record of each commodity interest transaction of the commodity trading advisor and each principal thereof, showing the transaction date, quantity, commodity interest, and, as applicable, price or premium, delivery month or expiration date, whether a put or a call, strike price, underlying contract for future delivery or underlying physical, the futures commission merchant carrying the account, whether the interest was purchased, sold, exercised, or expired, and the gain or loss realized.

(2) Each confirmation of a commodity interest transaction, each purchase and sale statement and each monthly statement furnished by a futures commission merchant to (i) the commodity trading advisor relating to a personal account of the trading advisor, and (ii) each principal of the trading advisor relating to a personal account of such principal.

* * * * *

PART 15—REPORTS—GENERAL PROVISIONS

25. Section 15.00 is amended by revising paragraph (b)(2) and redesignating paragraph (b)(2) as paragraph (b)(2)(i), by adding paragraph (b)(2)(ii), and by revising paragraphs (g) and (h) to read as follows:

§ 15.00 Definition of terms used in Parts 15 to 21 of this chapter.

* * * * *

(b) * * *

(2) For purposes of reports regarding commodity options—

(i) For reports specified in Part 16 and in § 17.01 of this chapter, any open contract position on any one contract market in the put option or separately in the call option of a specified option expiration date, which is carried on the books of any one futures commission merchant or foreign broker or which is held by a member of a contract market, and which, at the close of the market on any business day, equals or exceeds 25 options on futures contracts or 25 options on physicals, except as otherwise approved by the Commission.

(ii) For reports specified in §§ 18.00 and 18.04 of this chapter, and for recordkeeping requirements specified in § 18.05 of this chapter, 25 or more open options on futures contracts or 25 or more open options on physicals on any one contract market in a put option or separately in a call option of a specified option expiration date.

* * * * *

(g) *"Guided account program"* means any customer trading program which limits trading to the purchase or sale of a particular contract for future delivery of a commodity or a particular commodity option that is advised or recommended to the participant in the program.

(h) *"Discretionary account"* means a commodity futures or commodity option trading account for which buying and/or selling orders can be placed or

originated, or for which transactions can be effected, under a general authorization and without the specific consent of the customer, whether the general authorization for such orders or transactions is pursuant to a written agreement, power of attorney, or otherwise.

* * * * *

26. Section 15.01 is amended by revising paragraph (c) to read as follows:

§ 15.01 Persons required to report.

* * * * *

(c) Traders who hold or control reportable positions as specified in Part 18 of this chapter.

* * * * *

27. Section 15.02 is revised to read as follows:

§ 15.02 Reporting forms.

Forms on which to report may be obtained from any office of the Commission. Forms to be used for the filing of reports are listed below, and persons required to file these forms may be determined by referring to the rule listed in the column opposite the form number.

Form No.	Title	Rule
40	Statement of Reporting Trader	18.04
102	Identification of Special Accounts	17.01
103	Large Trader Report	18.00
Series 04	Cash Positions of Traders in Specified Commodities.	19.00
	204—Grains (including Oilseeds)	
	304—Cotton	
	504—Eggs	
	604—Potatoes	
Series 01	Positions of Special Accounts on or Subject to the Rules of Specified Markets.	17.00
	01-60—Board of Trade of the City of Chicago.	
	01-61—Board of Trade of the City of Kansas City, Missouri, Inc.	
	01-62—Minneapolis Grain Exchange	
	01-63—MidAmerica Commodity Exchange.	
	01-64—Chicago Mercantile Exchange	
	01-65—New York Mercantile Exchange.	
	01-66—New York Cotton Exchange and Associates.	
	01-69—Commodity Exchange, Inc.	
	01-73—Coffee, Sugar and Cocoa Exchange.	
	01-74—International Monetary Market	
	01-77—New York Futures Exchange	
	01-78—New Orleans Commodity Exchange.	

28. Section 15.05 is revised to read as follows:

§ 15.05 Designation of a futures commission merchant to be the agent of foreign brokers, customers of a foreign broker, and foreign traders.

(a) For purposes of this section, the term "futures contract" means any contract for the purchase or sale of any commodity for future delivery traded or executed on or subject to the rules of any contract market; the term "option contract" means any contract for the purchase or sale of a commodity option traded or executed on or subject to the rules of any contract market; the term "customer" means any person for whose benefit a foreign broker makes or causes to be made any futures contract or option contract; and the term "communication" means any summons, complaint, order, subpoena, special call, request for information, or notice, as well as any other written document or correspondence.

(b) Any futures commission merchant who makes or causes to be made any futures contract or option contract for the account of any foreign broker or foreign trader shall thereupon be deemed to be the agent of the foreign broker or the foreign trader for purposes of accepting delivery and service of any communication issued by or on behalf of the Commission to the foreign broker or the foreign trader with respect to any futures or option contracts which are or have been maintained in such accounts carried by the futures commission merchant. In the case of a futures commission merchant who makes or causes to be made any futures or option contract for the account of a foreign broker, the futures commission merchant shall also be the agent of the customers of the foreign broker (including any customer who is also a foreign broker and its customers) who have positions in the foreign broker's futures or option contract account carried by the futures commission merchant for purposes of accepting delivery and service of any communication issued by or on behalf of the Commission to the customer with respect to any futures or option contracts which are or have been maintained in such accounts carried by the futures commission merchant. Service or delivery of any communication issued by or on behalf of the Commission to a futures commission merchant pursuant to such agency shall constitute valid and effective service or delivery upon the foreign broker, a customer of the foreign broker or the foreign trader. A futures commission merchant who has been served with, or to whom there has been delivered, a communication issued by or on behalf of the Commission to a foreign broker, a customer of the foreign broker or the foreign trader shall transmit the communication promptly and in a manner which is reasonable under the circumstances, or in a manner specified by the Commission in the communication, to the foreign broker, a customer of the foreign broker or the foreign trader.

(c) It shall be unlawful for any futures commission merchant to open a futures or options contract account for, or to effect transactions in futures contracts or option contracts for an existing account of, a foreign broker or foreign trader unless the futures commission merchant informs the foreign broker or foreign trader prior thereto, in any reasonable manner which the futures commission merchant deems to be appropriate, of the requirements of this section.

(d) The requirements of paragraphs (b) and (c) of this section shall not apply to any account carried by a futures commission merchant if the foreign broker, customer of a foreign broker, or foreign trader for whose benefit such account is carried has duly executed and maintains in effect a written agency agreement in compliance with this paragraph with a person domiciled in the United States and has provided a copy of the agreement to the futures commission merchant prior to the opening of an account, or placing orders for transactions in futures contracts or option contracts of an existing account, with the futures commission merchant. This agreement must authorize the person domiciled in the United States to serve as the agent of the foreign broker and customers of the foreign broker or the foreign trader for purposes of accepting delivery and service of all communications issued by or on behalf of the Commission to the foreign broker, customers of the foreign broker, or foreign trader and must provide an address in the United States where the agent will accept delivery and service of communications from the Commission. This agreement must be filed with the Commission by the futures commission merchant prior to opening an account for the foreign broker or foreign trader or effecting transactions in futures or option contracts for an existing account of a foreign broker or foreign trader. Unless otherwise specified by the Commission, the agreements required to be filed with the Commission shall be filed with the Secretary of the Commission at 2033 K Street, N.W., Washington, D.C. 20581. A foreign broker, customer of a foreign broker, or foreign trader shall notify the Commission immediately if the written agency agreement is terminated, revoked or is otherwise no longer in effect. If a futures commission merchant carrying an account for a foreign broker or foreign trader knows or should know that the agreement has expired, has been terminated or is otherwise no longer in effect, the futures commission merchant shall notify the Secretary of

the Commission immediately. If the written agency agreement expires, terminates or is not in effect, the futures commission merchant and the foreign broker, customers of the foreign broker or foreign trader are subject to the provisions of paragraphs (b) and (c) of this section.

PART 16—REPORTS BY CONTRACT MARKETS

29. Section 16.00 is amended by revising paragraph (a) to read as follows:

§ 16.00 Clearing member reports.

(a) *Information to be provided.* Each contract market shall submit to the Commission, in accordance with paragraph (b) of this section, a report for each business day, showing for each clearing member, by proprietary and customer account, the following information separately for futures by commodity and by future, and, for options, by underlying futures contract for options on futures contracts or by underlying physical for options on physicals, and by put, by call, by expiration date and by strike price:

* * * * *

30. Section 16.01 is amended by revising the introductory text of paragraphs (a) and (b) and by revising paragraphs (c) and (d) to read as follows:

§ 16.01 Trading volume, open contracts and price.

(a) *Trading volume and open contracts.* Each contract market shall publish for each business day the following information separately for futures by commodity and by future, and, for options, by underlying futures contract for options on futures contracts or by underlying physical for options on physicals, and by put, by call, by expiration date and by strike price:

* * * * *

(b) *Prices.* Each contract market shall make readily available to the news media and the general public no later than the business day following the day to which the information pertains, the following information separately for futures, by commodity and by future, and, for options, by underlying futures contract for options on futures contracts or by underlying physical for options on physicals, and by put, by call, by expiration date and by strike price:

* * * * *

(c) *Additional information.* Each contract market shall make readily available to the public, in printed form at the office of the contract market, the following information with respect to transactions in commodity futures and commodity options on that contract market: (1) The method used by the contract market in determining nominal prices and settlement prices; and (2) if discretion is used by the contract market in determining the opening and closing ranges or the settlement prices, an explanation that certain discretion may be employed by the contract market and a description of the manner in which that discretion may be employed.

(d) *Reports to the Commission.* Unless otherwise approved by the Commission or its designee, the information specified in paragraphs (a) and (b) of this section shall be submitted to the Commission on compatible data processing punched cards, magnetic tapes or magnetic discs using a format and coding structure approved in writing by the Commission or its designee. Unless otherwise instructed by the Commission or its designee, such information shall be submitted the business day following the day to which the information pertains at the Regional Office of the Commission having local jurisdiction with respect to such contract market.

31. Section 16.02 is amended by revising paragraphs (a)(1) and (b) to read as follows:

§ 16.02 Large option trader reports.

(a) *Information required.* When an option becomes the option which will expire next, and, in any case, at least six weeks prior to an option's expiration date, each contract market shall submit to the Commission a weekly report for options on futures and options on physicals that are settled in cash and, unless otherwise determined by the Commission, a daily report for all other options on physicals, containing the following information for each option trader controlling a reportable option position in the option which will expire next or controlling a reportable option position in an option which will expire in six weeks or less:

(1)(i) For options on futures contracts and options on physicals that are settled in cash, with respect to each put and call and each long and short controlled by the option trader, the following information shown separately by futures commission merchant or member of the contract market and combined for all futures commission merchants and members:

(A) All reportable positions in the option which is next to expire, by strike price;

(B) All reportable positions in any other options which expire within six weeks, by strike price;

(C) All reportable positions in the next-deferred option expiration date, regardless of strike prices;

(D) All reportable positions in all other more distant option expiration dates, regardless of strike prices; and

(E) The total reportable position controlled by the option trader in all option expiration dates, regardless of strike prices.

(ii) Unless otherwise determined by the Commission, for all other options on physicals, with respect to each put and call and each long and short controlled by the option trader, the following information shown separately by futures commission merchant or member of the contract market and combined for all futures commission merchants and members:

(A) All reportable positions in the option which is next to expire, by strike price, and the number of contracts exercised;

(B) All reportable positions in any other options which expire within six weeks, by strike price, and the number of contracts exercised;

(C) All reportable positions in the next-deferred option expiration date, regardless of strike prices, and the number of contracts exercised;

(D) All reportable positions in all other more distant option expiration dates, regardless of strike prices, and the number of contracts exercised; and

(E) The total reportable position controlled by the option trader in all option expiration dates, regardless of strike prices, and the total number of contracts exercised.

(iii) Each contract market shall identify all option positions controlled by the same trader which are carried at the same futures commission merchant or held by a member of the contract market by use of the number which is assigned by the futures commission merchant or member in accordance with § 17.01(a) of this chapter.

* * * * *

(b) *Form and manner of reporting.* The information required by paragraph (a) of this section shall be submitted in hard copy form and on compatible data processing punched cards, magnetic tapes or magnetic discs, using a format and coding structure approved in writing by the Commission or its designee. For options on futures and for options on physicals that are settled in cash, such information shall be compiled weekly as of the close of business on Tuesday, or Monday if Tuesday is a holiday, or more frequently than weekly as the Commission may direct. Unless otherwise instructed by the Commission or its designee, the information shall be

submitted by the business day following that to which the information pertains at the Regional Office of the Commission having local jurisdiction with respect to such contract market.

32. Section 16.04 is amended by revising paragraph (a) to read as follows:

§ 16.04 Month-end reports.

(a) *Information to be provided.* Each contract market shall submit to the Commission, for each month, a report for options on futures contracts and separately a report for options on physicals showing long and short open option positions held at month-end in all accounts, reported separately by underlying futures contract or physical, for commercial and noncommercial option traders, by put, by call, by expiration date, by strike price and by clearing member.

* * * * *

PART 18—REPORTS BY TRADERS

33. Section 18.00 is amended by revising the introductory paragraph, paragraphs (a), (b), (c) and(d) and by removing paragraphs (e), (f), (g) and (h) to read as follows:

§ 18.00 Information to be furnished by traders.

Every trader who owns, holds or controls, or has held, owned or controlled, a reportable futures or options position in a commodity shall within one business day after a special call upon such trader by the Commission or its designee file reports to the Commission concerning transactions and positions in such futures or options. Reports shall be filed for the period of time that the trader held or controlled a reportable position as instructed in the call. Each such report shall be prepared on the Commission's Large Trader Reporting Form (Form 103) on a separate sheet for each commodity or option, and shall show for the day covered by the report the following information, as specified in the call, separately for each future or option and for each contract market:

(a) Open contracts;

(b) Purchases and sales;

(c) Delivery notices issued and stopped; and

(d) Options exercised.

§ 18.01 [Amended]

34. Section 18.01 is amended by removing paragraph (d).

35. Section 18.04 is amended by revising the introductory paragraph and paragraphs (a)(2), (a)(5), (a)(9), (b)(3), (b)(4), (c)(3), (c)(4), (c)(5), (c)(6), and (d) to read as follows:

18.04 Statement of reporting trader.

Every trader who holds or controls a reportable futures position shall file with the Commission a "Statement of Reporting Trader" on Form 40. Each trader shall file an initial Form 40 at such time as the Commission directs, but not later than the tenth business day following the date the trader assumes the reportable position. Subsequent filings shall be made at the time specified in paragraph (e) of this section. In addition, every trader who holds or controls a reportable option position, as set forth in § 15.00(b)(2)(ii) of this chapter, shall within one business day after a special call upon such trader by the Commission or its designee file a "Statement of Reporting Trader" with respect to such option positions. All traders shall complete Part A of the Form 40 and, in addition, shall complete:

Part B—If the trader is an individual, a partnership or a joint tenant.

Part C—If the trader is a corporation or type of trader other than an individual, partnership, or joint tenant.

(a) * * *

(2) Principal business and occupation of the reporting trader and, in addition, whether transactions are made for, on behalf of, or in association with, a customer trading program of a futures commission merchant, a commodity pool, a producer cooperative, any business activities in which the trader is commercially engaged, or for personal use.

* * * * *

(5) The name and address of each person whose account is controlled by the reporting trader.

* * * * *

(9) The following information concerning accounts which the reporting trader guarantees or in which the trader has a financial interest of ten percent or more if such accounts are in a name other than that of the reporting trader:

* * * * *

(b) * * *

(3) If the trader is self-employed and engaged in the marketing of a cash commodity or in a business activity which is hedged by use of the futures market, or the trader uses the option market in connection with such business, the cash commodity marketed or risk exposure covered, types of associated marketing activities, the option contract used or the futures contract used for hedging.

(4) The name, address, and type of any organization in which the reporting trader participates in the management if such organization holds another futures or option trading account.

* * * * *

(c) * * *

(3) Names and locations of all subsidiary firms that trade in commodity futures or options and whether or not the subsidiary firms are organized under the law of any state (including the District of Columbia) or territory or possession of the United States.

(4) Name, address, and business telephone number of person(s) actually controlling the trading and, if different persons are responsible for different commodities or options, the commodities or options for which each controller has responsibility.

(5) Name, office address and business telephone number of person or persons to contact regarding trading.

(6) If the firm is engaged in the marketing of a cash commodity or in a business activity which is hedged by using the futures markets, or the firm uses the option market in conjunction with such business, the cash commodity marketed or risk exposure covered, types of associated marketing activities, and the option contracts used or the futures contracts used for hedging.

(d) *Updating reports.* If at the time a trader holds or controls a reportable futures position and (1) the trader has not filed a Form 40 during the previous twelve months or (2) a Form 40 previously filed by the trader is no longer accurate because, since the previous filing, there has been a change in the information required under paragraph (a)(1), (a)(2), (a)(3), (a)(5), (a)(6), (a)(8), (a)(9), (a)(10), (b) or (c) of this section, the trader shall file an updated Form 40 with the Commission not later than 10 calendar days after the expiration of such twelve month period or after such change occurs, as the case may be.

36. Section 18.05 is revised to read as follows:

§ 18.05 Maintenance of books and records.

Every trader who holds or controls a reportable futures or option position shall keep books and records showing all details concerning all positions and transactions for future delivery in the commodity on all contract markets, all positions and transactions in the commodity option, and all positions and transactions in the cash commodity, its products and byproducts and, in addition, commercial activities that the trader hedges in the commodity underlying the futures contract in which the trader is reportable, and shall upon

request furnish to the Commission any pertinent information concerning such positions, transactions or activities.

PART 21—SPECIAL CALLS FOR INFORMATION FROM CONTRACT MARKETS, FUTURES COMMISSION MERCHANTS, MEMBERS OF CONTRACT MARKETS, AND FOREIGN BROKERS

37. Section 21.02 is revised to read as follows:

§ 21.02 Special calls for information on open contracts in accounts carried by futures commission merchants, members of contract markets, and foreign brokers.

Upon special call by the Commission for information relating to futures and/or option positions held on the dates specified in the call, each futures commission merchant, member of a contract market, or foreign broker, and, in addition, for options information, each contract market, shall furnish to the Commission the following information concerning accounts of traders owning or controlling such futures and/or options positions as may be specified in the call:

(a) The name and address of the person for whom each account is carried:

(b) The principal business or occupation of the person for whom each account is carried, as specified in the call;

(c) The type of each such account;

(d) The name, address and principal business or occupation of any person who controls the trading of each account;

(e) The name and address of any person having a financial interest of ten percent or more in each account;

(f) The number of open futures and/or option positions carried in each account as specified in the call; and

(g) As applicable, the following identifying information:

(1) Whether a trader who holds commodity options is classified as a commercial or as a noncommercial for each commodity option;

(2) Whether the open commodity futures contracts are classified as speculative, spreading (straddling), or hedging; and

(3) Whether any of the accounts in question are omnibus accounts and, if so, whether the originator of the omnibus account is another futures commission merchant or foreign broker.

PART 32—REGULATION OF COMMODITY OPTION TRANSACTIONS

38. Section 32.1 is revised to read as follows:

§ 32.1 Scope of Part 32; definitions.

(a) *Scope.* The provisions of this Part, except for the provisions of §§ 32.8 and 32.9 which shall in any event apply to all commodity option transactions, shall apply to all commodity option transactions except for commodity option transactions conducted or executed on or subject to the rules of a contract market pursuant to Section 4c(c) of the Act and the regulations promulgated thereunder.

(b) *Definitions.* As used in this Part:

(1) "Commodity option transaction" and "commodity option" each means any transaction or agreement in interstate commerce which is or is held out to be of the character of, or is commonly known to the trade as, an "option", "privilege", "indemnity", "bid", "offer", "put", "call", "advance guaranty", or "decline guaranty' involving any commodity regulated under the Act other than wheat, cotton, rice, corn, oats, barley, rye, flaxseed, grain sorghums, mill feeds, butter, eggs, onions, Solanum tuberosum (Irish potatoes), wool, wool tops, fats and oils (including lard, tallow, cottonseed oil, peanut oil, soybean oil and all other fats and oils), cottonseed meal, cottonseed, peanuts, soybeans, soybean meal, livestock, livestock products and frozen concentrated orange juice;

(2) "Interstate commerce" shall be construed and have the same meaning as set forth in Sections 2(a) and 2(b) of the Act;

(3) "Option customer" means any person who, directly or indirectly, purchases or otherwise acquires for value any interest in a commodity option, but shall not include a person required to register as a futures commission merchant in accordance with this Part;

(4) "Purchase price" means the total actual cost paid or to be paid, directly or indirectly, by an option customer for entering into and maintaining an interest in a commodity option transaction by whatever name called; and

(5) "Striking price" means the price at which an option customer may purchase or sell the commodity or the contract of sale of a commodity for future delivery which is the subject of a commodity option transaction.

39. Section 32.11 is amended by revising paragraph (b) to read as follows:

§ 32.11 Suspension of commodity option transactions.

* * * * *

(b) The provisions of paragraph (a) of this section shall not apply to any commodity option transaction conducted in accordance with the provisions of § 32.4(a) or any commodity option transaction conducted on or subject to the rules of a contract market in accordance with the provisions of Section 4c(c) of the Act and the regulations promulgated thereunder.

* * * * *

PART 33—REGULATION OF DOMESTIC EXCHANGE-TRADED COMMODITY OPTION TRANSACTIONS

40. Section 33.2 is amended by revising paragraph (a) to read as follows:

§ 33.2 Applicability of Act and rules; scope of Part 33.

(a) Except as otherwise specified in this Part and unless the context otherwise requires:

(1) Each board of trade designated, or applying for designation, by the Commission as a contract market for the purpose of trading commodity options pursuant to this Part shall be deemed for such purpose to be a "board of trade," "exchange," and a "contract market" and, with respect to commodity option transactions conducted pursuant to such designation, shall comply with and be subject to all of the provisions of the Act relating to boards of trade, exchanges, or contract markets as though such provisions were set forth herein; and

(2) The provisions of Sections 2(a)(1), 2(a)(8)(B), 4, 4a, 4c(a), 4d, 4e, 4f, 4g, 4h, 4i, 4j, 4k, 4m, 4n, 5, 5a, 5b, 6, 6a, 6b, 6c, 7, 8(a)–(e), 8a, 8b, 8c, and 16 of the Act shall apply to commodity option transactions that are subject to the requirements of this Part as though such provisions were set forth herein and included specific references to commodity option transactions. Nothing contained in this section shall be construed to confer designation as a contract market absent issuance of an order of the Commission so designating an applicant board of trade.

* * * * *

41. Section 33.3 is amended by revising paragraphs (b)(1) and (b)(2) to read as follows:

§ 33.3 Unlawful commodity option transactions.

* * * * *

(b) * * *

(1) Any person to solicit or accept orders from an option customer (other than in a clerical capacity) for any commodity option transaction, or to supervise any person or persons so engaged, unless such person is:

* * * * *

(2) Any person registered or required to be registered as a futures commission

merchant under the Act to permit another person to become or remain associated with such person as a partner, officer, employee, agent or representative (or in any status or position involving similar functions) in any capacity involving the solicitation or acceptance of an order from an option customer (other than in a clerical capacity) for any commodity option transaction or the supervision of any person or persons so engaged, if such person knows or should know that such other person is or was not registered as required by this Part or that such registration has expired, been suspended (and the period of suspension has not expired) or been revoked.

42. Section 33.4 is amended by revising the introductory paragraph and paragraphs (a)(1)(ii) and (a)(3), by revising paragraph (a)(4) and redesignating paragraph (a)(4), as paragraph (a)(6), by adding a new paragraph (a)(4), by revising paragraph (a)(5)(iii) and by adding a new paragraph (a)(5)(iv), by revising paragraph (b)(1)(iii), by adding a new paragraph (b)(11), and by revising paragraphs (c), (d), (d)(1), (d)(3), and (g) to read as follows:

§ 33.4 Designation as a contract market for the trading of commodity options.

The Commission may designate any board of trade located in the United States as a contract market for the trading of options on contracts of sale for future delivery or options on physicals when the applicant complies with and carries out the requirements of the Act (as provided in § 33.2), these regulations, and the following conditions and requirements with respect to the commodity option for which the designation is sought:

(a) * * *

(1) * * *

(ii) With respect to options on futures contracts, may be exercised only by the establishment, by book entry, in the clearing organization of positions in the underlying futures contract.

* * * * * *

(3) If designation for the trading of options on futures contracts is sought, is designated as a contract market for the underlying contract of sale for future delivery which is the subject of the option for which designation is sought, and submits, if so requested by the Commission, the information called for by § 1.50 of this chapter (relating to continued compliance with the conditions and requirements for designation as a contract market) for the specified futures contract underlying the option for which the designation is sought, and the applicant complies with the conditions and requirements for designation as a contract market for such contract for future delivery as set forth in Sections 5 and 5a of the Act and as set forth in these regulations.

(4) In the case of a contract market which is requesting designation for the trading of options on physicals for which it is designated as a contract market for contracts of sale for future delivery or for options on futures contracts, submits, if so requested by the Commission, the information called for by § 1.50 of this chapter (relating to continued compliance with the conditions and requirements for designition as a contract market) for that specified futures contract and/or options on that futures contract, and the applicant complies with the conditions and requirements for designation as a contract market for such contract for future delivery as set forth in Sections 5 and 5a of the Act and as set forth in these regulations.

(5) * * *

(iii) If designation for the trading of options on futures contracts is sought the volume of trading in all contract months for future delivery of the commodity for which the option designation is sought has averaged at least 1,000 contracts per week on such board of trade for the 12 months preceding the date of application for the designation, or, alternatively, that there is sufficient liquidity in the cash and futures markets in the commodity underlying the option for which designation is being sought to prevent disruption of those markets by the trading of options on a futures contract; and

(iv) If designation for the trading of options on physicals is sought and thereafter for the purpose of demonstrating continued compliance with the Act and these regulations:

(A) The cash market for the underlying physical exhibits sufficient liquidity such that the grantor and purchaser of the option have the opportunity to purchase or sell the underlying physical at its economic value in normal cash marketing channels;

(B) There exists an accurate and widely-disseminated price series for the underlying physical which is deliverable on the option contract;

(C) Trading of such options will not be disruptive of trading in the cash market for the underlying physical or of any futures contract; and

(D) The individual terms and conditions of the option contract conform to practices in the underlying cash market or are otherwise justified, including a demonstration that the terms and conditions of the option contract provide for a deliverable supply which is not conducive to price manipulation or distortion, consistent with a description of the cash market furnished by the board of trade.

(6) If designation for the trading of options on a futures contract is sought, is not designated as a contract market for any other option on a futures contract, and if designation for the trading of options on a physical is sought, is not designated as a contract market for any other option on a physical.

(b) * * *

(1) * * *

(iii) The point, in terms of the price of the underlying futures contract or underlying physical, at which a new strike price will be introduced in any option which is already trading;

* * * * * *

(11) Establish appropriate criteria which are reasonably designed to secure performance, upon exercise, of the option contracts.

(c) Such board of trade establishes procedures and conducts sales practice audits of member futures commission merchants which engage in the offer or sale of option contracts regulated under this Part. These sales practice audits must be of sufficient scope to enforce the contract market's rules, including investigation for the improper handling of discretionary accounts, inadequate internal supervision, fraudulent or high-pressure sales communications, compliance with disclosure requirements, improper handling and disposition of option customer complaints, and, where applicable, the futures commission merchant's officer or sale of deep-out-of-the-money options.

(d) A board of trade must submit an analysis and justification of the individual terms and conditions of the option contract. In determining whether to approve option contract terms and conditions, the Commission may consider the analysis and justification submitted for such terms and conditions, including, without limitation:

(1) The expiration date of the option if that date is less than ten business days before the earlier of the last trading day or the first notice day of any futures contract on the same or a related commodity;

* * * * * *

(3) The nature of the clearing mechanism to be utilized for the commodity option, and the differences, if any, among the clearing mechanisms for options on futures contracts, options on physicals, and futures contracts;

* * * * * *

(g) Such board of trade provides a comprehensive list of occupation or business categories of commercial users of the commodity underlying the option contract for which the board of trade is seeking designation as a contract market.

43. Section 33.5 is amended by revising paragraph (c) to read as follows:

§ 33.5 Application for designation as a contract market for the trading of commodity options.

* * * * *

(c) The effective period for designation as a contract market for a particular commodity option under this Part shall be for a period not to exceed three years from the effective date of the designation, or such shorter period as the Commission may specify at the time the designation is granted, and in any event shall be of no further force or effect should the Commission, by rule or regulation, repeal the provisions of this Part under which such designation is granted. Except as may be specifically authorized by the Commission, no board of trade which has been designated as a contract market for the trading of commodity options may authorize or allow the trading of any commodity option which will expire after the termination of the effective period of such designation, and, with respect to an option on a futures contract, where the delivery month of the futures contract underlying such option is later than the termination of the effective period of such designation or where the month for the underlying futures contract has not been listed.

44. Section 33.6 is amended by revising paragraph (c) to read as follows:

§ 33.6 Suspension or revocation of designation as a contract market for the trading of commodity options.

* * * * *

(c) The option market is not used on more than an occasional basis for other than speculative purposes by producers, processors, merchants or commercial users engaged in handling or utilizing the commodity (including the products, by-products or source commodity thereof) underlying an option, in interstate commerce; or

45. Section 33.7 is amended by revising portions of paragraph (b) (Options Disclosure Statement) and by revising paragraphs (c) and (d) to read as follows:

§ 33.7 Disclosure.

* * * * *

(b) The disclosure statement must read as follows:

OPTIONS DISCLOSURE STATEMENT

BECAUSE OF THE VOLATILE NATURE OF THE COMMODITIES MARKETS, THE PURCHASE AND GRANTING OF COMMODITY OPTIONS INVOLVE A HIGH DEGREE OF RISK. COMMODITY OPTION TRANSACTIONS ARE NOT SUITABLE FOR MANY MEMBERS OF THE PUBLIC. SUCH TRANSACTIONS SHOULD BE ENTERED INTO ONLY BY PERSONS WHO HAVE READ AND UNDERSTOOD THIS DISCLOSURE STATEMENT AND WHO UNDERSTAND THE NATURE AND EXTENT OF THEIR RIGHTS AND OBLIGATIONS AND OF THE RISKS INVOLVED IN THE OPTION TRANSACTIONS COVERED BY THIS DISCLOSURE STATEMENT.

BOTH THE PURCHASER AND THE GRANTOR SHOULD KNOW WHETHER THE PARTICULAR OPTION IN WHICH THEY CONTEMPLATE TRADING IS AN OPTION WHICH, IF EXERCISED, RESULTS IN THE ESTABLISHMENT OF A FUTURES CONTRACT (AN "OPTION ON A FUTURES CONTRACT") OR RESULTS IN THE MAKING OR TAKING OF DELIVERY OF THE ACTUAL COMMODITY UNDERLYING THE OPTION (AN "OPTION ON A PHYSICAL COMMODITY"). BOTH THE PURCHASER AND THE GRANTOR OF AN OPTION ON A PHYSICAL COMMODITY SHOULD BE AWARE THAT, IN CERTAIN CASES, THE DELIVERY OF THE ACTUAL COMMODITY UNDERLYING THE OPTION MAY NOT BE REQUIRED AND THAT, IF THE OPTION IS EXERCISED, THE OBLIGATIONS OF THE PURCHASER AND GRANTOR WILL BE SETTLED IN CASH.

A PERSON SHOULD NOT PURCHASE ANY COMMODITY OPTION UNLESS HE IS ABLE TO SUSTAIN A TOTAL LOSS OF THE PREMIUM AND TRANSACTION COSTS OF PURCHASING THE OPTION. A PERSON SHOULD NOT GRANT ANY COMMODITY OPTION UNLESS HE IS ABLE TO MEET ADDITIONAL CALLS FOR MARGIN WHEN THE MARKET MOVES AGAINST HIS POSITION AND, IN SUCH CIRCUMSTANCES, TO SUSTAIN A VERY LARGE FINANCIAL LOSS.

A PERSON WHO PURCHASES AN OPTION SHOULD BE AWARE THAT IN ORDER TO REALIZE ANY VALUE FROM THE OPTION, IT WILL BE NECESSARY EITHER TO OFFSET THE OPTION POSITION OR TO EXERCISE THE OPTION. IF AN OPTION PURCHASER DOES NOT UNDERSTAND HOW TO OFFSET OR EXERCISE AN OPTION, THE PURCHASER SHOULD REQUEST AN EXPLANATION FROM THE FUTURES COMMISSION MERCHANT. CUSTOMERS SHOULD BE AWARE THAT IN A NUMBER OF CIRCUMSTANCES, SOME OF WHICH WILL BE DESCRIBED IN THIS DISCLOSURE STATEMENT, IT MAY BE DIFFICULT OR IMPOSSIBLE TO OFFSET AN EXISTING OPTION POSITION ON AN EXCHANGE.

THE COMMODITY FUTURES TRADING COMMISSION REQUIRES THAT ALL CUSTOMERS RECEIVE AND ACKNOWLEDGE RECEIPT OF A COPY OF THIS DISCLOSURE STATEMENT BUT DOES NOT INTEND THIS STATEMENT AS A RECOMMENDATION OR ENDORSEMENT OF EXCHANGE-TRADED COMMODITY OPTIONS.

Contents of Disclosure Statement

1. Some of the risks of option trading
2. Description of commodity options
3. The mechanics of option trading
4. Margin requirements
5. Profit potential of an option position
6. Deep-out-of-the-money options
7. Glossary of terms

(1) *SOME OF THE RISKS OF OPTION TRADING.*

THE GRANTOR OF AN OPTION SHOULD BE AWARE THAT, IN MOST CASES, A COMMODITY OPTION MAY BE EXERCISED AT ANY TIME FROM THE TIME IT IS GRANTED UNTIL IT EXPIRES. THE PURCHASER OF AN OPTION SHOULD BE AWARE THAT SOME OPTION CONTRACTS MAY PROVIDE ONLY A LIMITED PERIOD OF TIME FOR EXERCISE OF THE OPTION.

THE PURCHASER OF A PUT OR A CALL IS SUBJECT TO THE RISK OF LOSING THE ENTIRE PURCHASE PRICE OF THE OPTION—THAT IS THE PREMIUM PAID FOR THE OPTION PLUS ALL TRANSACTION COSTS.

Specific market movements of the underlying future or underlying physical commodity cannot be predicted accurately.

The grantor of a call option who does not have a long position in the underlying futures contract or underlying physical commodity is subject to risk or loss should the price of the underlying futures contract or underlying physical commodity increase by an amount greater than the premium received for granting the call option.

The grantor of a call option who has a long position in the underlying futures contract or underlying physical commodity is subject to the full risk of a decline in price of the underlying position. In exchange for the premium received for granting a call option, the option grantor gives up all of the potential gain resulting from an increase in the price of the underlying futures contract or underlying physical commodity above the option strike price if the option is exercised against the grantor.

The grantor of a put option who does not have a short position in the underlying futures contract or underlying physical commodity (*e.g.*, commitment to sell the physical) is subject to risk of loss should the price of the underlying futures contract or underlying physical commodity decrease by an amount in excess of the premium received for granting the put option.

The grantor of a put option on a futures contract who has a short position in the underlying futures contract is subject to the full risk of a rise in the price in the underlying position. In exchange for the premium received for granting a put option on a futures contract, the option grantor gives up all of the potential gain resulting from a decrease in the price of the underlying futures contract below the option strike price if the option is exercised against the grantor. The grantor of a put option on a physical commodity who

has a short position (*e.g.*, commitment to sell the physical) is subject to the full risk of a rise in the price of the physical commodity which must be obtained to fulfill the commitment. In exchange for the premium, the grantor of a put option on a physical commodity gives up all of the potential gain which would have resulted from a decrease in the price of the commodity below the option strike price if the option is exercised against the grantor.

(2) *Description of Commodity Options.* Prior to entering into any transaction involving a commodity option, an individual should thoroughly understand the nature and type of option and the underlying futures contract or underlying physical commodity involved. The futures commission merchant is required to provide, and the individual contemplating an option transaction should obtain, a description of the following:

(i) The futures contract or the physical commodity which is the subject of the option;

(ii) The quantity of the underlying futures contract or underlying physical commodity which may be purchased or sold upon exercise of the option or, if applicable, whether exercise of the option will be settled in cash;

* * * * *

(v) A description of all costs in addition to the purchase price which may be incurred if the commodity option is exercised, including the amount of commissions (whether termed sales commissions or otherwise), storage, interest, and all similar fees and charges which may be incurred;

(vi) An explanation and understanding of an option grantor's initial margin requirement and obligation to provide additional margin in connection with such an option position, or a position in a futures contract, if applicable;

* * * * *

(viii) If applicable, a description of the effect upon the value of the option position that could result from limit moves in the underlying futures contract.

(3) *The Mechanics of Option Trading.* Before entering into any exchange-traded option transaction, an individual should obtain a description of how commodity options are traded.

Option customers should clearly understand that there is no guarantee that option positions may be offset by either a closing purchase or closing sale transaction on an exchange. In this circumstance, option grantors could be subject to the full risk of their positions until the option positions expire, and the purchaser of a profitable option might have to exercise the option to realize a profit.

For an option on a futures contract, an individual should clearly understand the relationship between exchange rules governing option transactions and exchange rules governing the underlying futures contract. For example, an individual should understand what action, if any, the exchange will take in the option market if trading in the underlying futures market is restricted or the futures prices have made a "limit move."

* * * * *

(5) *Profit Potential of An Option Position.* An option customer should carefully calculate the price which the underlying futures contract or underlying physical commodity would have to reach for the option position to become profitable. This price would include the amount by which the underlying futures contract or underlying physical commodity would have to rise above or fall below the strike price to cover the sum of the premium and all other costs incurred in entering into and exercising or closing (offsetting) the commodity option position.

(6) *Deep-out-of-the-Money Options.* A person contemplating purchasing a deep-out-of-the-money option (that is, an option with a strike price significantly above, in the case of a call, or significantly below, in the case of a put, the current price of the underlying futures contract or underlying physical commodity) should be aware that the chance of such an option becoming profitable is ordinarily remote.

On the other hand, a potential grantor of a deep-out-of-the-money option should be aware that such options normally provide small premiums while exposing the grantor to all of the potential losses described in section (1) of this disclosure statement.

(7) *Glossary of Terms.* (i) *Contract market*—Any board of trade (exchange) located in the United States which has been designated by the Commodity Futures Trading Commission to list a futures contract or commodity option for trading.

(ii) *Exchange-traded option; put option; call option*—The options discussed in this disclosure statement are limited to those which may be traded on a contract market. These options (subject to certain exceptions) give an option purchaser the right to buy in the case of a call option, or to sell in the case of a put option, a futures contract or the physical commodity underlying the option at the stated strike price prior to the expiration date of the option. Each exchange-traded option is distinguished by the underlying futures contract or underlying physical commodity, strike price, expiration date, and whether the option is a put or a call.

(iii) *Underlying futures contract*—The futures contract which may be purchased or sold upon the exercise of an option on a futures contract.

(iv) *Underlying physical commodity*—The commodity of a specific grade (quality) and quantity which may be purchased or sold upon the exercise of an option on a physical commodity.

(v) *Class of options*—A put or a call covering the same underlying futures contract or underlying physical commodity.

(vi) *Series of options*—Options of the same class having the same strike price and expiration date.

(vii) *Exercise price*—*See* strike price.

(viii) *Expiration date*—The last day when an option may be exercised.

(ix) *Premium*—The amount agreed upon between the purchaser and seller for the purchase or sale of a commodity option.

(x) *Strike price*—The price at which a person may purchase or sell the underlying futures contract or underlying physical commodity upon exercise of a commodity option. This term has the same meaning as the term "exercise price."

(xi) *Short option position*—*See* opening sale transaction.

(xii) *Long option position*—*See* opening purchase transaction.

(xiii) *Types of options transactions*—

(A) *Opening purchase transaction*—A transaction in which an individual purchases an option and thereby obtains a long option position.

(B) *Opening sale transaction*—A transaction in which an individual grants an option and thereby obtains a short option position.

(C) *Closing purchase transaction*—A transaction in which an individual with a short option position liquidates the position. This is accomplished by a closing purchase transaction for an option of the same series as the option previously granted. Such a transaction may be referred to as an offset transaction.

(D) *Closing sale transaction*—A transaction in which an individual with a long option position liquidates the position. This is accomplished by a closing sale transaction for an option of the same series as the option previously purchased. Such a transaction may be referred to as an offset transaction.

(xiv) *Purchase price*—The total actual cost paid or to be paid, directly or indirectly, by a person to acquire a commodity option. This price includes all commissions and other fees, in addition to the option premium.

(xv) *Grantor, writer, seller*—An individual who sells an option. Such a person is said to have a short position.

(xvi) *Purchaser*—An individual who buys an option. Such a person is said to have a long position.

(c) Prior to the entry of the first commodity option transaction for the account of an option customer, a futures commission merchant or the person soliciting or accepting the order therefor must provide an option customer with all of the information required under the disclosure statement: *Provided,* The limitations, if any, on the transfer of an option customer's account to a futures commission merchant other than the one through whom the commodity option transactions are to be executed must be provided in writing; *Provided, further,* That the futures commission merchant or the person soliciting or accepting the order therefor must provide current information to an option customer if the information provided previously has become inaccurate.

(d) Prior to the entry into a commodity option transaction on or subject to the rules of a contract market, each option customer or prospective option customer shall, to the extent the following amounts are known or can reasonably be approximated, be informed by the person soliciting or accepting the order therefor of the amount of the premium and any mark-ups thereon, if applicable, commissions, costs, fees and other charges to be incurred in connection with the commodity option transaction.

as well as the strike price and all costs to be incurred by the option customer if the commodity option is exercised.

PART 145—COMMISSION RECORDS AND INFORMATION

46. Section 145.5 is amended by revising paragraph (d)(1)(vi) to read as follows:

§ 145.5 Nonpublic matters.

* * * * *

(d) * * *

(1) * * *

(vi) Reports required to be filed pursuant to Parts 15–21 of this chapter; and

* * * * *

PART 147—OPEN COMMISSION MEETINGS

47. Section 147.3 is amended by revising paragraph (b)(4)(i)(F) to read as follows:

§ 147.3 General requirement of open meetings; grounds upon which meetings may be closed.

* * * * *

(b) * * *

(4) * * *

(i) * * *

(F) Reports required to be filed pursuant to Parts 15–21 of this chapter; and

* * * * *

PART 155—TRADING STANDARDS

48. Section 155.2 is amended by revising paragraphs (a), (b), and (i) to read as follows:

§ 155.2 Trading standards for floor brokers.

Each contract market shall adopt and submit to the Commission for approval pursuant to Section 5a(12) of the Act and § 1.41 of this chapter, a set of rules which shall, at a minimum, with respect to each member of the contract market acting as a floor broker:

(a) Prohibit such member from purchasing any commodity for future delivery, purchasing any call option, or selling any put option, for his own account or for any account in which he has an interest, while holding an order of another person for the (1) purchase of any future, (2) purchase of any call option, or (3) sale of any put option, in the same commodity which is executable at the market price or at the price at which such purchase or sale can be made for the member's own account or any account in which he has an interest.

(b) Prohibit such member from selling any commodity for future delivery, selling any call option, or purchasing any put option, for his own account or for any account in which he has an interest, while holding an order of another person for the (1) sale of any future, (2) sale of any call option, or (3) purchase of any put option, in the same commodity which is executable at the market price or at the price at which such sale or purchase can be made for the member's own account or any account in which he has an interest.

* * * * *

(i) Require that every execution of a transaction on the floor by such member be confirmed promptly with the opposite floor broker or floor trader; such confirmation shall identify price or premium, quantity, future or commodity option and respective clearing members. In the event a contract market cannot require prompt identification of respective clearing members without seriously disrupting the functions of its marketplace, the contract market may petition the Commission for exemption from this requirement. Such petition shall include:

* * * * *

49. Section 155.3 is amended by revising paragraph (a)(1) to read as follows:

§ 155.3 Trading standards for futures commission merchants.

(a) * * *

(1) Insure, to the extent possible, that each order received from a customer or from an option customer which is executable at or near the market price is transmitted to the floor of the appropriate contract market before any order in any future or in any commodity option in the same commodity for any proprietary account, any other account in which an affiliated person has an interest, or any account for which an affiliated person may originate orders without the prior specific consent of the account owner, if the affiliated person has gained knowledge of the customer's or option customer's order prior to the transmission to the floor of the appropriate contract market of the order for a proprietary account, an account in which the affiliated person has an interest, or an account in which the affiliated person may originate orders without the prior specific consent of the account owner; and

* * * * *

PART 170—REGISTERED FUTURES ASSOCIATIONS

50. The authority citation for Part 170 is revised to read as follows:

Authority: 7 U.S.C. 6c, 12a, and 21.

51. Section 170.5 is revised to read as follows:

§ 170.5 Prevention of fraudulent and manipulative practices (Section 17(b)(7) of the Act).

A futures association must establish and maintain a program for the protection of customers and option customers, including the adoption of rules to protect customers and option customers and customer funds and to promote fair dealing with the public. These rules shall set forth the ethical standards for members of the association in their business dealings with the public. An applicant association must also demonstrate its capability to foster a professional atmosphere among its members, including an acceptance of an adherence to the ethical standards, and to monitor and enforce compliance with the customer and option customer protection program and rules.

52. Section 170.8 is revised to read as follows:

§ 170.8 Settlement of customer disputes (Section 17(b)(10) of the Act).

A futures association must be able to demonstrate its capability to promulgate rules and to conduct proceedings which provide a fair and equitable procedure, through arbitration or otherwise, for the voluntary settlement of a customer's or option customer's claim or grievance of less than $15,000 brought against any member of the association or any employee of a member of the association. Such rules shall conform to and be consistent with Section 17(b)(10) of the Act and be consistent with Part 180 of the Commission's regulations governing contract market arbitration and dispute settlement procedures.

PART 180—ARBITRATION OR OTHER DISPUTE SETTLEMENT PROCEDURES

53. Section 180.1 is amended by revising paragraph (a) to read as follows:

§ 180.1 Definitions.

(a) The term "claim or grievance" as used in this Part shall mean any dispute which arises out of any transaction on or subject to the rules of a contract market, executed by or effected through a member of that contract market or employee thereof which dispute does not require for adjudication the presence of essential witnesses or third parties over whom the contract market does not have jurisdiction and who are not otherwise available. The term claim or grievance does not include disputes

arising from cash market transactions which are not a part of or directly connected with any transaction for the purchase or sale of any commodity for future delivery or commodity option.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2619

Valuation of Plan Benefits in Non-Multiemployer Plans

AGENCY: Pension Benefits Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This rule amends the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Benefits in Non-Multiemployer Plans, Part 2619, by adding a new table, Table I-83, to Appendix D and correcting typographical errors in Subpart D. Table I-83 is to be used for plans covered under Title IV of the Employee Retirement Income Security Act of 1974, *as amended*, that terminate in 1983. The table is needed to determine an expected retirement age for certain plan participants in terminating pension plans that provide for an early retirement benefit. The expected retirement age is needed to calculate the value of the early retirement benefit and, thus, the total value of benefits under the plan.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Office of General Counsel, Code 210, Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006, 202-254-4895 (not a toll-free number).

SUPPLEMENTARY INFORMATION: On January 28, 1981, the Pension Benefit Guaranty Corporation ("PBGC") published a final and interim rule on Valuation of Plan Benefits in Non-Multiemployer Plans, 29 CFR Part 2610 (46 FR 9504). Under Title IV of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1001 *et seq.*, as amended, covered pension plans that terminate must determine the total value of benefits under the plan in order to determine if plan assets are sufficient to provide for those benefits. If plan assets are not sufficient to provide for all benefits guaranteed by PBGC, the employer is liable for the insufficiency up to a limit of 30% of the employer's "net worth" within the meaning of 29 U.S.C. 1362. The interim portion of the benefit valuation regulation, Subpart D and Appendices D and E, provided methods for determining an expected retirement age to be used with the rules in Subparts B and C of Part 2610 to determine the value of an early retirement benefit. Part 2610 was redesignated Part 2619 in a notice published June 24, 1981 (46 FR 32574). Subpart D and Appendices D and E of Part 2619, as amended December 31, 1981 (46 FR 63268), were promulgated as final rules on April 13, 1982 (47 FR 15780).

Appendix D contains two sets of tables to be used to determine an expected date of retirement for each participant entitled to early retirement. The first set of tables, Selection of Retirement Rate Category (I-79, I-80, I-81, and I-82), is used to determine whether a participant has a low, medium, or high probability of retiring early. The second set of tables, Expected Retirement Ages for Individuals in the Low/Medium/High Categories (II-A, II-B, and II-C), is used to determine the expected retirement age.

The first set of tables determines the probability of early retirement based on the year a participant would reach normal retirement age and the participant's monthly benefit at normal retirement age. The second set of tables establishes, by probability category, the expected retirement age based on the earliest age a participant could retire and on the normal retirement age under the plan. This age is used to calculate the value of the early retirement benefit and, thus, the total value of benefits under the plan and the amount of employer liability, if any, owed to PBGC.

The first set of tables in Appendix D as originally published (46 FR 9504)—the Selection of Retirement Rate Category—consists of three tables. The tables establish a retirement rate category for each of the calendar years 1979 through 1981, and each table applies only to plans terminating in that particular year. A new table, I-82, was added on December 31, 1981 (46 FR 63268) in order to update the correlation between the amount of a participant's benefit and the probability that he or she will elect early retirement. Normally, a table remains in effect only for a calendar year. This rule amends Appendix D of Part 2619 to add Table I-83 for use in valuing benefits in plans that terminate during calendar year 1983.

This rule also amends §§ 2619.63(c) and 2619.64(c) to correct two typographical errors. The cross reference to Appendix C should be to Appendix D in each instance.

The PBGC has determined that notice of and public comment on the addition of Table I-83 to Appendix D, Part 2619, are impracticable and contrary to the public interest. This determination is based on the need to issue the table promptly so the appendix will reflect, as accurately as possible, the relationship between a participant's benefit and his or her probability of retiring early. The PBGC has found that the public interest is best served by issuing this table without an opportunity for notice and comment so that plans can calculate the value of plan benefits before submitting a notice of intent to terminate. Also, plans will be able to predict employer liability more accurately prior to plan termination and can, therefore, lessen or avoid interest charges under 29 CFR 2622.7 for late payment of employer liability. Moreover, because of the need to provide immediate guidance for the valuation of benefits under plans that will terminate on or after January 1, 1983, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making the table set forth in this amendment to the final regulation effective less than 30 days after publication.

The PBGC has determined that this is not a "major rule" under the criteria set forth in Executive Order 12291 of

February 17, 1981 (46 FR 13193) because it will not result in an annual effect on the economy of $100 million or more, a major increase in costs for consumers or individual industries, or significant adverse effects on competition, employment, investment, productivity, or innovation.

List of Subjects in 29 CFR Part 2619

Employee benefit plans, Pension insurance, Pensions.

PART 2619—[AMENDED]

In consideration of the foregoing, Part 2619 of Chapter XXVI of Title 29, Code of Federal Regulations is hereby amended by adding a new table and making corrections as follows:

1. The authority citation for Part 2619 reads as follows:

Authority: Sections 4002(b)(3), 4041(b), 4044, and 4062(b)(1)(A), Pub. L. 93–406, 88 Stat. 1004, 1020, 1025, 1029, (1974), as amended by Secs. 403(1), 403(d), and 402(a)(7), Pub. L. 96–364, 94 Stat. 1302, 1301, and 1299, (1980) (29 U.S.C. 1302, 1341, 1344, 1362).

§ 2619.63 [Amended]

2. In § 2619.63, paragraph (c)(1) is amended by substituting "Appendix D" for "Appendix C".

§ 2619.64 [Amended]

2. In § 2619.64, paragraph (c) is amended by substituting "Appendix D" for "Appendix C" in the first sentence.

4. Appendix D to Part 2619 is amended by the addition of Table I–83, as follows:

Appendix D.—Tables Used to Determine Expected Retirement Age

* * * * *

TABLE I–83.—SELECTION OF RETIREMENT RATE CATEGORY

[For plans with a valuation date after Dec. 31, 1982 and before Jan. 1, 1984]

Participant reaches NRA in year	Participant's retirement rate category is—			
	Low (table II–A)	Medium (table II–B)	Medium (table II–B)	High (table II–C)

—

Participant reaches NRA in year	If monthly benefit at NRA is—

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 123

[SW–10–FRL 2272–2]

Hazardous Waste Management Program; Washington Application for Interim Authorization, Phase I and Phase II Components A and B

AGENCY: Environmental Protection Agency.

ACTION: Notice of public hearing and public comment period.

SUMMARY: EPA regulations to protect human health and the environment from the improper management of hazardous waste were published in the **Federal Register** on May 19, 1980 (45 FR 33063). These regulations include provisions for authorization of State programs to operate in lieu of the Federal program. Today EPA is announcing the availability for public review the Washington application for Phase I and Phase II Components A and B Interim Authorization, inviting public comment, and giving notice of a public hearing to be held on the application.

DATE: Comments on the Washington interim authorization application must be received by February 1, 1983.

EPA will conduct a Public Hearing for the Washington Interim Authorization application at 10:00 AM on January 25, 1983. The State of Washington will participate in the Public Hearing held by EPA on this subject.

ADDRESSES: The Public Hearing will be held at: Federal Building, South Auditorium (Fourth Floor), 915 Second Avenue, Seattle, Washington. Copies of the Interim Authorization application are available at the following addresses for inspection and copying by the public during normal business hours:

Washington Department of Ecology, Solid Waste Division, Rowesix Building, #4, Second Floor, 4224 Sixth Avenue NE, Lacey, Washington, (206) 459–6301

Environmental Protection Agency, Region 10, Library, 12th Floor, 1200 Sixth Avenue, Seattle, Washington 98101, (206) 442–1259

EPA Headquarters Library, Room 2404, 401 M Street SW., Washington, D.C. 20460.

Written comments and requests to speak at the hearing should be sent to: Environmental Protection Agency, Region 10, Betty Wiese, RCRA Program Development Section M/S 530, 1200 Sixth Avenue, Seattle, Washington 98101, (206) 442–2857.

FOR FURTHER INFORMATION CONTACT: Betty Wiese (206) 442–2857.

SUPPLEMENTARY INFORMATION: In the May 19, 1980 **Federal Register** (45 FR 33063) the Environmental Protection Agency promulgated regulations pursuant to Subtitle C of the Resource Conservation and Recovery Act of 1976 (as amended), to protect human health and the environment from the improper management of hazardous waste. Included in these regulations, which became effective six (6) months from the date of promulgation, were provisions for a transitional stage in which states would be granted interim authorization in phases corresponding to the stages in which the underlying Federal program will take effect. EPA's Phase I regulations (promulgated May 19, 1980) establish, among other things: the initial identification and listing of hazardous wastes; the standards applicable to generators and transporters of hazardous wastes, including a manifest system; and the "interim status" standards applicable to existing hazardous waste management facilities before they receive permits.

In the January 26, 1981 **Federal Register** (46 FR 7765), the Environmental Protection Agency announced availability of portions of the second phase of Interim Authorization. Component A, published in the **Federal Register** January 12, 1981 (46 FR 2802) contains standards for permitting containers, tanks and certain kinds of surface impoundments and waste piles. Component B published in the **Federal Register** January 23, 1981 (46 FR 7666) contains standards for permitting hazardous waste incinerators.

The State of Washington has submitted an application to EPA for interim authorization for Phase I and Phase II, Components A and B. A full description of the requirements and procedures for State Interim Authorization is included in 40 CFR Part 123 Subpart F, 45 FR 33479.

Prior to being authorized for a component of Phase II, a state may require facilities that treat, store or dispose of hazardous waste to obtain a

state permit. There are no provisions within RCRA or the Federal hazardous waste regulations for designating these pre-authorization state permits as RCRA permits. Only EPA or an authorized state can issue a RCRA permit.

EPA and the State of Washington now require permits for certain hazardous waste facilities. The agencies are cooperating in the current permit application review activity and intend to jointly issue Federal/State permits for these facilities. EPA is proposing to consider such jointly issued State permits as RCRA permits upon authorization of the applicable component of Phase II.

As noted in the May 19, 1980 Federal Register, copies of State submittals for interim authorization are to be made available for public inspection and comment. The purpose of this notice is to announce the availability of Washington's application for public inspection, to invite public comments and to give notice of a public hearing to be held on Washington's application.

40 CFR Part 716

[OPTS-84003D; TSH-FRL 2272-4]

Health and Safety Data Reporting; Submission of Lists and Copies of Health and Safety Studies; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects errors in an amendment to 40 CFR Part 716 adding 11 chemicals to the final regulations, under section 8(d) of the Toxic Substances Control Act (TSCA) (15 U.S.C. 2607(d)), which require the submission of unpublished health and safety studies on specifically listed chemicals by chemical manufacturers, processors, and others in possession of such studies. The 11 chemical substances added were recommended for testing by the Interagency Testing Committee (ITC) in their Eleveth Report to EPA and designated for priority consideration by EPA within one year. The amendment was published in the Federal Register of December 3, 1982 (47 FR 54624).

EFFECTIVE DATE: This correction document was effective on December 3, 1982.

FOR FURTHER INFORMATION CONTACT: Douglas Bannerman, Acting Director, Industry Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-511, 401 M St., SW., Washington, D.C. 20460, Toll free: (800-424-9065), In Washington, D.C.: (554-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: In FR Doc. 82-32843, published in the Federal Register of December 3, 1982, appearing at page 54624, the following corrections are made in the first table in the center column under the heading Alkyltin Compounds:

1. The CAS No. for monobutyltin tris(isooctyl mercaptoacetate) is corrected to read "25852-70-4".

2. The following chemical is added to the bottom of the list of Alkyltin Compounds:

Monomethyltin tris(isooctyl mercaptoacetate), 54849-38-6

This notice corrects the list of chemicals that appeared in the preamble to the amendment. The list should have contained the 11 chemicals recommended for testing by the ITC and designated for priority consideration by EPA within one year. The list of chemicals codified at 40 CFR 716.17(a)(2) is correct.

Dated: December 15, 1982.

Don R. Clay,

Director, Office of Toxic Substances.

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 1-3, 1-16 and 1-30

[FPR Amdt. 227]

Federal Procurement Regulations; Revisions to Audit Thresholds and Progress Payment Provisions

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment revises the thresholds for requesting contract audit services as a pricing aid, raises the uniform standard percentages for progress payments based on total costs, and revises the provisions covering progress payments based on costs. It is based upon changed agency needs arising from present economic conditions and revisions recently made to the Defense Acquisition Regulation. The intended effect is to reduce mandatory audit requirements for certain cost-reimbursement type contract proposals, provide increased progress payments for both small and large businesses, and achieve substantial Government-wide uniformity regarding progress payment clauses and provisions.

EFFECTIVE DATE: January 31, 1983.

FOR FURTHER INFORMATION CONTACT: Philip G. Read, Director, Office of Federal Procurement Regulations, Office of Acquisition Policy, (202-523-4755).

SUPPLEMENTARY INFORMATION: Significant changes introduced in this amendment are as follows:

1. The audit requirement threshold for contract proposals for cost-reimbursement, cost-sharing, cost-plus-award-fee, and cost-plus-fixed-fee contracts is increased from $250,000 to $500,000.

2. Customary progress payment rates based upon total costs, which are presently set at 80 percent for other than small business concerns and 85 percent for small business concerns, are increased to 90 percent and 95 percent, respectively.

3. Miscellaneous revisions are made to the FPR coverage on advance payments because of revisions to Treasury Circular No. 1075 and the cancellation of Federal Management Circular 73-7.

4. Subpart 1-30.5, Progress Payments, is revised to make the coverage substantially uniform with parallel coverage in the Defense Acquisition Regulation except in areas considered peculiar to Defense Department contracting.

5. The information collection requirement contained in this regulation (section 1-16.808(a)) has been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and has been assigned OMB control number 3090-0105.

List of Subjects

41 CFR Part 1-3

Government procurement, Types of contracts, Procurement by negotiation, Small purchases and cost accounting standards.

41 CFR Part 1–16

Government procurement and procurement forms.

41 CFR Part 1–30

Government procurement, Claims and contract finance.

PART 1–3—PROCUREMENT BY NEGOTIATION

Subpart 1–3.8—Price Negotiation Policies and Techniques

Section 1–3.809 is amended to revise paragraph (b)(1) to read as follows:

§ 1–3.809 Contract audit as a pricing aid.

* * * * *

(b) *Auditors reports on contract proposals.* (1) The contracting officer or his authorized representative shall request an audit review by the contract audit activity in accordance with this paragraph (b). Audit reviews shall be requested prior to the negotiation of any contract or modification resulting from proposals in excess of $100,000 which are for firm fixed-price, fixed-price with economic price adjustment, fixed-price redeterminable (prospective), and time and materials or labor-hour type contracts, and for interim and final price redetermination and settlement of incentive type contracts; $250,000 for fixed-price incentive, cost-plus-incentive-fee or fixed-price redeterminable (retroactive) type contracts; or $500,000 for cost-reimbursement, cost-sharing, cost-plus-award-fee or cost-plus-a-fixed-fee type contracts, when the price is based on cost or pricing data (§1–3.807–3) submitted by the contractor. These include initial prices, estimated cost of cost-reimbursement type contracts, economic price adjustments, target prices, and modifications of formally advertised contracts. In arriving at the aggregate amount involved in a contract or modification, all supplies and services shall be included (including construction) which properly would be grouped together in a single transaction. Requirements shall not be split into several contracts or modifications which individually would be less than (but in the aggregate would be more than) the amounts set forth in this paragraph (b)(1) for the type of contract anticipated.

(i) The requirement to audit proposals as set forth in paragraph (b)(1) of this section may be waived by the contracting officer whenever it is clear that information already available is adequate for determining the reasonableness of the price of the proposed procurement. Examples of such information include recent preaward audits of proposals submitted by the offeror, preaward surveys, or other recent favorable audit experience. In such cases, the contract files shall be documented to reflect the reasons for any such waivers. However, independent Government estimates of cost or price shall not be used as the sole justification for waiver (see § 1–3.811(a)(4)).

(ii) Audits should be requested for proposals which are less than the thresholds set forth in paragraph (b)(1) of this section where a valid need exists, such as:

(A) Inadequate knowledge concerning the contractor's accounting policies, cost systems, or substantially changed methods or levels of operation;

(B) Previous unfavorable experience indicating doubtful reliability of the contractor's estimating, accounting, or purchasing methods; or

(C) Procurement of a new product for which cost experience is lacking.

PART 1–16—PROCUREMENT FORMS

The table of contents for Part 1–16 is amended to add 2 new entries as follows:

1–16.808 Contractor's request for progress payment.
1–16.901–1443 Standard Form 1443: Contractor's Request for Progress Payment.

Subpart 1–16.8—Miscellaneous Forms

Section 1–16.808 is added to read as follows:

§ 1–16.808 Contractor's request for progress payment.

Standard Form 1443, Contractor's Request for Progress Payment, is designed for submission of progress payment requests under the contract clauses set forth in § 1–30.510–1. This form is specifically referred to in § 1–30.529 and in the guidance pertaining to the administration of progress payments throughout Subpart 1–30.5. Instructions for completion are printed on the form.

Subpart 1–16.9—Illustrations of Forms

Section 1–16.901–1443 is added to read as follows:

§ 1-16.901-1443 Contractor's request for progress payment.

CERTIFICATION

I certify that the above statement (with attachments) has been prepared from the books and records of the above-named contractor in accordance with the contract and the instructions hereon, and to the best of my knowledge and belief, that it is correct, that all the costs of contract performance (except as herewith reported in writing) have been paid to the extent shown herein, or where not shown as paid have been paid or will be paid currently, by the contractor, when due, in the ordinary course of business, that the work reflected above has been performed, that the quantities and amounts involved are consistent with the requirements of the contract. That there are no encumbrances (except as reported in writing herewith, or on previous progress payment request No. _____) against the property acquired or produced for, and allocated or properly chargeable to the contract which would affect or impair the Government's title, that there has been no materially adverse change in the financial condition of the contractor since the submission of the most recent written information dated _____ by the contractor to the Government in connection with the contract, that to the extent of any contract provision limiting progress payments pending first article approval, such provision has been complied with, and that after the making of the requested progress payment the unliquidated progress payments will not exceed the maximum unliquidated progress payments permitted by the contract.

INSTRUCTIONS

GENERAL- All entries on this form must be typewritten - all dollar amounts must be shown in whole dollars, rounded up to the next whole dollar. All line item numbers not included in the instructions below are self-explanatory.

SECTION I — IDENTIFICATION INFORMATION. Complete Items 1 through 8c in accordance with the following instructions:

Item 1. TO — Enter the name and address of the cognizant Contract Administration Office. PAYING OFFICE — Enter the designation of the paying office, as indicated in the contract.

Item 2. FROM - CONTRACTOR'S NAME AND ADDRESS/ ZIP CODE — Enter the name and mailing address of the contractor. If applicable, the division of the company performing the contract should be entered immediately following the contractor's name.

Item 3. Enter an "X" in the appropriate block to indicate whether or not the contractor is a small business concern.

Item 5. Enter the total contract price, as amended. If the contract provides for escalation or price redetermination, enter the initial price until changed and not the ceiling price; if the contract is of the incentive type, enter the target or billing price, as amended until final pricing. For letter contracts, enter the maximum expenditure authorized by the contract, as amended.

Item 6A. PROGRESS PAYMENT RATES — Enter the 2-digit progress payment percentage rate shown in paragraph (a)(1) of the progress payment clause.

Item 6B. LIQUIDATION RATE — Enter the progress payment liquidation rate shown in paragraph (b) of the progress payment clause, using three digits - Example: show 80% as 800 - show 72.3% as 723.

Item 7. DATE OF INITIAL AWARD — Enter the last two digits of the calendar year. Use two digits to indicate the month. Example: show January 1982 as 82/01.

Item 8A. PROGRESS PAYMENT REQUEST NO. — Enter the number assigned to this request. All requests under a single contract must be numbered consecutively, beginning with 1. Each subsequent request under the same contract must continue in sequence, using the same series of numbers without omission.

Item 8B. Enter the date of the request.

SECTION II — GENERAL INSTRUCTIONS. DATE. In the space provided in the heading enter the date through which costs have been accumulated from inception for inclusion in this request. This date is applicable to item entries in Sections II and III.

Cost Basis. For all contracts with small business concerns, the base for progress payments is total costs incurred. For contracts with concerns other than Small Business, the progress payment base will be the total recorded paid costs, together with the incurred costs per the Computation of Amounts paragraph of the progress payment clause in FPR 1-30.510-1(a) or FAR 52.232-16, as appropriate. Total costs include all expenses paid and incurred, including applicable manufacturing and production expense, general and administrative expense for performance of contract, which are reasonable, allocable to the contract, consistent with sound and generally accepted accounting principles and practices, and which are not otherwise excluded by the contract.

Manufacturing and Production Expense, General and Administrative Expense. In connection with the first progress payment request on a contract, attach an explanation of the method, bases and period used in determining the amount of each of these two types of expenses. If the method, bases or periods used for computing these expenses differ in subsequent requests for progress payments under this contract, attach an explanation of such changes to the progress payment request involved.

Incurred Costs Involving Subcontractors for Contracts with Small Business Concerns. If the incurred costs eligible for progress payments under the contract include costs shown in invoices of subcontractors, suppliers and others, that portion of the costs computed on such invoices can only include costs for: (1) completed work to which the prime contractor has acquired title; (2) materials delivered to which the prime contractor has acquired title; (3) services rendered; and (4) costs billed under cost reimbursement or time and material subcontracts for work to which the prime contractor has acquired title.

SECTION II — SPECIFIC INSTRUCTIONS

Item 9. PAID COSTS ELIGIBLE UNDER PROGRESS PAYMENT CLAUSE — Line 9 will not be used for Small Business Contracts.

BILLING CODE 6820-61-C

For large business contracts, costs to be shown in Item 9 shall include only those recorded costs which have resulted at time of request in payment made by cash, check, or other form of actual payment for items or services purchased directly for the contract. This includes items delivered, accepted and paid for, resulting in liquidation of subcontractor progress payments.

Costs to be shown in Item 9 are not to include advance payments, downpayments, or deposits, all of which are not eligible for reimbursement; or progress payments made to subcontractors, suppliers or others, which are to be included in Item 14. See "Cost Basis" above.

Item 10. INCURRED COSTS ELIGIBLE UNDER PROGRESS PAYMENT CLAUSE — For all Small Business Contracts, Item 10 will show total costs incurred for the contract.

Costs to be shown in Item 10 are not to include advance payments, downpayments, deposits, or progress payments made to subcontractors, suppliers or others.

For large business contracts, costs to be shown in Item 10 shall include all costs incurred (see "Cost Basis" above) for: materials which have been issued from the stores inventory and placed into production process for use on the contract; for direct labor; for other direct in-house costs; and for properly allocated and allowable indirect costs as set forth under "Cost Basis" above.

Item 12a. Enter the total contract costs incurred to date; if the actual amount is not known, enter the best possible estimate. If an estimate is used, enter-(E) after the amount.

Item 12b. Enter the estimated cost to complete the contract. The estimate may be the last estimate made, adjusted for costs incurred since the last estimate; however, estimates shall be made not less frequently than every six months.

Items 14a through 14e. Include only progress payments on subcontracts which conform to progress payment provisions of the prime contract.

Item 14a. Enter only progress payments actually paid.

Item 14b. Enter total progress payments recouped from subcontractors.

Item 14d. For Small Business prime contracts, include the amount of unpaid subcontract progress payment billings which have been approved by the contractor for the current payment in the ordinary course of business. For other contracts, enter "0" amount.

SECTION III — SPECIFIC INSTRUCTIONS. This Section must be completed only if the contractor has received advance payments against this contract, or if items have been delivered, invoiced and accepted as of the date indicated in the heading of Section II above. EXCEPTION: Item 27 must be filled in by the Contracting Officer.

Item 20a. Of the costs reported in Item 11, compute and enter only costs which are properly allocable to items delivered, invoiced and accepted to the applicable date. In order of preference, these costs are to be computed on the basis of one of the following: (a) The actual unit cost of items delivered, giving proper consideration to the deferment of the starting load costs or, (b) projected unit costs (based on experienced costs plus the estimated cost to complete the contract), where the contractor maintains cost data which will clearly establish the reliability of such estimates.

Item 20d. Enter amount from 14e.

Item 21a. Enter the total billing price, as adjusted, of items delivered, accepted and invoiced to the applicable date.

Item 23. Enter total progress payments liquidated and those to be liquidated from billings submitted but not yet paid.

Item 25. Self-explanatory. (NOTE: If the entry in this item is a negative amount, there has been an overpayment which requires adjustment.)

Item 26. Self-explanatory, but if a lesser amount is requested, enter the lesser amount.

SPECIAL INSTRUCTIONS FOR USE UNDER FEDERAL ACQUISITION REGULATION (FAR).

Items 20 and 20a. Delete the references to a(3)(i) of the progress payment clause.

Items 21 and 21a. Delete the references to a(3)(ii) of the progress payment clause.

SPECIMEN

PART 1-30—CONTRACT FINANCING

The table of contents for Part 1-30 is amended to remove 4 entries and revise 11 entries as follows:

1-30.502-1 [Removed]
1-30.503 Customary progress payments.
1-30.503-1 Uniform standard percentages.
1-30.503-2 Applicability of percentages.
1-30.503-3 Indefinite quantity contracts and basic ordering agreements.
1-30.504-5 Non-responsive bids—uninvited progress payment condition.
1-30.504-6 [Removed]
1-30.510-2 [Removed]
1-30.511-2 Uniform standard percentages—firms not small business concerns—paragraphs (a) and (b) of clause.
1-30.511-3 Uniform standard percentages—firms not small business concerns—paragraphs (a) and (b) of clause.
1-30.511-4 Unusual percentages.
1-30.511-5 Other protective provisions.
1-30.511-6 Provisional increases in contract price.
1-30.521-2 [Removed]
1-30.529 Standard Form 1443, Contractor's Request for Progress Payment.

Subpart 1-30.1—Forms of Financing

Section 1-30.104-1 is revised to read as follows:

§ 1-30.104-1 Letters of credit.

Whenever the criteria set forth by the Department of the Treasury in Department Circular No. 1075, 4th Revision, 42 FR 62927, December 14, 1977 (31 CFR Part 205) are met, the letter of credit method of financing advance payments must be used unless waived by the Department of the Treasury.

Subpart 1-30.2—Basic Policies

Section 1-30.209 is amended to revise paragraph (e) to read as follows:

§ 1-30.209 Order of preference.

* * * * *

(e) Advance payments (§ 1-30.408). However, see § 1-30.401(b) for guidance on the use of advance payments for research contracts with educational institutions.

Subpart 1-30.4—Advance Payments

1. Section 1-30.401 is revised to read as follows:

§ 1-30.401 Types of contracts that may have advance payments.

(a) Advance payments may be made on any approved type of contract.

(b) In view of the nonprofit position of educational institutions, and the Government objective of strengthening the research capabilities of these institutions, all agencies shall make advance payments to them in reasonable amounts on contracts for research, whenever practical, in all cases where the agency is authorized by law to do so. (See §§ 1-30.403, 1-30.404, and 1-30.408.)

2. Section 1-30.408-1 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1-30.408-1 Use of letter of credit method of financing.

(a) Unless a waiver has been obtained from the Department of the Treasury, the letter of credit method of financing advance payments must be used whenever the criteria set forth in Treasury Department Circular No. 1075 (31 CFR Part 205) and promulgated in regulations contained in Volume I, Part VI, Chapter 2000, of the Treasury Fiscal Requirements Manual are met. The letter of credit method of financing advance payments shall be employed in accordance with agency procedures and Department of the Treasury regulations whenever the agency has, or expects to have, a continuing relationship with a recipient organization for at least 1 year, involving annual advances aggregating at least $120,000. Agency procedures may be applicable to an entire agency, a major organizational unit of an agency (e.g. bureau, service or administration), any component of a major unit, or a lower tier element of such component. The letter of credit procedures may apply to the financing of all contracts and/or grants, or classes of contracts and/or grants between a recipient organization and an agency or any of its components. Since the letter of credit method enables the recipeint organization to withdraw cash from the Treasury concurrently with and as frequently as disbursements are made by the recipient organization, there need be no time lag between drawdowns from the Treasury and disbursements by the recipient organization. Therefore, it is unnecessary for the recipient organization to maintain undisbursed balances of Federal cash to provide for an element of bank float other than small balances necessary to accommodate Treasury minimum limitations on individual drawdowns.

(b) Contracts shall require such adequate security for funds advanced as may be considered appropriate for the protection of the Government under the circumstances of each case, but in any event, the financial management system of the recipient organization shall provide for effective control over and accountability for all Federal funds in accordance with governing regulations of the Treasury Department. See § 1-30.413 and 31 CFR Part 205 (also appearing as Department of the Treasury Circular No. 1075, 4th Revision, 42 FR 62927, December 14, 1977).

* * * * *

Subpart 1-30.5—Progress Payments Based on Costs

1. Section 1-30.500-1 is revised to read as follows:

§ 1-30.500-1 Exclusions.

This subpart does not apply to (a) cost-reimbursement type contracts, except as to progress payments to subcontractors and suppliers thereunder (see § 1-30.514), or (b) contracts for construction or for shipbuilding or ship conversion, alteration, or repair, when such contracts provide for progress payments based on a percentage or stage of completion.

2. Section 1-30.502 is revised to read as follows:

§ 1-30.502 General.

(a) *Obligations.* Nothing in these regulations shall be construed to authorize payment of more than the amount obligated on a contract.

(b) *Requests for proposals.* In connection with procurement by negotiation, requests for proposals shall state that contract provision for progress payments will be made in conformity with regulations, and that the need for progress payments conforming to regulations will not be considered as a handicap or adverse factor in the award of contracts. Requests for proposals shall not state a liquidation rate for progress payments (see § 1-30.512).

§ 1-30.502-1 [Removed]

3. Section 1-30.502-1 is removed.

4. Section 1-30.503 is revised to read as follows:

§ 1-30.503 Customary progress payments.

(a) Certain contracts may require a contractor to incur predelivery or unbillable partial performance expenditures that will have a material impact on the contractor's working funds. These include production contracts which involve a long "lead time" or preparatory period between the beginning of work and the first production delivery, normally involving 4 months or more for small business concerns and 6 months or more for firms which are not small business concerns. They also include some contracts for research and development and some contracts for services which have a long time period, of approximately 4 months or more for small business concerns and 6 months or more for firms which are not small business concerns, between the beginning of work and the first

opportunity to bill and receive payment for a significant element of contract performance. Progress payments are customary at (1) the uniform standard percentages of total costs (§ 1–30.503–1), (2) the uniform cost base (§ 1–30.509–5), (3) the frequency of payment established in the progress payment clause (§ 1–30.510–1), and (4) the ordinary liquidation method (§ 1–30.512–1) unless changed to the alternate method as provided in § 1–30.512–2 on this category of contracts and letter contracts comtemplating a definitive fixed price type of contract. Length of lead time, or length of the time period within which billings for deliveries or for significant partial performance cannot be accomplished, are not factors in qualifying letter contracts and their superseding definitive contracts for customary progress payments. Contract financing arrangements other than those set forth in this paragraph are regarded as unusual, and not within the category of customary progress payments (§ 1–30.505).

(b) The long lead time or preparatory period in these cases, and the accompanying predelivery or pre-partial performance billing expenditures that may have a material impact on the contractor's working funds, and the equivalent circumstances of letter contracts and their superseding definitive contracts, are regarded as making these customary progress payments reasonably necessary. The general preference for private financing is not applicable to this class of cases. Provision for customary progress payments will be made as a matter of course when requested by contractors who are known (from experience or adequate preaward investigation) to be reliable, competent capable of satisfactory performance, in satisfactory financial condition, and to have an adequate accounting system and controls. In such cases, it is not necessary to require projections of cash receipts and expenditures or other demonstration of actual reasonable need for progress payments. However, in order to minimize administrative effort and expense, progress payments will be discouraged on relatively small contracts of the stronger and larger contractors who are not small business concerns; e.g., contracts for less than $1 million, unless the circumstances of a group of such contracts, for contemporaneous performance, make such contracts the approximate equivalent of a larger contract that would have a material impact on the contractor's working funds. If a small business concern and the contract involved meet the above standards for customary progress payments, the smallness of the contract shall not deter the making of provision for customary progress payments to such small business concern.

5. Section 1–30.503–1 is revised and the caption changed to read as follows:

§ 1–30.503–1 Uniform standard percentages.

The uniform standard progress payment rate is 90 percent of total costs for firms which are not small business concerns, and 95 percent of total costs for small business concerns, whether or not awarded by formal advertising. Higher percentages will be regarded as unusual (§ 1–30.505) and not within the category of customary progress payments. No percentage higher than the uniform standard progress payment may be offered in any solicitation unless approved in advance in accordance with § 1–30.505.

6. Section 1–30.503–2 is revised to read as follows:

§ 1–30.503–2 Applicability of percentages.

The uniform standard percentages authorized by § 1–30.503–1 apply to new contracts; new procurement effected by supplements, amendments, or other modifications of existing contracts; definitive contracts superseding letter contracts; contracts effecting new procurement under basic agreements; orders or other instruments under basic ordering agreements or indefinite quantity contracts; all supplements, amendments, or other modifications which affect or provide for progress payments; and any outstanding contracts which contain optional provision as to progress payment percentages. Higher percentages for new contracts will be regarded as unusual (§ 1–30.505) and not within the category of customary progress payments.

7. Section 1–30.503–3 is revised to read as follows:

§ 1–30.503–3 Indefinite quantity contracts and basic ordering agreements.

(a) Ordinarily, progress payments will not be undertaken in indefinite quantity contracts or basic ordering agreements which do not provide for payments and liquidation by a single office. Otherwise, for indefinite quantity contracts (§ 1–30.409(c)) and basic ordering agreements (§ 1–3.410–3) contemplating requisitions, delivery orders, work orders, task orders, job orders or their equivalent, if the contractor meets all other requirements for customary progress payments, the decision as to whether progress payments come within the customary category will depend upon estimates of the amount of work expected to be done, and the production lead time expected to be necessary for the major part of the work anticipated. In these cases, provision for progress payments in the indefinite quantity contract or basic ordering agreement may be deemed customary if the amounts involved, and the production lead time, result in conditions substantially equivalent to those required for authorization of customary progress payments. Insofar as practicable, the progress payment provision of an indefinite quantity contract or basic ordering agreement shall fix a single liquidation rate to be applicable to all procurement actions under that agreement. The standards for unusual progress payments govern when progress payments are not of the customary type.

(b) Progress payments made under indefinite quantity contracts and basic ordering agreements shall normally be processed on the basis of individual orders or calls. Except as provided below, for progress payment purposes, each order, call, or equivalent procurement action with progress payments, will be treated as a separate contract. Alternatively, at the contractor's request, but with the specific approval of the contracting officer provision may be made to process progress payments against the basic contract/agreement. Whenever the contract/agreement method is used, the contractor shall be required to submit a supporting schedule for each Contractor's Request For Progress Payment (see § 1–30.529), identifying the costs applicable to each call or order. Subject to the above restrictions, for progress payment purposes, all procurement actions under the basic contract (1) involving progress payments on a procurement action, (2) having a single uniform liquidation rate, and (3) for payment by a single paying office, may be grouped and aggregated so that the contract price, costs, payments, and liquidations will be handled in the same way as if all such procurement actions constituted work under a single fixed-price type contract.

8. Section 1–30.504–1 is amended to revise paragraphs (a)(2), (b), and (c) to read as follows:

§ 1–30.504–1 Progress payment provision in invitations for bids.

(a) * * *

(2) Provision for progress payments ordinarily will not be made in invitations for bids when the procurement is for quick turnover items of kinds for which predelivery financing

by progress payments is not the custom or practice on sales by members of the industry or private commercial customers, such as: (i) Subsistence, (ii) clothing and apparel, (iii) "off-the-shelf" items, and (iv) standard commercial items or equivalent items (including medical and dental supplies), not requiring substantial accumulation of predelivery expenditures.

* * * * *

(b) When progress payments are contemplated, the invitations for bids should include the notice set forth in § 1–30.504–4(a). This notice to bidders may be modified as provided in paragraph (c) of this section.

(c) In unusual circumstances, the contracting officer may consider it to be in the interest of the Government to contemplate progress payments, but to provide for application of the criteria specified in § 1–30.504–1(a)(1) after the opening of bids. In such event, the invitations shall state that upon written request by the prospective contractor a progress payment clause, of a type considered appropriate to the circumstances, will be included in the contract at the time of award if the contracting officer considers the contractor eligible under applicable regulations. (See § 1–30.504–4(b) for appropriate notice to bidders.)

9. Section 1–30.504–2 is revised to read as follows:

§ 1–30.504–2 Small business restricted advertising.

The policy and standards set forth in § 1–30.504–1 also apply to procurement by "Small Business Restricted Advertising" and for procurement pursuant to § 1–30.504–3. When progress payments are contemplated in these cases, provision will be made for progress payment percentage at 95 percent of total costs.

10. Section 1–30.504–4 is amended to revise paragraph (a) to read as follows:

§ 1–30.504–4 Notice to bidders.

(a) Those invitations for bids that make provision for progress payments pursuant to § 1–30.504–1(b) should contain substantially the following notice to bidders:

Progress Payments*

The need for progress payments conforming to regulations (Part 1–30, Federal Procurement Regulations) will not be considered as a handicap or adverse factor in the award of contracts. Authorized progress payments will not be a factor for evaluation of bids. The appropriate "Progress Payment" clause attached hereto will be included in the contract awarded in the manner herein provided; however, the clause shall be inoperative during the time the contractor's accounting system and controls are determined by the Government to be inadequate for segregation and accumulation of contract costs. For small business concerns the clause designated "Progress Payment for Small Business Concerns" (§ 1–30.510–1(b)) shall be used for such contractors. For contractors who are not small business concerns, the clause designated "Progress Payment for Other Than Small Business Concerns" (§ 1–30.510–1(a)) shall be used. (End of notice)

*Do not use the last sentence of this notice for procurements mentioned in §§ 1–30.504–2 and 1–30.504–3.

* * * * *

11. Section 1–30.504–5 is revised and § 1–30.504–6 is removed as follows:

§ 1–30.504–5 Nonresponsive bids—uninvited progress payment condition.

To minimize the possibility of misunderstandings, the recipients of invitations for bids, or those included on bidders lists, should be informed and kept aware that when invitations for bids do not provide for progress payments, progress payment clauses cannot be included in the contract at time of award, and that bids conditioned upon provision for progress payments will have to be rejected as nonresponsive. This precautionary warning notice may be included in invitations for bids, may accompany invitations for bids, or may be otherwise circulated or made known to prospective bidders by such means as are considered appropriate. Also, prospective bidders who are not small business concerns should be given appropriate precautionary warning notice that when invitations for bids provide for progress payments for small business concerns only (§ 1–30.504–3), progress payment provision cannot be made for contractors who are not small business concerns, and that bids of those who are not small business concerns, if conditioned upon provision for progress payments, will have to be rejected as nonresponsive.

§ 1–30.504–6 [Removed]

12. Section 1–30.505 is amended to revise paragraph (b) to read as follows:

§ 1–30.505 Unusual progress payments—standards—procedure.

* * * * *

(b) Such cases must involve a preparatory period requiring contractor's predelivery expenditures that are large in relation to the contract price and in relation to the contractor's working capital and credit. Contract provisions for progress payments in this category will be only supplementary to private financing, including guaranteed loans, in amounts necessary for contract performance. The percentage rates for progress payments in this category will be determined on a minimum basis commensurate with the contractor's production schedule requirements and minimum inventory lead time, with due regard to the contractor's projected cash needs, cash resources, and their planned application.

* * * * *

13. Section 1–30.508 is revised to read as follows:

§ 1–30.508 Advance payments.

When advance payments and progress payments are authorized in the same contract, progress payment percentages shall not exceed the uniform standard percentages in §§ 1–30.503 and 1–30.504. In these cases, the words "less unliquidated advance payments" may be deleted from paragraphs (a)(4)(ii) of the progress payment clause for other than small business concerns (see § 1–30.510–1(a)) and (a)(3)(ii) of the progress payment clause for small businesses (see § 1–30.510–1(b)), in accordance with agency procedures.

14. Section 1–30.509–4 is revised to read as follows:

§ 1–30.509–4 Costs.

For progress payment purposes, costs, except as otherwise limited in this paragraph, include all expenses of contract performance which are reasonable, allocable to the contract, consistent with sound and generally accepted accounting principles and practices, and not excluded by the contract. Limitations on costs that may be accepted for progress payments are contained in the clauses in § 1–30.510–1.

15. Section 1–30.509–5 is revised to read as follows:

§ 1–30.509–5 Incurred costs.

(a) Incurred costs are those costs identified through the use of the accrual method of accounting and reporting. As to invoices, incurred costs include only invoices for (1) completed work to which the prime contractor has acquired title, (2) materials delivered (to which the prime contractor has acquired title), (3) services rendered, (4) costs billed under cost reimbursement or time and material subcontracts for work to which the prime contractor has acquired title, and (5) invoices for progress payments to subcontractors, which have been paid or approved for current payment in the ordinary course of business (as specified in the prime contract), all properly recorded on the books of the contractor and identified with the contracts. Costs incurred are exclusively costs of direct labor, direct material, and direct

services identified with and necessary for the performance of the contract, and also all properly allocable and allowable overhead (indirect) costs recorded on the books of the contractor.

(b) However, for those contractors who elected to use the special transition method provided in Cost Accounting Standard (CAS) 410, "Allocation of Business Unit General and Administrative Expenses to Final Cost Objectives," General and Administrative Expenses (G&A) shall not be included in incurred costs eligible for progress payments until the work-in-process inventories of those contracts entered into after the applicability date of CAS 410, exceed the amounts contained in the CAS 410 suspense account and then limited to the contract's pro rata share of the G&A allocable to such excess. This limitation shall not apply where the CAS 410 suspense account is less than $5 million.

(c) Facilities capital cost of money, which is recognized as an allowable cost by § 1–15.205–51, shall be deemed an incurred cost for progress payment purposes. When this cost is allocated in accordance with applicable regulations and records are maintained in accordance with § 1–15.205–51, it shall be a "properly allocable and allowable indirect cost as shown by records maintained by the contractor" within the meaning of that requirement as included in the Computation of Amounts provision of the appropriate Progress Payment clause set forth in § 1–30.510–1.

(d) For the purpose of progress payments to other than small business concerns in connection with items or services purchased directly for the contract, costs must be paid as well as incurred as shown by payment made by cash, check, interdivisional notices of payment, or other form of actual payment.

16. Section 1–30.509–7 is revised to read as follows:

§ 1–30.509–7 Contract price.

The term "contract price" means the total amount fixed by the contract (other than any portion of the contract specifically providing for cost reimbursement only), as amended, to be paid for complete performance of the contract. If the contract provides for economic price adjustment or for redetermination of price, this term means the initial price until changed and not the ceiling price. If the contract is of the incentive type, the term means the target or billing price, as amended, until final pricing. This definition shall also apply to incentive type subcontracts containing a progress payment clause. For letter contracts and similar preliminary contractual instruments, this term means the maximum expenditure authorized by the contract, as amended.

17. Section 1–30.510 is revised to read as follows:

§ 1–30.510 Contract clauses.

Subject to the instructions in §§ 1–30.511 and 1–30.512, the Progress Payment clauses in § 1–30.510–1 shall be used when payments are to be made to a contractor based upon a percentage of costs. The clause contained in § 1–30.510–1(a) shall be used in contracts with other than small business concerns. The clause contained in § 1–30.510–1(b) shall be used in contracts with small business concerns.

18. Section 1–30.510–1 is revised to read as follows:

§ 1–30.510–1 Total costs clauses.

One of the following clauses shall be used whenever progress payments are to be based upon a percentage of costs in accordance with the instructions in § 1–30.510:

(a) *Progress payment clause for other than small business concerns.*

Progress Payment for Other Than Small Business Concerns

Progress payments shall be made to the Contractor when requested as work progresses, but not more frequently than monthly, in amounts approved by the Contracting Officer upon the following terms and conditions:

(a) *Computation of amounts.*

(1) Unless a smaller amount is requested, each progress payment shall be (i) 90 percent of the amount of the Contractor's total costs which, except as provided in (a)(2) below, shall include only those recorded costs which result, at the time of the request, from payment made by cash, check, or other form of actual payment for items or services purchased directly for the contract, together with (when the Contractor is not delinquent in payment of costs of contract performance in the ordinary course of business) cost incurred, but not necessarily paid, for materials which have been issued from the Contractor's stores inventory and placed in the production process for use on the contract, for direct labor, for direct travel, for other direct inhouse costs, and for properly allocable and allowable indirect costs, all as shown by records maintained by the Contractor for purposes of obtaining payment under Government contracts plus (ii) the amount of progress payments which have been paid to Contractor's subcontractors and other divisions as provided in (j) below; all less the sum of previous progress payments.

(2)(i) With respect to costs of pension, profit sharing, and employee stock ownership plan contributions, when these contributions are paid by the Contractor to the pension, profit sharing, or employee stock ownership plan funds less frequently than quarterly, accruals of the costs of these contributions shall be excluded from the Contractor's total costs for progress payment purposes until such costs are paid. If pension, profit sharing, and employee stock ownership plan contributions are paid on a quarterly or more frequent basis, accruals of costs of these contributions may be included in the Contractor's total costs for progress payment purposes *provided* these contributions are paid to the pension, profit sharing, and employee stock ownership plan funds within 30 days after the close of the period covered by the payment. If payments are not made to the pension, profit sharing, and employee stock ownership plan funds within such 30 day period, these costs shall be excluded from the Contractor's total costs for progress payment purposes until payment therefor has been made.

(ii) For those Contractors who elected to use the special transition method provided in Cost Accounting Standard (CAS) 410, "Allocation of Business Unit General and Administrative Expenses to Final Cost Objectives", general and administrative expenses (G&A) shall not be included in incurred costs eligible for progress payments until the work-in-process inventories of those contracts entered into after the applicability date of CAS 410, exceed the amounts contained in the CAS 410 suspense account and then limited to this contract's pro rata share of the G&A allocable to such excess. This limitation shall not apply where the CAS 410 suspense account is less than 5 million dollars.

(3) The Contractor's total costs ((a)(1)(i)) shall be reasonable, allocable to this contract, and consistent with sound and generally accepted accounting principles and practices. However, such costs shall not include (i) any costs incurred by subcontractors or suppliers, or (ii) any payments or amounts payable to subcontractors or suppliers, except for completed work (including partial deliveries) to which the Contractor has acquired title and except for amounts paid or payable under cost-reimbursement or time and material subcontracts for work to which the Contractor has acquired title, or (iii) costs ordinarily capitalized and subject to depreciation or amortization except for the properly depreciated or amortized portion of such costs.

(4) The amount of unliquidated progress payments shall not exceed the lesser of (i) 90 percent of the costs mentioned in (a)(1)(i) above, plus any unliquidated progress payments mentioned in item (a)(1)(ii) above, both of which are applicable only to the supplies and services not yet delivered and invoiced to and accepted by the Government, or (ii) 90 percent of the total contract price of supplies and services not yet delivered and invoiced to and accepted by the Government, less unliquidated advance payments.

(5) The aggregate amount of progress payments made shall not exceed 90 percent of the total contract price.

(6) If at any time a progress payment or the unliquidated progress payments exceed the amount permitted by this paragraph (a), the Contractor shall pay the amount of such excess to the Government upon demand.

(b) *Liquidation.* Except as provided in the clause entitled "Termination for Convenience

of the Government", all progress payments shall be liquidated by deducting from any payment under this contract, other than advance or progress, the amount of unliquidated progress payments, or 90 percent, or the applicable percentage (calculated in accordance with references in the *footnote at the end of the clause) of the gross amount invoiced, whichever is less. Repayment to the Government required by a retroactive price reduction will be made after calculating liquidations and payments on past invoices at the reduced prices and adjusting the unliquidated progress payments accordingly. The Government reserves the right to unilaterally change from the ordinary liquidation rate to the alternate rate when deemed appropriate for proper contract financing.

(c) *Reduction or suspension.* The Contracting Officer may reduce or suspend progress payments, or liquidate them on a rate higher than the percentage stated in (b) above, or both, whenever he finds upon substantial evidence that the Contractor (1) has failed to comply with any material requirement of this contract, (2) has so failed to make progress, or is in such unsatisfactory financial condition, as to endanger performance of this contract, (3) has allocated inventory to this contract substantially exceeding reasonable requirements, (4) is delinquent in payment of the costs of performance of this contract in the ordinary course of business, (5) has so failed to make progress that the unliquidated progress payments exceed the fair value of the work accomplished on the undelivered portion of this contract, or (6) is realizing less profit than the estimated profit used for establishing a liquidation percentage in paragraph (b), if that liquidation percentage is less than the percentage stated in paragraph (a)(1).

(d) *Title.* Immediately, upon the date of this contract, title to all parts; materials; inventories; work in process; special tooling as defined in the clause of this contract entitled "Special Tooling"; special test equipment and other special tooling to which the Government is to acquire title pursuant to any other provision of this contract; nondurable (i.e., noncapital) tools, jigs, dies, fixtures, molds, patterns, taps, gauges, test equipment, and other similar manufacturing aids title to which is not obtained as special tooling pursuant to this paragraph; and drawings and technical data (to the extent delivery thereof to the Government is required by other provisions of this contract); theretofore acquired or produced by the Contractor and allocable or properly chargeable to this contract under sound and generally accepted accounting principles and practices shall forthwith vest in the Government; and title to all like property thereafter acquired or produced by the Contractor and allocable or properly chargeable to this contract as aforesaid shall forthwith vest in the Government upon said acquisition, production or allocation. Nothwithstanding that title to property is in the Government through the operation of this clause, the handling and disposition of such property shall be determined by the applicable provisioins of this contract such as: the Default clause and paragraph (h) of this clause; Termination for Convenience of the Government clause; and the Special Tooling clause. Current production scrap may be sold by the Contractor without approval of the Contracting Officer and the proceeds shall be credited against the costs of contract performance. With the consent of the Contracting Officer and on terms approved by him, the Contractor may acquire or dispose of property to which title is vested in the Government pursuant to this clause, and in that event, the costs allocable to the property so transferred from this contract shall be eliminated from the costs of contract performance and the Contractor shall repay to the Government (by cash or credit memorandum) an amount equal to the unliquidated progress payments allocable to the property so transferred. Upon completion of performance of all the obligations of the Contractor under this contract, including liquidation of all progress payments hereunder, title to all property (or the proceeds thereof), which had not been delivered to and accepted by the Government under this contract or which had not been incorporated in supplies delivered to and accepted by the Government under this contract, and to which title has vested in the Government under this clause, shall vest in the Contractor. The provisions of this contract referring to or defining liability for Government-furnished property shall not apply to property to which the Government shall have acquired title solely by virtue of the provisions of this clause.

(e) *Risk of loss.* Except to the extent that the Government shall have otherwise expressly assumed the risk of loss of property, title to which vests in the Government pursuant to this clause, in the event of the loss, theft or destruction of or damage to any such property before its delivery to and acceptance by the Government, the Contractor shall bear the risk of loss and shall repay the Government an amount equal to the unliquidated progress payment based on costs allocable to such lost, stolen, destroyed or damaged property.

(f) *Control of costs and property.* The Contractor shall maintain an accounting system and controls adequate for the proper administration of this clause.

(g) *Reports and information-access to records.* Insofar as pertinent to the administration of this clause, the Contractor will (1) furnish promptly such relevant reports, certificates, financial statements, and other information as may be reasonably requested by the Contracting Officer, and (2) give the Government reasonable opportunity to examine and verify his books, records and accounts.

(h) *Special provisions regarding default.* If this contract is terminated pursuant to the clause entitled "Default," (1) the Contractor shall, upon demand, pay the Government the amount of unliquidated progress payments, and (2) with respect to all property as to which the Government elects not to require delivery under the clause entitled "Default," title shall vest in the Contractor upon full liquidation of progress payments, and the Government shall be liable for no payment except as provided by the "Default" clause.

(i) *Reservations of rights.* The rights and remedies of the Government provided in this clause shall not be exclusive, and are in addition to any other rights and remedies provided by law or under this contract. No payment, or vesting of title pursuant to this clause, shall excuse the Contractor from performance of his obligations under this contract, nor constitute a waiver of any of the rights and remedies of the parties under this contract. No delay or failure of the Government in exercising any right, power or privilege under this clause shall affect any such right, power or privilege, nor shall any single or partial exercise thereof preclude or impair any further exercise thereof or the exercise of any other right, power or privilege of the Government.

(j) *Progress payments to subcontractors.*

(1) The amounts mentioned in item (a)(1)(ii) of this clause shall be all progress payments paid by the Contractor to his subcontractors or other divisions and remaining unliquidated when under subcontracts or interdivisional orders which conform to (2) below.

(2) Subcontracts or interdivisional orders on which progress payments to subcontractors or other divisions may be included in the base for progress payments pursuant to paragraph (a) of this clause are limited to those subcontracts in which there is expected to be a long "lead time" between the beginning of work and the first delivery, approximating four months or more for small business concerns and six months or more for firms which are not small business concerns, and in which the provisions regarding progress payments are substantially similar to and as favorable to the Government as this "Progress Payment" clause, (except that in the case of those subcontractors which are small business concerns, a "Progress Payment" clause substantially similar to that contained in § 1–30.510–1(b) of the Federal Procurement Regulations (FPR) may be used). Progress payment rates for subcontractors shall be the uniform, standard progress payment rate under FPR § 1–30.503–1. All rights of the subcontractor with respect to all property to which the Government has title under the subcontract will be made subordinate to the rights of the Government to require delivery of such property to it in the event of default by the Contractor under this contract or in the event of the bankruptcy or insolvency of the subcontractor.

(3) The Government agrees that any proceeds received by it from property to which it has acquired title by virtue of such provisions in any subcontract shall be applied to reduce the amount of unliquidated progress payments made by the Government to the Contractor under this contract. In the event the Contractor fully liquidates such progress payments made by the Government to him hereunder and there are progress payments to any subcontractors which are unliquidated, the Contractor shall be subrogated to all the Government's rights by virtue of such provisions in the subcontract or subcontracts involved as if all such rights had been thereupon assigned and transferred to the Contractor.

(4) To facilitate small business participation in subcontracting under this

contract, the Contractor agrees to offer and provide progress payments to those subcontractors that are small business concerns, in conformity with the standards for customary progress payments stated in § 1–3.503 of the FPR as in effect on the date of this contract. The Contractor further agrees that the need for such progress payments will not be considered as a handicap or adverse factor in the award of subcontracts.

(End of clause)

*See §§ 1–30.512–2 and 1–30.512–3 for calculation of alternate liquidation percentages. For contractors who elected to use the transition method in Appendix A of CAS 410, see §§ 1–30.512–1 and 1–30.512–3(f) for calculation of adjusted ordinary and alternate liquidation percentages.

(b) *Progress payment clause for small business concerns.*

Progress Payment for Small Business Concerns

Progress payments shall be made to the Contractor when requested as work progresses, but not more frequently than monthly, in amounts approved by the Contracting Officer under the following terms and conditions.

(a) *Computation of amounts.*

(1) Unless a smaller amount is requested, each progress payment shall be (i) 95 percent of the amount of the Contractor's total costs incurred under this contract, except as provided herein with respect to costs of pension contributions, plus (ii) the amount of progress payments to subcontractors as provided in (j) below; all less the sum of previous progress payments. With respect to costs of pension contributions, when pension contributions are paid by the Contractor to the retirement fund less frequently than quarterly, accruals of the costs of these pension contributions shall be excluded from the Contractor's total costs for progress payment purposes until such costs are paid. If pension contributions are paid on a quarterly or more frequent basis, accruals of the costs of these pension contributions may be included in the Contractor's total costs for progress payment purposes provided that the pension contributions are paid to the retirement fund within 30 days after the close of the period covered by the payment. If payments are not made to the fund within such 30 day period, pension contribution costs shall be excluded from the Contractor's total costs for progress payment purposes until payment therefor has been made.

(2) The Contractor's total costs ((a)(1)(i)) shall be reasonable, allocable to this contract, and consistent with sound and generally accepted accounting principles and practices. However, such costs shall not include (i) any costs incurred by subcontractors or suppliers, or (ii) any payments or amounts payable to subcontractors or suppliers, except for completed work (including partial deliveries) to which the Contractor has acquired title and except for amounts paid or payable under cost-reimbursement or time and materials subcontracts for work to which the Contractor has acquired title, or (iii) costs ordinarily capitalized and subject to depreciation or amortization except for the properly depreciated or amortized portion of such costs.

(3) The amount of unliquidated progress payments shall not exceed the lesser of (i) 95 percent of the costs mentioned in (a)(1)(i) above, plus any unliquidated progress payments mentioned in item (a)(1)(ii) above, both of which are applicable only to the supplies and services not yet delivered and invoiced to and accepted by the Government, or (ii) 95 percent of the total contract price of supplies and services not yet delivered and invoiced to and accepted by the Government, less unliquidated advance payments.

(4) The aggregate amount of progress payments made shall not exceed 95 percent of the total contract price.

(5) If at any time a progress payment or the unliquidated progress payments exceed the amount permitted by this paragraph (a), the Contractor shall pay the amount of such excess to the Government upon demand.

(b) *Liquidation.* Except as provided in the clause entitled "Termination for Convenience of the Government," all progress payments shall be liquidated by deducting from any payment under this contract, other than advance or progress, the amount of unliquidated progress payments, or 95 percent* (See footnote at end of clause) of the gross amount invoiced, whichever is less. Repayment to the Government required by a retroactive price reduction will be made after calculating liquidations and payments on past invoices at the reduced prices and adjusting the unliquidated progress payments accordingly.

(c) *Reduction or suspension.* The Contracting Officer may reduce or suspend progress payments, or liquidate them at a rate higher than the percentage stated in (b) above, or both, whenever he finds upon substantial evidence that the Contractor (1) has failed to comply with any material requirement of this contract, (2) has so failed to make progress, or is in such unsatisfactory financial condition, as to endanger performance of this contract, (3) has allocated inventory to this contract substantially exceeding reasonable requirements, (4) is delinquent in payment of the costs of performance of this contract in the ordinary course of business, (5) has so failed to make progress that the unliquidated progress payments exceed the fair value of the work accomplished on the undelivered portion of this contract, or (6) is realizing less profit than the estimated profit used for establishing a liquidation percentage in paragraph (b), if that liquidation percentage is less than the percentage stated in paragraph (a)(1).

(d) *Title.* Immediately, upon the date of this contract, title to all parts; materials; inventories; work in process; special tooling as defined in the clause of this contract entitled "Special Tooling"; special test equipment and other special tooling to which the Government is to acquire title pursuant to any other provision of this contract; nondurable (i.e. noncapital) tools, jigs, dies, fixtures, molds, patterns, taps, gauges, test equipment, and other similar manufacturing aids title to which is not obtained as special tooling pursuant to this paragraph; and drawings and technical data (to the extent delivery thereof to the Government is required by other provisions of this contract); theretofore acquired or produced by the Contractor and allocable or properly chargeable to this contract under sound and generally accepted accounting principles and practices shall forthwith vest in the Government; and title to all like property thereafter acquired or produced by the Contractor and allocable or properly chargeable to this contract as aforesaid shall forthwith vest in the Government upon said acquisition, production or allocation. Nothwithstanding that title to property is in the Government through the operation of this clause, the handling and disposition of such property shall be determined by the applicable provisions of this contract such as: the Default clause and paragraph (h) of this clause; Termination for Convenience of the Government clause; and the Special Tooling clause. Current production scrap may be sold by the Contractor without approval of the Contracting Officer and the proceeds shall be credited against the costs of contract performance. With the consent of the Contracting Officer and on terms approved by him, the Contractor may acquire or dispose of property to which title is vested in the Government pursuant to this clause, and in that event, the costs allocable to the property so transferred from this contract shall be eliminated from the costs of contract performance and the Contractor shall repay to the Government (by cash or credit memorandum) an amount equal to the unliquidated progress payments allocable to the property so transferred. Upon completion of performance of all the obligations of the Contractor under this contract, including liquidation of all progress payments hereunder, title to all property (or the proceeds thereof) which had not been delivered to, and accepted by the Government under this contract and to which title has vested in the Government under this contract or which had not been incorporated in supplies delivered to and accepted by the Government under this contract and to which title has vested in the Government under this clause shall vest in the Contractor. The provisions of this contract referring to or defining liability for Government-furnished property shall not apply to property to which the Government shall have acquired title solely by virtue of the provisions of this clause.

(e) *Risk of loss.* Except to the extent that the Government shall have otherwise expressly assumed the risk of loss of property, title to which vests in the Government pursuant to this clause, in the event of the loss, theft or destruction of or damage to any such property before its delivery to and acceptance by the Government, the Contractor shall bear the risk of loss and shall repay the Government an amount equal to the unliquidated progress payments based on costs allocable to such lost, stolen, destroyed, or damaged property.

(f) *Control of costs and property.* The Contractor shall maintain an accounting system and controls adequate for the proper administration of this clause.

(g) *Reports and information—access to records.* Insofar as pertinent to the administration of this clause, the Contractor will (1) furnish promptly such relevant reports, certificates, financial statements, and other information as may be reasonably requested by the Contracting Officer, and (2) give the Government reasonable opportunity to examine and verify his books, records and accounts.

(h) *Special provisions regarding default.* If this contract is terminated pursuant to the clause entitled "Default," (i) the Contractor shall, upon demand, pay to the Government the amount of unliquidated progress payments and (ii) with respect to all property as to which the Government elects not to require delivery under the clause entitled "Default," title shall vest in the Contractor upon full liquidation of progress payments, and the Government shall be liable for no payment except as provided by the "Default" clause.

(i) *Reservations of rights.* The rights and remedies of the Government provided in this clause shall not be exclusive, and are in addition to any other rights and remedies provided by law or under this contract. No payment, or vesting of title pursuant to this clause, shall excuse the Contractor from performance of his obligations under this contract, nor constitute a waiver of any of the rights and remedies of the parties under this contract. No delay or failure of the Government in exercising any right, power or privilege under this clause shall affect any such right, power or privilege, nor shall any single or partial exercise thereof preclude or impair any further exercise thereof or the exercise of any other right, power or privilege of the Government.

(j) *Progress payments to subcontractors.*

(1) The amount mentioned in item (a)(1)(ii) of this clause shall be the sum of (i) all the progress payments made by the Contractor to his subcontractors and remaining unliquidated, and (ii) unpaid billings for progress payments to subcontractors which have been approved for current payment in the ordinary course of business, when under subcontracts which conform to (2) below.

(2) Subcontracts on which progress payments to subcontractors may be included in the base for progress payments pursuant to paragraph (a) of this clause are limited to those subcontracts in which there is expected to be a long "lead time" between the beginning of work and the first delivery, approximating four months or more for small business concerns and six months or more for firms which are not small business concerns, and in which the provisions regarding progress payments are substantially similar to and as favorable to the Government as the "Progress Payments" clause set forth in § 1–30.510–1(a) of the Federal Procurement Regulations (FPR), (except that in the case of those subcontractors which are small business concerns, a "Progress payment" clause substantially similar to this clause may be used). Progress payment rates for subcontractors shall be the uniform, standard progress payment rate under FPR § 1–30.503–1. All rights of the subcontractor with respect to all property to which the Government has title under the subcontract will be made subordinate to the rights of the Government to require delivery of such property to it in the event of default by the Contractor under this contract or in the event of the bankruptcy or insolvency of the subcontractor.

(3) The Government agrees that any proceeds received by it from property to which it has acquired title by virtue of such provisions in any subcontract shall be applied to reduce the amount of unliquidated progress payments made by the Government to the Contractor under this contract. In the event the Contractor fully liquidates such progress payments made by the Government to him hereunder and there are progress payments to any subcontractors which are unliquidated, the Contractor shall be subrogated to all the Government's rights by virtue of such provisions in the subcontract or subcontracts involved as if all such rights had been thereupon assigned and transferred to the Contractor.

(4) The billings described in (j)(1)(ii) above shall be paid promptly by the Contractor in the ordinary course of business, not later than a reasonable time after payment of equivalent amounts by the Government to the Contractor.

(5) To facilitate small business participation in subcontracting under this contract, the Contractor agrees to offer and provide progress payments to those subcontractors which are small business concerns, in conformity with the standards for customary progress payments stated in § 1–30.503 of the FPR, as in effect on the date of this contract. The Contractor further agrees that the need for such progress payments will not be considered as a handicap or adverse factor in the award of subcontracts.

(End of clause)

*For lower percentages for this paragraph (b) and for (a)(3)(ii) and (a)(4), see § 1–30.512–1.

§ 1–30.510–2 [Removed]

19. Section 1–30.510–2 is removed.

20. Section 1–30.511 is revised to read as follows:

§ 1–30.511 General instructions for progress payment clauses.

The following instructions apply to the clauses required by § 1–30.510 and set forth in § 1–30.510–1.

21. Section 1–30.511–2 is revised and the caption is changed to read as follows:

§ 1–30.511–2 Uniform standard percentages—firms not small business concerns—paragraphs (a) and (b) of clause.

For contracts with contractors that are not small business concerns, except as provided in § 1–30.511–4, the figure of 90 percent stated in paragraphs (a)(1)(i), (a)(4)(i), (a)(4)(ii), (a)(5) and (b) of the clause in § 1–30.510–1(a) is the uniform standard percentage for use in those paragraphs for all contracts, whether awarded on the basis of formal advertising or negotiation.

22. Section 1–30.511–3 is revised and the caption is changed to read as follows:

§ 1–30.511–3 Uniform standard percentages—small business concerns—paragraphs (a) and (b) of clause.

For contracts with small business concerns, except as provided in § 1–30.511–4, a figure of 95 percent shall be specified in paragraphs (a)(1)(i), (a)(3)(i), (a)(3)(ii), (a)(4) and (b) of the clause in § 1–30.510–1(b). This is the standard percentage for all contracts awarded to small businesses, whether on the basis of formal advertising (see §§ 1–30.504–1, 1–30.504–2, or 1–30.504–3) or negotiation.

23. Section 1–30.511–4 is revised and the caption is changed to read as follows:

§ 1–30.511–4 Unusual percentages.

For unusual progress payments (§ 1–30.505), the percentage used for paragraph (a)(1)(i) of the clauses in § 1–30.510–1 will also be specified in paragraph (a)(4)(i) of the clause for other than small business concerns (§ 1–30.510–1(a)) and in paragraph (a)(3)(i) of the clause for small business concerns (§ 1–30.510–1(b)). For these contracts, if a percentage lower than the percentage used for paragraph (a)(1)(i) is stated in paragraph (b) of the clause pursuant to § 1–30.512–2, the exact percentage stated in paragraph (b) shall also be specified in paragraphs (a)(4)(ii) and (a)(5) of the clause for other than small business concerns (§ 1–30.510–1(a)) and paragraphs (a)(3)(ii) and (a)(4) of the clause for small business concerns (§ 1–30.510–1(b)).

24. Section 1–30.511–5 is revised to read as follows:

§ 1–30.511–5 Other protective provisions.

When deemed reasonably necessary for the protection of the Government, the clauses set forth in § 1–30.510–1 may be supplemented by additional protective provisions, such as personal or corporate guarantees, subordinations or standbys of indebtedness, special bank accounts, and other protective covenants of the kinds outlined in item (r) of § 1–30.414–2. When first article approval is required, additional protective provisions shall be used reciting that, until first article approval, there shall be no progress payments, or that the aggregate of progress payments for first article costs shall be limited to a stated amount, or percentage (less than the percentage used in paragraph (a)(4) of the clause in § 1–30.510–1(a) and paragraph (a)(3) of the clause in § 1–30.510–1(b)) of the contract price.

25. Section 1–30.511–6 is revised to read as follows:

§ 1-30.511-6 Provisional increases in contract price.

Ordinarily, the definitized price shall be the basis for limiting the aggregate amount of progress payments within the meaning of "total contract price" as used in paragraph (a)(5) of the clause in § 1-30.510-1(a) and paragraph (a)(4) of the clause in § 1-30.510-1(b). An exception exists if the application of this limitation would result in an inability to pay progress payments for costs properly incurred for authorized but unpriced contractual actions pertaining to the definitized contract, or in the case of incentive-type contracts, if the contractor's costs exceed the target price. When this exception exists, the contracting officer may make a provisional increase in the contract price for the purpose of paragraph (a)(5) of the clause in § 1-30.510-1(a) and paragraph (a)(4) of the clause § 1-30.510-1(b). The provisional increase to the contract price shall not exceed the amount recorded as an obligation based upon the Government's estimate of its liability for those unpriced contractual actions.

28. Section 1-30.512 is revised to read as follows:

§ 1-30.512 Progress payment liquidation.

Controlling principles for liquidation of progress payments based on costs, and for specification of a percentage in paragraph (b) of the clauses in § 1-30.510-1 are set forth in this § 1-30.512.

27. Section 1-30.512-1 is revised to read as follows:

§ 1-30.512-1 Ordinary method.

The percentages specified in § 1-30.511-2 and § 1-30.511-3 for paragraph (b) of the Progress Payment clauses (§ 1-30.510-1) represent the ordinary method for liquidation of progress payments, i.e., the percentage for progress payments stated in paragraph (a)(1)(i) of each clause will also be the percentage for liquidation stated in paragraph (b) of such clause. However, when a contract is subject to a limitation on General and Administrative (G&A) expenses eligible for progress payments because a contractor elected to use the special transition method provided in Cost Accounting Standard 410, Allocation of Business Unit General and Administrative Expense to Final Cost Objectives, an adjusted ordinary liquidation rate will be used. The adjusted liquidation rate will be established by subtracting from the progress payment percentage stated in the contract, the percentage computed by multiplying the progress payment percentage by the results of dividing the unbilled G&A expense by the contract price. For example, if the price was $1,100,000 and the unbilled G&A was $47,600 the liquidation rate would be:

	Percent
Progress payment percentage	80.00
Less: Unbilled G&A ÷ contract price × progress payment percentage ($47,600 ÷ 1,100,000) × 90 pct	3.89
Total	86.11

These methods of liquidation are the only methods authorized for use at the inception of a contract.

28. Section 1-30.512-2 is revised to read as follows:

§ 1-30.512-2 Alternate method.

(a) The alternate method for liquidation of progress payments involves the use of a percentage rate of liquidation which will (1) effect liquidation of the amount of progress payments involved in each invoice from which liquidation of progress payments is to be made (i.e., recovery of the portion of costs for which progress payments have been made), (2) permit payment to the contractor of not more than the cost of items delivered and accepted (less allocable progress payments) and his earned profit on those items, and (3) ensure that unliquidated progress payments will not exceed the amount permitted by paragraph (a)(4) of the Progress Payment clause in § 1-30.510-1(a) and paragraph (a)(3) of the clause in § 1-30.510-1(b).

(b) Adequate consideration shall be deemed to exist in the initial negotiation of the contract for subsequent changes in the percentage of liquidation. A negotiated contract shall be amended to substitute the alternate rate of liquidation for the ordinary rate when all of the following conditions are met:

(1) Contract delivery schedule extends 18 months or more beyond the contract award date.

(2) Data on actual costs are available for the products delivered, or, if no deliveries have been made, for a performance period of at least 12 months.

(3) The contractor requests the alternate rate and furnishes data on actual cumulative costs and estimated future costs to complete the contract, which satisfactorily fulfill the requirements in § 1-30.512-2(a).

(4) The parties agree on an appropriate percentage rate of liquidation.

(5) The contractor agrees to provide updated information on an annual basis or upon request of the contracting officer and certify as to the continued validity of the alternate rate in relation to the § 1-30.512.2(a) requirements. When the above-stated conditions are met, the contracting officer shall take prompt action to amend the contract to provide for the alternate liquidation rate.

(c) If profit rates on contracts subject to price redetermination or to incentive price revision are changed by contract modification, appropriate harmonizing changes to conform to § 1-30.512-2(a) will be made at the time of such modification in the stated percentage for future progress payment liquidation. Except as done incident to modification of a profit rate on contracts subject to price redetermination or to incentive price revision, above, contracts may be amended to reduce the progress payment liquidation rate not more frequently than once in each period of twelve months. Amendments reducing liquidation rates will be retroactive as well as prospective and appropriate adjustment will be made for items theretofore delivered and associated progress payments. When a progress payment liquidation rate is changed by contract amendment, appropriate conforming changes will be made in (a)(4)(ii) and (a)(5) of the clause in § 1-30.510-1(a) and (a)(3)(ii) and (a)(4) of the clause in § 1-30.510-1(b) so that the new percentage specified in paragraph (b) of the progress payment clause will also be specified in these paragraphs.

(d) Contract amendments that substitute an alternate rate of liquidation for the ordinary rate shall include the following provision:

> On an annual basis, or more frequently as determined necessary by the contracting officer, the contractor agrees to (1) certify in relation to the requirements of § 1-30.512-2(a) of the Federal Procurement Regulations as to the continued validity of the liquidation rate in the progress payment clause as hereby amended and (2) furnish information which adequately supports the certification.

(e) Revision of an alternate liquidation rate (§ 1-30.512-3) would occur because either (1) a contractor is realizing more profit than previously anticipated and the liquidation rate is to be adjusted downward, or (2) a contractor is achieving less profit than anticipated and the liquidation rate is to be adjusted upward. A contractor should be promptly paid any amount improperly withheld, and conversely, any overpayments should be promptly recouped. Therefore, revised liquidation rates should apply retroactively and prospectively. This policy will be administered in accordance with the provisions of § 1-30.524.

29. Section 1-30.512-3 is revised to read as follows:

§ 1-30.512-3 Liquidation percentages.

(a) For the purposes of § 1-30.512-2, the minimum liquidation rate has to be enough to recover the full amount of progress payments by way of deductions from delivery billings. The amount of expected progress payments divided by the contract price, gives the minimum liquidation percentage. The amount of expected progress payments is the product of multiplication of the progress payment percentage by either: (1) The total estimated contract costs, or (2) the total estimated contract cost less estimated G&A costs not eligible for progress payments because a contractor elected to use the special transition method provided in Cost Accounting Standard (CAS) 410, Allocation of Business Unit General Administrative Expense to Final Cost Objectives. For the purpose of this paragraph, the contract price may be calculated by the contracting office to include authorized but undefinitized work and projected economic adjustments; however, the price thus calculated may not exceed the Government's estimate of the price of all authorized work. The contract files shall document the basis and rationale for calculation of such rates. Examples of computations of the alternate liquidation rates when progress payments are made at 90 percent are as follows:

(i) If price is $1,000,000 and total estimated cost of $1,000,000 is eligible for progress payments, the liquidation rate would be:

$$\frac{1.000.000 \times 90\%}{1,100,000} = 81.82\%$$

(ii) If price is $1,10,000 and total estimated cost includes $47,600 of G&A not eligible for progress payments, the liquidation rate would be:

$$\frac{(1,000,000 - 47,600) \times 90\%}{1,100,000} = 77.92\%$$

(b) For the computation of minimum rates of liquidation, fractions of a percentage point will be expressed in tenths. Fractions between tenths will be rounded upward to the next higher tenth of a point as follows:

(1) 63.64 percent would be expressed as 63.7 percent in the contract.

(2) 68.18 percent would be expressed as 68.2 percent in the contract.

(3) 72.72 percent would be expressed as 72.8 percent in the contract.

(4) 72.27 percent would be expressed as 77.3 percent in the contract.

(5) 81.81 percent would be expressed as 81.9 percent in the contract.

(c) Further illustrative examples of minimum liquidation rates for contracts not subject to the CAS 410 suspense account limitation on G&A expense are set out in paragraph (d) of this section.

For the purposes of § 1-30.512-2, the profit rate is deemed to be amount by which the fixed or target contract price exceeds estimated total costs within the fixed or target price, divided by those estimated total costs as follows:

$$\frac{\text{Price-Costs}}{\text{Costs}} = \text{Profit Rate}$$

If the estimated profit rate falls between tenths of a percentage point, the fraction of a tenth will be dropped off for computation of a minimum liquidation rate. For example, a profit rate of 8.21 percent or 8.29 percent would be used as 8.2 percent for this computation of a minimum liquidation rate.

(d) Illustrative minimum progress payment liquidation rates.

MINIMUM LIQUIDATION RATE WITH PROGRESS PAYMENT RATE

Profit rate	Percent												
	80	[illegible]	[illegible]	91	92	[illegible]	[illegible]	95	[illegible]	97	[illegible]	[illegible]	100

(e) Minimum liquidation rates will of course have to vary up or down from those shown in the above illustrative tables, for differing rates of projected profit and for different percentages for progress payments.

(f) When a contract is subject to a limitation on General and Administrative (G&A) expenses eligible for progress payments because a contractor elected to use the special transition method provided in cost Accounting Standard 410, an adjusted alternate liquidation rate will be used. The adjusted alternate liquidation rate will be established by subtracting the estimated G&A costs not eligible for progress payments from total estimated contract costs. For example, if the price is $1,100,000, costs is $1,000,000 and unbilled G&A $47,600, the liquidation rate would be calculated as follows:

$$\frac{(1{,}000{,}000-47{,}600)}{1{,}100{,}000}\times 90\% = 77.92\%$$

Use 78.00%

30. Section 1–30.513 is amended to revise paragraph (b) to read as follows:

§ 1–30.513 Subcontracts.

* * * * *

(b) The policies and standards for "unusual" progress payments set forth in § 1–30.505, are equally applicable to situations where it is contemplated that contracts will provide for progress payments based on "unusual" progress payments made by a prime contractor to a subcontractor. In such cases, when the inclusion of such unusual progress payments on the subcontracts has been approved in the manner set forth in § 1–30.505, appropriate revision will be made in paragraph (j)(2) of the Progress Payment clause in § 1–30.510–1(a) so as to permit inclusion of the unusual progress payments on the subcontract as part of the base for progress payments on the prime contract. Such revisions are deemed not to be deviations, and do not require the clearance called for by § 1–30.517(b). Paragraph (a)(3) of the clause in § 1–30.510–1(a) applies only to the "contractor's" costs mentioned in paragraph (a)(1)(i) of the clause. Paragraph (a)(3) of the clause does not apply to the progress payments to subcontractors mentioned in paragraph (a)(1)(ii) of the clause. The same policies and standards apply to the same numbered paragraphs in the progress payment clause in § 1–30.510–1(b), except that paragraph (a)(3) of the clause in § 1–30.510–1(a) is numbered (a)(2) in the clause in § 1–30.510–1(b).

31. Section 1–30.513–1 is revised to read as follows:

§ 1–30.513–1 Subcontractor progress payments.

When progress payments have been made by a prime contractor to a subcontractor pursuant to the provisions of the applicable prime contract and subcontract, the progress payment to the prime contractor to reimburse him for such progress payment to the subcontractor shall include the full amount of his progress payment made to the subcontractor.

32. Section 1–30.513–2 is revised to read as follows:

§ 1–30.513–2 Adaptation of uniform clause for subcontracts.

(a) Contracting officers are not required to review or approve subcontracts merely because they provide for progress payments. However, they shall check and review subcontracts providing for progress

payments to the extent appropriate in the ordinary course of administration of the Progress Payment clause of prime contracts. The duty rests on the prime contractor to see to it that subcontracts providing for progress payments, to be included in the base for progress payments pursuant to the provisions of paragraph (j) of the clause in § 1–30.510–1(a), conform to the provisions of paragraph (j) of the clause in § 1–30.510–1(a). In adapting the clause in § 1–30.510–1(a) for use in subcontracts, to conform to paragraph (j) of the clause, the subcontract Progress Payment clause should have appropriate changes to reflect the position of the prime contractor as purchaser and of the subcontractor as vendor, and to indicate that the progress payments under the subcontract are being made and administered by the prime contractor. However, the title provision of the Progress Payment clause, the subcontract shall provide for the vesting of title directly in the Government, as set forth in paragraph (d) of the clause, and the subcontract will not substitute the prime contractor for the Government as the holder of title under that paragraph of the subcontract. In that title paragraph of the subcontract, reference to the prime contractor should, however, be substituted for the word "Government" in the parenthetical expression concerning drawings and technical data.

(b) In the subcontract counterpart (clause paragraph (g)) entitled "Reports and information—access to records", the references to "Contracting Officer" and "Government" should not be deleted, but may in each case be expanded so as to refer to the "Contracting Officer or the prime contractor," (paragraph (g)(1) of the clause) and to the "Government or the prime contractor" (paragraph (g)(2) of the clause).

(c) With regard to the subcontract counterpart of the "Special Provisions Regarding Default" (paragraph (h) of the clause), only the substance of the first twenty-six words of that paragraph (with reference to the prime contractor being substituted for "Government"), is required for conformity to the provisions of paragraph (j)(2) of the clause.

(d) The same policies and standards apply to the same numbered paragraphs in the Progress Payment clause provided in § 1–30.510–1(b).

33. Section 1–30.515 is revised to read as follows:

§ 1–30.515 Letter contracts.

When progress payments are to be made under letter contracts or similar contractual instruments (§ 1–30.503, § 1–30.503–2), incorporation of the appropriate clause in § 1–30.510–1 is required. See §§ 1–30.509–7, 1–30.511–2, and 1–30.511–3. Procedures for later events are outlined in paragraphs (a) and (b) below.

(a) When the superseding definitive contract provides for progress payments (§ 1–30.503, § 1–30.503–2), the letter contract costs, progress payments and unliquidated progress payments will be carried over to the definitive contract the same as if initially covered by the definitive contract instead of the letter contract. For the various percentages, see §§ 1–30.503–2, 1–30.511–2, 1–30.511–3, 1–30.511–4 and 1–30.512.

(b) If the letter contract is not superseded by a definitive contract providing for progress payments, for whatever reason, the unliquidated progress payments on the letter contract will be deducted from amounts otherwise payable to the contractor. If not so fully liquidated, the amount of unliquidated progress payments will be payable to the Government upon demand.

34. Section 1–30.519 is revised to read as follows:

§ 1–30.519 Contractor's request.

All invoices for progress payments on contracts containing the Progress Payment clauses set out in § 1–30.510, and on contracts containing any deviation from those clauses approved pursuant to § 1–30.517, will be supported by Standard Form 1443 (see § 1–30.529 and § 1–16.808) with any supporting information that may be reasonably required. The reverse side of the form contains instructions for use.

35. Section 1–30.520 is revised to read as follows:

§ 1–30.520 Audit.

For the making of progress payments, principal reliance will be placed on the adequacy of the contractor's accounting system and controls (§ 1–30.506) and on the reliability of the contractor's certificates. To conserve administrative effort, hold down expense, and promote prompt payment of proper progress billings, audit before the making of progress payments will be kept to the minimum necessary for the protection of the interest of the Government. Preaudit, that is, audit before the making of a progress payment, will be limited to those situations in which there is reason to question the reliability or accuracy of the contractor's certificate, or reason to believe that the contract will involve a loss. Where the adequacy and reliability of the contractor's accounting system and controls have been established in accordance with § 1–30.506, there shall be no requirement for preaudit of the first progress billing under new contracts. Postreview or postaudit will be made when considered desirable by the contracting officer to determine the validity of any progress payment made on the contractor's certifications.

§ 1–30.521–2 [Removed]

36. Section 1–30.521–2 is removed.

37. Section 1–30.522 is revised to read as follows:

§ 1–30.522 Adjustment—retroactive price reduction—refunds.

When a retroactive price reduction has been made effective, i.e., by supplemental agreement or by unilateral determinaton pursuant to the price redetermination provision of the contract, paragraph (b) of the clauses prescribed in § 1–30.510–1 requires adjustments so that the amount of unliquidated progress payments and the amounts paid or payable for supplies or services accepted will give effect to the price reduction. In this situation, the retroactive price reduction means that too much has been paid or billed for deliveries, and that from those delivery billings too much has been applied as a reduction of the unliquidated progress payment balance. The necessary adjustments would be; (a) Recomputation of total cash delivery payments on the basis of the reduced billing price resulting from the retroactive price reduction, and repayment by the contractor of the difference between the total recomputed payments and the total cash delivery payments that had been made, and (b) increase of the unliquidated progress payment balance by the excess of the total amounts previously applied to reduce the unliquidated progress payment balance over the amounts that would have been applied to reduce the unliquidated progress payment balance if the reduced delivery prices had been in effect from the date from which the redetermination is applicable. This same principle of upward adjustment of the unliquidated progress payment balance is also applicable in connection with interim refunds made by contractors pursuant to the provisions of incentive and price redetermination contracts, and in connection with voluntary refunds on such contracts.

38. Section 1–30.523 is revised to read as follows:

§ 1–30.523 Maximum unliquidated amount.

When the contract price is sufficient to cover all costs of complete performance, and liquidation of progress payments is effected by the ordinary method (§ 1–30.512–1), the amount of

unliquidated progress payments should automatically stay within the maximum limits stated in paragraph (a)(4) of the clause in § 1–30.510–1(a) and paragraph (a)(3) of the clause in § 1–30.510–1(b). For either method of liquidation § 1–30.512–2, or § 1–30.512–2 and § 1–30.512–3), whenever the rate or quality of performance is unsatisfactory, or the rate of rejections is unduly high, or there is excessive wastage or spoilage, or a loss to the contractor is indicated, careful examination should be made to determine whether or not the unliquidated progress payments exceed the maximum amounts permitted by paragraph (a)(4) of the clause in § 1–30.510–1(a) and paragraph (a)(3) of the clause in § 1–30.510–1(b). Also, when the alternate method of liquidation is used (§ 1–30.512–2, § 1–30.512–3), it may occur that actual costs and future costs of performance are higher than the estimated costs used to establish a liquidation rate. In such cases (paragraph (c)(6) of the clauses in § 1–30.510–1), appropriate increase of the liquidation percentage, with or without reduction of the rate of progress payments or suspension of progress payments (§ 1–30.524) will be necessary to adjust for any liquidation that may have occurred, to bring the amount of unliquidated progress payments within the limits of paragraph (a)(4) of the clause in § 1–30.510–1(a), and paragraph (a)(3) of the clause in § 1–30.510–1(b), and to assure the adequacy of future liquidations. As required, the services of the agency's contract audit organization should be utilized to the fullest extent available, together with the services of qualified cost analysis and engineering personnel. See § 1–30.519.

39. Section 1–30.524–1 is revised to read as follows:

§ 1–30.524–1 Failure to comply with contract.

Except for the purpose of correcting overpayments or obtaining amounts due from the contractor, action will not be taken pursuant to paragraph (c)(1) of the clauses provided in § 30.510–1 for failure to comply with a requirement of the contract, if such failure has resulted solely from causes beyond the control and without the fault or negligence of the contractor. For examples of such causes, see paragraph (c) of the Default clause in § 1–8.707. Compliance with the material requirements of the contract, within the meaning of paragraph (c)(1) includes compliance with all provisions of the Progress Payment clause.

40. Section 1–30.524–2 is revised to read as follows:

§ 1–30.524–2 Unsatisfactory financial condition.

If unsatisfactory financial condition, or failure to make progress, endangering contract performance, as described in paragraph (c)(2) of the clauses prescribed in § 1–30.510–1, is found to exist, arrangements reasonably assuring contract completion without loss to the Government will be required in connection with the making of further progress payments and the making of other payments so long as progress payments are unliquidated. Within the meaning of this paragraph (c)(2), performance of the contract includes full liquidation of progress payments. Further payments should be withheld so long as any progress payments remain unliquidated, only upon full consideration of all pertinent facts, and upon concluding that further payments will serve to increase the probable loss to the Government.

41. Section 1–30.524–3 is revised to read as follows:

§ 1–30.524–3 Excessive inventory.

When inventory allocated to the contract is found substantially to exceed reasonable requirements (paragraph (c)(3) of the clauses in § 1–30.510–1), the simplest form of adjustment to correct or avoid overpayment will be to eliminate the costs of such excess inventory from the costs shown in items 9 and 10 of the contractor's request referenced in § 1–30.529. If that is not regarded as sufficient in a particular case, or if the adjustment in items 9 and 10 of the request will not accomplish full correction, additional deductions, to the extent necessary for the correction, should be made to liquidate progress payments incident to billings for payments other than progress payments. Transfer of such excess inventory from the contract should also be required. The expression "reasonable requirements" includes a reasonable accumulation of inventory for future use to assure continuity of operations.

42. Section 1–30.524–4 is revised to read as follows:

§ 1–30.524–4 Delinquency in payment of costs of performance.

The contractor's delinquency in payment of costs of contract performance in the ordinary course of business (paragraph (c)(4) of the clauses in § 1–30.510–1) may be an indication of unsatisfactory financial condition or other circumstances endangering contract performance and involving probability of loss to the Government. If such delinquency is not connected with poor financial condition that is so unsatisfactory as to endanger contract performance or to involve reasonably foreseeable loss to the Government, further progress payments and other payments will not necessarily be denied to protect the unliquidated progress payments and minimize risks of additional losses, and payments may be continued at the contract rate, or in reduced amounts, in connection with appropriate arrangements to (a) cure the contractor's delinquencies in payment of the costs of contract performance, (b) avoid further delinquencies, and (c) reasonably assure completion of the contract without loss to the Government. (See also § 1–30.524–3.) The standards in paragraph (a) of the clauses in § 1–30.510–1 for the exclusion of pension contribution costs from progress payment computations will govern a determination of delinquency in the ordinary course of business with respect to these pension contribution costs, without regard to other provisions in § 1–30.524. Amounts claimed by subcontractors, suppliers and others, but disputed in good faith by the contractor, should not be considered delinquent until determined due by a court (or by arbitration if applicable). However, any such disputed amounts shall be excluded from costs of performance so long as they are disputed.

43. Section 1–30.524–5 is revised to read as follows:

§ 1–30.524–5 Fair value of undelivered work.

(a) In connection with determining the relation of the amount of unliquidated progress payments to the fair value of the work accomplished on the undelivered portion of the contract (see paragraph (c)(5) of the clauses prescribed in § 1–30.510–1), the principles stated in § 1–30.523 are applicable. In determining action, if any, to be taken, the contracting officer (using available audit, engineering, inspection, and cost analysis services) will give full consideration to the degree of completion of contract performance, the quality and amount of work performed on the undelivered portion of the contract, the amount of work remaining to be done and the estimated costs of completion of performance, and the amount remaining unpaid under the contract. If the contracting officer finds that the fair value of the work done under the undelivered portion of the contract, in relation to the contract price, is less than the unliquidated progress payments, his actions will be governed by the principles stated in §§ 1–30.524–2 and 1–30.524–4. This fair value could not exceed the contract price of undelivered work under the

contract, less the estimated total future costs of completion of the contract. When this fair value is found to be less than the amount of the unliquidated progress payments, all further payments on the contract will be controlled in such a manner as to hold the unliquidated progress payments within the fair value of the work done on the undelivered portion of the contract. (See also § 1–30.525–1.)

(b) If it is determined that the total costs incurred plus the estimated additional costs to complete the contract will exceed the contract price, the purchasing office will be promptly advised and all further progress payments will be adjusted using a loss ratio factor. Principles and practices discussed in § 1–30.524 will be followed in adjusting progress payments. For the purpose of computing the loss ratio factor, a revised contract price will be used consisting of the current contract price, (current contract price of fixed-price incentive contracts for this purpose is the current ceiling price) plus unpriced contractual actions, such as change orders and unpriced orders, to the extent obligated. The revised contract price divided by the sum of the total costs incurred to date (item 12a) plus the estimated additional costs to complete (item 12b) will be the loss ratio factor.

(c) When computing progress payments for loss contracts, the *Contractor's Request for Progress Payment* (Standard Form 1443) instructions will be modified as follows:

Item 5—Current contract price plus unpriced contractual actions, such as change orders and unpriced orders, to the extent obligated.

Item 11—The sum of Items 9 and 10 will be multiplied by the loss ratio factor and the result (recognized costs for progress payments) will be entered on Item 11.

Item 20a—Contract price of items delivered, invoiced and accepted to the date in heading of Section II. Note that average unit contract price is equal to the projected average unit cost multiplied by the loss ratio factor. Consequently, the maximum cost that may be recognized for the items delivered is equal to the contract price of the items delivered.

The contracting officer shall use, as required, audit and technical services and other pertinent data and management reports in determining the amount and costs of work completed and the estimated amount costs of uncompleted work under the contract. In the event that the figures submitted by the contractor in his request for progress payment are at variance with the determination of the estimated loss made by the contracting officer, the latter shall (1) adjust the figures in accordance with his own determination, (2) advise the contractor in writing, and (3) adjust all further progress payments in accordance with his calculations until the difference is resolved. The contracting officer will prepare a supplementary sheet which will be attached to the *Contractor's Request for Progress Payment* showing the revised contract price where there are outstanding unpriced actions to be considered, calculation of the loss ratio factor, and alternate amount to be used as Item 13. An example of such a supplementary sheet is as follows:

EXAMPLE: § 1–30.524–5 LOSS CONTRACTS

Section I—Contractor's request for progress payment:

Item 5—Contract price	[illegible]
Change orders and unpriced orders to extent obligated	[illegible]
Revised contract price	1,000,000

Section II:

Item 12a—Total costs incurred to date	1,080,000
Item 12b—Estimated additional costs to complete	120,000
Total	1,200,000

Loss ratio factor $\frac{1,000,000}{1,200,000} = 83.3\%$

Item 11—Total costs eligible for progress payments	[illegible]
Loss ratio factor (percent)	× 83.3
Recognized costs for progress payments	[illegible]
Item 6a—Progress payment rate (percent)	× 90.0
Item 13—Alternate amount to be used	674,730

Section III:

*Item 20a—Contract price of items delivered	[illegible]
Item 20b—Recognized costs applicable to undelivered items ($749,700–$250,000)	499,700

*This amount will be the same as item 21a since the costs of such items will exceed the contract price.

44. Section 1–30.525–1 is revised to read as follows:

§ 1–30.525–1 Loss, theft, destruction, or damage.

Paragraph (e) of the clauses in § 1–30.510–1 is not intended to apply to normal spoilage. The risk of loss as to properlty affected by the Progress Payments clause is on the contractor, except to the extent that by some special provision of the contract (such as that relating to aircraft in the open) the Government shall have expressly assumed the risk of loss. Such express assumption of risk by the Government is not made in the Progress Payments clause, the Default clause or the Termination clause. Because of problems of administering the contract, especially those connected with property responsibility and inventory control, the risk of loss on property to which the Government holds title because of progress payments must be on the contractor to the same extent that it would be if the contractor held title to the property. This risk of loss carries with it the accompanying duty to repay to the Government the amount of unliquidated progress payments based on cost allocable to lost, stolen, or destroyed property or to the damaged portion of the property. If the Government has expressly assumed particular risks of loss, then, to the extent of such express assumption of risks by the Government, the contractor would not be obligated to repay to the Government the amount of unliquidated progress payments based on costs allocable to such lost, stolen, destroyed, or damaged property. (See, however, paragraphs (c)(5) and (c)(6) of the clauses prescribed in § 1–30.510–1 as to future payments on the contract after such loss, damage, theft, or destruction.)

45. Section 1–30.525–5 is amended to revise paragraph (b) to read as follows:

§ 1–30.525–5 Scrap—excess property.

* * * * *

(b) When: (1) The contractor has completed all work called for by the contract, and (2) such work has been delivered to and accepted by the Government, and (3) progress payments made under the contract have been fully liquidated, and (4) the contractor has fully performed all his obligations under the contract (including the making of any payments to which the Government may be entitled under the contract, and including compliance with any other provisions of the contract, such as the Termination clause, the Special Tooling clause, or the Government-furnished Property clause), any excess property remaining is to be regarded as having not been allocated or properly chargeable to the contract under sound and generally accepted accounting principles and practices, and thus outside the scope of the Progress Payments clause which would have

vested title in the Government. Accordingly, the contractor holds title to such excess property and may deal with it as he desires.

46. Section 1–30.529 is revised to read as follows:

§ 1–30.529 Standard Form 1443, Contractor's Request For Progress Payment.

Standard Form 1443 set forth in § 1–16.901–1443 and described in § 1–16.808 is provided to facilitate the submission of requests for progress payments. Various instructions contained in this Subpart 1–30.5 are referenced to specific paragraphs of this form.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: December 4, 1982.

Ray Kline,

Acting Administrator of General Services.

BILLING CODE 6820–61–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 5b

Privacy Act of 1974; Exempt Record System

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Office of the Secretary of the Department of Health and Human Services is amending its Privacy Act Regulations to exempt the system of records, "Civil and Administrative Investigative Files of the Inspector General, HHS/OS/OIG," from certain provisions of the Privacy Act. This exemption is authorized by subsection (k)(2) of the Privacy Act, which applies to investigative materials compiled for law enforcement purposes. The Office of Inspector General (OIG) is authorized to gather information for civil and administrative law enforcement purposes under Pub. L. 94–505, establishing the HHS Office of Inspector General, and section 1128A of the Social Security Act, authorizing civil money penalties for the filing of false claims in certain health care financing programs. In order to maintain the integrity of the OIG investigative process and to assure that the OIG will be able to obtain access to complete and accurate information, the Department is exempting this system, under subsection (k)(2), from the notification, access, correction and amendment provisions of the Privacy Act.

DATE: This amendment is effective January 21, 1983.

FOR FURTHER INFORMATION CONTACT: Richard McGowan, Public Affairs Officer, Office of Inspector General, Department of Health and Human Services, Room 5267 North Building, 330 Independence Avenue, S.W., Washington, D.C. 20201 or call (202) 472–3142.

SUPPLEMENTARY INFORMATION: On September 30, 1982, a notice of proposed rulemaking concerning the amendment to the Department's Privacy Act Regulations was published in the **Federal Register** (47 FR 43099) and invited public comments by November 1, 1982. No comments were received.

The Office of Inspector General is expanding its responsibilities in the area of civil and administrative investigations involving DHHS programs and operations. This requires the establishment of a records system to document the investigations which will be conducted by the OIG or other investigative agencies; to improve the tracking of reviews conducted because of allegations and complaints received by DHHS or other agencies concerning DHHS programs, or current or former HHS personnel; to improve the reporting of the results of civil and administrative investigations to other components of the Department for their use in operating and evaluating their programs; and to assist in civil and administrative proceedings, including proceedings under section 1128A of the Social Security Act (establishing civil monetary penalties in the Medicare, Medicaid, and Maternal and Child Health programs).

This system will contain sensitive investigative records, the release of which could impede on-going investigations, violate the privacy rights of individuals other than the subjects of the investigations, reveal the identities of confidential sources, or otherwise impair the ability of the Office of Inspector General to conduct civil and administrative investigations. For these reasons, the Department is exempting this system, under subsection (k)(2) of the Privacy Act, from the notification, access, correction and amendment provisions of the Privacy Act.

The exemption does not meet the standards set forth in Executive Order 12291 for classification as a major rule, and no regulatory analysis statement is required.

The Secretary certifies that the exemption will not have a significant impact on any substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96–354.

List of Subjects in 45 CFR Part 5b

Privacy.

PART 5b—PRIVACY ACT REGULATIONS

Accordingly, the Department's Privacy Act Regulations, Part 5b of 45 CFR Subtitle A is amended as follows:

1. In § 5b.11 by adding paragraph (b)(2)(ii)(D) as follows:

§ 5b.11 Exemptions.

* * * * *

(b) * * *
(2) * * *
(iii) * * *

(D) Civil and Administrative Investigative Files of the Inspector General, HHS/OS/OIG.

BILLING CODE 4150–04–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 81–343; FCC 82–513]

Proceeding Concerning the Policies To Be Followed in the Authorization of Common Carrier Facilities To Meet Pacific Telecommunications Needs During the Period 1981–1995

AGENCY: Federal Communications Commission.

ACTION: Policy statement (Report and order).

SUMMARY: The Federal Communications Commission issues the policies it will follow in authorizing common carrier facilities that will be needed in the Pacific Ocean Region during the period 1982–1986. The incorporation of these policies into the authorization process will ensure that service will be provided to the public in the most efficient, expeditious manner possible.

DATE: Effective December 22, 1980.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: William J. Sill, International Facilities Planning Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554, (202) 632–4047.

SUPPLEMENTARY INFORMATION:

Report and Order

Adopted: November 18, 1982.

Released: December 3, 1982.

In the matter of inquiry into the policies to be followed in the authorization of Common Carrier Facilities to Meet Pacific Telecommunications Needs During the Period 1981–1995; CC Docket No. 81–343.

1. On June 1, 1981, the Commission released a Notice of Inquiry, FCC 81–243, 46 FR 31286 (June 15, 1981), which initiated a comprehensive planning process in the Pacific Ocean Region for the 1981–1995 period. The U.S. international service carriers (USISCs),[1] Comsat, Hawaiian Telephone Company (HTC), the Department of Commerce (DOC) and the State of Hawaii (State) submitted comments. The Commission later released a Notice of Proposed Rulemaking in the above-captioned proceeding, Notice of Proposed Rulemaking, FCC 82–206, 47 FR 21868 (May 20, 1982) (hereinafter, Notice of Proposed Rulemaking or Notice), by which we issued for public comment our tentative conclusions about facilities planning and use in the Pacific Ocean Region (POR) from 1981–1986. On June 28, 1982, AT&T, ITT World Communications Inc. (ITT Worldcom), RCA Global Communications, Inc. (RCA Globcom), Comsat, HTC, DOC, the Department of Defense (DoD), Western Union International, Inc. (WUI), RCA American Communications, Inc. (RCA Americom) and State filed comments on the tentative conclusions contained in the NPRM.[2] On July 1, 1982 TRT Telecommunications Corporation (TRT) filed its comments.[3] Replies were filed by RCA Globcom, HTC, AT&T, WUI, Comsat, ITT Worldcom and the State of Hawaii. On July 29, 1982 the State of Hawaii revised the Appendix to its reply. On October 29, 1982 AT&T revised Appendix E to its comments. The comments and reply comments are summarized in Appendix I to this Report and Order.[a] Here we adopt the policies which we shall apply in acting upon requests for authorization to construct and operate submarine cable and satellite communications facilities for Pacific service during 1982–1986.

I. Background

2. In response to the Notice of Inquiry, the USISCs formulated and submitted four alternative facilities plans to meet anticipated POR traffic demands during the 1981–1995 planning period, referred to as Plans I, IIA, IIB and III. These plans utilize a combination of existing and possible future facilities options. The various future facilities under consideration are the ANZCAN cable system (ANZCAN),[4] HAW–4 cable, HAW–5, Trans-Pacific-3 cable (TPC–3), TPC–4, INTELSAT V–A, VI, and VI–A.[5] The ANZCAN cable system will link Australia, New Zealand, Fiji and Norfolk Islands with Hawaii (ANZCAN South) and provide cable service between Hawaii and Canada (ANZCAN North). The proposed HAW–4 cable would be routed between the U.S. Mainland and Hawaii. WAW–5's route has not been determined. TPC–3 would be constructed between Hawaii and Japan while the TPC–4 cable would land in Hawaii and Guam. Intelsat satellites series V–A, VI and VI–A would be located in the Pacific Ocean Region.

3. Plan I proposed the construction of no new facilities during the planning period; it was submitted for analytical purposes rather than as a viable option. Plan IIA calls for U.S. carriers' use of ANZCAN cable system, the use of a primary path satellite, the introduction of a major path satellite in 1987, and the construction of HAW–4 and TPC–3 as digital optical fiber cables in 1988. Plan IIB varies from IIA in one respect; Plan IIB assumes use of the in-orbit spare satellite as an operational spare satellite between 1984–1987.[6] Plan III proposes construction and use of (a) ANZCAN, (b) an analog HAW–4 between Mainland U.S. and Hawaii in 1984, (C) an analog TPC–3 cable between Hawaii and Japan in 1986, (d) digital optical fiber HAW–5 and TPC–4 in 1991, with TPC–4 landing in Guam and Hawaii, (e) use of an in-orbit spare satellite as an operational spare satellite between 1984–1987, and (f) introduction of a major path satellite in 1987. Plans IIA and IIB contemplate U.S. carriers acquiring temporary and permanent interests in ANZCAN's circuits, while Plan III Proposes the acquisition of permanent interests.

4. In the Notice of Proposed Rulemaking the Commission decided that it would focus upon POR facilities planning for 1981–1986, and consider the 1987–95 period in a subsequent phase of the proceeding. The Commission reviewed the comments and evaluated the four facilities plans using demand flexibility, cost, service quality and technological risk as criteria. The Commission tentatively concluded:

(a) U.S. carriers' acquisition of permanent interests in ANZCAN South would serve U.S. interests. However, the Commission did not express a preference for the number of circuits to be acquired.

(b) U.S. carriers should be authorized to acquire temporary indefeasible right of user (IRU) interests in 734 ANZCAN North half circuits for international service and the IRCs should be authorized to acquire temporary IRU interests in 56 ANZCAN North whole circuits for domestic service.

(c) Utilization of Intelsat's proposed in-orbit operational spare satellite in the POR during the mid-1980's is desirable.

(d) Construction and use of analog HAW–4 and TPC–3 cables would not serve U.S. interests.

(e) A flexible master plan approach to development of a circuit distribution methodology is desirable. However, U.S. record carriers should be exempted from a specific circuit distribution methodology.

However, the Commission was unable to conclude that acquisition of temporary interests in 600 whole circuits in ANZCAN North for service between the U.S. Mainland and Hawaii would serve the United States' interests, as proposed in Plans IIA and IIB. In addition, the Commission requested AT&T, ITT Worldcom and HTC to submit reasons supporting permanent acquisition of ANZCAN North half circuits. The Commission also requested the parties to provide additional information on the availability of domestic satellite capacity between the U.S. Mainland and Hawaii.

5. The Pacific planning process is the first attempt by the Commission to analyze the U.S. carriers facilities requirements in the POR on a

---

[1] The USISCs are the United States entities which provide telecommunications service directly to the public. For purposes of this proceeding, the USISCs are composed of AT&T and the international record carriers: FTC Communications, Inc., ITT World Communications Inc., RCA Global Communications, Inc., TRT Telecommunications Corporation and Western Union International, Inc.

[2] On May 28, 1982 the Bureau granted AT&T's request for extension of time to file Comments and Replies in this proceeding; the deadlines for submission of comments and replies were changed to June 28, 1982 and July 28, 1982.

[3] TRT Telecommunications Corporation (TRT) filed its comments three days after the period for filing comments had passed. Since the acceptance of this pleading will not delay the proceeding and our analysis of the issues in the proceeding will be benefited by its acceptance, we shall accept the pleading.

[a] Filed as part of the original document.

[4] The ANZCAN cable will be constructed and owned by telecommunications entities in Australia, Canada, France, the Federal Republic of Germany, New Zealand, the Independent State of Papua, New Guinea, the Philippines and the United Kingdom.

[5] Intelsat series IV–A and V are currently in use in other ocean regions and are proposed be relocated in the POR.

[6] Use of an in-orbit spare satellite as an operational spare satellite would not provide additional satellite capacity but would provide an additional independent satellite path. Satellite traffic would be limited to the capacity of a single spacecraft, so that if the primary satellite failed the operational spare satellite would be able to restore the traffic formerly carried on the primary satellite.

comprehensive basis. Since international communications is a cooperative venture involving foreign and domestic entities, development of United States policy entails some consideration of what would be mutually acceptable. To this end, the Commission has taken cognizance of the views of interested foreign entities.[7]

II. Discussion

6. The parties' comments and reply comments provide us with significant information which was not available for our consideration during the preparation of the Notice of Proposed Rulemaking. Careful review and analysis of this information has caused us to modify our earlier analysis and some of the tentative conclusions announced in the Notice of Proposed Rulemaking. Below we shall consider the impact of these additional comments and information on the following issues: (1) The use of the ANZCAN cable system by any U.S. carrier; (2) the types of interests and the number of circuits the USISCs should be authorized to acquire in ANZCAN North for international services; (3) the types of interests and number of circuits HTC should be authorized to acquire in ANZCAN North for international service; (4) the types of interests and number of circuits the U.S. carriers should be authorized to acquire in ANZCAN North to provide domestic service; and (5) the number of circuits the USISCs and HTC should be authorized to acquire in ANZCAN South for international service.

A. U.S. Carrier Involvement in ANZCAN

7. In the NPRM we tentatively concluded that U.S. carriers' use of the ANZCAN North and South would serve U.S. interests. The Department of Commerce, in its comments, disagreed. It contends that the ANZCAN cable system will be foreign owned, constructed and operated. According to DOC, U.S. participation in ANZCAN will benefit foreign countries rather than the U.S., and U.S. involvement in a foreign cable will set a bad precedent. DOC calculates that a half circuit IRU in ANZCAN would cost 5 times more than a half circuit in an optical fiber HAW–4, and believes that this is too high a price to pay for route diversity and redundancy. In contrast, ITT Worldcom points out that there is no U.S. cable available which could meet its customers' needs. HTC believes that DOC's comments reflect a parochial outlook and notes that an ITT subsidiary will be involved in the ANZCAN's construction. In addition, HTC challenges the validity of DOC's comparing the cost of ANZCAN IRUs to HAW–4 circuits. HTC believes that such a comparison is invalid since the ANZCAN temporary interests will have expired by the time HAW–4 becomes available.

8. Based upon the responses of the parties and the information before us, we conclude that U.S. carriers' acquisition of ANZCAN circuits will serve the public interest. Existing POR facilities in place in 1986 will not be able to meet forecasted demands for international services between the U.S. and Pacific points in that year. The ANZCAN cable system can be utilized by the carriers to fill the gap between circuit supply and expected demand, and will provide additional route diversity and redundancy. Further, utilization of ANZCAN North will obviate the necessity to build an analog HAW–4 which would require greater USISCs investment than ANZCAN North. We also note that international telecommunications increasingly involves the participation of many nations in a single system. We do not beleive that foreign ownership of a specific cable will in all instances militate against its use. Rather, the question to be answered in overseeing U.S. carriers' involvement in foreign-owned cable is whether this involvement would serve the public interest. In light of the scarcity of available circuits in the POR during the middle of the planning period, we conclude that the U.S. carriers' acquisition of ANZCAN circuits serves the public interest.

1. ANZCAN North—International Service, the USISCs' Circuit Requests

9. In the NPRM we tentatively concluded that U.S. carriers should be authorized to acquire temporary interests in 734 half circuits for international service.[8] We found that ANZCAN North usage, on a temporary basis, was less expensive than a comparable outlay for the analog HAW–4 cable system. In addition, we determined that in conjunction with ANZCAN South, ANZCAN North usage would bridge the circuit demand gap of the mid-1980's and permit the construction of an optical fiber rather than an analog HAW–4. In the NPRM we stated that the optical fiber cables are expected to be much cheaper on a unit cost basis than their analog counterparts. We affirm here out earlier finding that temporary interests in ANZCAN will serve the public interest.

10. After tentatively concluding that the carriers should be restricted to temporary interests in ANZCAN North, we invited the carriers to explain why they had proposed acquiring permanent as well as temporary interests. In their comments and replies, the USISCs contend that the acquisition of permanent interests is warranted by economic, planning flexibility and international comity considerations. Serveral carriers maintain that ANZCAN would be the most cost effective means of assuring service. ITT Worldcom claims ANZCAN use would cost less than utilization of Comstar/Telstar and would provide route diversity. AT&T and WUI state that the ANZCAN owners redesigned their cable system from 9 mHz to 14 mHz in order to accommodate the U.S. carriers' needs with the expectation that the carriers would attempt to secure Commission approval for their acquisition of permanent interests in ANZCAN North.[9] In their comments the carriers significantly lowered their circuit requests for international service from their earlier request of permanent interests in 300 ANZCAN North half circuits to 131 half circuits. The State of Hawaii, in contrast with the USISCs, contends that the MOU is a private matter and was entered into prior to Commission approval. Under the circumstances, the State of Hawaii states that frustration of the purpose of the MOU is a private, rather than international, concern. In addition, DOC concurs with the Commission's tentative conclusion and contends that the cost of permanent ANZCAN interests and the availability of a digital optical fiber HAW–4 in 1988 make the acquisition of permanent interests unnecessary.

11. Our analysis of the comments filed in response to the NPRM has led us to revise our tentative conclusion about USISCs' circuit acquisition and to permit the USISCs to acquire some permanent

[7] On September 22, 1982 the Chairman and representatives from three telecommunications entities which are involved in the ANZCAN cable project, Teleglobe Canada, the New Zealand Overseas Post Office and the Overseas Telecommunications Commission of Australia, participated in a teleconference during which these representatives expressed their views on U.S. carriers involvement in ANZCAN. A report summarizing the views expressed by the participants has been placed in C.C. Docket No. 81–343.

[8] These 734 half circuits are comprised of the USISCs' requested 539 half circuits and HTC's requested 195 half circuits.

[9] On October 1, 1981 the carriers and the ANZCAN owners signed a Memorandum of Understanding (MOU) in which the carriers pledged their best efforts to obtain Commission approval of their acquisition of temporary and permanent interests in ANZCAN. A copy of this memorandum was submitted along with AT&T's comments of June 28, 1982.

interests in ANZCAN North. We believe that a combination of permanent and temporary interests is warranted on the basis of cost, route diversity, and international comity. In the NPRM we found that the carriers' initial comprehensive ANZCAN North circuit requests would have cost $41.8 million (1981 dollars) (or $47.0 million 1984 dollars).[10] If the carriers' revised request for ANZCAN North were approved it would cost $26.6 million (1984 dollars). Thus, the carriers' revised circuit requests would cost $20.4 million less than their initial circuit requests. *See* Appendix II.[11] Therefore, the combination of permanent and temporary interests now proposed by the U.S. carriers in ANZCAN North increases the cost differential between ANZCAN North and the construction and use of an analog HAW–4, the only short term cable alternative. *See* NPRM Table 7.

12. Authorization of a combination of temporary and permanent circuits in ANZCAN North will increase route diversity, obviate the necessity of constructing an analog HAW–4 cable and promote the early introduction of optical fiber cables in the POR. The USISCs' temporary acquisition of interests in ANZCAN North would provide additional route diversity until 1988, when their temporary interests terminate. However, permanent interests in ANZCAN North circuits would continue to provide additional route diversity for the U.S. Mainland-Hawaii portion of international routes even after a digital optical fiber HAW–4 is constructed. Further, the U.S. carriers' use of ANZCAN North circuits would obviate any need to build an analog HAW–4, which would require greater USISCs' initial investment than ANZCAN North. In addition, the use of ANZCAN North to bridge circuit supply shortfall will permit the construction of a digital optical fiber HAW–4. Thus, authorizing a combination of temporary and permanent interests in ANZCAN North will increase route diversity both in the short and long term and encourage the early introduction of optical fiber cables into the POR.

13. We believe that in addition to the other considerations discussed above, international comity is a factor which should be taken into account.[12] It would be short sighted to view U.S. participation in this system without taking into account the effect our decision will have on relations with international telecommunications entities. Many of the ANZCAN owners, confronted with the expiration of the COMPAC North cable in 1983 and the COMPAC South in 1984, decided to participate in the construction of the ANZCAN cable to replace COMPAC North and South.[13] In 1981 the ANZCAN owners redesigned ANZCAN North's bandwidth from 9 mHz to 14 mHz specifically to accommodate the U.S. carriers' circuit requests. A failure to consider both the importance of the ANZCAN cable to its owners and the owners' reliance on the U.S. carriers' assurances in the MOU could well undermine the trust and co-operative spirit beneficial for international telecommunications planning projects.

14. Furthermore, this report and order is the culmination of the Commission's first comprehensive Pacific planning process. We note that the MOU between the ANZCAN owners and the U.S. carriers is the result of informal discussion which began long before this proceeding began. The Commission considers these circumstances unique, and expects future phases of this and other planning processes to provide the forum for facilities planning.

15. We conclude that a combination of permanent and temporary interests in ANZCAN North circuits would serve the public interest and is warranted by economic, route diversity and international comity considerations. The only question which remains to be answered is what number of permanent and temporary interests should be authorized in the public interest. On June 28, 1982 the carriers reduced both the number of circuits they requested and the exent of their initial investment in ANZCAN North. *See* paras. 10, 11, *supra*. In addition to reducing their circuit requirements, AT&T plans to utilize circuit multiplication technology on its MTS circuits to maximize their capacity. We have evaluated forecasted demand, circuit requests and the manner in which the proposed circuits would be utilized, and conclude that the record supports, and the public interest will be served by USISCs' acquisition of temporary IRU interests in 386 half circuits in ANZCAN North and permanent ownership interests in 131 half circuits in ANZCAN North for international service. *See*, Appendix III.

2. ANZCAN North—International Service, HTC's Circuit Requests

16. In the NPRM the Commission tentatively concluded that authorizing HTC to acquire temporary interests in 195 ANZCAN North half circuits and ITT Worldcom to acquire a temporary interest in one half circuit for international service would serve U.S. interests. In its comments on the NPRM, HTC revised its earlier request and notified the Commission that it wished instead to acquire permanent interest in 120 half circuits to serve Canada and permanent interests in 35 half circuits for use to Europe. ITT Worldcom dropped its request for permanent interest in 1 half circuit for international use. Therefore, we shall consider here whether HTC's acquisition of permanent interests in 155 half circuits to serve Canada and Europe would serve the public interest.

17. In its comments HTC contends that 120 ANZCAN half circuits directly to Canada would prove more cost effective than routing via the U.S. and then transiting to Canada. HTC contends that if it were restricted to acquiring temporary interests it would have to relinquish them when HAW–4 becomes operational. HTC opposes use of HAW–4 because unlike ANZCAN North, HAW–4 is not a direct route and would require the additional cost and decreased reliability inherent in transiting.[14] HTC states that it plans to use Intelsat to cross the Atlantic and therefore needs to acquire permanent interests in 35 ANZCAN North half circuits, rather than satellite circuits, if it is to avoid a "double hop" situation.[15]

---

[10] The conversion from 1981 to 1984 dollars was made based upon use of a constant discount rate of 4% as was used in Appendix E of the AT&T submission of June 28, 1982. This discount rate was agreed upon by the carriers as representing the "real" impact of inflation after accounting for changes in both costs and revenues.

[11] The facility investment cost for acquisition of ANZCAN North circuits found to be in the public interest in this proceeding is approximately $22.5 million (1984 dollars). *See* Appendix II.

[12] As we stated in Overseas Communication, 67 FCC 2d 359, 417–418 (Report, Order and Third Statement of Policy Guidelines) (1977), that while international comity is a significant factor in the consideration of facility plans and programs, it must be balanced against our public interest mandate. Our actions here are consonant with *Overseas Communication* since we have examined the U.S. carriers proposals and, after modification, found that they would serve the public interest.

[13] The COMPAC cable system is the only cable system that connects Canada, Hawaii, the Fiji Islands, New Zealand and Australia. ANZCAN North will follow the same route as COMPAC North. ANZCAN South's route differs from COMPAC South only in that it will land on Norfolk Island.

[14] The proposed HAW–4 cable will be routed between Hawaii and the U.S. Mainland. To provide Canadian service via HAW–4, HTC would have to employ a terrestrial system from the U.S. Mainland to Canada

[15] A double hop occurs when traffic is transferred from one satellite to another. Double hop configurations exceed the 400 milli-second (ms) one way propagation time limitation which CCITT considers desirable. International Telecommunication Union, International Telegraph and Telephone Consultative Committee, Yellow Book, Volume III, General Characteristics of International Telephone Connections and Circuits, Recommendation G. 114(b), pp 70–2, VIIth Plenary Assembly, Geneva (November 10–12, 1980).

The State of Hawaii and DOC object to HTC's proposals, and state that the record does not support the requested circuitry. The State of Hawaii cautions that HTC's rates are already high and that the authorization of these circuits could exacerbate the situation. DOC views HTC's routing to Europe as an attempt to forsake use of U.S. telecommunications systems. DOC believes that U.S. facilities could be more cost effective and better serve U.S. interests without any loss of redundancy or media diversity.

18. Our analysis of the comments filed in response to the NPRM has lead us to revise our tentative conclusion concerning HTC's acquisition of temporary interests in 195 half circuits in ANZCAN North for international service. We believe that the public interest would be served by HTC acquiring permanent ownership interests in 60 half circuits for Canadian service and denial of its requests for another 60 half circuits for Canadian service and for permanent ownership interests in 35 half circuits for European service. ANZCAN North is the only cable with available capacity which would give HTC direct service to Canada. Direct routing is desirable since it improves service reliability and minimizes the number of transmission systems and switching terminals which must be traversed. Acquisition of permanent rather than temporary interest permits the continued utilization of the only direct cable route to Canada.

19. While we believe that acquisition of permanent interests is warranted, our examination of HTC's circuit requests reveals that HTC is not proposing to efficiently utilize the circuits it requests. We note that HTC and AT&T's joint request for 149 whole circuits in ANZCAN North for domestic MTS service will employ circuit multiplication equipment and thereby double their circuits' capacity. However, HTC's request for 120 half circuits in ANZCAN North for Canadian service fails to take advantage of the cost savings inherent in the use of circuit multiplication technology.[16] By utilizing circuit multiplication equipment HTC would need only half of its requested 120 half circuits. Therefore, we find the public interest shall be served by HTC's acquisition of permanent interests in 60 half circuits in ANZCAN North for Canadian service and require HTC to utilize circuit multiplication equipment.[17]

20. HTC's request for 35 half circuits in ANZCAN North for service to Europe would not serve the public interest. HTC has submitted only a skeletal description of its proposal for use of ANZCAN North for this service. HTC has failed to demonstrate that using ANZCAN North to Canada, transiting Canada to Teleglobe Canada's earth station, and then using the Intelsat satellite system to Europe would be cost effective.[18] HTC states that since it will utilize the Intelsat satellite system to cross the Atlantic it must use ANZCAN North in order to avoid a "double hop" situation. However, if HTC utilized the TAT–7 cable rather than the Intelsat satellite system to cross the Atlantic, HTC could utilized domestic satellites between Hawaii and the U.S. Mainland without a double hop. This routing is more direct, involves a much shorter land transit[19] and would result in the same degree of route diversity and redundancy as HTC's proposal. Further, it would appear more reasonable for HTC to provide European service via domestic satellite(s) and the TAT–7 cable.[20]

3. ANZCAN North—Domestic Service, U.S. Carriers' Circuit Requests

21. In the NPRM the Commission tentatively concluded that the IRCs' acquisition of temporary interests in 56 ANZCAN North whole circuits would serve U.S. interests. However, we refrained from tentatively concluding whether AT&T and BTC should be authorized to jointly acquire temporary interests in 600 ANZCAN North whole circuits. We noted that domestic satellite systems might contain sufficient capacity to accommodate the U.S. carriers' needs and requested the parties to provide information on domestic satellite circuit availability.

22. Along with their comments, AT&T, HTC and the IRCs submitted revised circuit requests. AT&T and HTC reduced their joint request for temporary interests in ANZCAN North whole circuits from 600 to 149 circuits, and the IRCs lowered their circuit requests from 56 to 47 whole circuits. AT&T reports that its revised circuit request reflects decreased demand resulting from prevailing economic conditions and recent rate increases. WUI and ITT Worldcom consider IRUs the only affordable basis for acquiring access to AT&T's Comstar/Telstar domestic satellite system and both express concern over the continued availability of IRUs on the Comstar/Telstar system. ITT Worldcom reports that its search for additional satellite capacity has been fruitless. AT&T notes that domestic satellite carriers have failed substantively to respond to the Commission's request for information on circuit availability.[21] However, AT&T and WUI contend that they did not propose to use ANZCAN North whole circuits because of a shortage of domestic satellite capacity. Rather, they state they selected ANZCAN North whole circuits because utilizing these circuits would increase route diversity, service reliability, media diversity, national security and their ability to meet customer preferences. AT&T states if their satellite system were disrupted by equipment failure or a catastrophic event the ANZCAN North whole circuits would provide additional continuity of service. AT&T calculates that, without using ANZCAN North whole circuits, cable usage would peak in 1983 when cables carried 16% of the U.S. Mainland-Hawaii MTS traffic. If AT&T and HTC jointly acquire 149 whole circuits in ANZCAN North, cable usage would peak in 1984 when cable traffic would account for 22% of all MTS traffic between the U.S. Mainland and Hawaii.

23. DOC and the State of Hawaii contend that these circuits are unneccessary. Both DOC and the State of Hawaii agree with the Commission's finding in the NPRM that sufficient domestic satellite capacity could be made available to meet demand. In addition, DOC contends that domestic satellite circuits could be less expensive than ANZCAN North circuits and that service reliability and route diversity could be increased in a less costly way by utilization of the three existing U.S. Mainland-Hawaii cable systems and the Intelsat satellite system. The State of Hawaii notes that RCA Americom has already indicated that it would have a minimum of 200–300 circuits available.

---

[16] See *Overseas Communication, supra* note 10, at 404.

[17] HTC is not authorized to directly serve Canada. Therefore, HTC must file for and be granted § 214 authority in order to directly serve Canada.

[18] We note that HTC's proposed extensive transiting proposal is inconsistent with its objections to transiting the comparatively short distance over the U.S. and Canadian borders to provide Canadian service.

[19] HTC could use a domestic satellite from Hawaii to an earth station in Pennsylvania and use a terrestrial system to transit from the earth station to the TAT–7 cable head in Tuckerton, N.J.

[20] If HTC requests authority to serve Europe via domestic satellite(s) and TAT–7, the Commission could order AT&T to make available interests in TAT–7 circuits to HTC. *See* AT&T et al. (TAT–7), 73 FCC 2d 248, 261 (1979).

[21] On December 23, 1981, the Common Carrier Bureau sent letters to RCA American Communications, Inc. (RCA Americom), American Satellite Company, Southern Pacific Communications Company, Alascom, Inc., Hughes Communications Company, GTE Satellite Corporation, and the Western Union Telegraph Company. Although all the domestic satellite carriers responded, RCA Americom was the only domestic satellite carrier which provided specific circuit availability information.

The State of Hawaii suggests the Commission should again request domestic satellite carriers to provide information on circuit availability and price.

24. We conclude that AT&T's, HTC's and the IRCs' requests to acquire temporary interest in ANZCAN North whole circuits for domestic service would serve the public interest. As we stated in the NPRM, service reliability and media diversity are important considerations in facilities planning.[22] Over 80% of the MTS traffic between Hawaii and the U.S. Mainland is transmitted via two satellites. A satellite system's failure could result in a serious disruption of service. The three existing cable systems will be saturated by 1983. Therefore, ANZCAN North is the only cable available from 1983 to 1988 that AT&T, HTC and the IRCs could use to cushion the impact of a satellite system's failure. We note that these parties are proposing acquisition of temporary rather than permanent interests for domestic service. This will reduce initial costs and maximize the ability of AT&T, HTC and the IRCs to utilize optical fiber cables when they are introduced. In addition, we note that AT&T and HTC will utilize circuit multiplication technology to minimize their bearer circuit requirement.

25. Finally, while there is apparently adequate domestic satellite capacity to accommodate these service requirements, the domestic satellite carriers have not actively sought this business and there are good public interest reasons for utilizing ANZCAN North. AT&T, HTC and IRC's acquisition of temporary interests in ANZCAN North whole circuits would increase service reliability and media diversity, while minimizing both the initial cost and length of involvement in this analog cable. Therefore, we conclude that AT&T, HTC and the IRC's acquisition of temporary interests in ANZCAN North whole circuits for domestic use would serve the public interest. *See,* Appendix III.

4. ANZCAN South—International Service, U.S. Carriers' Circuit Requests

26. In the Notice of Proposed Rulemaking the Commission tentatively concluded that U.S. carriers' acquisition of permanent ownership interests in ANZCAN South would serve U.S. interests but did not tentatively decide the number of half circuits that should be acquired. On June 28, 1982 AT&T, the IRCs and HTC submitted revised circuit requests which reduced their proposed ANZCAN South involvement from 648 half circuits to 546 half circuits.[23]

27. In their Comments AT&T, the IRCs and HTC concurred with the Commission's tentative conclusion. The Department of Commerce favors minimizing use of ANZCAN South due to its cost and the possible introduction of additional cable facilities. DOC concurs with the Commission's decision in the NPRM not to express a tentative preference for the number of circuits the carriers should acquire since DOC believes that demand growth in the region will decrease. The State of Hawaii contends that the record fails to support the need for any additional cable facilities in the Pacific Ocean Region.

28. We conclude that the public interest would be served by AT&T, the IRCs and HTC acquiring permanent ownership interests in 518 half circuits in ANZCAN South. The U.S. carriers' facility investment costs for these circuits is approximately $48.4 million (1984 dollars). *See* Appendix II. Projected demand figures indicate that by 1986 existing POR facilities will be unable to provide sufficient capacity to satisfy forecasted demands for international service between U.S. and Pacific points. During the mid-1980's ANZCAN South circuits would provide sufficient additional capacity to meet predicted demand for U.S. international services, at adequate levels of service quality in the POR. In addition, the acquisition of long term interests in ANZCAN South is required to provide media diversity to Southern Pacific points between 1991–1995 since after Seacom–2's retirement in 1991 ANZCAN South will be the only direct cable route projected to have available capacity from 1984 to 1995 between the U.S. and those points.

29. While the U.S. carriers have requested 546 half circuits, we conclude that only 518 half circuits should be acquired. This circuit reduction can be accomplished without any decrease in requested capacity. While HTC had requested permanent interest in 60 half circuits to serve Australia, it did not propose to utilize circuit multiplication technology. If HTC utilizes circuit multiplication equipment, 32 half circuits would carry the same traffic 60 unenhanced half circuits would carry. HTC's utilization of circuit multiplication technology would maximize the efficient use of ANZCAN South circuits and minimize its investment. For the reasons discussed above, we conclude that acquisition of permanent interest in 518 half circuits in ANZCAN South by AT&T, HTC and the IRCs serves the public interest.[24] *See* Appendix III.

B. Other Issues

30. Several other issues arose in this proceeding: (a) A master plan; (b) IRC's exemption from specific loading criteria; (c) application of the IRC's exemption to HTC; (d) adoption of a standardized costing methodology; (e) the adequacy of the record; (f) the use of an in-orbit operational spare satellite; and (g) the construction and use of analog HAW–4 and TPC–3 cables.[25] We shall discuss these issues below.

1. The Master Plan

31. Subsequent to the NOI, AT&T recommended formulation of a Master Plan approach to circuit activation. Further, both AT&T and Comsat proposed the incorporation of the principle of balanced loading into the Master Plan.[26]

32. In the NPRM the Commission tentatively concluded that a Master Plan approach to development of circuit distribution methodology is acceptable if it: (a) Utilizes balanced loading to optimize service quality, (b) gives due consideration to the costs to the ratepayers, and (c) contains a mechanism to deal with forecasted traffic level deviations.

33. In response to the Commission's tentative conclusion, in their comments the U.S. carriers and Comsat generally supported the concept of a Master Plan and submitted their circuit activation plans. ITT Worldcom submitted the requested information but questioned the necessity for IRCs to do so in light of

---

[22] In its comments, DoD states that service reliability and media diversity are extremely important due to their impact on U.S. national security.

[23] AT&T requested permanent interests in 360 half circuits, the IRCs 108, and HTC 78.

[24] AT&T will be authorized to acquire 360 half circuits, the IRCs 108 and HTC 50 half circuits.

[25] In addition, the IRCs registered their concern over continued access to domestic satellites, the State of Hawaii complained about HTC's rates and suggested that cable and satellite rates be unbundled, and ITT Worldcom requested an affirmation of the Commission's 1966 *Authorized User* decision. Authorized Entities and Users, 4 FCC 2d 421, 431 (1966). A facilities planning process is not the appropriate forum to discuss or decide the issues of continued access to domestic satellites and rate structures. Furthermore, subsequent to ITT Worldcom's request for an affirmation of the 1966 *Authorized User* decision, the Commission modified its earlier decision. Authorized User Modification, FCC 82–357,—— FCC 2d——, released August 19, 1982. To the extent this Report and Order is related to the *Authorized User Modification* decision, it is consistent with our decision there.

[26] The principle of balanced loading is considered by many to minimize the period of time over which there is an imbalance of traffic among the available facilities on a given route, and to minimize the percentage of lost circuits in the event of a facilities failure between two geographical points.

the Commission's tentative conclusion to exempt the IRCs from any particular loading criteria. In its comments, DOC suggests that a Master Plan not be adopted until criteria have been fully aired and adopted. DOC supports a media loading ratio of 65/35 which would be based on relative cost effectiveness of either cable or satellite systems.

34. Comsat, HTC and AT&T proposed various mechanisms to deal with deviation of forecasted traffic levels in the context of the Master Plan for circuit activation. Comsat and AT&T propose similar shortfall/longfall approaches to deal with traffic levels falling short of projected levels (shortfall) and traffic levels exceeding projected levels (longfall). The shortfall/longfall approach distributes a shortfall or a longfall in projected traffic levels over facilities in proportion to the originally planned growth for facilities in each year. Comsat's and AT&T's greatest area of disagreement concerns the circumstances under which the Master Plan would require modification. Rather than proposing an approach similar to Comsat's and AT&T's, HTC proposes the Commission authorize a carrier's Master Loading Plan subject to a total cable or satellite traffic deviation of ±20%. Comsat states that HTC's request for a 20% variation in circuit activation is too broad. In addition, Comsat requests the Commission to require U.S. carriers to file monthly status reports so that actual circuit activation can be monitored.

35. A Master Plan is a useful means of arraying projected circuit requirements. We requested the U.S. carriers to submit their circuit distribution plans for incorporation into a Master Plan to clarify their proposals and detail the method in which their requested circuits would be utilized. Without the IRC's forecasted circuit distributions the Master Plan would have fallen short of being comprehensive. The information contained in the Master Plan aided the Commission in conducting its analysis of the merits of the proposed facilities requests.

36. This is the first facilities planning proposal we have had an opportunity to review since we announced in *Authorized User Modification*, FCC 82–357,—— FCC 2d ——, released August 19, 1982, our intention to remove ourselves from the decision as to the activation of cable and satellite circuits. However, as we noted in that decision, the lack of effective competition between cable and satellite mediums prevents us from relying totally upon market forces. Thus, we stated that while we would generally rely upon the carriers to make circuit activation decisions, we would be required to monitor those decisions to assure that both mediums are reasonably used.

37. Consistent with *Authorized User Modification*, the carriers in this proceeding generated their own proposed circuit activation plans based upon the principle of balanced loading. We believe that the Commission's authorization of a specific master plan is undesirable since it would frustrate our decision to rely upon the carriers and competitive forces to efficiently activate circuits. After reviewing the carrier's circuit activation plans we believe those plans appear to constitute a reasonable Master Plan. Furthermore, we believe that AT&T's shortfall/longfall approach is a reasonable mechanism for dealing with deviations from projected traffic levels. In addition, in this proceeding AT&T's flexible approach appears preferable to using the specific allowable percentage of deviation proposed by HTC, since deviations in forecasted traffic levels are by their nature unexpected and can occur for a myriad of reasons. We shall not, at this time, express an opinion as to what set of circumstances we believe would necessitate the revision of the Master Plan. We expect the U.S. carriers to use the Master Plan as a guideline for circuit activation. As we stated in *Authorized User Modification*, we shall continue to monitor the U.S. carriers' circuit activation to assure that both cable and satellite facilities are reasonably used.[27] For the reasons discussed above, we find both the Master Plan for circuit activations from 1982–1986 and the use of a shortfall/longfall approach to traffic deviation during that period of time to be reasonable.

2. IRCs' Exemption From Specific Loading Methodology

38. The Commission tentatively concluded in the NPRM that the IRCs should be exempt from any particular loading criteria so they can adequately respond to their customers' preferences for cable or satellite circuits. In reaching this conclusion, we noted that the IRCs' circuit requests are small enough relative to the total number of circuits in use that if exempted from balanced loading IRCs' circuit distribution would be unlikely to deprive the ratepayers of the benefits of a balanced loading.

39. The IRCs enthusiastically supported our tentative conclusion. WUI and ITT Worldcom assured the Commission that, if exempted, they would not abandon satellites for cable. They maintain that good management policy dictates the relatively even use of both mediums. Both Comsat and the State of Hawaii expressed their concerns that the IRCs would migrate to cable at the expense of satellites if the IRCs were exempted. Further, Comsat contended that the IRCs' bearer and MTS circuits should be subject to balanced loading. Comsat believes that the IRCs would have sufficient flexibility to meet customer preferences if corcuits for leased channel record services were not subject to a strict circuit activation schedule.

40. We conclude that exempting IRCs from any particular loading criteria would serve the public interest. In the NPRM we tentatively concluded that IRCs should be exempted from specific circuit distribution methodology because of the existence of customer preferences for cable and satellite circuits. In order to adequately respond to individual private line customer demands the IRCs require flexibility in choosing facilities. The degree of flexibility they require cannot be attained by restricting them to a particular loading criteria. We disagree with Comsat's suggestion that the IRCs' leased circuits and bearer circuits should be treated differently because the former is subject to customer preferences while the latter is not. In the NPRM we stated that due to the relatively small number of circuits the IRCs required, exempting *all* their circuits was unlikely to harm U.S. ratepayers. If all the IRCs' circuits can be exempted without any adverse affect to the U.S. ratepayer, affording the IRCs' leased circuits and bearer circuits different treatment would not serve any purpose. Further, in the North Atlantic planning process we exempted the IRCs' total requested circuits so that IRCs could reconfigure its circuits to make cable or satellite circuits available to honor customer requests. *Future Licensing of Overseas Communications Facilities*, 73 FCC 2d 326, 348–349 (1979). Finally, we believe that the IRCs' need to be responsive to their customers' preferences will militate against a mass migration from either cable or satellite usage. However, we shall monitor the IRCs' use of facilities. *See* para. 37, *supra*. For the reasons discussed above we conclude that the IRCs shall be exempt from a specific circuit

[27] In *Authorized User Modification* the Commission found it necessary to continue to monitor the U.S. carriers' use of facilities to assure that both cable and satellite facilities are reasonably used. FCC 82–357 para. 65. To aid our monitoring of circuit activations we will condition § 214 authorizations on the carriers' submission of monthly status reports for the POR.

distribution in the Pacific Ocean Region.[28]

3. Application of IRC's Exemption to HTC.

41. In its comments HTC requests that the Commission extend the proposed IRC exemption from a specific loading methodology to encompass HTC's private line circuits. HTC contends that like the IRCs, its private line customers express media preferences and its private line circuits are small relative to its total circuit requirements. Comsat states that HTC should be accorded the same degree of flexibility as the IRCs in accommodating private line circuits.

42. We believe that exempting HTC's private line circuits would serve the public interest. HTC's and the IRCs' private line circuits are similar in terms of customer preference and small number relative to their respective total circuit requirements. HTC's exemption will apply only to its private line circuits, since unlike the IRCs, HTC's total circuits are numerous enough to distort the balance of use of facilities. For the reasons discussed above, we conclude that exempting HTC's private line circuits from a specific loading methodology would serve the public interest.

4. Adoption of a Standardized Cost Methodology

43. In the NPRM we discussed various costing methodologies and requested that the parties comment on them. At that point the parties had submitted four different methods for calculating the cost of the various plans; AT&T's investment method, AT&T's use method, Comsat's Present Worth of Expenditures (PWE), and the State of Hawaii's revenue requirements approach.

44. While the concept of a standardized costing methodology appealed to many, the parties were unable to agree on any one specific methodology. Several parties felt that Hawaii's revenue requirements approach called for too much speculation and effort. AT&T in its reply noted that no consensus had arisen but contended that it was not necessary to choose a specific methodology since the various costing methods tended to yield similar results.

45. We shall not adopt a standard costing methodology here. We note that utilizing the three methods suggested by AT&T and Comsat[29] yield similar relative costs for the plans; Plan III is the most expensive followed by Plan IIA and IIB.[30] Rather than adopting a specific cost methodology, we are utilizing the investment cost outlay costing approach, as described in the Table 7 of the NPRM, to arrive at the cost figures provided in Appendix II. Therefore, it is unnecessary to adopt a standard methodology at this time.

5. The Adequacy of the Record

46. In their comments both the State of Hawaii and DOC contend that the record is inadequate to support the acquisition of additional circuits. Both parties suggest that the Commission delay the Report and Order until a more complete record has been established. Both the State of Hawaii and the Department of Commerce are critical of the number of plans generated. The State of Hawaii contends that the international facilities planning process might be illegal since Hawaii is a domestic rather than international point. Hawaii suggests that the Commission should either sever the domestic matters or broaden the scope of the proceeding to include all domestic common carriers. The State of Hawaii also criticizes the Commission for failing to consider whether existing and future facilities are being efficiently utilized. The State of Hawaii contends that before the Commission authorizes additional circuits the Commission should require USISCs to demonstrate that they have efficiently subdivided their bearer circuits and fully utilized time division multiplex (TDM) equipment on their existing bearer circuits. In addition, Hawaii contends that the U.S. carriers failed to show that the ANZCAN owners decision to reduce ANZCAN North from 1840 3KHz to 1380 4KHz is cost effective. The DOC suggests an alternative facilities planning process which is ongoing and dynamic. In addition, its alternative process would formulate specific guidelines.

47. The U.S. carriers disagree with DOC's and the State of Hawaii's characterization of the record as incomplete. AT&T reminds the State of Hawaii that the Commission's request for information from domestic satellite common carriers went largely unanswered. AT&T states that Hawaii is a hub for international and domestic service and therefore both international and domestic facilities should be considered. According to AT&T, bifurcating the proceeding would deny the U.S. ratepayer the economies of scale inherent in the joint use of facilities. AT&T states that the reconfiguration of ANZCAN North from 3KHz to 4KHz will increase the cost on a per-circuit basis but concludes that the corresponding reduction in its U.S.-Hawaiian circuit needs and the elimination of 3KHz channelizing equipment will result in a lower overall USISCs investment. WUI believes that DOC's and Hawaii's objections to the adequacy of the record consist largely of unsubstantiated assertions.

48. The record is adequate. We believe that the Pacific Ocean Region planning process has been a dynamic and ongoing one, but we also recognize that planning must become final so construction and operation of facilities can begin. This proceeding was initiated on May 15, 1981 when the Commission released the Notice of Inquiry. Since that time we have held public meetings, requested domestic satellite common carriers to submit information, issued an NPRM, and extended the time for responding to the NPRM so that both the parties and the public would have an opportunity to comment. Further, in the NPRM we have explicitly stated various criteria that we would use in evaluating the plans.

49. In addition, we have examined both existing and future facilities for efficient use. The latest monthly circuit reports[31] indicate that out of 333 circuits used by HTC and the IRCs to provide service between Hawaii-U.S. Mainland, 316 are used for alternative voice and data services (AVD). Therefore, the State of Hawaii is concerned with only 17 bearer circuits (about 5%). Thus, the number of circuits with which Hawaii is concerned is not significant. In addition, the monthly reports indicate that carriers are deriving between 42–90 subchannel circuits per voice circuit between Hawaii and the U.S. Mainland. This appears to reflect use of TDM equipment by the IRCs and HTC on this route. We would expect that competition will continue to promote the maximization of subdivision equipment use. Further, our analysis of the carriers' requested circuits revealed that HTC could use fewer circuits without a decrease in capacity if it employed circuit multiplication equipment. Accordingly, the number of circuits authorized to HTC was substantially

[28] Several IRCs urge this policy to be extended to the TRANSPAC–2 cable. This facilities planning process is not the appropriate forum for such a request.

[29] No one, including Hawaii, calculated what the various plans would cost if the revenue requirements approach were utilized.

[30] Plan IIB is the least expensive plan unless the "use" costing method is utilized. Under the use method, Plan IIB is only slightly more costly than IIA.

[31] HTC, RCA Globcom and WUI's August 1982 monthly circuit reports were utilized. ITT Worldcom's June 1982 circuit report was used.

reduced from its initial request. We also examined the cost effectiveness of reconfiguring the ANZCAN North cable. While changing the ANZCAN North cable from a 3KHz to a 4KHz circuit increased per circuit costs, the increase was more than offset by the fact that the carriers would need fewer 4KHz circuits.

50. Finally, we note that bifurcating this proceeding would require the planning and perhaps construction of separate facilities for domestic and international service, which would result in needless delay and expense to the U.S. ratepayer. For the reasons discussed above, we conclude that the record as a whole is complete.[33]

6. In-Orbit Operational Spare Satellite, Analog HAW–4 and TPC–3 Cables

51. In the NPRM the Commission tentatively concluded that use of Intelsat's proposed in-orbit operational spare satellite in the POR during the mid-1980's was desirable but tentatively concluded that construction and use of analog HAW–4 and TPC–3 cables would not serve U.S. interests. Our tentative conclusions did not generate significant controversy. The U.S. carriers supported these tentative conclusions. Utilization of Intelsat's in-orbit spare satellite as an operational spare satellite would provide additional route diversity at minimal U.S. costs. Therefore, we conclude that configuration of the INTELSAT Pacific Ocean Region in-orbit spare satellite as an operational spare satellite during the mid-1980's is desirable. However, construction of and use of analog HAW–4 and TPC–3 is not essential to satisfy projected demands for service at adequate levels of service quality during the mid-1980's due to the U.S. carriers' use of the ANZCAN cable system. In addition, U.S. carriers' use of ANZCAN would be more compatible with the early introduction of the more cost effective digital optical fiber technology into the Pacific Ocean Region. Therefore, we conclude that construction and use of the analog HAW–4 and TPC–3 cables proposed in Plan III would not serve the public interest.

C. Issues Deferred

52. In the NOI we initiated a comprehensive planning process in the Pacific Ocean Region for the 1981–1995 period. However, in the NPRM we decided to focus upon POR facilities planning for 1981–1986 and consider the 1987–1995 period in a subsequent phase of the proceeding.

53. In the next phase of the POR planning process we shall examine U.S. carriers' 1987–1995 forecasted circuit demands, their circuit requests, and alternative facility plans proposed for construction during that period. Both the DOC and DoD suggest that the Commission consider landing the TPC–3 cable in Guam as well as Japan. This concern has not been addressed here because the issue of service to Guam is not affected by the planning process for the 1981–1986 period. However, full consideration will be given to this important topic in the next phase of the proceeding, which will examine the introduction of the TPC–3 cable in 1988.

III. Conclusion

54. Accordingly, it is ordered pursuant to Sections 4(i), 4(j), 214 and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 214 and 403 (1976), that we adopt the following policy guidelines for the Pacific Ocean Region:

(1) We find that U.S carriers' acquisition of ANZCAN circuits serves the public interest.

(2) We find that the public interest would be served by the American Telephone and Telegraph Company's acquisition of temporary IRU interests in 332 half circuits in ANZCAN North, and the International Record Carriers' acquisition of temporary IRU interests in 54 ANZCAN North half circuits for international service.

(3) We find that the public interest would be served by the authorization of American Telephone and Telegraph Company to acquire permanent ownership interests in 112 ANZCAN North half circuits and the International Record Carriers' acquisition of permanent ownership interests in 19 half circuits in ANZCAN North for international service.

(4) We find that the public interest would be served by the American Telephone and Telegraph Company and Hawaiian Telephone Company jointly acquiring temporary IRU interests in 149 whole circuits in ANZCAN North for domestic service.

(5) We find that the public interest would be served by the International Record Carriers acquiring temporary IRU interests in 47 whole circuits in ANZCAN North for domestic service.

(6) We find that Hawaiian Telephone Company's acquisition of permanent ownership interests in 60 half circuits in ANZCAN North for Canadian service would serve the public interest.

(7) We find that the Hawaiian Telephone Company's acquisition of 35 half circuits in ANZCAN North for European service would not serve the public interest.

(8) We find that the public interest will be served by the American Telephone and Telegraph Company acquiring permanent ownership interests in 360 half circuits, the International Record Carriers acquiring permanent ownership interests in 108 half circuits and Hawaiian Telephone Company acquiring permanent ownership interests in 50 half circuits in ANZCAN South.

(9) We find that the Master Plan and incorporation of the shortfall/longfall approach proposed by the American Telephone and Telegraph Company to accommodate deviations from forecasted traffic levels are reasonable.

(10) We find that the exemption of the IRCs from specific loading criteria would serve the public interest.

(11) We find that exemption of HTC's private line circuits from a specific loading methodology would serve the public interest.

(12) We find that standardized costing methodology need not be adopted in this phase of the planning process.

(13) We find that utilization of INTELSAT's in-orbit spare satellite as an operational spare satellite during the mid-1980's would serve the public interest.

(14) We find that construction and use of analog HAW–4 and TPC–3 cables would not serve the public interest.

55. It is further ordered that the rulemaking instituted by our Notice of Proposed Rulemaking is hereby terminated; but that the overall inquiry looking toward the development of facilities policy for the 1987–1995 period remains OPEN.

56. It is further ordered pursuant to § 0.291 of our Rules and Regulations, 47 CFR 0.291 (1980), that we continue the delegation of authority to the Chief, Common Carrier Bureau and his staff to meet with the parties to the inquiry in this proceeding and other interested persons to discuss matters relating to the issues on which we have deferred action as well as other matters relating to Pacific Ocean Region facilities

[33] In addition, the record supports the acquisition of interests in ANZCAN South and North. A discussion of those matters can be found in paragraphs 6–29, *supra*.

planning and to require submission of information relevant to those discussions.

Federal Communications Commission.

47 CFR Parts 1, 90, and 95

[FCC 82-397]

Substitution of Forms for Applications in the Private Land Mobile and General Mobile Radio Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted a Memorandum Opinion and Order substituting Forms 574, 574A and 574B for Forms 400 and 400S for applications in the Private Land Mobile and General Mobile Radio Services. This action was taken because under international agreements the United States should report to the International Telecommunication Union certain technical data which is used to protect reported stations and to resolve interference disputes between licensees in different countries. The information is needed as well so that the Commission can carry out its licensing function. The new forms will better serve these ends.

DATE: Initiation of these new forms and procedural rules is contingent upon approval of the forms by the Office of Management and Budget. When such approval has been obtained, we will announce the effective date by public notice. Until that time, the existing rules remain in effect and the existing forms must be employed.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Charles F. Turner, Private Radio Bureau, (202) 632-6497.

SUPPLEMENTARY INFORMATION:

List of Subjects

47 CFR Part 1

Practice and procedure.

47 CFR Part 90

Public safety radio services, Special emergency radio service, Industrial radio services, Land transportation radio services, Radiolocation service.

47 CFR Part 95

Personal radio services, General mobile radio service.

Adopted: August 24, 1982.

Released: August 31, 1982.

In the matter of amendment of the Commission's Rules to substitute Forms 574, 574A, and 574B for Forms 400 and 400S for applications in the Private Land Mobile and General Mobile Radio Services; memorandum opinion and order.

1. The Federal Communications Commission adopts new forms (FCC Forms 574, 574A and 574B) for use by applicants for authorizations in the Private Land Mobile and General Mobile Radio Services.

2. Pursuant to the requirements of Numbers 147 and 571 of the International Telecommunication Convention (Malaga-Torremolinas, 1973), as the United States is expected to report to the ITU certain technical data regarding the private land mobile radio services. This information is used to protect reported stations, and to resolve interference disputes between licensees in different countries.

3. In order to collect the necessary data, and to provide the Commission with additional information it requires, we are adopting new license application forms for use by applicants in the Private Land Mobile and General Mobile Radio Services. We are also taking this opportunity to modify our system licensing procedures in two respects. First we are expanding the number of stations that may be contained in a "system license." Second, we are making the submission of system applications optional raather than mandatory. See 47 CFR 90.117. Currently, only applications involving systems consisting of not more than two stations at permanent locations are submitted as applications for a "system license". Those needing larger systems have had to file multiple applications. This limitation was dictated by the capabilities of our data processing systems, and our intention has always been to expand the system licensing approach when it became practical to

do so.[1] [2] In addition, the mandatory filing requirement to file a system application when not more than two stations at a permanent location are involved has proved to be burdensome for both the Commission and the applicants. In view of our enhanced computer capabilities, therefore, applications involving systems consisting of not more than six stations at permanent locations may be filed as applications for systems licensing if the applicant wishes. We are eliminating, however, any compulsion on applicants to seek a single system license.

Form 574

4. Form 574 replaces Form 400. It is to be filed by those applying for new stations or systems, for modification of existing systems, or for Commission consent to the assignment of a license. The new form contains several data elements not contained on Form 400. Form 574 requires applicants to state the effective radiated power of their proposed station; this information is necessary for the Commission to comply with ITU reporting requirements. Other data elements which we had considered including at one time have been eliminated or reduced 8, *infra*. We are requiring submission of the name and telephone number of the person supplying technical data for the application in order to permit the Commission to contact this person should technical questions arise. At the same time we have been able to delete 5 questions previously required on the Form 400 which are no longer required for licensing.

5. To minimize the impact to the public in supplying data such as a station's effective radiated power, existing licensees may continue to use Form 405A (the short form renewal) when filing for a license renewal. They will, however, have to file Form 574 in instances of station modifications where they previously would have been required to file Form 400. Applicants may, as a precaution, wish to file Form 574 voluntarily, inasmuch as licensees will receive maximum protection from international interference only if the Commission can report current and accurate station information (including E.R.P.) to the ITU. If such information is not reported, any international interference disputes that arise may be resolved on the basis of "worst-case" assumptions that could be unfavorable to the licensee. In any case, the licensee would be protected in accordance with the limits of the assumptions reported by the FCC unless exceptions are filed.

Form 574A

6. Form 574A, replacing Form 400S, is to be filed by applicants for 800 MHz-band stations. This new form will enable the Commission to collect in a more orderly fashion information already supplied by licensees in this band. Because Form 574A does not collect any ITU required information, existing licensees are not required to file it for simple renewals. They may use 405A instead. They will be required to file 574A, however, when applying for a modification, for consent to an assignment, or for a new station or system. The data collection burden on the public (400S vs 574A) has also been reduced by the elimination of several questions previously required.

Form 574B

7. Form 574B pertains to stations operating on frequencies below 27.5 MHz for which additional data are required for reporting to ITU, and to stations close to the U.S.-Canada or U.S.-Mexico borders to satisfy coordination procedures established by treaties or agreements.[3] The form contains the following new data elements:

(1) Class of operation (required only on applications for frequencies below 27.5 MHz).

(2) Azimuth of main lobe.

(3) Angular width of radiation main lobe of directional antennas.

8. All licensees operating stations below 27.5 MHz, an estimated 500 of some 180,000 applications received yearly whatever their location, must file Form 574B. Because it is in the bands below 27.5 MHz that there is the greatest potential for international interference problems, no exception will be made of existing licensees. Thus existing licensees in these bands must file Form 574B the first time that they file for renewal of their authorizations following the effective date of the new rule and whenever a modification occurs which affects the data of the new rule and whenever a modification occurs which affects the data contained thereon. Applicants operating or seeking authorization to operate border-area facilities above 27.5 MHz will not be required to file Form 574–B. But, if they choose not to submit the form, the Commission will report the station to the coordinating nation as having certain assumed characteristics.[4] In those instances where the assumptions do not apply, applicants may provide the correct data by filing Form 574B. If they do not, they will be bound by the assumptions.

9. These changes are procedural in nature and we find notice and public procedure thereon are impractical and unnecessary. See 5 U.S.C Section 553(b)(3)(A). Nevertheless, we have informally solicited public comment regarding the proposed revisions. On December 11, 1980, we issued a Public Notice announcing the proposed changes and soliciting written comments. On January 6, 1981 and November 11, 1981, interested parties attended open meetings held by members of the Commission's staff and expressed their views. We have considered the comments made, and made some changes to these new forms as a result.[5]

---

[1] This limitation does not apply to systems operating exclusively in the 470–512 MHz band.

[2] *Private Land Mobile Radio Services-System Licensing*, 71 FCC 2d 1150 (1979) at p. 1153–1154.

[3] Specifically, the following stations are involved:

(1) Those north of Line A, or east of Line C if the application is for a frequency between 30 MHz and 470 MHz.

(2) Those requesting frequencies in the portions of the frequency bands allocated to both countries that overlap in the two geographical areas as defined in the U.S.-Canada agreement, dated April 7, 1962, concerning the use of 800 MHz frequencies along the U.S.-Canada border.

[4] The assumed characteristics are as follows:

(a) *Class of Operation for HF stations.* All HF applicants must file Form 574B. However, any station record not updated will be assumed to operate in the "A" mode.

(b) *Antenna Polarization.* We will report each station as having a vertically polarized antenna.

(c) *Antenna Gain.* Since we require each applicant to report each transmitter's output power and effective radiated power, we will approximate the gain.

(d) *Antenna Azimuth of Main Lobe.* We will report each base or mobile relay station as having an omnidirectional (360 degrees) azimuth. We will assume that each control station associated with a mobile relay station has a directional antenna with its azimuth of maximum radiation directed toward the mobile relay station.

(e) *Beamwidth.* Since an omnidirectional antenna is assumed, beamwidth has no relevance and no assumption will be made. However, for control stations we will assume 20 degrees.

(f) *Regular Hours of Operation.* We will report each station as operating twenty-four hours per day.

(g) *Receiver Information.* We will assume that a receiver operates at the same location as a transmitter, and that all units specified on the same application form communicate with each other as a system. In other words, we will assume that the receiver site for a mobile station transmission is the location of the associated base station. The receiver site for a base station transmission will be assumed to be the area of operation of the associated mobile stations. For a control station transmission, the location of the associated mobile relay station's receiver antenna will be the assumed receiver site.

[5] We have modified the forms so as to make them easier to complete. For instance, we have "grandfathered" existing licensees, eliminating the need for them to supply effective radiated power data when they file renewal applications subsequent to the effective date of these new rules. In addition, these new forms provide larger spaces for listing multiple frequencies, so that applicants seeking to operate on a number of channels need

10. Initiation of these new forms and procedural rules is contingent upon approval of the forms by the Office of Management and Budget. When such approval has been obtained, we will announce the effective date by public notice. Until that time, the existing rules remain in effect and the existing forms must be employed.

11. For the reasons set forth above, Parts 1, 90 and 95 of Title 47, Code of Federal Regulations, are amended as set forth in the Appendix hereto, effective on a date to be published in the **Federal Register** following Office of Management and Budget approval of these new forms. This action is taken pursuant to Sections 4(i) and 303(r) of the Communications Act, as amended, 47 U.S.C. Sections 154(i) and 303(r).

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 1, 90, and 95 of Chapter 1 of the Code of Federal Regulations are amended as follows:

PART 1—PRACTICE AND PROCEDURE

1. Section 1.922 is amended by removing the Form 400 and 400–10 from the list of Forms and adding in appropriate numerical order, Forms 574, 574–A, and 574–B as follows:

§ 1.922 Forms to be used.

FCC form	Title
*	*
574	Application for Radio Station Authorization in the Private Land Mobile and General Mobile Radio Services.
574–A	Supplementary Information for Trunked and Conventional Systems (806–821 MHz and 851–866 MHz bands).
574–B	Private Fixed, Mobile, and Radiolocation Services Supplementary Information Form. Instructions for Completion of FCC Form 574.
*	*

2. Section 1.924 is amended by revising paragraph (b)(2)(i), redesignating paragraphs (b)(2)(v) through (b)(2)(vii) as (b)(2)(iv) through (b)(2)(vi) respectively and reserving (b)(2)(vii).

not complete several application forms. In response to suggestions offered by frequency coordinators, we have added a data element that solicits a frequency coordination number. We have eliminated previously proposed data elements concerning points of communication, equipment type acceptance, shared use, and rendering of service. We have also deleted a proposed requirement to list wireline control points other than the primary control point.

§ 1.924 Assignment or transfer of control, voluntary and involuntary.

* * * * *

(b) * * *

(2) * * *

(i) FCC Form 574: for assignment of station authorization in services under Part 90 of this chapter, except as provided in subparagraph (ii). Attached thereto shall be an executed Form 1046 or a signed letter from proposed assignor stating the desire to assign the current authorization in accordance with the rules governing the particular radio service involved. Applications for consent to assign authorizations of stations operating in the 806–821 and 851–866 MHz bands shall be accompanied by FCC Form 574–A. Applications for assignment of authorizations for stations operating on frequencies below 27.5 MHz shall be accompanied by FCC Form 574–B.

* * * * *

3. Section 1.926 is amended by adding a new paragraph (b)(3).

§ 1.926 Application for renewal of license.

* * * * *

(b) * * *

(3) Applications for renewal of stations operating on frequencies below 27.5 MHz may be submitted on FCC Form 405–A, but it must be accompanied by a completed FCC Form 574–B unless Form 574–B had been submitted previously for the station in question.

* * * * *

§ 1.931 [Removed]

4. Section 1.931, Application for extension of construction permit, is removed in its entirety.

5. Section 1.955 is amended as follows:

Paragraphs (a) and (g) are revised. New paragraph (h) is added.

§ 1.955 Frequency coordination, Canada.

(a) As a result of mutual agreements, the Commission has, since May 1950 had an arrangement with the Canadian Department of Communications for the exchange of frequency assignment information and engineering comments on proposed assignments along the Canada-United States borders in certain bands above 30 MHz. Except as provided in paragraph (b) of this section, this arrangement involves assignments in the following frequency bands.

MHz	*MHz*
30.56–32.00	75.40–76.00
33.00–34.00	150.80–174.00
35.00–36.00	450–470
37.00–38.00	806.00–890.00
39.00–40.00	1850.0–3220.0
42.00–46.00	3450.0–3690.0
47.00–49.60	3700.0–4200.0
72.00–73.00	5925.0–7125.0
GHz	*GHz*
10.55–10.68	10.70–13.25

* * * * *

(g) Proposed assignments in the space radiocommunication services and proposed assignments to stations in frequency bands allocated coequally to space and terrestrial services above 1 GHz are not treated by these arrangements. Such proposed assignments are subject to the regulatory provisions of the International Radio Regulations.

(h) Assignments proposed in the frequency band 806–890 MHz shall be in accordance with the Canada-United States agreement, dated April 7, 1982.

PART 90—PRIVATE LAND MOBILE RADIO SERVICES.

1. Section 90.117 is revised as follows:

§ 90.117 Applications for radio station or radio system authorizations.

Persons desiring a radio station or radio system authorization must first submit the appropriate application(s). Prescribed application forms are listed in § 90.119. The Forms may be obtained from the Washington, D.C. office of the Commission, its Gettysburg, Pa. office, or from any of its engineering field offices. (See § 90.145 for information regarding special temporary authorizations.) Applicants for new stations comprising a land mobile radio system as defined in § 90.7 of this Part, or applicants modifying or renewing a station that is a part of a system, may file an application for a system authorization.

2. Section 90.119 is amended by revising the introductory text of paragraph (a) and paragraphs (a)(2)(i) and (a)(2)(ii). Present paragraphs (d) and (e) are redesignated as new paragraphs (f) and (g). Present paragraph (b) is redesignated as paragraph (e) and revised. New paragraphs (b), (c), and (d) are added as set forth below.

§ 90.119 Applications forms.

* * * * *

(a) Form 574 shall be used to apply:

(2) * * *

(i) Application for a radio system may be submitted on a single Form 574.

(ii) If the control station(s) will operate on the same frequency as the mobile station, and if the height of the control station(s) antenna(s) will not exceed 6.1 meters (20 feet) above the ground, or an existing man-made structure (other than an antenna structure), there is no limit on the number of such stations which may be authorized. Items 1 through 5 of Form 574 shall be completed showing the

frequency, the station class, the total number of control stations, the emission, and the output power of the highest powered control station.

* * * * *

(b) With respect to the 806–821 and 851–866 MHz bands, all applications required by this Section to be filed on Form 574 shall be accompanied by Form 574–A.

(c) With respect to the frequencies below 27.5 MHz, all applications required by this Section to be filed on Form 574 shall be accompanied by Form 574–B.

(d) Applications for stations on frequencies above 27.5 MHz in areas where international coordination is required may be accompanied by Form 574–B, but are not required to be. If the applicant files Form 574–B, the information concerning the proposed station that the Commission reports to the coordinating nation will be that provided on the Form. If the applicant does not file Form 574–B, the information concerning the proposed station that the Commission reports to the coordinating nation will be based on assumed technical characteristics determined by the Commission and described in instructions to Form 574. Specifically, the following stations are involved:

(1) Those north of Line A, or east of Line C if the application is for a frequency between 30 MHz and 470 and 929 and 930 MHz. Lines A and C are defined in Section 90.7.

(2) Those requesting frequencies in the portion of the frequency bands allocated to both countries that overlap in the two geographical areas as defined in the U.S. Canada agreement, dated April 7, 1982, concerning the use of 800 MHz frequencies along the U.S.-Canada border.

(e) Form 405–A shall be used to apply for a renewal without modification of a station or system license.

* * * * *

3. Section 90.135 is amended by revising paragraph(b)(7).

§ 90.135 Modification of license.

* * * * *

(b) * * *

(7) In the case of a change listed in subparagraphs (b)(3), (b)(4), or (b)(5) of this paragraph, the licensee shall promptly notify the Commission within 30 days of the change. The notice shall be filed on FCC Form 574 and sent to Federal Communications Commission, Gettysburg, Pa. 17325. If the notification relates to stations operating in 806–821 and 851–866 MHz bands, the Form 574 shall be accompanied by Form 574–A. If the notification relates to stations operating on frequencies above 27.5 MHz the Form 574 may be accompanied by Form 574–B, but is not a requirement. See § 90.119(d).

PART 95—PERSONAL RADIO SERVICES

Subpart A—General Mobile Radio Service

* * * * *

Part 95 is amended as follows:

1. Section 95.15 is amended by revising the introductory text of paragraph (a), paragraphs (a)(3), and (a)(6) through (a)(8), and adding paragraph (a)(5) as follows:

§ 95.15 Standard forms to be used.

(a) Except as required in paragraph (b) of this section, FCC Form 574 shall be used when:

* * * * *

(3) Application is made for station license of any base station or fixed station.

* * * * *

(5) Application is made for reinstatement of an expired authorization.

(6) Application is made for an authorization for a new base or fixed station to operate at unspecified or temporary locations. When individual transmitters are intended to be operated as base stations or as fixed stations at unspecified or temporary locations for indeterminate periods, such transmitters may be considered to comprise a single station intended to be operated at a temporary location. The application shall specify the general geographic area within which the operation will be confined. Data must be submitted to show why the proposed area of operation needs to be the size requested.

(7) Subject to the limitations set out in this Section, applicants for new stations comprising a land mobile radio system (See Section 95.17(e)), or applicants modifying or renewing a station that is part of a system may file an application for a system authorization if the system consists of not more than six land stations at permanent locations. The system may include any number of mobile stations and any number of fixed stations for control. The application must include:

(i) Number of fixed stations for control;

(ii) Their transmitting frequencies;

(iii) Their types of emission;

(iv) Their highest output powers;

(v) Each street address;

(vi) Each street address of control points;

(vii) Geographical coordinates for all land stations whose antenna heights exceed 6.1 meters;

(viii) Geographical coordinates for all fixed stations for control which transmit with more than 5 watts ERP.

(8) Applicants for new station licenses or for modification of existing station licenses, where the modification involves a change in station location or antenna height, must furnish a narrative statement concerning environmental impact, if required (See Part 1 of this chapter, §§ 1.1301 through 1.1319).

* * * * *

2. Section 95.17 is amended by revising paragraphs (b) and (e) as follows:

§ 95.17 Filing of applications

* * * * *

(b) Applications for station or system authorizations, applications for consent to transfer of control of a corporation holding a radio station or system authorization, requests for special temporary authority or other special requests, and correspondence relating to an application for a radio station or system authorization shall be submitted to the Federal Communications Commission, Gettysburg, Pennsylvania 17325. Prescribed application forms are set forth in 47 CFR Part 1, Sections 1.922 and 1.926.

* * * * *

(e) Applications for land mobile radio system authorizations will only be accepted for systems complying with § 95.15(a)(7).

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 671

[Docket No. 21217-253]

Tanner Crab Off Alaska

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of season adjustment.

SUMMARY: The Secretary of Commerce establishes new season opening dates for Tanner crab fishing in the fishery conservation zone in the South Peninsula and Chignik Districts of

Registration Area J. The new opening dates are consistent with those set by the State of Alaska and are necessary to allow Tanner crab fishing during periods when meat content of the crab is more fully developed and of better quality. This action would promote conservation of Tanner crab stocks and more optimal use of harvested Tanner crab. This action also would provide coordinated State/Federal management of a Tanner crab fishery that is conducted simultaneously in State and Federal waters.

EFFECTIVE DATE: This notice of season adjustment is effective from December 17, 1982 through October 31, 1983. This notice was filed for public inspection with the Office of the Federal Register on December 17, 1982 at 5:05 p.m.

FOR FURTHER INFORMATION CONTACT: Robert W. WcVey, Director, Alaska Region, National Marine Fisheries Service, 907–586–7221.

SUPPLEMENTARY INFORMATION: The fishery management plan for the Commercial Tanner Crab Fishery off the Coast of Alaska provides for adjustments of season and area openings and closures by field order. Implementing rules at 50 CFR Part 671 specify at section 671.27(b) that these orders will be issued by the Secretary of Commerce under criteria set out in that section.

In March of 1982, the Alaska Board of Fisheries (Board) adopted changes to Tanner crab fishing seasons in both the South Peninsula and Chignik Districts of Registration Area J by changing the opening date in each district from 12:00 noon local time on December 15, to 12:00 noon local time on February 10. The Board took this action at a joint meeting of the Board and the North Pacific Fishery Management Council (Council) in response to requests from the fishing industry. At the request of the Council, the Secretary of Commerce made an initial determination to adopt these changes for the South Peninsula and Chignik Districts, explained the rationale for that determination, and invited comments on these changes through December 16, 1982 (47 FR 54125, December 1, 1982).

No comments were received during the comment period. By this notice the Secretary of Commerce confirms the initial determination to adopt those changes and announces that the opening dates for the Chignik and South Peninsula Districts are changed to 12:00 noon local time on February 10, 1983. Closing dates remain unchanged. This field order expires on October 31, 1983.

These new seasons will not be effective prior to filing this notice for publication with the Office of the Federal Register and publicizing the season opening for 48 hours through Alaska Department of Fish and Game (ADF&G) procedures, under 50 CFR 671.27(a)(2).

Other Matters

This action is taken under the authority of regulations specified at 50 CFR 671.27 and is taken in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 47, No. 246
Wednesday, December 22, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 113

[Docket No. 82-022]

Viruses, Serums, Toxins, and Analogous Products; Revision of Standard Requirements for the Detection of Extraneous Agents in Vaccines Prepared Using Cells and Ingredients of Animal Origin; Relaxation of Testing Requirements

Correction

In FR Doc. 82-32636 beginning on page 53884, in the issue of Tuesday, November 30, 1982, make the following correction.

On page 53889, in the second column, the eighth line of § 113.55 (a)(3), the reference to "§ 113.2" should have read "§ 113.52".

BILLING CODE 1505-01-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Codes and Standards for Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amend its regulations to incorporate by reference the Summer 1982 Addenda of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code. The sections of the ASME Code being incorporated provide rules for the construction of nuclear power plant components. Adoption of these amendments would permit the use of improved methods for construction of nuclear power plants.

DATE: Comments must be received by February 22, 1983. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Written comments or suggestions may be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. E. T. Baker, Division of Engineering Technology, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone (301) 443-5893.

SUPPLEMENTARY INFORMATION: On July 29, 1982 (47 FR 32725), the Nuclear Regulatory Commission published in the **Federal Register** proposed amendments to is regulation, 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities," which proposed incorporation by reference of the Winter 1981 Addenda to the ASME Boiler and Pressure Vessel Code. The proposed amendment would revise § 50.55a to incorporate by reference the Winter 1981 Addenda to Section III, Division 1, "Rules for the Construction of Nuclear Power Plant Components," and to Section XI, Division 1, "Rules for Inservice Inspection of Nuclear Power Plant Components," of the ASME Boiler and Pressure Vessel Code. The Summer 1982 Addenda to the ASME Code have been issued. The Commission proposes to further amend § 50.55a to incorporate by reference the Summer 1982 Addenda that modifies Section III, Division 1, of the ASME Boiler and Pressure Vessel Code.

Some of the changes effected in the addenda that would be incorporated through the adoption of the proposed amendments follow:

1. The foreword of all sections of the Code was revised regarding interpretations of the Code to restrict the authority to issue such interpretations to the American Society of Mechanical Engineers. Previously, paragraph thirteen of the foreword had permitted the National Board of Boiler and Pressure Vessel Inspectors to issue interpretations of the ASME Boiler and Pressure Vessel Code.

2. Paragraph NCA-8230(b) was revised to delete the requirement that the location of the nameplate for component supports be shown on the support drawing.

3. Code Case N-100, "Pressure Relief Valve Design," was adopted into the body of the Code as subsubarticle NB-3590. The Code Case will be annulled when the Summer 1982 Addenda becomes effective.

4. Subsubarticle NB-5520 was revised to update the reference to the American Society for Nondestructive Testing (ASNT) standard SNT-TC-1A, to the 1980 Edition. It was also revised to clearly state that even if an outside agency or ASNT provided the qualification examinations, the employer is still responsible for certifying its own personnel.

Paperwork Reduction Act Statement

Pursuant to the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511), the NRC has made a determination that this proposed rule does not impose new nor impact existing information collection requirements.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. This proposed rule affects only the licensing and operation of nuclear power plants. The companies that own these plants do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration at 13 CFR Part 121. Since these companies are dominant in their service areas, this proposed rule does not fall within the purview of the Act.

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire prevention, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting requirements.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended,

and section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following amendments to 10 CFR Part 50 is contemplated.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, 1246, as amended (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95–601, Sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Sections 50.100–50.102 also issued under sec. 186, 68 Stat. 955; (42 U.S.C. 2236).

For the purposes of sec. 223, 68 Stat. 958, as amended, (42 U.S.C. 2273), §§ 50.10(a), (b), and (c), 55.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161b, 68 Stat. 948 as amended (42 U.S.C. 2201(b)); §§ 50.10(b) and (c) and 50.54 issued under sec. 161i, 68 Stat. 949, as amended, (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 50.55a, paragraph (b)(1) is revised to read as follows:

§ 50.55a Codes and standards.

* * * * *

(b) * * *

(1) As used in this section, references to Section III of the ASME Boiler and Pressure Vessel Code refer to Section III, Division 1, and include editions through the 1980 Edition and addenda through the Summer 1982 Addenda.

* * * * *

Dated at Bethesda, Maryland this 20th day of November 1982.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

[FR Doc. 82-34586 Filed 12-21-82; 8:45 am]

BILLING CODE 7590-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Monthly Statements

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is proposing to amend its regulations to require futures commission merchants ("FCMs") to include in the monthly statements of account activity furnished to futures customers a detailed accounting of commissions and fees charged to the customer's account during the preceding month. The Commission is also requesting comments as to whether it should continue to require FCMs to include in their monthly statements to option customers information relating to commissions and fees. The Commission believes that the presentation of such information in summary form in monthly activity statements would be of benefit to futures customers.

DATE: Comments must be received on or before January 21, 1983.

ADDRESS: Comments should be sent to: Commodity Futures Trading Commission, 2033 K Street N.W., Washington, D.C. 20581. Attention: Secretariat.

FOR FURTHER INFORMATION CONTACT: Paul G. Thompson, Esq., Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: On June 30, 1982, the Commission published proposed rules to expand the Commission's commodity options pilot program to include the trading on domestic exchanges of options on physicals. 47 FR 28401. That proposal also included proposed amendments to existing rules which would affect transactions in futures contracts and options on futures contracts. Among the proposed rules affecting futures transactions was a proposal to amend § 1.33(a)(1) to require that FCMs provide their futures customers with monthly activity statements which include information relating to financial charges and credits to the customer's account and trading activity during the preceding month. Proposed § 1.33(a)(1)(iv). The Commission proposed this requirement because it believed that the presentation of such information in summary form in monthly activity statements would be of benefit to futures customers. In particular, the Commission believed that the reiteration of this information would be useful to customers who otherwise would receive this data only on a "per transaction" basis in the purchase and sale statements provided pursuant to § 1.46(a) when it may not be focused on by customers. Furthermore, and as the Commission noted when it proposed this rule, § 1.33(a)(2)(v) presently requires that this information be provided to option customers. 47 FR at 28406.

The Commission, however, has recently received letters from FCMs suggesting that the inclusion of commissions and fees in the monthly statements provided to futures customers would require the modification, at great expense, of most FCMs' computer systems. These FCMs further suggested that implementation of such a requirement could substantially increase the length of the monthly statements now provided to futures customers, thereby making those statements less, rather than more, useful to their recipients. Thus, although the Commission is today publishing in the **Federal Register** rules and rule amendments it has adopted after consideration of the comments on its June 30, 1982 proposal, the Commission has decided to repropose § 1.33(a)(1)(iv) in order to allow other FCMs and interested members of the public an additional opportunity to offer comments on whether FCMs should be required to include information relating to commissions and fees in the monthly statements provided to their futures customers.[1]

As noted earlier, § 1.33(a)(2)(v) requires the inclusion of commissions and fees in the monthly statements provided to option customers. The Commission understands that comments submitted on the question of whether the Commission should require this information to be included in the monthly statements for futures transactions could also apply generally to whether this requirement is appropriate for option transactions.[2] The Commission is therefore requesting that in light of the special protections that are afforded to option customers under the Commission's pilot program regulations, such comments be separately identified and specifically address the value of such information to option customers.

The Commission has previously determined that registered futures commission merchants are not "small entities" for purposes of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). 47 FR 18618 (April 30, 1982). The requirements of the Regulatory Flexibility Act do not, therefore, apply to those entities. Accordingly, the Chairman, on behalf of the Commission, hereby certifies pursuant to 5 U.S.C.

[1] The Commission will consider the letters it has thus far received on this subject in its review of the amendment proposed herein.

[2] For example, confirmation statements for option transactions must include, among other items, all "commissions, costs, fees and other charges incurred in connection with the option transaction." Section 1.33(b)(2)(ii).

605(b) that the rules provided herein, if promulgated, will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 17 CFR Part 1

Records, Monthly statements.

In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act and, in particular, Section 4g and 8a thereof, 7 U.S.C. 6g, 12a, the Commission hereby proposes to amend Chapter I of Title 17 of the Code of Federal Regulations by amending § 1.33(a)(1)(iv) as follow:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. Section 1.33 is proposed to be amended by revising paragraph (a)(1)(iv) to read as follows:

§ 1.33 Monthly and confirmation statements

(a) * * *

(1) * * *

(iv) A detailed accounting of all financial charges and credits to the commodity customer's account during the monthly reporting period, including all customer funds received from or disbursed to the commodity customer, commissions and fees, and realized profits and losses; and

* * * * *

Issued in Washington, D.C. on December 13, 1982, by the Commission.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-148 (Oklahoma-5)]

High-Cost Gas Produced From Tight Formations; Oklahoma Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Oklahoma that the "Jones Sand member" of the "Cleveland Sand" interval of the Skiatook Group be designated as a tight formation under § 271.703(d).

DATES: Comments on the proposed rule are due on January 31, 1983. Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on January 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or John Roy Johnson, (202) 357-8731.

SUPPLEMENTARY INFORMATION:

Issued: December 16, 1982.

I. Background

On October 23, 1982, the Oklahoma Corporation Commission (Oklahoma) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the "Jones Sand member" of the "Cleveland Sand" interval of the Skiatook Group located in Lincoln County, Oklahoma, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Oklahoma's recommendation that the "Jones Sand member" of the "Cleveland Sand" interval of the Skiatook Group be designated a tight formation should be adopted. Oklahoma's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Oklahoma has recommended that the "Jones Sand member" of the "Cleveland Sand" interval, underlying Sections 1 through 4 and 9 through 12, Township 13 North, Range 2 East; Sections 4 through 8, Township 13 North, Range 3 East; Sections 21 through 28 and 33 through 36, Township 14 North, Range 2 East; and Sections 19, 20 and 28 through 33, Township 14 North, Range 3 East, in Lincoln County, central Oklahoma, be designated a tight formation. The recommended interval is Early Pennsylvanian (Missourian) in age.

The "Jones Sand member" is composed of an "upper", "middle" and "lower" sand zone and two interbedded zones of predominantly shale. The sand zones consist of fine- to very fine-grained, well cemented quartz sandstone and interbedded shale.

The depth of the recommended interval ranges from 3,910 to 4,500 feet, and it is approximately 200 feet thick. The top of the designated interval is respectively overlain by a shale zone (ranging from 200 to 280 feet in thickness), the "Upper Cleveland sand" and the "Checkerboard limestone" of the Lower Skiatook Group; the recommended interval is underlain by a shale zone (ranging from 100 to 150 feet in thickness which separates the "Oswego limestone" of the Marmaton Group (Des Moinesian age) from the "Lower Jones sand" zone.

III. Discussion of Recommendation

Oklahoma claims in its submission that evidence gathered through information and testimony presented at public hearings convened on July 20 and August 16, 1982, by Oklahoma on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Oklahoma further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Oklahoma that the "Jones Sand member" of the "Cleveland Sand" interval of the Skiatook Group, as described and delineated in Oklahoma's recommendation as filed with the

Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 31, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–148 (Oklahoma-5) and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than January 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432.)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Oklahoma's recommendation is adopted.

Kenneth A. Williams

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by adding subparagraph (152) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(115) through (151) [Reserved]

(152) *"Jones Sand member" of the "Cleveland Sand" interval of the Skiatook Group in Oklahoma.* RM79–76–148 (Oklahoma-5).

(i) *Delineation of formation.* The designated interval is found in Sections 1 through 4 and 9 through 12, Township 13 North, Range 2 East; Sections 4 through 8, Township 13 North, Range 3 East; Sections 21 through 28 and 33 through 36, Township 14 North, Range 2 East; and Sections 19, 20 and 28 through 33, Township 14 North, Range 3 East, in Lincoln County, central Oklahoma. The "Jones Sand member" consists of three quartz sandstone zones and two interbedded zones of predominantly shale.

(ii) *Depth.* The depth of the applicable interval ranges from 3,910 to 4,500 feet, and it is approximately 200 feet thick. The top of the designated interval is respectively overlain by a shale zone (ranging from 200 to 280 feet in thickness), the "Upper Cleveland sand" and the "Checkerboard limestone" of the Lower Skiatook Group; the interval is underlain by a shale zone (ranging from 100 to 150 feet in thickness) which separates the "Oswego limestone" of the Marmaton Group (Des Moinesian age) from the "Lower Jones sand" zone.

18 CFR Part 271

[Docket No. RM79–76–159 (Texas–29)]

High-Cost Gas Produced From Tight Formations, Texas; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by Section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that the Vicksburg Formation in the Portilla (9000') Field be designated as a tight formation under § 271.703(d).

DATES: Comments on the proposed rule are due on January 31, 1983.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on January 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Walter W. Lawson, (202) 357–0556.

SUPPLEMENTARY INFORMATION:

Issued: December 16, 1982.

I. Background

On November 9, 1982, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Vicksburg Formation in the Portilla (9000') Field, in San Patricio County, Texas, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that the Vicksburg Formation in the Portilla (9000') Field be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas recommends that the Vicksburg Formation in the Portilla (9000') Field in the northern portion of San Patricio County, Texas, Railroad Commission District 4, be designated as a tight formation. The recommended area is located approximately six miles northeast of Sinton, Texas, and underlies some 15,000 acres of land bounded by the Chiltipin Creek to the south, U.S. Highway 77 to the west, and the Aransas River to the north. The eastern boundary is a line extending from the Chiltipin Creek on the south to the Aransas River on the north and approximately bisecting the following surveys: Isaac Clover A–89, N. J. Devenny A–105, and Ralph Ellis Hrs. A–115. The depth to the top of the Vicksburg Formation in the Portilla (9000') Field varies between 8,800 feet and 9,000 feet, and the formation extends to depths in excess of 11,000 feet.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing in support of this recommendation demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of the formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Vicksburg Formation in the Portilla (9000') Field as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 31, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-159 (Texas-29) and should give reasons including supporting data for any recommendation. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than January 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by adding subparagraph (155) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(115) through (154) [Reserved]

(155) *Vicksburg Formation in the Portilla (9000') Field in Texas.* RM78-76-159 (Texas-29).

(i) *Delineation of formation.* The Vicksburg Formation in the Portilla (9000') Field is located in the northern portion of San Patricio County, Texas, Railroad Commission District 4, approximately six miles northeast of Sinton, Texas, and underlies 15,000 acres of land bounded by the Chiltipin Creek to the south, U.S. Highway 77 to the west, and the Aransas River to the north. The eastern boundary is a line extending from the Chiltipin Creek on the south to the Aransas River on the north and approximately bisecting the following surveys; Isaac Clover A-89, N. J. Devenny A-105, and Ralph Ellis Hrs. A-115.

(ii) *Depth.* The depth to the top of the Vicksburg Formation in the Portilla (9000') Field varies between 8,600 feet and 9,000 feet and the formation extends to depths in excess of 11,000 feet.

18 CFR Part 271

[Docket No. RM79-76-149 (Texas-3 Addition IV)]

High-Cost Gas Produced From Tight Formations, Texas; Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that an additional area of the Cisco-Canyon Formations located in Glasscock, Reagan, and Sterling Counties, Texas, be designated as tight formations under § 271.703(d).

DATE: Comments on the proposed rule are due on January 31, 1983.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on January 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Walter W. Lawson, (202) 357-8556.

SUPPLEMENTARY INFORMATION:

Issued December 16, 1982.

I. Background

On October 22, 1982, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that an additional area of the Cisco-Canyon Formations located in Glasscock, Reagan, and Sterling Counties, in west Texas, be designated as tight formations. The Commission previously adopted a recommendation

that the Cisco-Canyon Formations encountered in a specified portion of Glasscock County be designated as tight formations. (Order No. 242, issued July 15, 1982, in Docket No. RM79-76 (Texas-3 Addition III)). Pursuant to 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that an additional area of the Cisco-Canyon Formations in Glasscock, Reagan, and Sterling Counties be designated tight formations should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas recommends that the Cisco-Canyon Formations encountered in southeast Glasscock County, southwest Sterling County and northwest Reagan County, in west Texas, Railroad Commission Districts 7C and 8, be designated as tight formations. The area lies to the north and west of the Sallie (Cisco) Field and is an extension of the Cisco-Canyon Formations in Glasscock County in the area of the Conger, S.W. (Penn) Field which have previously been approved. The recommended area includes the following sections: T. & P. RR. Block 33, T-5-S, Sections 34, 36, and the west half of Section 38; T. & P. RR. Block 32, T-5-S, Sections 42 and 46; T. & P. RR. Block 2, Sections 44, 50, 62, 70, 90, 100, 118, 128, 146, 155 and 156; G. C. & S. F. RR., Sections 1 and 3; C. T. & M. C. RR., Section 2; E. L. & RR. Sections 3 and 4; W. R. Barton, Section 4; S. H. Birdwell, Section 17; Brooks & Burleson, Sections 1 and 2; D. L. Carver, Section 4; T. B. Wilson, Section 2; and approximately the south half of the H. T. Tweedle, Section 2 (I. W. Terry Fee).

The depth to the top of the Cisco Formation varies from approximately 8,670 feet on the west part of the area to 7,810 feet on the east. The depth to the top of the Canyon Formation (the base of the Cisco Formation) varies from approximately 8,810 feet on the west to 7,970 feet on the east. Total thickness of the two sandstone formations varies from approximately 200 feet on the west to 430 feet on the east.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formations, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formations is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of these formations will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Cisco-Canyon Formations, as described and delineated in Texas' recommendation as filed with the Commission, be designated as tight formations pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 31, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-149 (Texas-3 Addition IV), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than January 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by revising subparagraph (12)(iii) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(12) *Cisco Sandstone Formation in Texas.* RM79-76-149 (Texas-3 Addition IV).

* * * * *

(iii) *The Cisco-Canyon Formations.*

(A) *Delineation of formation.* The Cisco-Canyon Formations are found in the area of the Conger, S.W. (Penn) Field in Glasscock, Reagan and Sterling Counties, Texas, Railroad Commission Districts 7C and 8. The area includes the following sections: T. & P. RR. Co. Block 33, T-5-S, Sections 34, 36, and W½ of 38; T. & P. RR. Co. Block 32, T-5-S, Sections 40, 41, 42 and 46; T. & P. RR. Co. Block 2, Sections 44, 50, 62, 70, 90, 100, 118, 128, 146, 155 and 156; G. C. & F. RR., Sections 1 and 3; C. T. & M. C. RR., Section 2; E. L. & RR., Sections 3 and 4; W. R. Barton, Section 4; S.H. Birdwell, Section 17; Brooks & Burleson, Sections 1 and 2; D. L. Carver, Section 4; T. B. Wilson, Section 2; and approximately the south half of H. T. Tweedle, Section 2 (I. W. Terry Fee).

(B) *Depth.* The depth to the top of the Cisco Formation varies from approximately 8,670 feet on the west part of the area to 7,810 feet on the east. The depth to the top of the Canyon Formation (the base of the Cisco Formation) varies from approximately 8,810 feet on the west to 7,970 feet on the east. Total thickness of the two formations varies from approximately 200 feet on the west to 430 feet on the east.

High-Cost Gas Produced From Tight Formations; Utah Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR section 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Utah that the Mancos "B" formation be designated as a tight formation under § 271.703(d).

DATES: Comments on the proposed rule are due on January 31, 1983.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for public hearing are due on January 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Victor Zabel, (202) 357-8616.

SUPPLEMENTARY INFORMATION:

Issued December 16, 1982.

I. Background

On November 5, 1982, the State of Utah Board of Oil, Gas and Mining (Utah) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Mancos "B" Formation located in Carbon County, Utah, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Utah's recommendation that the Mancos "B" Formation be designated a tight formation should be adopted. The United States Department of the Interior, Minerals Management Service (formerly the U.S. Geological Survey) concurs with Utah's recommendation. Utah's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended formation is located about 18 miles northeast of Price, Utah, and underlies all of Township 12 South, Range 13 East in Caron County, Utah. The recommended area contains approximately 22,207 acres, of which 76% is federal land, 16% is state land, 8% is fee land.

The Mancos "B" Formation is a distinct lithologic unit within the Mancos Shale. In the recommended area, the Mancos "B" Formation is found at a depth of between 7,000 and 7,800 feet with an average depth to the top of the formation of 7,490 feet. The designated formation varies in thickness from 1,400 feet to 1,600 feet.

III. Discussion of Recommendation

Utah claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. TGF-106 convened by Utah on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c) (2) (i) (B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Utah further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM 80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Utah that the Mancos "B" Formation, as described and delineated in Utah's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E. Washington, D.C. 20426, on or before January 31, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM 79-76-155 (Utah-7), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than January 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432.)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Utah's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by adding subparagraph (151) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(115) through (150) [Reserved]

(151) *Mancos "B" Formation in Utah.* RM79-76-155 (Utah-7).

(i) *Delineation of formation.* The Mancos "B" Formation is located in all

of Township 12 South, Range 13 East, SLM, in Carbon County, Utah.

(ii) *Depth.* The Mancos "B" Formation is a distinct lithologic unit of the Mancos Shale, occurring 200 to 300 feet below the top of the Mancos Formation. The formation varies in thickness from 1,400 to 1,600 feet and is found at an average depth of 7,490 feet.

BILLING CODE 4717-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6470]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below and proposed changes to base flood elevations for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Brian R. Mrazik, Ph.D., National Flood Insurance Program, (202) 287-0230, Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Alabama	City of Anniston, Calhoun County	Cane Creek	Approximately 100 feet downstream of Southern Railway	*670

[Docket No. 21210-254]

Pacific Coast Groundfish Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of proposed inseason adjustment and request for comment.

SUMMARY: This notice proposes an increase in the optimum yield (OY) for sablefish harvested off the coasts of Washington, Oregon, and California in 1982. This action is authorized under the Pacific Coast Groundfish Fishery Management Plan and Federal regulations. The intended effect of this action is to establish a more accurate basis on which to manage the fishery in 1983.

DATE: Comments on this proposed action must be received by January 11, 1983.

ADDRESSES: Send comments to H. A. Larkins, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way N.E., BIN C15700, Seattle, Washington 98115.

FOR FURTHER INFORMATION CONTACT: H. A. Larkins, 206–527–6150.

SUPPLEMENTARY INFORMATION: The Pacific Coast Groundfish Fishery Management Plan (FMP) was approved by the Assistant Administrator for Fisheries, NOAA, on January 4, 1982, and its implementing regulations were published in the **Federal Register** at 47 FR 43974 on October 5, 1982. The regulations at 50 CFR 663.22(b) (47 FR 43978) state that the Secretary of Commerce (Secretary), after receiving a recommendation from the Pacific Fishery Management Council (Council), may increase the numerical OY for a species if he determines that no biological stress would result and that the increase would promote full utilization of the resource. The numerical OY is the maximum amount of a species that may be retained or landed each year from the fishery management area (3–200 nautical miles from shore) and State waters (0–3 nautical miles from shore). The FMP assigns numerical OYs to five species: Pacific whiting, sablefish, Pacific ocean perch, shortbelly rockfish, and widow rockfish. All other species managed under the FMP are in a multispecies complex and do not have individual numerical OY specifications.

In late September 1982, the Council became aware that the OY for sablefish had been reached. The Council directed its Groundfish Management Team (Team) to reevaluate the appropriateness of the sablefish OY because: (1) The harvest of sablefish in 1980 and 1981 was about 8,000 mt below the total OY for the two years, possibly providing additional harvestable fish in 1982; (2) there were indications of a strong 1977 year class that had recently became available to the fishery; (3) signs of stress on the stock had not been identified; (4) it would be premature to close the fishery completely before the accuracy of the OY were verified; and (5) OY is based not only on biological factors but on social and economic factors as well, and closure of the fishery would result in economic hardship for many in the fishing industry.

To ensure that biological stress did not occur before the Team could reevaluate OY, and to avoid premature and perhaps unnecessary closure of the fishery, the Secretary imposed an emergency interim rule placing a 3,000 pound (round weight) trip limit on sablefish after October 27, 1982 (47 FR 49620). This trip limit will be extended by separate **Federal Register** notice through December 31, 1982.

According to the regulations at 50 CFR 663.22(b)(3), the maximum possible increase in OY for sablefish that can be made in 1982 is 4,000 mt, a 30 percent increase over the initial 1982 specification of 13,400 mt.

The regulations at 50 CFR 663.22(b) list biological factors to be considered before increasing OY, and require public input in the determination. The biological factors are to be considered when determining whether the increase

in OY would cause biological stress. No biological information to support a change to the maximum sustainable yield (MSY) and 1982 acceptable biological catch (ABC) estimates of 13,400 mt was available. Although projected catches to the end of 1982 are over 21,000 mt, the Team was unable to document signs of biological stress at the levels of sablefish fishing experienced in 1982. The proposed increase is not expected to impact the OY for other species. The Council's Scientific and Statistical Committee and Groundfish Advisory Subpanel favored increasing the 1982 OY to 17,400 mt to avoid unnecessary economic hardship for the fishing industry. A public hearing was held in conjunction with the November 17–18, 1982, Council meeting. Most of the public testimony requested increasing the 1982 sablefish OY by 30 percent and maintaining the increase for the initial 1983 OY. (Such an action would allow the OY to be increased an additional 30 percent in 1983 if conditions warrant). After considering all comments, the Council recommended that the 1982 OY for sablefish should be increased to 17,400, mt, based solely on social and economic factors.

The Secretary has considered the sparse information available and the factors listed at 50 CFR 663.22(b)(i)-(vi) and has determined that a 30 percent increase in the 1982 OY estimate for sablefish from 13,400 mt to 17,400 mt will not cause biological stress to that or any other species and that such action would promote full utilization of the resource. He, therefore, proposes to increase the 1982 OY for sablefish to 17,400 mt.

Lists of Subjects in 50 CFR Part 663

Fish, Fisheries, Fishing.

This action is taken under the authority of 50 CFR 663.22, is in compliance with Executive Order 12291, and is covered by the Regulatory Flexibility Analysis prepared for the authorizing regulations and by the Final Environmental Impact Statement (filed with the Environmental Protection Agency) for the FMP.

(16 U.S.C. 1801 *et seq.*)

Dated: December 17, 1982.

Joseph W. Angelovic,

Acting Deputy Assistant Administrator for Science and Technology, National Marine Fisheries Service.

Notices

Federal Register
Vol. 47, No. 246
Wednesday, December 22, 1982

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 17, 1982.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listing should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Richard J. Schrimper, Statistical Clearance Officer, (202) 447–6201.

ARCHITECTURAL AND TRANSPORTATION

Barriers Compliance Board; Meeting

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of ATBCB Meeting.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (ATBCB) has scheduled a meeting to be held from 1:00 PM to 5:00 PM, Tuesday, January 11, 1983, to take place in the Main Hall of the Disabled American Veterans (DAV) National Service and Legislative Headquarters, 807 Maine Avenue, SW., Washington, D.C. 20024. Items to be considered are as follows: Discussion on the utilization of ATBCB discretionary funds in FY 1983; proposed transfer of ATBCB administrative support services from Departemnt of Education to GSA; discussion of exploration of long-term ATBCB objective.

DATE: January 11, 1983, 1:00 PM–5:00 PM.

ADDRESS: Main Hall, Disabled American Veterans (DAV) National Service and Legislative Headquarters, 809 Maine Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Larry Allison, Director of Public Information (202) 245–1591 (voice or TDD).

Committee meetings of the ATBCB will be held on Monday, January 10, 1983, in the Hubert Humphrey Building. Contact Larry Allison, Director of Public Information (202) 245–1591 (voice or TDD), for further information.

Wm. Bradford Reynolds,
Chairperson.

DEPARTMENT OF COMMERCE

Bureau of the Census

Annual Survey of Retail Sales and Inventories; Determination

In accordance with title 13, United States Code, sections 182, 224, and 225, and due Notice of Consideration having been published November 9, 1982 (47 FR 50732), I have determined that certain 1982 annual data for retail trade are needed to provide a sound statistical basis for the formation of policy by various governmental agencies and that these data are also applicable to a variety of public and business needs. This annual survey is a continuation of similar surveys conducted each year since 1951 (except 1954). It provides, on a comparable classification basis, annual sales and accounts receivable balances for 1982 and year-end inventories for 1981 and 1982. These data are not publicly available on a timely basis from nongovernmental or other governmental sources.

Reports will be required from a selected sample of firms operating retail establishments in the United States, with probability of selection based on sales size. The sample will provide, with measurable reliability, statistics on the subjects specified above.

Report forms will be furnished to the firms covered by the survey and will be due 20 days after receipt. Copies of the forms are available upon written request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed that an annual survey be conducted for the purpose of collecting these data.

Dated: December 16, 1982.

Bruce Chapman,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

Annual Wholesale Trade; Determination

In accordance with title 13, United States Code, sections 182, 224, and 225, and due Notice of Consideration having been published November 12, 1982 (47 FR 51176), I have determined that data covering year-end inventories and annual sales are needed to provide a sound statistical basis for the formation of policy by various governmental agencies and that these data are also applicable to a variety of public and business needs. This annual survey is a continuation of similar surveys conducted each year since 1978. It provides, on a comparable classification basis, annual sales for 1982 and year-end inventories for 1981 and 1982. These data are not publicly available on a timely basis from nongovernmental or other governmental sources.

Reports will be required from a selected sample of firms operating merchant wholesale establishments in the United States, with probability of selection based on sales size. The sample will provide, with measurable reliability, statistics on the subjects specified above.

Report forms will be furnished to the firms covered by the survey and will be due 20 days after receipt. Copies of the forms are available upon written request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed that this annual survey be conducted for the purpose of collecting these data.

Dated: December 16, 1982.

Bruce Chapman,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

International Trade Administration

Semiconductor Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Semiconductor Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to semiconductors, or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States established or in which it participates including proposed revisions of any such controls.

TIME AND PLACE: January 18, 1983 at 9:30 a.m. The meeting will take place at the Main Commerce Building, Room 5230, 14th Street and Constitution Ave., NW., Washington, D.C.

AGENDA: General Session:

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Update of the COCOM schedule for the list review.

(4) Subcommittee reports:

a. Discrete Semiconductor Device,

b. Microcircuits, and

c. Semiconductor Manufacturing Materials and Equipment.

(5) Election of chairman.

(6) New business; Executive Session.

(7) Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PUBLIC PARTICIPATION: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federally Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone: 202-377-4217.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: 202-377-2583.

Dated: December 14, 1982.

John K. Boidock,

Director, Office of Export Administration.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council's Scientific and Statistical Committee and Advisory Panel; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Caribbean Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94-265), has established a Scientific and Statistical Committee and an Advisory Panel, which will meet jointly to examine and provide recommendations on the policy to be adopted by the Council on potential sites for marine sanctuaries in Puerto Rico and the U.S. Virgin Islands; on the evaluation of area closures as a management tool in the Caribbean fishery conservation zone, and to discuss other related business.

DATE: The public meeting will convene on Tuesday, January 18, 1983, at approximately 9:30 a.m., and will adjourn at approximately 3:30 p.m., and will take place at the Federal Building, Room 327, Carlos Chardon Avenue, Hato Rey, Puerto Rico.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, Suite 1108, Banco de Ponce Building, Hato Rey, Puerto Rico 00918; Telephone: (809) 753-4926.

Dated: December 17, 1982.

Joe P. Clem,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510-22-M

University of California; Issuance of Permit

On November 8, 1982, Notice was published in the **Federal Register** (47 FR 50540), that an application had been filed with the National Marine Fisheries Service by Ms. Susan Shane, Biology-Applied Sciences Bldg., University of California, Santa Cruz, California 95064, for a permit to take by harassment up to 2,000 Pacific pilot whales over a three year period for the purpose of scientific research.

Notice is hereby given that on December 16, 1982, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a permit for the above taking subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: December 16, 1982.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Wometco Miami Seaquarium; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: Wometco Miami Seaquarium, 4400 Rickenbacker Causeway, Miami, Florida 33149.
2. Type of Permit: Public Display.
3. Name and Number of Animals: Atlantic bottlenose dolphins (Tursiops truncatus) (6).
4. Type of Take: To take for permanent maintenance.
5. Location of Activity: Indian River, Florida.
6. Period of Activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington D.C.; and

Regional Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: December 17, 1982.

R. B. Brumstead,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishing Import Restraint Levels for Certain Cotton, Wool, and Man-Made Fiber Textile Products From Taiwan Under a New Agreement, Effective on January 1, 1983

December 16, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing the import restraint levels for certain cotton, wool, and man-made fiber textile and apparel products, produced or manufactured in Taiwan and exported during the twelve-month period beginning on January 1, 1983 and extending through December 31, 1983, under a new agreement.

SUMMARY: On November 18, 1982 representatives of the American Institute in Taiwan and the Coordination Council for North American Affairs signed an agreement concerning cotton, wool, and man-made fiber textile products, produced or manufactured in Taiwan, and exported during the six year period beginning on January 1, 1982 and extending through December 31, 1987. The new agreement establishes specific ceilings, among other categories, for Categories 313, 331, 333/334, 335, 337, 338/339, 340, 341, 347/348, 353/354/653/654, 435, 445/446, 604, 633/634/635, 638, 639, 640, 641, 645/646, 647, 648, and 659 for the agreement year beginning on January 1, 1983. Accordingly, there is published below a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton, wool, and man-made fiber textile products in the foregoing categories be limited to the designated amounts during the agreement year which begins on January 1, 1983. In accordance with the flexibility provisions of the new agreement the base levels for Categories 633/634/635, 640, 645/646, and 659 have been adjusted to include swing.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), May 13, 1982 (47 FR 20654), and November 24, 1982 (47 FR 53091).)

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and

Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 16, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the bilateral textile agreement of November 18, 1982, concerning cotton, wool, and man-made fiber textile products from Taiwan; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1983 and for the twelve-month period extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, and man-made fiber textile products in the following categories, produced or manufactured in Taiwan, in excess of the indicated levels of restraint:

Category	12-mo level of restraint
313	42,875,872 square yards.
331	473,006 dozen pairs.
333/334	61,870 dozen.
335	73,988 dozen.
337	131,067 dozen.
338/339	559,411 dozen.
340	644,548 dozen.
341	373,366 dozen.
347/348	909,085 dozen of which not more than 446,481 dozen shall be in Cat. 347 and not more than 720,783 dozen shall be in Cat. 348.
353/354/653/654	219,406 dozen.
435	19,616 dozen.
445/446	126,286 dozen.
604	461,340 pounds.
633/634/635	1,506,746 dozen of which not more than 993,723 dozen shall be in Cat. 633/634 and not more than 739,034 dozen shall be in Cat. 635.
638	1,626,644 dozen.
639	5,033,179 dozen.
640	3,254,255 dozen.
641	703,726 dozen.
645/646	3,966,756 dozen.
647	2,378,621 dozen.
648	3,089,650 dozen.
659 pt.[1]	3,340,838 pounds.
659 pt.[2]	1,725,500 pounds.

[1] In Category 659, only T.S.U.S.A. numbers 703.0500 and 703.1000.
[2] In Category 659, only T.S.U.S.A. number 703.1515.

In carrying out this directive entries of textile products in the foregoing categories, except Categories 313 and 337, which have been exported to the United States on and after January 1, 1982 and extending through December 31, 1982, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during that twelve-month period. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter. Entries of textile products in Categories 313 and 337, which have been exported before January 1, 1983 shall not be subject to this directive.

Except as already adjusted, the levels of restraint set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of November 18, 1982, which provide, in part, that: (1) specific limits or sublimits may be exceeded by certain designated percentages, provided a corresponding reduction in equivalent square yards is made in one or more specific limits or sublimits during the same agreement year; (2) certain specific limits and sublimits may be increased for carryforward; (3) special shift may be applied to certain categories, provided an equivalent quantity in square yards equivalent is deducted from designated categories; and (4) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement, referred to above, will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), May 13, 1982 (47 FR 20654), and November 24, 1982 (47 FR 53091).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the authorities in Taiwan and with respect to imports of cotton, wool, and man made fiber textile products from Taiwan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Corps of Engineers; Department of the Army

Intent To Prepare a Regulatory Action Draft Environmental Impact Statement (DEIS) for the Duck Island/ Sagavanirktok River Delta Development Project, Prudhoe Bay, Alaska

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS)

SUMMARY: 1. The proposed action contemplates issuance of a permit to the SOHIO Alaska Petroleum Company and the EXXON Corporation for the Duck Island/Sagavanirktok (Sag) Delta Development Project located offshore of the North Slope Borough, Alaska. The project is related to society's need for energy and is proposed to recover oil and gas of the Endicott Reservoir by facilities located on manmade gravel islands. The proposed project includes:

a. Construction in the Beaufort Sea (Arctic Ocean) of a combined production and drilling island, two satellite drilling islands, and, should secondary recovery be found to be feasible, a waterflood island.

b. Construction of buried pipeline between islands for produced fluids, injection water, artifical lift gas, and fuel.

c. Construction of buried pipelines for sales of oil and gas between the production island and the Trans-Alaska Pipeline System (TAPS). Two pipeline alternatives are being considered, construction of a causeway connecting the production island with the shore, or pipeline burial in subsea trenches.

d. Construction of facilities to generate electrical power, both centralized on the production island and localized on each island

e. Placement of cables between islands for electrical power distribution.

f. Construction of roads, distribution

pipelines, and fuel and utility systems.

2. Alternatives include no action; meeting society's energy need by other means; issuing a permit with certain conditions; alternative locations for drilling and production; alternative plan variations relating to roads, pipelines, structures, construction techniques, gravel sources, intake/discharge structures, treatment plant processes, and air quality control techniques.

3. The scope of the DEIS will be determined by encouraging and seeking the involvement of individuals; organized groups; the Inupiat Eskimos; local, State, and Federal agencies; and expert opinion from other sources. These and other interested parties are invited to actively participate in the scoping process by expressing ideas and concerns related to the proposed action.

Issues to be analyzed indepth include effects on wetland values, biological resources of aquatic systems, water quality, wildlife, air quality, human dependence and use of affected resources, and the cumulative impact of continued oil and gas development on the North Slope, Alaska. Possible cooperating agencies (as defined by current Federal guidelines) include the U.S. Environmental Protection Agency (EPA), the U.S. Fish and Wildlife Service, and other agencies of the Department of the Interior. In addition to preparation of the environmental impact statement and involvement in the Corps of Engineers permit process, the project will require permits from EPA and various local and state bodies.

4. An initial scoping meeting to provide an opportunity for public involvement will be held on 18 January 1983 in Anchorage, Alaska. The time and location have not yet been established. There will be additional scoping meetings to follow, times have yet to be determined. Written comments regarding the scope of the DEIS are welcomed

5. The DEIS is estimated to be available for public review in October 1983.

ADDRESS: Questions about the proposed action and the DEIS can be answered by: William D. Lloyd, Chief, Environmental Resources Section, Alaska District, Corps of Engineers, P.O. Box 7002, Anchorage, Alaska 99510

Dated: December 8, 1982.

Neil E. Saling,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 82-34625 Filed 12-21-82; 8:45 am]

BILLING CODE 3710-NL-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Sand Island Shore Protection Study

December 10, 1982.

AGENCY: Army Corps of Engineers, Honolulu District, DOD.

ACTION: Notice of intent to prepare draft environmental impact statement.

SUMMARY: 1. The U.S. Army Engineer District, Honolulu, is studying the feasibility of providing shore protection for Sand Island on Oahu, Hawaii.

2. The study is investigating the possibility of using detached breakwaters and/or an ungrouted riprap revetment to provide the protection.

3. The corps held a workshop in November 1982 in Honolulu with the State of Hawaii, Parks Division, and interested local citizens. Local interest groups, private organizations and parties, and Federal, State and County of Hawaii agencies will again be contacted during the course of the study. At this time, the DEIS will address the effects of the improvements on fish and wildlife resoures, historic sites, water resources, parks and social considerations identified by local residents at the public workshops. The U.S. Fish and Wildlife Service will provide their opinion of the project effects on fish and wildlife resources for inclusion in the DEIS. Consultation with the U.S. Advisory Council on Historic Preservation, National Park Service, State Historic Preservation Officer, State Department of Health, U.S. Environmental Protection Agency, National Marine Fisheries Service, State Harbor Division, and State Department of Parks, and the County Department of Parks and Recreation will be completed during the study as appropriate.

4. A scoping meeting is not planned at this time.

5. The DEIS will be made available for public review about April 1983.

ADDRESS: Questions about the proposed action and DEIS can be answered by: Mr. Warren Kanai, Project Manager, U.S. Army Engineer District, Honolulu, Building T-1, Fort Shafter, HI 96858; telephone (808) 438-2240.

Alfred J. Thiede,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-NN-M

Department of the Navy

Permanent Disposal of Decommissioned, Defueled Naval Submarine Reactor Plants; Public Hearings and the Availability of Draft Environmental Impact Statement

The Department of the Navy has prepared a draft environmental impact statement (EIS) to assess the environmental implications of alternatives that could be used to permanently dispose of decommissioned, defueled naval submarine reactor plants.

The proposed action is to evaluate the two basic alternatives for the permanent disposal of decommissioned, defueled submarine reactor plants—either land or sea. The Navy has made no decision to dispose of any nuclear-powered ships at this time. However, with over 100 nuclear-powered submarines in operation, the Navy is faced with eventual decommissioning of these ships at a future rate of possibly 3 or 4 per year over the next 30 years, and a permanent means of disposal must be developed that is environmentally acceptable. Following decommissioning, the submarines do not contain nuclear fuel, transuranic elements, or high level radioactive material. They will, however, contain low-level radioactivity resulting from the operation of the reactors while the submarines were in commission.

The two basic alternatives for permanent disposal are land disposal and sea disposal. Permanent disposal can be achieved by removal of the submarine compartment that contains the defueled reactor, followed by shipment of the compartment by barge and overland transporter to either of two accessible Federal land burial sites currently used by the Department of Energy for burial of low-level radioactive waste. These sites are in South Carolina (Savannah River Plant) and Washington State (Hanford Site). Radiation levels associated with the entire operation would meet applicable requirements of the Department of Transportation, Nuclear Regulatory Commission, and Department of Energy for transportation and disposal of solid low-level radioactivity. Alternatively, permanent disposal of the defueled submarine reactor plants could be achieved by sinking the defueled, decommissioned submarine in deep water locations that would be designated by the United States Environmental Protection Agency.

An alternative for temporary disposition of these defueled submarine

reactor plants would be the placement of each submarine in protective storage in a Navy facility for an extended period. This would allow radioactive material to decay under controlled conditions without release to the environment. However, this alternative would lead to other impacts and only postpone the decision for ultimate disposal, requiring the decision to be made sometime in the future. For this reason, this alternative is regarded as the no-action alternative. No other practical alternatives are known to exist for the final disposition of the reactor plants.

Impacts assessed for each disposal alternative include expected commitment of resources, land use, transportation requirements, and environmental consequences, including occupational radiation exposure due to disposal activities, and possible radiation exposure to the public during transportation and disposal. The impact of radioactivity releases due to unexpected occurrences is also assessed. For each alternative considered, an assessment is made of the impact on the environment in the vicinity of disposal sites. The draft EIS also includes a cost analysis of the disposal alternatives.

In accordance with the Council on Environmental Quality regulations for compliance with the National Environmental Policy Act (NEPA) (40 CFR Part 1501), the Department of the Navy is serving as the lead agency for preparation of the EIS. The Department of Energy (DOE) is participating as a cooperating agency with regard to the alternative of land disposal at DOE burial sites. By participating as a cooperating agency, DOE obligations under NEPA are fulfilled and no separate DOE EIS is required.

Copies of the draft EIS have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality regulations. Copies have also been sent to interested organizations and individuals, including those who requested copies in their response to the Navy's solicitation of comments or suggestions on the scope of the planned environmental statement, which was published in the Federal Register on January 14, 1982.

Single copies of the draft EIS may be obtained by writing to: Captain Edward F. Wagner, U.S. Navy, Office of the Chief of Naval Operations (OPNAV–22), Department of the Navy, Washington, D.C. 20350, Telephone (202) 697–1961.

The draft EIS may also be reviewed at the locations identified in this notice. The locations selected include public libraries in the county seats of all counties on the U.S. west coast. Locations were not selected in every county on the U.S. east coast because of the large number of counties and the short distance between county seats in some cases. Therefore, public libraries were selected in these locations such that any person would only have to travel a short distance to review the draft EIS. The draft EIS will be available in public libraries in all counties which surround the Federal land burial sites in South Carolina (Savannah River Plant) and Washington State (Hanford Site). The draft EIS will also be available at several locations in each State capitol where public hearings will be held.

Interested agencies, organizations, and the general public desiring to submit comments on the draft EIS are invited to do so. Comments on the draft EIS will be considered in preparing the final EIS.

Written comments on the draft EIS may be submitted to: Captain Edward F. Wagner, U.S. Navy, Office of the Chief of Naval Operations (OPNAV–22), Department of the Navy, Washington, D.C. 20350, Telephone (202) 697–1961.

Written comments should be received on or before March 31, 1983, in order to be incorporated into the final EIS. Responses to all substantive comments will be published in the final EIS.

Public hearings will be held during the comment period to afford members of the public an opportunity to present their views on the basic alternatives. These hearings will be held at the following locations:

1. February 14, 1983, in three sessions, the first commencing at 9:00 a.m., the second commencing at 1:30 p.m., and the third commencing at 7:30 p.m. in the North Carolina Department of Transportation Auditorium, Wilmington and Morgan Streets, Raleigh, North Carolina.

2. February 17, 1983, in three sessions, the first commencing at 9:00 a.m., the second commencing at 1:30 p.m., and the third commencing at 7:30 p.m. in the University of South Carolina Wade Hampton Conference Center, Main and Gervais Streets, Columbia, South Carolina.

3. February 22, 1983, in three sessions, the first commencing at 9:00 a.m., the second commencing at 1:30 p.m., and the third commencing at 7:30 p.m. in the State of Washington Department of General Administration, Office Building #2 auditorium, 218 General Administration Building, Olympia, Washington.

4. February 24, 1983, in three sessions, the first commencing at 9:00 a.m., the second commencing at 1:30 p.m., and the third commencing at 7:30 p.m. in the California Water Resources Building, 1416 Main Street, Sacramento, California.

The hearings will be conducted by a Navy Hearing Officer. The hearings will be informal, neither evidential nor judicial in nature, and there will be no cross-examination of witnesses. All persons who give testimony or ask questions are requested to address themselves to the Hearing Officer. Individual speakers are requested to limit their testimony to five minutes each, and organizational spokesmen will have ten minutes each to summarize and present their views. Organizations desiring to make a formal presentation in excess of ten minutes may do so if specific arrangements have been made with the Hearing Officer in advance. All testimony will be recorded.

Individuals and organizations wishing to submit written statements to be included in the hearing record may either present such statements to the hearing Officer at the hearing or mail the statements to Captain Wagner at the above address.

Locations Where Draft EIS Is Available for Review

BILLING CODE 3810–AE–M

Relocation of Navy Personnel From Leased Space to Government-Owned Office Space, Washington, D.C.; Public Hearings and Availability of Draft Environmental Impact Statement

Notice is hereby given that two public hearings will be held for the purpose of receiving oral and written comments concerning the Draft Environmental Impact Statement (DEIS) on the potential consolidation of Navy administrative offices now located in leased buildings in the Washington, D.C., area. Potentially affected by this consolidation are approximately 18,000 Navy military and civilian employees now working at thirteen locations in the District of Columbia, Maryland, and Virginia, with the greatest number in the northern Virginia suburbs of Washington.

The DEIS documents the impact of implementing the consolidation at each of four alternative sites: (1) The Washington Navy Yard/Southeast Federal Center tract in southeast Washington, D.C.; (2) the Naval Surface

Weapons Center at White Oak, Maryland; (3) the Pentagon site in Arlington, Virginia; and (4) the Crystal City complex of buildings, also in Arlington, Virginia.

The public hearings will be held on January 18, 1983, at 7:00 p.m., at the Aurora Hills Recreation Center, 735 South Hayes Street (South Hayes at 18th Street, near Crystal City), Arlington, Virginia, and on January 19, 1983, at 7:00 p.m., in Room 201, Building 172, the Washington Navy Yard, Washington, D.C. (gate guards will direct visitors to Building 172 at the Navy Yard).

At the hearings, a short presentation will be given describing the consolidation, and summarizing the major impacts associated with the alternative consolidation sites. After the presentation, there will be an opportunity for public and agency comment. Persons wishing to speak at the hearings may register by contacting EDAW, Inc., Attention: Tony Duncanson, 601 Prince Street, Alexandria, Virginia 22314, telephone 836–1414. Speakers may also register on the evening of either hearing by completing a registration card at the door. Oral statements at the hearings will be limited to five minutes. Lengthy comments should be submitted in writing and summarized orally. Only registered speakers will be recognized. Written comments are not required, but are encouraged to ensure accuracy. Written comments will be accepted at the hearings, or at the above address during normal business hours before or after the hearings, through January 24, 1983.

To facilitate public review, copies of the DEIS have been placed in a number of public libraries in the Washington, D.C. area. Persons wishing to examine a copy at one of these locations may contact EDAW, Inc., at the above address and telephone number for the name and location of the nearest public library at which copies of the DEIS have been placed.

Dated: December 17, 1982.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.
